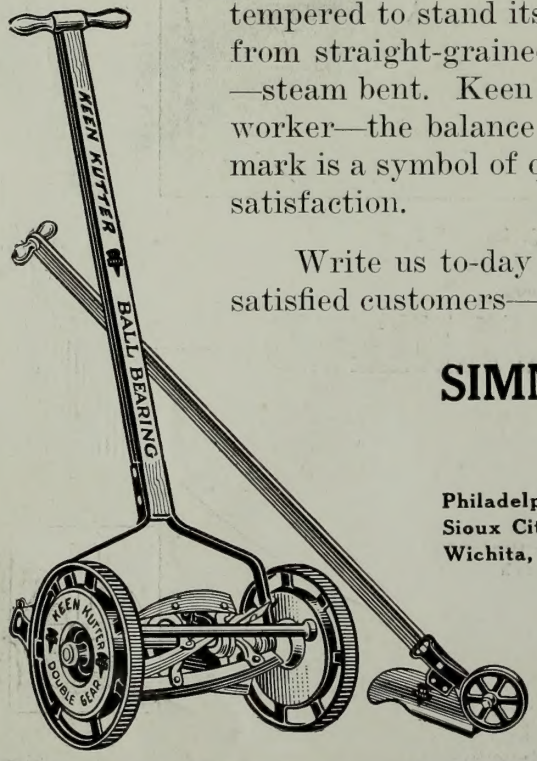
KEEN KUTTER
TRADE MARK REG. CUTLERY AND TOOLS U. S. PAT. OFF.

MAKE MONEY ON GARDEN TOOLS

This is the time to look over your stock of Garden Tools, such as spades, rakes, hoes, grass scythes, lawn mowers, lawn trimmers, hay forks, etc., and see if you are in position to meet the demand for this class of goods.



Also look back to last year's sales and find out if your profit on Garden Tools was as good as it should have been, and if the quality of the goods you sold proved satisfactory to your customers, or did you have come-backs or defective goods.

KEEN KUTTER QUALITY TOOLS

are made of the highest grade steel, and each tool is accurately tempered to stand its required work. The handles are fashioned from straight-grained lumber, and bent handles are **really** bent —steam bent. Keen Kutter tools are made to work **with** the worker—the balance is perfect. The famous Keen Kutter trade mark is a symbol of quality and is a lasting guarantee of absolute satisfaction.

Write us to-day and let us tell you how you can have **more** satisfied customers—and best of all—**satisfactory profits.**

TRI-ANGLE CHICKEN COOP

and take orders for Spring Delivery

Tri-Angle coops **cut chicken loss 80 per cent.** because they are sanitary and rat and weasel-proof.

They are convenient and easy to keep clean, and the price compares favorably with any other coop on the market.

Send $2.00 to Henderson & Richardson for Full Size Coop. We positively guarantee satisfaction.

Canadian Agents:

Henderson & Richardson

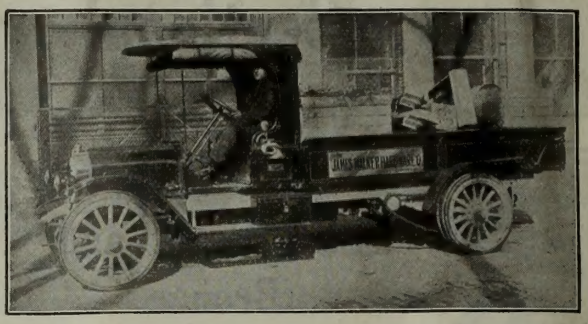
MONTREAL

Manufactured by

The TRI-ANGLE MFG. CO., Freeport, Ill.

This tool will drive a 5/8 in. hole into white pine or 3/8 in. into any grade of wood easier and quicker than a bit brace, and it gets into tight corners where you can't use a brace. One thrust of the plunger means three revolutions of the bit.

It will take any tool you can put into a brace. Great for driving large screws, tapping small nuts, or running them up on bolts. Takes very little room in the carpenter's tool box.



Display them in your window with a set of Boosters and Show Cards, which we will be happy to send you upon request. Shall we send you a supply of "Yankee" Tool Circulars with your name and address? Command us. Your Jobber sells the "Yankee."

Every mechanic will be quick to recognize the value of this "YANKEE" No. 75

What Motor Trucks Can Do For The Hardware Dealer

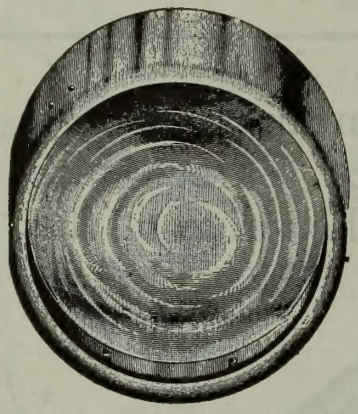
Mack Truck used by The James Walker Hdw. Co. Hardware Dealers, Montreal.

The motor truck will enable you to deliver goods over a much larger area than is possible with horse and wagon. Expanding your area expands your business.

A large number of your orders are received over the telephone. With the motor truck these orders can be given prompt attention and sent out C.O.D. Your customers will appreciate this ready service.

The motor truck will enable you to send to the wholesale house for goods that are wanted in a hurry and which are needed before the wholesaler can make delivery.

The motor truck will not require your attention on Sundays or holidays.



We are sales agents for the leading gasoline motor truck of the world—MACK.

Let us make a study of your business and recommend the kind of truck you should have, type of body, capacity, etc. If, after an investigation, we find it would not be profitable for you to operate a truck, we will not attempt to sell you one. Give us a chance to tell you about the Mack.

Ask us for Facts and Figures.

MILK CAN TRIMMINGS

COMPLETE SETS.

Comprising one broad hoop roll-rim bottom, concave pattern; body hoop 6 inches wide, 20 gauge; top hoop 4 inches wide, 14 gauge; one cover; one pair malleable side handles; one pair steel top handles. If wanted with malleable top handles, 7 cts. per set extra list.

COMPLETE SETS.

Gallons	10	15	20	25	30	40
Case lots, sets	6	6	6	6	6	6

The roll-rim has no sharp turns, therefore the grain of the metal is not broken, and having a broad wearing surface on the bottom it cannot damage floors. Ample space is left between the bottom and the hoop for the insertion of the body of the can. It is the neatest and strongest in appearance and is supplied with concave bottoms. By examining the cut anyone can readily see that this style of construction makes it the strongest bottom ever produced. They do not cost any more than inferior bottoms. If you want to keep ahead of your competitors use S.M.P. Roll-rim Milk Can Bottoms.

Tipped Pattern in Torsil Metal

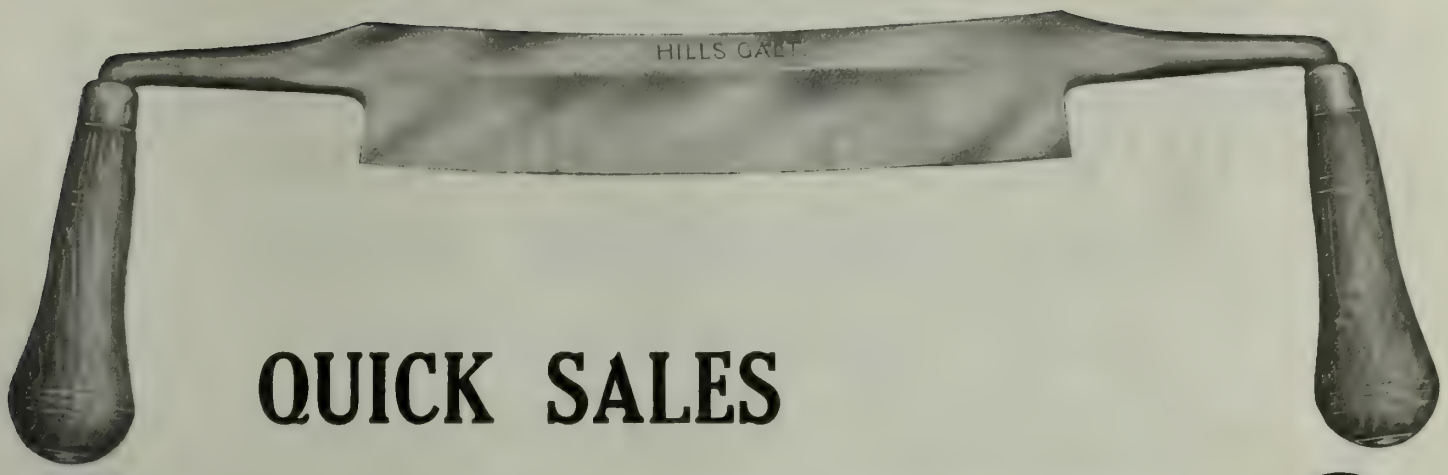
Spoons and Forks made of Torsil Metal are guaranteed solid metal throughout. Torsil Metal is a solid White Metal, combining durability and strength, no coating to wear off, will not rust, for hard usage will give perfect satisfaction.

For hotels, restaurants and family use, where customer does not wish to go to the expense of plated goods, Torsil Metal is without a parallel.

As there is no Plate to wear off, any Silver Powder, Chalk or Electroine can be used to clean them; the more they are cleaned the whiter and more beautiful they become.

	Light Weight	Heavy Weight
Teaspoons, small, per dozen	$ .78	....
Teaspoons, medium, per dozen	.96	$1.60
Teaspoons, large, per dozen	1.16	2.00
Dessert spoons, per dozen	2.22	3.00
Table spoons, per dozen	2.70	3.50
Dessert forks, per dozen	2.22	3.00
Medium forks, per dozen	2.70	3.50

Special trade discount off above prices quoted on application.



Torsil Metal Spoons and Forks are tied up in sets of six, packed one dozen in an olive green box and nicely labelled.

If you cannot buy this line from your jobber write us direct for our prices and a sample spoon; the sample spoon will not cost you anything, and we would like you to try it with a file and see how hard it is, and generally to compare it with any other similar line that you may be now handling.

Starrett

Your Pride—and Ours

A Little New Year's Talk.

Just at the new year it will do us all good to sit down and think—think of what we did last year and what we will do this year.

Take your own case. Are you proud of the way you handled your business problems?—did you get the salary increase you wanted?—did you successfully carry increased responsibility?

Now, either you *are* proud of what you accomplished and can look forward to a new year feeling competent to meet it, or else you feel that you have *not* accomplished your best and will use the new year as a fresh opportunity to play life's game, so that you will be proud of it.

Unless you *are* proud of what you did last year or are anxious *to be* proud of your showing for the new year, you are driftwood — you have lost your grasp on living — you are just existing.

Of our own work last year we are frank to say we are proud. We did more business, invented new tools, and perfected old ones, built additions to our plant, and we still more firmly secured the loyalty of all our workers who keep the wheels turning. This year we want to beat all records—more business, new tools, more buildings, and we want to continue our perfect relations with all our employees. We feel that only by keeping our ideals high and by hustling can we maintain our reputation as the World's Greatest Tool Makers.

Our purpose in talking ambitions or ideals with you instead of micrometers and surface gauges is this: If you are anxious to make more sales and win more loyal customers, you can do it only by selling reliable goods having wide sales possibilities. We want you to feel and to know how superior Starrett tools and hack saws are and how many sales chances there are for them. They are mechanically perfect in accuracy. They are designed for widest range of service, and they are made to last. Let all of us who take pride in our work, pull together for greater sales. Here's hoping we can help each other to be proud of 1914.

The World's Greatest Tool Makers

Steel without Copper (black—uncoated) Same Steel with Copper (black—uncoated)

HERE IS THE PROOF

That COPPER BEARING STEEL is more durable for Roofing Purposes

The above illustration shows the result of actual exposure to the weather. A series of similar tests all prove conclusively that **Copper Bearing Steel** is more durable for roofing purposes than ordinary steel or so-called "pure iron." Copper Bearing Steel can be supplied in both Black and Galvanized Sheets at but slight increase in cost over ordinary steel.

Send for our booklet giving photographic illustrations of actual tests; you will find it very interesting.

LANDERS, FRARY & CLARK, NEW BRITAIN, CONN., U.S.A.

"What is the amount of my bill, please?"

Your best customers often ask this question—your "slow-pay" customers are not interested enough.

You've provided some things for the convenience of customers purchasing—more than likely an excellent telephone service. But, have you a system that makes it easy for you to keep account of their purchases—that provides a statement of account with each purchase—that keeps you and your customers aware of the amount of their bills?

The Barr Account Register System

means a combination of these things—means that when you issue your counter check you have a complete statement of account to date—your customer has a chance to keep within the credit limits—your bookkeeping is finished.

Built in floor cabinet style, combining desk, credit register and filing cabinet, for any number of accounts, or in the smaller counter style for the smaller credit business, the Barr Account Register is a time, labor and money saver—money saver because you know when to limit the credit of your customers.

Write today for information and demonstration that await your request.

BARR REGISTERS LIMITED

TRENTON, ONTARIO

Great Britain—Head Offices—Dacre House, No. 5, Arundel Street, Strand, London, W. C.—Factory, Birmingham.

SPECIAL NOTICE

The Barr Register is a bona fide Canadian invention, fully protected by valid patents. There is not and never has been any legal proceedings against above patents, notwithstanding all competitors' talk to the contrary. We make this announcement as we understand that some merchants have been imposed upon and induced to buy other account registers through such talk.

There's Business as well as Birds in the Air

With the big and profitable crops harvested and with money a-plenty in their pockets, the farmers, their boys and their helpers are planning for a bout of sport. As a class, recreation and sport to them means hunting. Their hunting means new guns and supplies of cartridges and loaded shells. They want the best, so be prepared to supply them with

WINCHESTER

Rifles, Shotguns and Ammunition

the ready-selling, satisfactory line. Winchester guns and Winchester make of ammunition are favorably known and in general use the world over. The demand for them in the Dominion is bigger than ever and still growing. The advertising behind the **W** line was planned to help retailers and it is doing it. To get your share of the business it is creating, stock Winchester guns and Winchester make of ammunition, let it be known that you do, and the results, both in volume of sales and amount of profit per sale, will satisfy you.

When ordering, specify the **W** Brand.

WINCHESTER REPEATING ARMS COMPANY

New Haven, Conn., U.S.A.

THE CAPACITY OF OUR OUTPUT OF OUR

New Famous Oil Heaters

HAS BEEN STRAINED TO THE UTMOST

We fully anticipated that the demand would be exceptional and were gratified to find that customers appreciated the new features embodied in the Heater.

Take the one piece Copper Tank—it's the only Copper Tank manufactured and is fully guaranteed to resist the corrosive action of coal oil. A welcome feature for housewives.

The easy simple new method of replacing the wick has finally removed the long standing complaint of considerable inconvenience and annoyance when performing this operation.

The automatic locking device prevents the wick from slipping—an invaluable feature.

The oil indicator shows the exact amount of oil in tank.

Get More Business

Reminding a man of something he needs at the right moment has produced many sales. You cannot always guess the right thing to suggest, but attractive "hangers" placed in conspicuous places about your store act like memorandum pages from your customer's note book.

A tool he has in mind, shown in an attractive manner in its natural colors and backed by the name of a well-known maker will frequently cause an inquiry that enables you to close an additional sale.

This set of five new, brilliantly colored signs will be sent free of charge to any dealer who will write for them. They can be used as hangers around the store, or in the dressing of your windows. In either case they catch the customer's eye and increase your sales.

Send a letter to-day—you should have these business boosters.

Order an assortment from your jobber now and get this business in your community.

It will pay you and every heater you sell makes a permanent winter market for you on the Clark Carbon fuel.

Write for our 1914 catalogue. It's a beauty.

Clark Carbon

Ignites Easiest
Heats Strongest
Lasts Longest

of all Heater Fuels.

It's the kind that always comes awfully good.

There is no come back
It always makes good

Chicago Flexible Shaft Co.

250 Ontario St., Chicago

WE TAKE THIS OPPORTUNITY TO EXTEND A HEARTY NEW YEAR'S GREETING TO THE TRADE, HOPING THAT THEIR MEASURE OF PROSPERITY AND HAPPINESS FOR 1914 WILL EXCEED ANY THEY HAVE BEFORE ENJOYED, AND TO THANK THEM FOR THEIR PAST PATRONAGE.

Thanks to the loyal co-operation of our customers, we can say we have just closed one of the largest year's business in our history in spite of the many disturbing public questions and the vast number of cleaning devices of all kinds that are now offered on the market.

This all goes to prove what we have steadfastly maintained—that no cleaning device can take the place of the Bissell sweeper for the simple reason that the sweeper embodies more genuine convenience and cleaning efficiency, at a small cost to the consumer, than any other cleaning device ever made.

The Bissell is the ever-needed, ever-ready sweeping device that combines durability with efficiency and is sold at fixed retail prices that yield you a good profit.

We are advertising in about 65 of the best publications in United States and Canada, having an aggregate circulation of over twenty-eight million, and we want to emphasize that our publicity campaign is persistent and continuous, not spasmodic spurts that are more calculated for "dealer effect" than for the sincere purpose of creating a steady and enduring demand for the product.

Put Your Accounting Troubles Up To Us

You can learn, without cost or obligation on your part, just where and how your profits may be increased and what leaks and losses are draining your business of net earnings. Unless we find you need

With Only One Writing **THE McCASKEY SYSTEM** **The End of Drudgery**

in your business, we shall not ask you to buy. If you do need the McCaskey System, we'll tell you so and show where and why. There are a few businesses that cannot use The McCaskey System with profit. If yours is one of these, we shall be very frank and tell you so.

Make use of this opportunity to learn something more about handling accounts. We have collected information from thousands of sources that you will find extremely profitable to you. Put your accounting troubles up to us. Let us show you in figures based on your own business how you can add to your profits.

If we recommend the use of The McCaskey System to you it will be for one or all of the following purposes:

Saving time in handling accounts.
Keeping every account posted up to the minute.
Making it impossible to forget to charge.
Preventing misunderstandings with customers over their accounts.
Preventing errors in accounts.
Improving your collections.
Protecting you against loss of insurance in case of fire.
Placing an automatic credit limit on each customer.

Remember, unless we are convinced that you really need The McCaskey System we shall not urge you to buy. We'll put the proposition up to you.

The advice we give is free.

Write to-day—and for your convenience use the coupon.

Why 400,000 cars are equipped with the J-M (MEZGER) SOOT-PROOF SPARK PLUG

When 400,000 car owners choose this plug in preference to all others, **there must be a reason!** And here it is, in a nutshell.

This is the **only plug that can't short-circuit**—because it is the only plug that is **absolutely soot-proof.**

It is impossible for soot to collect at the firing point, as the intense heat of the porcelain "petticoat" burns up the carbon as fast as it is formed. This is due to the fact that the "petticoat" extends to the **end of the outer shell,** where it is exposed to the heat of combustion. We control the basic patents for this form of construction.

The porcelain used in this plug is not affected by sudden changes of temperature. It is made of special clays tempered by a process of our own.

Millions of J-M (Mezger) Soot-Proof Plugs have been sold since they were put on the market, over 12 years ago.

Many that have been in use over 8 years are as good as new.

If any "J-M" (Mezger) Soot-Proof Plug fails to give satisfactory service we will supply a new one or refund purchase price. Price $1.00.

Personal Chat With Our Readers

PROMOTIONS ON H. & M. STAFF.

There is probably no other firm in Canada which recognizes ability and loyalty more quickly than does the MacLean Publishing Company.

A little less than four years ago, we announced the appointment of a new Associate Editor for Hardware and Metal, in T. B. Costain, whose successful experience on such newspapers as the Brantford Expositor, Ottawa Journal, Toronto Mail and Empire, and finally as editor of the Guelph Mercury, had marked him as the stamp of man who would answer the requirements of the MacLean Publications, and of Hardware and Metal in particular.

Before he had been on our staff two years, Mr. Costain was advanced to the position of Editor of Hardware and Metal, and he has shown conspicuous ability in performing the duties of this office. Under Mr. Costain's direction, Hardware and Metal has added many new editorial features which have made the paper more readable and more valuable to subscribers, than it had ever been before.

In recognition of the ability he has displayed in this direction, Mr. Costain has now been promoted to a newly created position, that of General Managing Editor of the MacLean Publications. In this new position, Hardware and Metal will still have the benefit of Mr. Costain's editorial ideas, and he will be sufficiently freed from detail work to enable him to spend more time in outlining broad editorial policies which will ensure Hardware and Metal being an even more vital force in the Canadian hardware trade than it has been in the past.

To succeed Mr. Costain, as editor of Hardware and Metal, the logical choice was, of course, George D. Davis, who has already become well known to the trade, as Associate Editor.

Mr. Davis joined the Hardware and Metal staff about a year and a half ago. Prior to that time, he had spent fifteen solid years in the hardware business, and had thoroughly familiarized himself with every department of hardware merchandising.

Commencing as a clerk behind the counter, Mr. Davis showed such ability in selling hardware that before long he joined the sales force of the Hobbs Hardware Co., and successfully covered Northern Ontario for that firm for two years. He then joined the Purdon Hardware Co., London, Ont., as buyer and Sales Manager. In this capacity, Mr. Davis learned how to conduct all the different branches of an up-to-date retail hardware business, and, as a constant reader of Hardware and Metal, he worked out many new ideas which were advanced in this paper, from week to week.

One day, in reading Hardware and Metal's advertising pages, Mr. Davis came across our own advertisement for a man with hardware experience to join the editorial staff of Hardware and Metal. He answered the advertisement, and before long was occupying the associate editor's chair.

Mr. Davis' long hardware experience has qualified him to edit Hardware and Metal in a sane, practical manner, which distinguishes it sharply from other trade papers conducted solely by "arm chair critics."

Mr. Davis has made a great many friends among Canadian hardwaremen in his fifteen years' connection with the trade, and we believe that, without exception, they will be delighted to learn of his well merited promotion.

A GOOD NEW YEAR'S RESOLUTION.

From all appearances, competition for business is going to be pretty brisk in 1914. The hardwaremen who will suffer least from the competition will be those who are able to adopt new trade-winning ideas to their stores.

Therefore, a mighty good New Year's resolution for all our subscribers to make is that they will carefully study every one of Hardware and Metal's 52 issues in 1914.

With Canada's greatest publishing organization behind it, Hardware and Metal is continually combing the entire Dominion for good ideas in hardware retailing and then passing them on to subscribers in every corner of Canada. These ideas are practical, and are submitted to our readers so that they may adapt them to their own businesses, and thus add to their profit.

And don't overlook the advertising pages. They contain, every week, some new message from the best manufacturers and jobbers who have goods to sell Canadian hardwaremen.

These advertisements contain helpful hints, not only for buying, but also for selling. To have read every advertisement in every issue of Hardware and Metal for a year, is in itself a liberal education in the hardware business.

So, make it one of your sincerest New Year's resolutions, to read Hardware and Metal with unusual care in 1914—and to study the advertising pages as thoroughly as any other part of the book.

OUR SILVER JUBILEE.

With the issue of December 27, Hardware and Metal closed its 25th year. And we believe our readers will agree with us that those 25 years have been years of steady progress in the quality of the service we have given them.

One thing we are very proud of, is that there are so many successful hardwaremen all over Canada, who can boast that they have been reading every issue of Hardware and Metal since it was first published, twenty-five years ago. To these, we can safely promise that the twenty-sixth year will show still further improvements—probably more than any previous year.

Readers of Hardware and Metal will further have the benefit of articles along practical lines, particularly tinsmithing problems, from the pen of Edwin Newsome, editor of the Sanitary Engineer, who is recognized as an authority in Canada on all problems of sanitation, heating and ventilating.

Money in Metallic? Certainly there is, Mr. Dealer!

The Superiority of "Metallic" Building Materials is a proven fact—

The "Metallic" Lines comprise the following fire-proof materials:—"Eastlake" Steel Shingles, "Manitoba" Siding, "Metallic" Corrugated Iron (superior in every respect to ordinary corrugated iron) "Metallic" store and house fronts, "Metallic" Brick, Stone and Clapboard Siding, "Metallic" Ceilings and Walls, "Halitus" Ventilators, "Metallic" Skylights, Ventilator Piping, Eave Trough and Water Piping, "Hayes" Patent Steel Lath, Roof Ornaments, "Metallic" Cornices, Weather Vanes, "Eureka" Spanish Roof Tile, Valleys, Ridge material, "Acheson" Barn Roof Lights, Corrugated Steel Granaries, etc., etc.

This is the Age of Steel

Houses, Stores, Public Buildings, Theatres, Garages are going up all around you, Mr. Dealer—old buildings require improving and repairing. From the Farmer's barn to the small store front, we can help you make money—this is where opportunity is asking you to "take notice."

1883 WRIGHTLIGHT 1913

Short Globe Lanterns have behind them the guarantee and backing of the oldest established firm of Lantern manufacturers in Canada.

It was in 1883 that E. T. Wright & Co. turned out the first Canadian Tubular Lantern, and to-day (30 years afterwards) the same firm under the same management, are still the pioneers of the Lantern world.

Our **WRIGHTLIGHT** Lantern is the latest product of thirty years of Lantern experience. Let us tell you at least a few of the **WRIGHTLIGHT** exclusive features, which are not found on any of the Canadian imitations of our Lantern—

NON-DETACHABLE WIRE EARS AND BAIL—This patented idea of ours makes it impossible for the handle to work loose or drop off. The Lantern must be torn to pieces before the handle will break away.

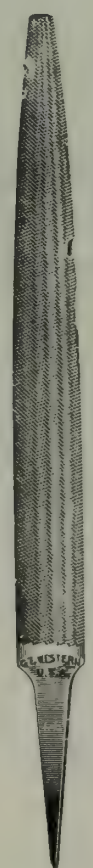
RISING CONE—The burner cone is attached to the globe disc, and rises with the globe when you are ready to light the Lantern. This leaves the wick exposed ready for the match, and insures a perfect fit when the globe descends.

And then there is

THE SHORT GLOBE, which allows the hand to be easily inserted for cleaning purposes.

TO CORRECT A FALSE IMPRESSION that is being circulated among some of our Lantern friends, let us assure them that all patent rights in connection with our No. 3 **WRIGHTLIGHT** Short Globe Lantern are vested solely in ourselves, and are nobody's concern but our own—and our lantern friends, who benefit by them.

Buyers who prefer a full-length globe will find that our No. 4 Cold Blast Pattern will answer their requirements perfectly.



A large stock of both patterns on hand always, and prompt shipments a certainty.

Just as
there are several grades of

Enameled ware

so also
there are several grades of

Aluminum ware

It pays to know why they are not "all the same"

"Wear-Ever"

The Reason Why

The enormous pressure of rolling mill and stamping machine makes the metal in **"Wear-Ever"** aluminum cooking utensils dense, hard and smooth. The "case hardened" surface of the metal is made still harder by electricity—which makes the inside of the utensil darker, smoother, less liable to be discolored and more easily cleaned.

"Wear-Ever" Aluminum Utensils

are stamped from thick, hard sheet aluminum—are made without joint, seam or solder. The less aluminum is heated and the more it is "worked" the harder it becomes. Consequently stamped utensils are rigid, are not easily dented nor softened by being heated.

Demand for **"Wear-Ever"** utensils exists—has been increased each year for eleven years by consumer confidence, by sample-demonstration work, and by magazine advertising.

For 7,742 towns we have assembled names of consumers who have bought one or more pieces of **"Wear-Ever"** ware.

Names of Customers, cards to be used in circularizing them, folders for distribution, Ad Book, Window Display Book, Demonstration Book, display cards and picture slides are at the service of **"Wear-Ever"** dealers.

QUALITY FACTS

Concerning Canadian Rogers Company's Plated Silver Flat Ware

The Base Metal used for all Horse Shoe Quality flat ware is **21%** German Silver which is whiter, harder and more durable than the base used by other manufacturers.

We do not use the designations "12 oz." and "6 oz." but the weight of silver actually deposited upon the **tea spoon,** the smaller staple piece, is used in designating quality.

Wm. A. Rogers SXXXR (Sectional Reinforced) Tea Spoons bearing this mark are guaranteed to be plated with full Six Ounces of Pure Silver per gross. Parts most exposed to wear are reinforced with an additional heavy plate by our special process, making them equal in service to quadruple plate. Other staple pieces in proportion. These will be sold under the usual triple plate list.

Wm. A. Rogers SXR (Sectional Reinforced) Tea Spoons bearing this mark are guaranteed to strip not less than Three Ounces of Pure Silver per gross. Parts Most exposed to wear will be reinforced by our special process with full triple plate. All other staple pieces in proportion. These will be sold under the regular extra plate list.

All Wm. A. Rogers Quality Knives are made from Finest Quality Spring Tempered Crucible Steel Blanks, and all forks in this quality are plated on finest 21% nickel blanks and Hand Burnished.

Vol. XXVI. JANUARY 3, 1914 No. 1

The Inspection of Weights and Measures

Report of Deputy Minister of Inland Revenue Shows Revenue and Expenditure—Suggested Reduction in Fees — Deputation of Hardware Men Will Wait on the Government in February.

THE latest report of the Deputy Minister of Inland Revenue, on the inspection of weights and measures, contains some interesting data for hardware merchants, especially for those who have, for some time past, been advocating that the inspection of weights and measures should be made at the expense of the public treasury.

The total revenue collected during the year (fiscal year ending March 31, 1913), for the inspection of weights and measures was $100,696.52.

The total expenditure was $131,344.71. The kindred services of weights and measures inspection earned about 77 per cent., of what is claimed to be its actual cost.

Number of Inspections.

The total number of weights and measures presented for inspection was 359,068. Number verified 356,674. Number rejected 2,394. These figures do not include inspection of gas and electric meters. Seventy-five seizures were made, and it is interesting to note, that these seizures were all made, in one province.

The report shows a considerable increase in expenditure, which it is claimed, is due to the fact that the same immense territory has to be journeyed to perform an annual inspection as biennial inspection, whilst expenses for the cartage and transportation of inspector's standards and equipment is more largely borne by the service. An additional item of expense was also incurred by the purchase of a new set of standards for the equipment of the W. & M. Standards Branch.

Suggested Reduction in Fees.

Article 7 in the Deputy Minister's report contains some significant remarks as follows: "I might here remark that there is throughout the Dominion amongst the public, scale manufacturers, retail and wholesale merchants, and elevator interests, an intense and growing demand for more efficient and more frequent W. & M. inspection, and also for considerable reduction in the inspection fees collected.

"It would seem then that the time has come when the deficit incurred by the W. & M. service must be accepted as an administrative obligation, and as one that must necessarily increase, and be provided for in the interests of the stability and integrity of Canadian commerce."

Hardware and other merchants have for many years objected to the charges incurred by the weights and measures inspection.

Hardwaremen are heavy contributors to the revenue.

Merchants realize the importance, and necessity of weights and measures inspection, but object to legislation which, in a large degree, is protecting the public, who are receiving protection at the expense of the merchants.

The large percentage of those receiving protection pay very little towards the cost of enforcing the protection which they enjoy.

It is decidedly unfair that the merchant should have to stand such a large share of the expense. Hardware dealers in particular have been heavy contributors, on account of the large number of scales, measures, self-measuring pumps, etc., used in hardware stores.

Hardwaremen in convention have discussed the question from all angles, and it is the intention of the Ontario Hardware and Stove Dealers' Association to present to the Government, during the next hardware convention in Ottawa, a number of resolutions, among which is Resolution No. 2, as follows:—"Resolved that the inspection of weights and measures should be made at the expense of the public treasury, as the aim and object of this inspection is to protect the public."

An effort is being made by the officers of the Ontario Hardware and Stove Dealers' Association to secure the co-operation of the Dominion Board of the Retail Merchants' Association and have a deputation present from that body.

It is expected that the deputation, waiting on the Government, will present some very strong arguments to show why the merchants should be relieved of what appears to be an excessive charge for an inspection, the aim, and object of which is largely to protect the public.

Paragraph 7 of the report of the Deputy Minister indicates that the trade in general is demanding more frequent, and more efficient inspection and also a considerable reduction in the inspection fees collected.

Considerable pressure can be brought to bear upon the Government, if the merchants co-operate, and work together in an effort to relieve themselves of the heavy fees which they are called upon to pay for the protection of the public.

If the present system were abolished, and a new system inaugurated, whereby the inspection of weights and measures should be made at the expense of the public treasury, the merchant as an individual, would still bear his share of the expense of operating the weights and measures service, which was not instituted solely for the protection of merchants, but for the common good.

RESOLUTION OF RETAILERS.

Resolution No. 2.—Resolved that the inspection of weights and measures should be made at the expense of the Public Treasury, as the aim and object of this inspection is to protect the public.

EXTRACT FROM REPORT OF THE DEPUTY MINISTER OF INLAND REVENUE.

"I might here remark that there is throughout the Dominion, amongst the public, scale manufacturers, retail and wholesale merchants, and elevator interests, an intense and growing demand for more efficient and more frequent weights and measures inspection, and also for considerable reduction in the inspection fees collected. It would seem then that the time has come when the deficit incurred by the weights and measures service must be accepted as an administrative obligation, and as one that must necessarily increase and be provided for in the interests and stability and integrity of Canadian Commerce.

DEATH OF H. H. CLARK.

The death occurred in Montreal Royal Victoria Hospital, on Dec. 23 of H. H. Clark of Lennoxville, Que. Mr. Clark entered the hospital about 8 weeks prior to the time of his death, to undergo an operation.

For sixteen years the late Mr. Clark represented Lewis Bros., Ltd., Montreal, in the Eastern Townships, and during that time he made many friends in that territory who will deeply regret to hear of his death.

Mr. Clark was one of the most popular salesmen, not only in the Eastern Townships, but in Canada, and his wife and family will have the sympathy of a large circle of friends.

The funeral services were held at his late residence in Lennoxville, and the burial services in Cookshire Friday morning Dec. 26.

THE U. S. CURRENCY BILL.

Considerable discussion and interest, has been aroused by the recent signing of the new currency bill in the United States. The New York Herald in commenting on "What the New Currency Bill Will Do" states as follows:—

By bringing the thousands of scattered banks into one co-operative system with central supervision it is sought to reduce the reserve requirements and at the same time make the banks infinitely stronger in times of stress by making the whole volume of reserves "liquid." The new project is compared to that of a city in which the water is kept in one reservoir whence it can be directed to any necessary point in case of fire, instead of each household maintaining its individual tank and in case of alarm refusing to aid its neighbors.

BANS SPRING SCALES.

Ottawa, Dec. 28.—An order in Council has been passed amending the weights and measures regulations of the Inland Revenue Department, and making some minor changes in the present toleration of error from exact weight or capacity as fixed by the accepted standards for testing. The amended regulations prohibit entirely the manufacture or sale of spring scales, except in the cases of the kinds now used for weighing ice, sportsmen's spring balances, and farmers' milk scales of approved type.

NO "HOUSEHOLD" SCALE.

No weighing machine of any type whatever shall hereafter be admitted to verification as "family" or "household" scales only. All weighing machines submitted by manufacturers for original verification and stamping must comply with the regulations provided for trade scales of their respective classes. In the case of automatic coin-operated slot machines of the combined spring and lever platform type, it is provided that the tolerations of error on original verification shall not exceed eight ounces at the maximum capacity, with twice this toleration at subsequent inspection.

The best of salesmen fall down at times—none of them has a perfect score—but they always leave the way open to return to the prospect under more favorable circumstances or with another proposition. To add to the loss of an immediate sale, all possibilities of future sales is the crudest kind of bungling.

Business Conditions In Canada Are Not Bad

Extracts from Letters Received from Manufacturers Giving Review of Last Year's Business—Outlook for 1914 Good.

In our last issue we published our annual review of business conditions in Canada, giving extracts from letters which we had received from leading hardware manufacturers and jobbers in Canada.

A number of letters arrived after Hardware and Metal had gone to press and extracts from these letters are appended:—

Outlook for 1914 Good.

In reply to your letter of 18th inst., we have to report that the business of this Company was fully up to our expectations and therefore, highly prosperous until the stringency in the money market began to make itself felt.

This stringency affected our business first of all in the large centres such as Montreal and Toronto, where it was real, but it was not long until the feeling spread into the country districts where it was more apparent than real.

Speaking of the country districts in Ontario and eastward to the Atlantic, business conditions were really good, as the farmer, on whom so much depends, was in very good shape, but there is no doubt that the country merchants, seeing the conditions of the money markets in the larger centres, felt it wise to husband their resources by keeping their stocks of merchandise as low as possible and in this they cannot be blamed.

The whole tendency, however, was to curtail the sales of the manufacturer from the month of May onwards, but the aggregate of the whole year was quite satisfactory.

The outlook for 1914 is on the whole good, although for the first four months of the year, or until navigation opens business may be less than last year owing to the slackness of business in large manufacturing establishments which use our materials indoors, but as our sales for Spring delivery in 1914 are very much in excess of those of the previous year, we feel quite sure that next Summer will show a very substantial revival in business generally.

Good Average Year.

Your valued favor of the 18th to hand relative to the condition of business for the past year, etc., and note carefully what you say.

Now, trade with us during the past year to December 1st, which ends our financial period, while good, has not been up to the record of 1912, but when we consider that year was a banner one in practically all branches of the Iron and Sheet Metal Trade, we are satisfied with ourselves, knowing that a good, average year has been recorded, even with the falling off of trade during the past three or four months.

As regards the outlook for the New Year, we have to admit that right now business is QUIET, more so than it has been at this time of year in a long while. At the same time some good inquiries are coming through which we believe will materialize into orders a little later on just as soon as the public get back to business again after the holiday festivities, and we are optimistic enough to predict that while 1914 may not be a banner year there is going to be enough business moving to restore confidence again and keep Canada leading as the most progressive country on the map.

Business on Better Foundation.

Canada has given a much better account of herself during this year of so-called "reaction" than most people expected and business is actually on a better foundation to-day than it was a year ago on account of the retrenchment that has taken place all along the line.

There is no doubt that money is becoming distinctly easier in all the money markets of the world and that there will be abundant funds for all legitimate purposes within the next few months.

Canada is naturally affected to a great extent by the condition of business in United States, and affairs there are shaping up very rapidly for another forward movement. The new American Banking law is a development of the first importance the effect of which is likely to be very much greater than most people realize. The two main factors in prosperity are money and crops. There will be money enough and if crops are good there will be business enough to satisfy all of us.

HARDWARE AND METAL

VOL. XXVI. No. 1 Toronto, Canada, January 3, 1914 Two Dollars per Year

A GREAT INJUSTICE.

The last report sent out from the Department of Inland Revenue gives interesting figures on the inspection of weights and measures.

The total number of weights and measures inspected during the twelve months preceding the completion of the report was 359,068. Of that number 356,674 were found accurate and 2,394 were found to be incorrect; in other words fault was found in about one-third of one per cent. of the number tested.

For the maintenance of this system of inspection, the amount paid in by manufacturers and retail merchants during the year was $100,696.52.

These figures sum up the situation closely and it is not hard to see why the retailers as a body object to the assessment levied upon them for weights and measures inspection. They are compelled to pay a heavy tax each year in order that the public may be protected against dishonesty and inaccuracy. That the possible loss to the public from incorrect measures and scales has been reduced to a minimum is apparent from the report now published. It is quite possible, in fact highly probable, that the amount would be larger if the system of inspection were discontinued. Any retailer with a desire to cheat the public would then be able to give his dishonest propensities full swing and others might be inclined to less care in the verification of the accuracy of their weights. This is not disputed in any sense of the word. In fact, reputable merchants are anxious that the system should be continued. They realize the necessity of it.

But is it fair to put the heavy burden of paying for this system on the merchant? That at least 99 per cent. of retailers are scrupulously honest and careful is established by the figures in the report. That they should be compelled to pay tribute regularly is not just. The customs inspector gets his salary from the Government, not by collecting from the people whose effects he goes through. The play censor draws his salary from the municipality, not from the theatres he visits. The sanitary inspector is a civic officer, paid by the municipality and not by means of fees collected with each inspection. The principle behind each instance quoted is the same; where duties are created in the public interest, the expense attached is borne by the public. Why then should an exception be made in the matter of inspection of weights and measures?

It is gratifying to note that the report refers to the "intense and growing demand" for a "considerable reduction in the fees collected." The statement is made that "it would seem then that the time has come when the deficit incurred by the W. & M. service must be accepted as an administrative obligation." With this sentiment prevailing in administrative circles, it is reasonable to assume that the hardship will shortly be mitigated and, perhaps, ultimately removed altogether. It would be well, however, for the retail bodies to insistently present their case and to work without cessation until results show.

The deputation which will approach the Government on this question among others during the hardware convention in February, will have a strong case to present.

THE CUTLERY TRADES.

A notable book has been published by G. A. Lloyd, Professor of Economics in the University of Toronto, on the cutlery trades, in which a complete resume is given of the early history of the trade and its development, together with an interesting discussion of present tendencies and future possibilities. Professor Lloyd had exceptional opportunities for the compilation of the material as he occupied the chair of Economics at the University of Sheffield and thus was able to study the cutlery industry at its centre.

Necessarily the work deals to a large extent with the growth of the cutlery industry in Germany. The German cutler has been making a strong bid for supremacy and has exploited machine methods strongly. From careful comparison of methods and processes, he believes that the future lies with the machine.

Solingen is the centre of the cutlery industry in Germany. In past times both Solingen and Sheffield profited by the abundance of water-power supplied by the small streams in the respective neighborhoods and by the easy access to suitable stone for grinding, while the mountains adjacent to Solingen furnished good ore for direct steel-making in charcoal furnaces. In both places, again, many of the operatives are outworkers, and have retained much of the independence of the mediaeval craftsmen. One reads with some surprise that the concentration of the German trade in factories has received a check, owing to the rapid diffusion of cheap electrical energy among the outworkers, which enables them to command the assistance of motive power for their drills, lathes, and grindstones, besides electric light. This development has led to the recent multiplication of private grinding shops attached to dwelling houses in the suburbs, and has improved the position of many of the workers. By means of these private installations fresh shops are being provided at the rate of 200 per annum, half of them being used for grinding. Another statement which will cause surprise in this country is that the German manufacturers still give out more work than they carry on in their own factories.

OUR ANNUAL WINDOW CONTEST.

With each succeeding year, greater interest is exhibited in the annual window-dressing contest conducted by Hardware and Metal. The contest just closed has been no exception, and we have received a record-breaking number of entries,

That increased interest is being taken in questions of display and store publicity was strikingly evidenced by the response to the contest.

The displays submitted are of a very high order indeed, and a difficult time can be predicted for the judges of the contest, owing to the uniform high quality of the displays submitted.

It is very gratifying indeed to see the great improvement that is being made in the window displays of Canadian hardwaremen.

When the judges have finished their task, and the displays are reproduced in Hardware and Metal, it is safe to predict that subscribers to this paper will have an opportunity of seeing reproductions of some of the best, if not the best, displays of hardware that have ever appeared in Canadian hardware display windows.

PROFITING BY EXPERIENCE.

Now is the time to capitalize the mistakes of the Christmas trade. The holiday season is over and an opportunity should afford itself to everyone to sit down and think over the shortcomings of the past month and the best features.

What goods sold the best; what seemed to stick on the shelf; the arrangements that proved advantageous and the methods that meant loss of business should all come under review.

One of the most important things is to have an exact knowledge of Christmas goods of various kinds that were disposed of. This information gathered systematically, and placed where it can be reached when the autumn comes round again will mean dollars and cents to any dealer.

Those dealers who operate a cost book the year round in which all purchases are entered will have most of this information. If, however, no yearly cost book is used, there will be nothing to depend on but memory when goods are being ordered for next Christmas. Memory is too fickle with the majority of us to rely upon for so long a time.

POINTED EDITORIALS.

Now for the New Year.

• • •

Make 1914 a record year in your paint department.

• • •

If you hold the key to success, don't be too lazy to turn it.

• • •

The present year should be a good one. But 1915 should be a regular "hum-dinger."

• • •

Here's a resolution that all hardwaremen, we trust, have made: To go to the convention and exhibition at Ottawa.

• • •

Greater difficulties to face means the necessity for greater efforts. He who relaxes in the face of difficulty fails.

The Business Situation

Immediately after the Christmas rush is over, retail hardware merchants in nearly all parts of the country commence their annual stocktaking.

During the stock-taking period the merchants do very little purchasing, in fact, about the only lines of goods they will purchase, are those for immediate needs. Under these conditions, a quiet period is expected at this season of the year by manufacturers and jobbers. The quietness which now exists and will for the next few weeks, is customary during the present period of the year.

It is confidently expected, that retailers generally will find that 1913 has been a successful year for them. It may be that they have not had the increase in business which they had expected, but nevertheless a good volume of business has been passing.

For a number of years past, retail hardware merchants have enjoyed continued prosperity. In many cases they have shown large annual increases, and expected a correspondingly large increase for 1913. Reports from parts of Ontario and Eastern Provinces show that the hopes of a good many dealers have been realized, and that they have shown a good increase during 1913.

Other dealers report that their business compares favorably with their 1912 business, which in many instances reached the high water mark.

When the pinch of tight money became evident, there was a general movement on the part of retailers to retrench in their purchasing operations. Although the purchases from manufacturers and jobbers during the latter part of the year may have fallen off to some extent, it does not necessarily indicate that the sales of the retailer were falling very far behind.

When business was brisk, and there was no talk of a money stringency, the retailers carried heavy stocks. When the so-called reaction set in there was a movement on the part of retailers to reduce their stocks, and pay more attention to collections.

The result has been that, while the retailer has retrenched in his purchases, he has kept his sales up by pushing the lines of goods which he was carrying in stock.

By paying strict attention to collections the retailer has been able to clear off his books a good many accounts which, under ordinary conditions, would have been allowed to run on for a much longer period.

There is every reason to believe that the stocks of retail hardware throughout the country are comparatively light, and that there will be a good buying movement during the early spring of the New Year.

The reaction has undoubtedly caused a great deal of good in compelling merchants to delve into the depths of their business, and finding out exactly how it stood.

The growth of the hardware business in Canada has been steady, and has been built on a solid foundation. It has not been the result of mushroom growth.

Canada is a growing country, and as the country expands there will be continued demands for all kinds of hardware.

Plans are already under way for many big undertakings in Canada during 1914, and with the return wave of prosperity, hardware merchants are sure to be greatly benefited.

Business to-day is on a better foundation than it was a year ago, and with light stocks in the stores of the retail hardwaremen, and an exceedingly bright outlook for the future, there is every reason to believe that the year 1914 will be a highly successful one for the hardware trade in general.

A Review of Financial Conditions in Canada

More Promise of Easier Money—Canada's Exports Per Head Have Doubled in Sixteen Years—Great Increase in Productivity Made Possible by Importation of Capital—Value of Products of Canadian Industry.

The accompanying article is a summary of a number of articles which appeared in The Financial Post, reviewing conditions in Canada during the past year. They are reproduced as they give valuable insight into trade and commercial problems and contain much matter of direct interest to the retailer.—Editor.

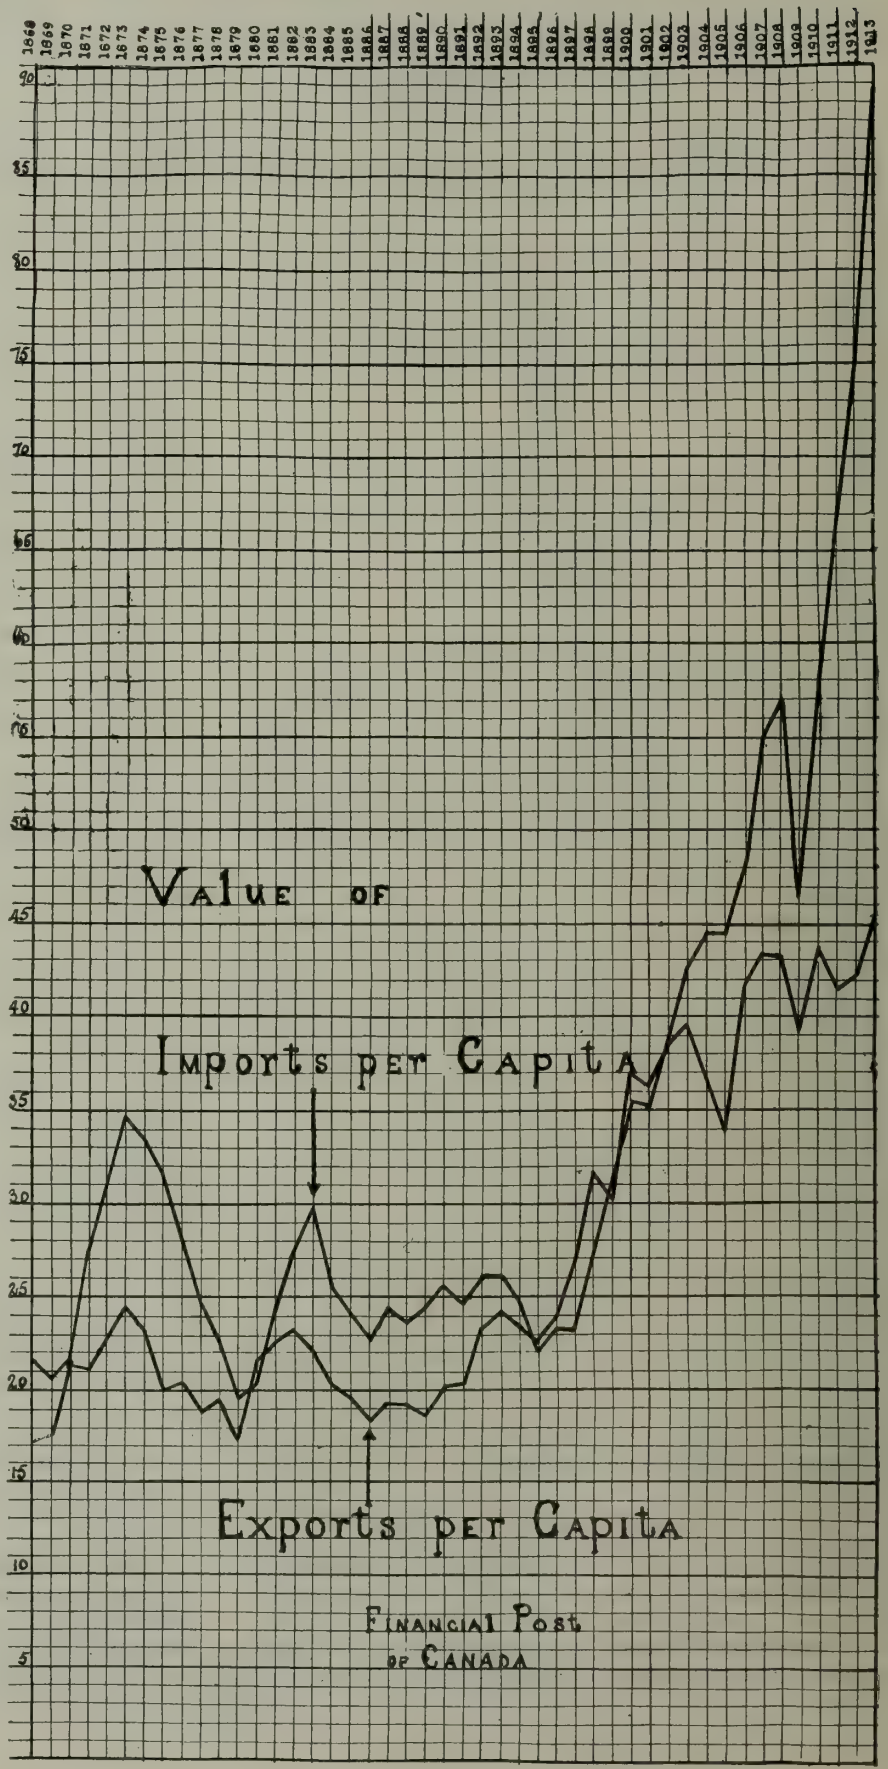
LONDON, Dec. 26th.—Depression in trade is becoming more pronounced and is actively releasing funds. The promises, therefore, are for rather easier money rates. The Continental exchanges, too, are moving strongly in favor of this centre. But it is difficult to lift stock exchange depression. Both Paris and London are smarting from very heavy losses in Mexico, Brazil and China.

Our own Government's financial difficulties form an additional source of embarrassment as fully as it indicates another wave of taxation upon capital.

Paris Unfavorable to Higher Prices.

Conditions in Paris and Vienna, forbid much immediate hope of a general rise in Stock Exchange securities. Much will depend on whether Mr. Asquith proceeds with inflated armaments or is courageous enough to call a halt upon Winston Churchill, the first Lord of the Admiralty, whose ambitions are uncontrolable.

Consols will probably sink further as a result of any reduction in the sinking fund or increase in the taxation on capital.



Canada Must Go Easy.

Day to day funds in London are easy, but the capital market is in a firm position. Our bankers recognize that world-wide demands for funds have been placed on file and will be satisfied as promptly as possible without causing undue strain.

Canadian requirements are still very large but will not be preferred as against other issues, as Canada has been getting much more than its share of the new capital available, in the last year.

Hopeful of American Railways.

London is taking a distinctly hopeful view of the American Railway position. Advices received here through Banking Channels give the results of personal assurance from President Wilson of sympathy with the railroads in their requirements for increased charges, for freight transportation. The Washington

Government's energetic advocacy of nationalization of railways and telephones and telegraphs is now recognized to have had the ulterior purpose of forcing the compromise which the American Telephone and Telegraph Company has just agreed to, and which other corporations are expected to follow.

Canada has been coming in for some very severe criticism during the past two years for the very considerable disparity that has come to show itself between the export and import trade of the country. This criticism has chiefly emanated from the United States which country has long since got past the days of unfavorable trade balances. The Post has prepared a chart which accompanies this article to show as fairly as is possible the movement of Canada's trade since Confederation. As the trade of a country is dependent entirely upon the producing and consuming people of that country it has been thought best to show the changes on a population basis, and for that reason the graphs indicate the changes in the value of trade per capita.

Value of Imports.

It is now quite obvious that the excess of imports over exports in the case of Canada represents entirely capital that is being invested in this country. The imports of this country must of necessity expand rapidly, along with a similar expansion taking place in all countries still in a development stage and which are consequently importing capital in large quantities. A Canadian promoter who sells securities in London deposits the proceeds in a London bank and pays by check for the steel rails or car wheels that he may need for his enterprise. These goods go to swell the import trade of the country. Such imports are essentially capital and as such are not to be compared with the exports that the country is making. It would be ridiculous to look for an even balance between imports and exports so long as Canada continues to need steel rails and car wheels for the development of natural resources.

The accompanying chart shows that from time to time the importation of capital into Canada has expanded very rapidly and then has fallen off just as rapidly as the money markets of the world have come to feel the strain of satisfying such demands. However, such importations of capital have resulted in the building up of the nation's industries and agriculture and unquestionably have ultimately been followed by great increases in production. The export trade is a fair index of the growing productivity of the country and the accompanying chart indicates that that export trade has continued to expand without the great fluctuations noticed in the import trade. There was time in the latter part of the last century when Canada was not regarded very highly as a field for investment and at that time the importation of capital was so slight that the export trade actually exceeded the import trade. Since the beginning of the present century, however, Canada has been more favorably regarded and as a direct consequence imports have advanced at a very rapid rate. At the same time the production of the country made possible by this new capital, as indicated by exports, has shown a very steady advance. Our exports per annum now amount to about $45 per head of population as compared with $22 in 1897. In other words the productivity of every man in Canada has been more than doubled by reason of the new capital at our disposal.

Making Use of Imported Capital.

The danger of course confronts us of finding ourselves with more capital than we have labor to develop it. For the year ending March 31 last our imports amounted to $89 per capita as compared with $22 in 1897. But at that time we were practically importing no capital and our imports simply representing goods we needed for daily consumption and which we secured in exchange for goods we were producing. Any new development at that time had to be financed out of savings from enterprises already organized. But the danger referred to is not a pressing one. Canada must be the goal of a greater part of the migrations from Europe for many years to come and although shortage of labor might for a time embrace the capital already invested, the evil would shortly be overcome.

The point most to be emphasized is that it is not necessary that Canada ever repay in exports the imports of the present developmental stage. It may be that Canada's export trade will never approach $89 per head of population, which is the present import rate, but so long as exports continue at a steady rate interest charges will be met and the foreign investor remain happy. The great excess of imports over exports renders us liable only to increase our production and consequently our exports, to a point where the annual charges on such excess can be met.

Production of Wealth.

During 1913 the production of wealth in Canada proceeded at a normal pace. Records established in 1912 were exceeded. In actual amount the increase was approximately $50,000,000. This is satisfactory in view of the uncertainty which prevailed and which caused some wheels to stop more because of nervousness than for lack of credit or capital.

General Showing.

The general wealth production of Canada estimated from careful compiled data will total nearly $2,510,000,000 compared with $2,460,000,000 last year or an increase of nearly fifty millions as stated above. The increase over 1910 is more than half a billion dollars and over 1908 nearly three-quarters of a billion. The government returns for the past six years give substantial yearly increases in practically every department of Canadian activity. This year's increase in gross wealth produced, is, not so great as the increases registered other years: but it is at least sufficient to show that we are certainly going forward at a normal gait.

The foregoing estimate only includes such products respecting which acceptable data were obtainable. No satisfactory estimates could be obtained with respect to dairy and cattle products. A rough estimate of these is given as being $350,000,000 during 1913, which would bring the total up to $2,859,000,000.

Manufactures in Six Years.

Taking the manufactures it will be seen that they have increased nearly sixty per cent. in six years, jumping from $1,020,000,000 in 1908 to $1,620,000,000 in 1913. Gains in this particular product have been pretty uniform, and have been due probably more than anything else to the policy of the banks in taking care of the needs of commerce.

Forest Products.

Uniform, also, has been the gain in forest products, which have increased from $163,000,000 in 1908 to a round $183,000,000 in this year. Not such a heavy gain, but steady each year. This year's product will probably be somewhat larger than the figure allowed in the tables; because pulp and paper mills have all exceeded their last year's consumption of raw material and several new sawmills are reported as cutting this year, but others have been inactive.

Minerals Up Ten Per Cent.

Examination of the mineral production shows that the gain this year has been nearly $12,000,000 or somewhat less than ten per cent. Not so great as last year's gain over 1910. but still quite satisfactory. The 1913 production valued at $145,000,000 is over fifty per cent. greater than that of six years before, when it amounted to only $85,927,802.

Fisheries Equal 1911.

Products of fisheries have been estimated this year at $35,000,000; which is quite conservative. Packs reported by the big canning companies have been

(Continued on page 57.)

The Value of Price and Show Cards

Department Stores Make Extensive Use of Price and Show Cards —An Incident Noted by a Traveller—Kingston Hardware Merchant Makes Good Use of Price Cards.

A successful merchant once said that price tickets and price cards are the lubricant of a store, and with them the goods glide easily away.

The true value of the price and show card has been realized more in the department store than in almost any other line of business.

When you enter a large department store you are confronted on every hand with displays of goods, accompanied by cards, giving information regarding the goods on display and generally showing the prices in plain figures.

Customers are drawn towards the goods, on which the prices are given. An illustration will bring this point out more fully.

A Toronto department store is in the habit of running off some lines which they do not advertise in the local papers.

Their method is to show the goods in various parts of the store, using price cards to arouse the curiosity of the public.

One day recently they had a large pile of bake boards on sale at 48 cents each. These boards were on display in the basement, and were placed on a table, one of many used for showing goods of this nature.

A large show card was used, bearing the following:

Bake Boards, with rim, good, clear wood, special to-day, 48c each.

A large number of people stopped and looked at the boards, and several sales were made in a short time.

Finally one lady customer came along, and, while looking at the boards, in the absence of the saleslady, dislodged the show card and it fell behind the table.

A traveller who was waiting for the manager of the department noticed the card fall, and he having previously noticed the number of people attracted to the display, wondered what effect the absence of the card would have.

In a store such as the one referred to there are always large numbers of customers passing to and fro.

The traveller noticed after the card had fallen that only a few people paused to look at the bake boards, and no sales were being made.

When the saleslady in charge of the circle returned to the section where the bake boards were displayed she replaced the show card. Almost immediately people again began to stop and examine the boards.

The traveller left the store shortly after this, but when he returned late in the day there was not a single bake board left.

He spoke to the saleslady about the little occurrence he had noticed in the morning and asked her what she thought of the value of price and show cards as a means to create enquiries and sales.

She replied that she thought the reason her department disposed of such a large number of household articles was simply because the goods were well displayed, and accompanied by show cards, price cards and price tickets, each one giving the price in plain figures.

She also stated that in many cases the goods were sold by the price cards before the customer was approached by the clerk, and the latter simply had to wrap up the goods and take the money.

The value of good price and show cards cannot be over-estimated, and hardware men could greatly increase sales of household goods, cutlery, and many other lines by making general use of this method of creating business.

Creating Business During Dull Times

It is Not Advisable to Retrench in the Matter of Advertising and to Relax in Advertising When Business Becomes Dull—Greater Difficulties in Getting Business Should be a Spur to More Strenuous Effort—The Experience of an Automobile Manufacturer.

WHEN the driver of an automobile comes to an upgrade, he puts his machine on a speed where he gets the largest leverage. Only in this way is it possible to make the grade.

When a man engaged in any task encounters something of a particularly difficult nature, he braces himself for the work, throwing his full strength and skill into it. If it is a heavy weight to be lifted, he finds it necessary to exert himself to the utmost, to call to his assistance every ounce of reserve strength that he may possess. If a teamster approaches a muddy part of the road, which he fears will "mire" him, does he drive his team slowly, to husband their strength for the work of pulling the load out after it has been stuck? On the contrary, he may, if the need seems great enough, place planks ahead for the wheels to cross on and urge the team over at top speed. By putting on extra speed, it is possible to skim over dangerous places on the ice, where a slow skater would go through every time.

All of which goes to show that when any task or feat presents unusual difficulty it is necessary to exert unusual effort in coping with it.

Is this rule followed out in business circles? Strangely enough, the answer is in the negative.

Some business men, particularly retail merchants, consider it advisable when trade gets a little dull to adopt a policy of immediate retrenchment. They start to cut down expenses, to save in every possible direction, to buy in limited quantities—and to cut down or eliminate entirely their advertising.

In other words, at times when the greatest difficulties confront them, they reverse the law of nature and, instead of exerting greater efforts, they permit themselves to relax.

It is not intended to assert that when business becomes dull, the merchant should throw economy to the winds and endeavor to force business by strenuous extravagance. It is undoubtedly advisable and expedient to carefully supervise all disbursements when receipts fall off. It is intended to assert, however, that the time of trade depression is the time for renewed effort, for earnest striving to keep business moving. It is the time when advertising is most essential.

It is in respect to advertising that business is most likely to err when times get dull. It is sometimes the first item lopped off the expense list. "Unnecessary expense," declares the merchant. But is anything which brings in business unnecessary? Can a revenue bringer be considered at any time as unessential?

Advertising brings results always, whether times are at the crest of prosperity or down in the trough of depression. A carefully planned and skillfully executed campaign will bring business when money is as tight as the bark on a tree. It is sometimes said that results from advertising can be traced more surely during a dull season than during an active one. Business will be secured then which would never have been secured in any other way while during a time of business boom, the general prosperity urges people to buy, and thus places advertising in the role of an assisting agency.

When Aggressive Work Told.

A couple of months ago the manager of a large hardware house decided that business had reached such a stage that a a careful investigation of conditions was necessary. He called in the head buyer and asked him how he stood.

"We are pretty heavily stocked," confessed the buyer, with a worried look." I fully expected a brisk fall trade and ordered a little more heavily than usual. You see, we have increases right along each year and in order to meet the demand it has become necessary for us to buy in gradually increasing quantity. I followed along on this policy for our fall and winter stock."

"Sales are light," said the manager.

"I know it. Unless things pick up, we won't sell out our present stock let alone handle repeat orders as in other years."

"We have heavy payments to make soon and we simply must get the money to meet them. What do you suggest?"

"There's only one thing to do," urged the buyer. "Retrench. We can cut down expenses in lots of ways. A couple of the men could be let out. And there's no use advertising now. You can't get business when the business isn't there to be got. If we cut down in every direction, we can get over the difficulty."

"Frank," said the manager, "You've got me into this difficulty by overbuying. Now you propose a way to get out which would set us farther back. It doesn't seem feasible to me, when we are overloaded with stock, to suddenly drop all efforts and try to make up for lack of sales by shortening up on expenses. If you had your money tied up in a piece of property and you needed that money badly, you would just naturally hustle out to sell that property. You would take off your coat and work early and late. If you knew of a prospective purchaser living in a town nearby who could be reached by the payment of a small railway fare, you would get over there as soon as the train would take you. The cost of the ticket wouldn't stick you.

"Now then, here we have our money tied up in goods and we need the money badly. There are prospective purchasers all over the district if we can only get to them. It costs us the price of advertising space to get to them but we've got to do it. To cut down our advertising would be just as foolish as for that man with the property to economize by not buying a railway ticket.

"No, Frank, I am going to try exactly the opposite to what you suggest. Instead of letting any men go, I'm going to keep them as long as the prospect of work holds out. Instead of cutting off all advertising, I am going to try the experiment of using more space for a while to see if we can't scare up more business."

This policy was carried out. A more comprehensive advertising scheme was started and the results soon showed. Business became appreciably better and, according to last reports, the firm are beginning to send in repeat orders.

This is an actual instance; not a hypothetical case. It shows that where success can be achieved by not slowing down the wagon of business when it approaches the bog of depression but by laying down the planks of advertising to provide a firm way across.

How it Works.

However, nothing is more convincing than to hear a successful business man tell of his own experience. It will be interesting, and convincing, therefore, to quote extracts from an address by John N. Willys, president of the Willys-Overland Co., Toledo, delivered before the Sphinx Club, New York, on December 9. He said in part:

We have found that it pays us to be continuous advertisers. We do not be-

lieve in advertising to-day and forgetting it for six months. We do not believe in stopping our advertising in the dull season. We believe in keeping our name before the public twelve months in the year, and that's what we try to do in some form or other.

The automobile industry is getting to be one of the largest in our country. It may be of interest to say that there has been expended in the year 1913 one thousand million dollars, or one billion dollars, for automobiles, and for the equipment of automobiles, and the expense of maintaining and operating those machines. It is a large amount of money to go into any industry, and when you consider the growth of this industry, when you consider that ten years ago it amounted to practically nothing, then you understand how hard it has been to keep pace in this industry; how hard it has been always to make your car in a manner that would be satisfactory to your customer, and in a manner that would gain you a reputation and a future in the industry.

One of the very serious drawbacks that I found in starting our industry was the fact that we could not get proper materials and get them properly made. It is all right to advertise, it is all right to sell your product, but unless your product gives satisfaction in the hands of the user, you cannot possibly have a future.

Why? Because what in the world is the use of advertising a car, an automobile, in a periodical that has a large circulation in California, if you haven't an agent in California?

It seems to me there is a great deal of money wasted in advertising because the advertisers don't study their own conditions. Advertising that is good for automobiles, might not be good for breakfast foods, or books, or patent medicines —whatever it may be. There are lots of different copy. We have found that it pays us not to try to put so much in an ad. that nobody will read it. We find that the less we say and the more "kick" we get in it, the more pointed we make our advertising, the better it pays.

If you go to the theatre, a light opera, and you hear four or five different pieces, as a general thing there will be one piece played that evening that you will carry home, and if you can make your advertising so strong, so pointed, that a customer in turning through the magazines or papers will read your advertisement and carry that home, it seems to me that is the situation for which we are all striving.

Ours is an old company. The largest output the company had up to six years ago was forty-nine cars for a year. I think that was the fourth or the fifth season; and when I was the sales agent I had contracted to take the whole output of the Overland factory for the year 1908.

Fighting Off the Receiver.

When the panic of 1907 came along our little company was "broke." It didn't have the money to meet the pay-roll. I came along to the factory and I saw my deposit that I had put up for these automobiles vanishing away. It looked as if the concern was going to fail. In the city of Indianapolis you couldn't get a check cashed in December six years ago.

One Sunday morning the manager of the plant told me, "We are going in the hands of a receiver to-morrow." I said, "Why?" "Because we can't meet the pay-roll; we gave the checks out last night and haven't money to meet the payroll." I said, "Is that so? How much is the payroll?" "About three hundred dollars."

I thought I might as well die for a whole sheep as a lamb, and if I could get three hundred dollars I might as well put that in. I went up to the clerk in the hotel at which I was stopping—I had stopped there a good deal—and I said, "Frank, I want three hundred dollars Monday morning."

He said, "Where are you going to get it?" I said, "Why, I am going to get it from you." He said, "I wish you luck. If I had three hundred dollars I wouldn't speak to you."

That wasn't a very interesting start for me. Frank seemed to take it as really a good joke that I wanted three hundred and had any idea I could get it. But I finally convinced him I really wanted the three hundred, and produced a check on a little bank in Pennsylvania in which I had an account. I finally induced him to promise not to let any traveling men leave town by cashing any little checks, fifteen or twenty dollars, the rest of the Sunday and save it all for me. And Monday morning I had the finest collection of currency, one, two and five dollar bills, you ever saw in your life. But I got the three-hundred dollars and took it over to the bank and said, "I want to make this deposit to the credit of the Overland Automobile Company."

I guess the bankers thought I was crazy, and wondered where I got the pile of one, two and five dollar bills. But we made that deposit and kept the company out of the hands of a receiver, and we started out and made our money again. It was pretty hard work for a few months. We got the cars out and they proved satisfactory.

We didn't have any money to advertise to the consumer. We got some agents by trade-paper advertising, and it was the second year before we did any general advertising. We had something like six thousand automobiles in the hands of the users. We had over five hundred agents in the United States before we did any general advertising, and then we went at it with hammer and tongs.

If times are really going to be as bad as we are led to believe, every time we go down town, why, I say, advertise! Instead of spending eight hundred thousand dollars for advertising this coming year I am willing to spend a million and a half.

We have the agents now, we have the product, and we are going to sell it, and if it takes a million and a half in advertising, it is good business for us to spend it.

I called on one of the banks down town the other day. The officials asked: "What do you hear from out West?" I said, "In October we had an increase of sixty-nine and one-half per cent. over October of last year." "Well, that was not so bad, was it?" "We thought it was very good," "Well, what happened in November?" "Well, in November we had about thirty-two and one-half per cent. increase over last year." "Falling off! Falling off!" they exclaimed. I said, "Yes, that's right; falling off, just like business in straw hats falls off in November. Of course it falls off. We are not going to get the business in December and January that we get in the summer months and we don't expect it. We don't feel on that account we are not going to have any business at all. I don't see anything the matter with this country. I don't see any reason why I should be pessimistic. I don't see any reason why any of us should be pessimistic. If business isn't as good as it ought to be, there is only one thing for us to do: that is to get it away from the other fellow. There is going to be business; we are all going to have some business; we are not going into bankruptcy to-morrow throughout the whole country; and if business isn't good, and we are going to have hard work to sell automobiles, all right: let's have more men in the field; let's work the dealers harder, be up earlier in the morning and stay up later nights and keep at it. I don't propose to sit down and say, 'My business is going to the dogs,' just because somebody down on Wall Street tells me things are blue."

The time really to make good, the time to know whether you have got a real business in any line, isn't in boom times. Anybody can be successful, anybody can sell a lot of merchandise, in boom times, when the times are good. But that concern which can increase its business,

Simple Solution of a Ventilating Problem

An Article Dealing with Heating and Ventilating Problems, Showing How a Ventilating Problem Was Solved by Using an Emerson Ventilator, Improved Style.

Written for Hardware and Metal by Edwin Newsome, Editor Sanitary Engineer, Plumber and Steamfitter of Canada.

It is well known throughout the civilized world that the matter of proper ventilation in our homes, our office and factory buildings is one of the most vital problems of the age.

Our Food and Drugs Act protects to some extent the food we consume.

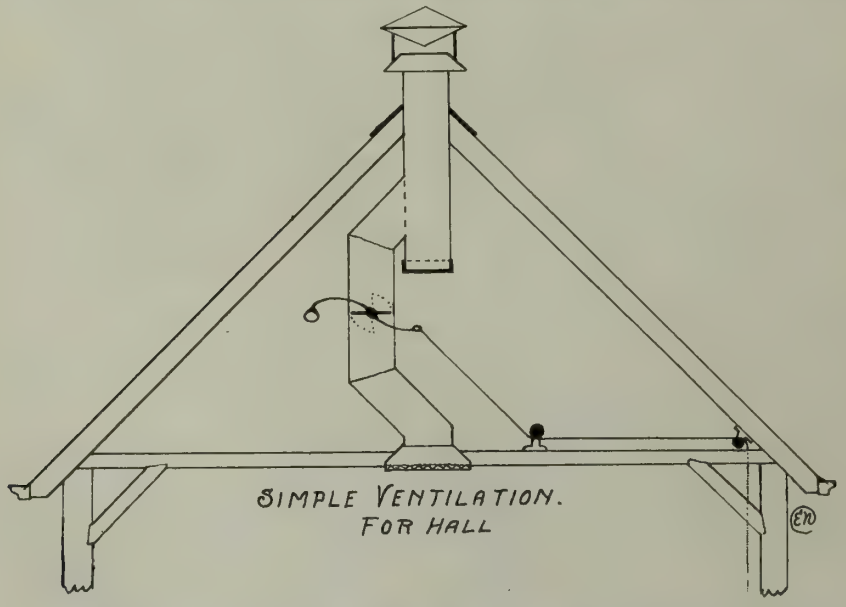
Our plumbing ordinances take care to a certain extent also of the method by which the domestic sewage is either conveyed away from our dwellings and other building, though the proper method for finally disposing of such matter is yet being investigated. We have, however tried several methods which have in a way answered our purpose.

Ventilation.

The problem of ventilation is one which, too, has recently become more interesting to the trade.

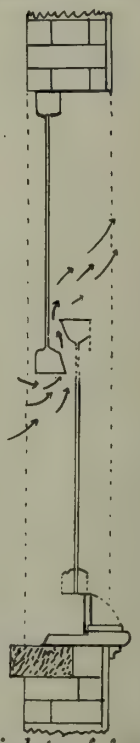
It is, however, still in its infancy. It is a problem which has been too long neglected, and it is surprsing, yet nevertheless true, that we can exist longer and fare better with poor food than we can under conditions of poor ventilation.

Our health authorities do not demand in terms forceful enough that our homes be properly ventilated, and what is the result? Pale faces, tuberculosis and scores of other aches and pains which humanity seems to be heir to. Hence we should take this problem to heart and study more the methods of ventilating.



In some future issue we will show how closely related the two problems—viz., heating and ventilating are.

However, in this article we will deal with a simple ventilating problem which came to the notice of the writer not very long ago—namely, that of a small hall.



The hall was not properly ventilated and the consequence was, the hall became overheated, particularly when a large number of people were present. If windows were opened in cold weather there was a draft, etc.

However, the writer was asked to solve the problem, which was done as follows:—A large cast iron register was placed in the ceiling, and to it a square to round galvanized box was fitted. Then a 24-inch pipe was placed in between the ceiling and the roof in the form shown in plan A, the chief item being what is known as an Emerson ventilator, improved style.

It may be here stated that the original Emerson ventilator had a flat disc for the hood, but experience has proved this improved type to give far better results. We will now explain more fully how this hall was successfully ventilated. First, by installing an Emerson ventilator, Fig. 1., in the way shown. The idea of the straight pieces being carried down was so as to form a receptacle to catch any condensation which might take place, as well as any rain or snow which might be apt to blow down the ventilating pipe, had it been put straight down.

A check was put in similar to an ordinary stove pipe damper, but with an arm on one side of the bar, which caused the check to always stand open when the rope was loose, and when the controlling rope was hooked down the check was closed.

Note inlets of fresh air.

To admit air in at the windows a piece of ½ inch lumber was fastened on the sill inside the window the full length of the sash, as shown in Fig. B. The bottom sash was raised and the piece of ½-inch lumber, which was hinged, also raised, cutting off any draft and fresh air was let into the room between the two sashes. This scheme worked well, and gave every satisfaction.

We will now go into the method of construction of this Emerson ventilator, shown in Fig. 1.

Fig. 2.—First, draw the dotted line A. B., which should represent the total height of the ventilator. We will presume we are developing a pattern for a 6 in. one. We will then take the compasses and mark off the diameter 6 inches from B. Then draw a horizontal line, as shown at G. G. This line should be exactly twice the length of the diameter to be in proper practical proportions. Then place the compasses where A. B. and G. G. intersect at 4. Then open up to G. and mark off on dotted

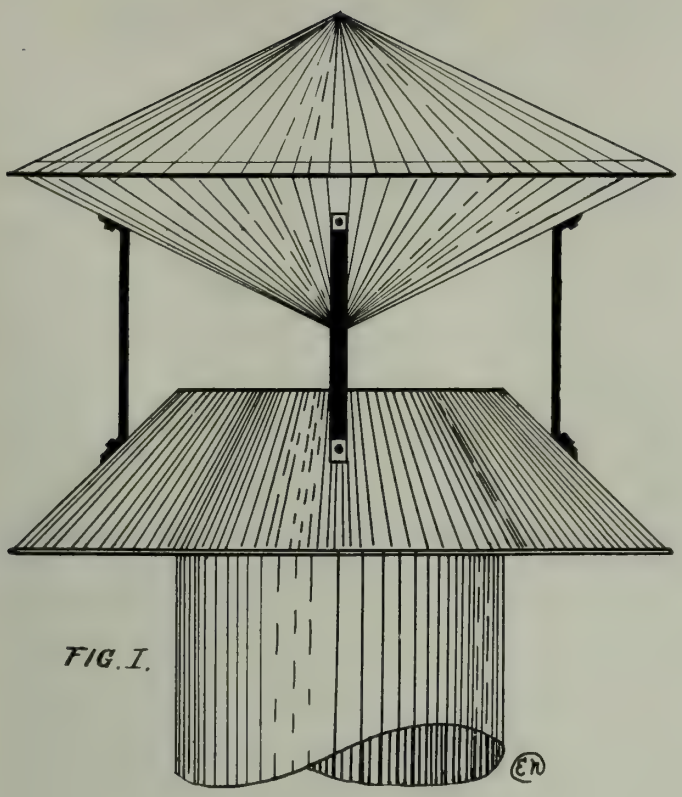


Fig. 1.

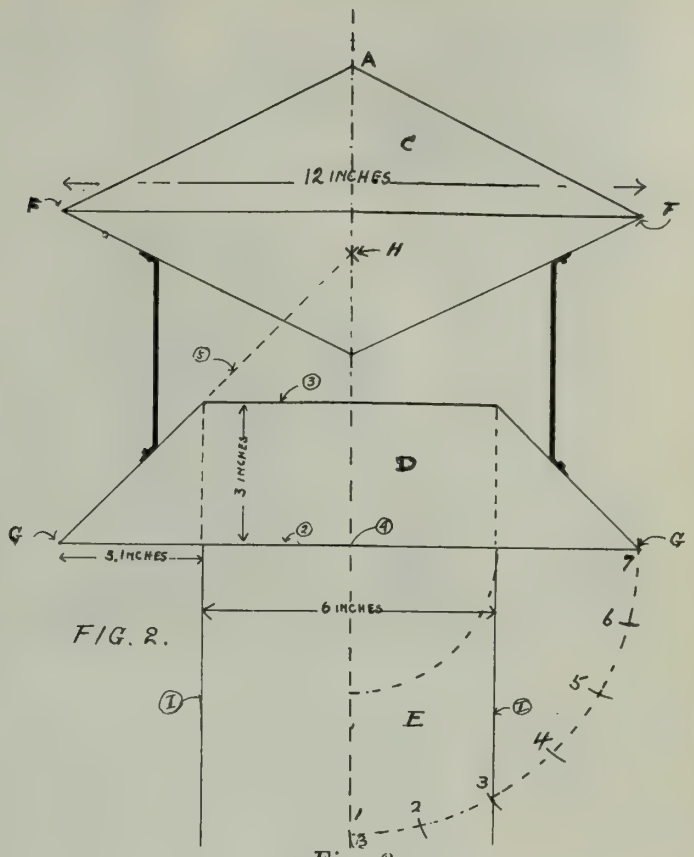

Fig. 2.

line at H. Then draw line 5, which should be exactly 45 degrees with A. B., and should also meet lines 1, which rise in dotted form. This is the actual opening of ventilator. We must now develop pattern E, which is bottom of flare D. This is done by placing compasses at centre 4, and opening up to point G, which reaches point B. Then close compasses and inside diameter of bottom. Then space off as shown and mark 1, 2, 3, 4, 5, 6, 7, all to be of equal distance apart.

We will now proceed to develop pattern for flare D, as shown in Fig. 3. Draw vertical line, and make centre H. Stretch compasses from H to G on Fig. 2, and make a circle as shown. Take the stretch-out measurements, 1, 2, 3, 4, 5, 6, 7, shown on Fig. 2, and start at 1 in centre at top of circle, spacing off as shown twice on the right and twice on the left. This will give the exact outside diameter of flare.

Then to mark out centre place compasses again at H on Fig. 2, and open up to where line 5 meets line 1 at G and H. Then transfer this diameter, as shown in Fig. 3. Place the straight edge at H and G, Fig. 3, and develop line 1. Then mark off sufficient allowance for seam, which should be made as shown in Fig. 4.

We will now develop the top and bottom of cone C, which are both exactly alike, except the piece to be used for top half must be a little large to allow for seam as shown.

Keeping the Home Trade at Home

The Actual Experience of a Western Ontario Firm Which Succeeded in Cutting off Practically all Outside Buying—Names Only Are Fictitious.

"We are not getting as much of their trade as we should."

BUSINESS was rather slack with James Reynolds a few years ago when he took his son Frank into partnership. His establishment was located in a comparatively fair-sized village in Western Ontario in the heart of a good fruit and farming district, and as he conducted a general store, he should have been fairly prosperous long before.

Frank Reynolds had taught school in a country district for three or four years, and being of an observant turn of mind had given some thought to conditions there. Often when chatting over the counter with the general merchant in the district where the school was located, he had heard complaints about what the mail order houses of the big cities were doing to the trade of the community. People there were, constantly telling the merchant that they saw this and that in the mail order house catalogue, how it was cheaper, etc., etc.

The Partnership Formed.

So it came about when Frank got tired of teaching school and his father suggested that he join the business, he agreed, believing himself capable of putting new life into things and of overcoming the gradual decline of trade.

For a month or two business ran along in the same old groove with perhaps a little improvement due to the somewhat improved service; for the son was a live, aggressive young man, polite and courteous and willing to please.

But between times he had been watching and thinking.

"Say father," he said one evening, just before closing time, "can we not prevent so many people driving over to S———— and N———— every week. In the past month I have noticed a great many going over to one or the other of those towns. Some of them stop and ask us to get ready for them or send them some sugar, nails, or overalls, but it is plain that we are not getting as much of their trade as we should."

One town was 4½ miles away and the other 7.

"That is quite true, Frank," replied the father, "but how are we to stop it? We carry just as good goods as the dealers there and our prices are no higher. Where lies the remedy?"

Eliminate the Cause.

"I think I see one," said Frank. "Why cannot we buy those things that these people go there for. Either you or I drive to S———— every Thursday. We have to go anyway for our own supplies and we might just as well get anything extra our customers want. That will give us a good opportunity to know their wants and we shall in future be able to serve them better."

"Go on," observed James Reynolds, dubiously.

"My scheme is this," persisted Frank. "Let us each Wednesday ask our customers if there is anything they want from S———— this week. Tell them that we are going over to-morrow with the large rig and if we can be of any service to them we shall gladly render it. Our plan should be to purchase what they want and bring back the receipted bill just as we get it. They will then see that they pay us just as much as and no more than they would to the merchant in S———— if they had gone themselves."

"Now, there is the Jones Fur Co., the S—— Hardware Co., Henry Farley, the harness man, and so on. Surely we could arrange with these men and others for a discount off the regular price of the goods if we give them the exclusive trade of our customers in those particular lines.'

The father began to see some logic in his son's plan and after further discussion of the project it was decided that Frank, on his next Thursday's trip should determine what he could do.

Arranged for 10 P.C. Commission.

The results of the scheme were better than anticipated. Frank arranged with the biggest merchant in the town—in lines which did not conflict with the general stock of the Reynolds store—for a 10 per cent. commission. One dealer was selected for furs, another for furniture; one for notions, novelties, etc.; a fourth for the more expensive boots and shoes, and so on. The goods were bought at the same price as each individual customer would have paid, and each customer received from Reynolds & Son the receipted counter check of the fur, hardware, or notion house in S. It saved them a trip to the town and the loss of the time.

What was of more importance, it kept the customers of Reynolds & Son from buying out of the village anything that could be bought in it. It kept the money circulating at home, which helped to build up the local district and to make the people happier.

Reynolds & Son probably received the greatest benefit. The rig had to go over every Thursday anyway. That meant one man's time, his dinner and feed for the horses. The 10 per cent. commission gave them enough to pay all expenses and a profit besides and they sold more goods from their own store.

Occasionally they ran into "bargains" in the department stores and often picked up some fancy goods for themselves which they were able to place on sale at an attractive profit. If they wanted anything for their own use from any of the stores in the plan, they secured the 10 per cent. commission which meant that much discount in such a case. If a customer was not pleased with the purchase, it was either taken into stock or exchanged on the next trip. But that seldom happened as care was taken in receiving instructions.

Frank Reynolds observed one drawback to all this when the plan got working well. Villagers and farmers were greatly pleased with the service. That was plain because this trade had grown wonderfully and so had their own. But every Thursday morning the big two-horse wagon went out of the village empty. Here was waste motion and waste energy. Was there no remedy for that?

Following Wednesday evening, the young man went into the telephone office in the store with a list of names of all farmers on the route to S. who had rural phones. This was a representative conversation:—

"Good evening, Mr. Allan; this is Frank Reynolds speaking; just thought I would call you up to say that I'm going into town in the morning with the empty rig and to ask if there was anything you needed—it might save you a trip and I could take it along just as well as not."

The very first farmer spoken to wanted a milk pail and a plough point; and his wife wanted a sack of flour. A few more phone connections brought other orders, and next morning when the wagon rolled out of the village it contained some $40 or $50 worth of groceries, hardware and dry goods. The farmers were delighted. When delivering these goods Frank took orders to fill in town for some things for the women folk.

Mail Order Houses Get Set-back.

His entire theory had worked out splendidly and his father now blesses the day that brought his son into the business. The mail order houses are finding it mighty difficult to get any trade in that district. Personal service and the flesh and blood power of personal contact, following a close study of existing conditions, turned the trick.

Gordon C. Seybold, of the Cochrane Hardware Company, Sudbury, Ont., has been spending a few days in Montreal with his father J. P. Seybold and has been looking up his old acquaintances there.

TRAVELLING MEN WANT BETTER COMMODATION.

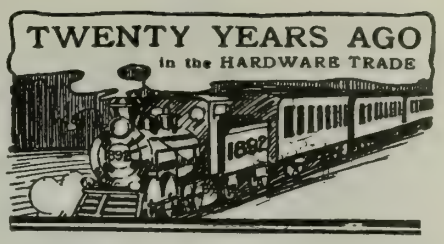
A meeting of the Commercial Travellers' Association of Canada was held in St. George's Hall, Toronto on Dec. 26. The report of Treasurer, E. Fielding, showed that the membership had largely increased during the past year, while the funds show a net surplus of $989,951, an increase of $91,293, in answer to Joseph Oliver, the past President, the Treasurer stated that no Toronto debentures were in the list of the association's investments, as they did not pay enough.

It was urged that the Government should be asked to better the conditions in small cities with regard to hotel accommodation. Northern Ontario was especially complained of in respect to poor hotel accommodation. A member of the board of directors promised that their actions during the coming year would be influenced by this discussion.

The following were elected to the Toronto Board of Directors: John Everett, Alex. Cook, Walter Moore, C. J. Silver, C. J. Tuthill, Harry Dodgson, R. G. Hector, J. W. Chambers, A. C. Rogers.

Hamilton Board.—C. C. Smye, A. F. Hatch, H. G. Wright, (seventeenth time), M. P. Malone, P. A. Somerville, George Matheson.

Montreal Board—George Dawson.



The following officers: S. H. Sterling, President; J. G. Cane, First Vice-President; G. W. Moore, Third Vice-President, and E. Fielding were all re-elected at the nomination meeting a week previous.

PRESENT BAG TO MR. TROWERN.

Officers of the Association and members of the office staff of the Toronto branch of the Retail Merchants' Association presented the Secretary, E. M. Trowern, with a handsome leather travelling bag fitted throughout with silver-mounted toilet utensils. The presentation was made by J. C. Van Camp, President of the Toronto branch, and was accompanied with a suitably prepared address, handsomely mounted, setting forth appreciation of the Secretary's services and the esteem in which he is held. Mr. Trowern made a suitable reply.

PRESENTATION TO CHAS. A. MOORE.

The employees of the Stratford Manufacturing Co., Stratford, Ont., presented Chas. A. Moore, Manager and Secretary-Treasurer of the Company with a handsome club bag as a slight token of the esteem in which he is held by the employees of the firm.

The following items were taken from the issue of Hardware and Metal of Jan. 6, 1894:

"Another year has been added to the century; and another volume of Hardware and Metal has been placed upon our library shelf. It is the fifth volume, and with this issue appears the first number of the sixth. Every yearly volume since the inception of Hardware and Metal has shown an improvement over its predecessor; and that for 1893 was no exception to the rule."

Editor's Note.—Hardware and Metal has now passed the 25th year, and we can repeat the assertion made twenty years ago, that every yearly volume since the inception of Hardware and Metal has shown an improvement over its predecessor; and that for 1913 was no exception to the rule.

* * *

"J. A. W. Allen, hardware merchant of Newmarket, Ont., was a visitor in Toronto this week."

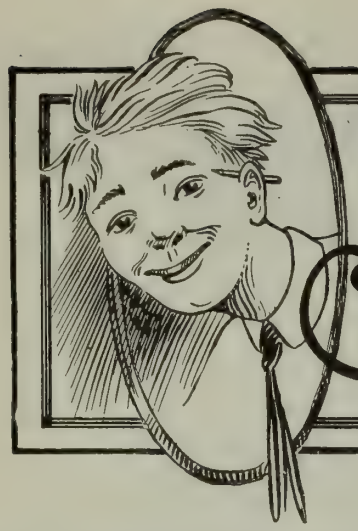
Editor's Note.—Colonel Allen is still in the hardware business in Newmarket and has just been elected by acclamation Mayor of the town, for a second term.

* * *

"Mr. Wortman of Wortman & Ward, London, was a visitor in Toronto this week."

Editor's Note.—Mr. Wortman still resides in London, Ont., but the business has been taken over by Beatty Bros., of Fergus, who now have plants in Fergus and London.

* * *



"The factory of Thomas Davidson & Co., wholesale manufacturers of tinware, Montreal, has been damaged by fire."

Editor's Note.—The Thomas Davidson Mfg. Co., are still located in Montreal, and their business has grown considerably during the past twenty years.

* * *

"The foundry buildings, owned by Charles Fawcett, of Sackville, N.B., were completely destroyed by fire."

Editor's Note.—The foundry was rebuilt and the business is now carried on under the name of Chas. Fawcett, Ltd.

THE JUNIOR CLERK'S PAGE

HOW SILK FISH LINES ARE MANUFACTURED.

Hardware and sporting goods dealers will be interested in the method of making silk fishing lines, and will after they have some idea of it understand how it is necessary for the price to be so high.

The fishing lines are made of glutinous thread or silkworm gut as it is generally known to the trade. This silkworm gut is usually prepared from silkworms in the caterpillar state. When the worms are about ready to spin their cocoons they are killed by lightly pulling so as to break their skins, after which they are immersed in vinegar for a considerable time. They are then pulled apart in a way to draw out a long glutinous thread formed by the silky secretion of the worm. This thread is then stretched on a board or otherwise, and dried in the sun. In the West River district of Hongkong, where most of the exports come from, the silkworm is usually of a green variety about three inches long, which is fed on leaves of the camphor tree. The threads of these worms vary in length from three to six feet. About 40 grades of the gut are recognized by the Chinese dealers and the price varies from 30 cents to $6 gold per pound, the latter price being obtained for a small quantity of very fine product. The Chinese trade at present is said to be entirely in the hands of natives, but the product is obtainable through most any of the export houses.

The production of silkworm gut has been materially increased during the past few years, and more attention is being paid to the export trade. Japan is said to take about one-half of the Chinese exports.

After this glutinous silk thread reaches the manufacturers of silk fishing lines it is carefully made up, great care being taken to preserve its flexible qualifications and at the same time give the anglers a line that will not break.

HOUSES BUILT WITHOUT NAILS.

In Alberta there is a village of houses which have been constructed without nails. As a matter of fact, little or no hardware of any character has entered into their construction. These houses have been built by Ruthenian immigrants and their architecture is quite novel. Their first attempts at house building are usually of the kind they have been accustomed to over in Europe, and their buildings are of the typical Ruthenian style—log, pitch-roofed, thatched and wide in the eaves.

In many cases these buildings are put up without a dollar's worth of hardware. Even the door, an affair of slender twigs woven and laced together, swings on home-made hinges, and is latched with a wooden hasp. The floor is of hewn logs, unnailed. The roof, as the favorite Russian roof always is, is a wonderful fabric of poles and cross-woven wheat straw, 10 inches thick, packed tight and solid, and laid with such care that it will stand the weather for 20 years.

SIMMONS ON "SERVICE."

Wallace D. Simmons, president of the Simmons Hardware Company, made an address recently at the monthly dinner of the Business Science Club of Philadelphia. His subject was "Business Building." Service was its key-note, which, he stated, was the main essential to the building up of any business.

"Good service," he said, "means a satisfied customer, and that is the best advertising a business can have. The business man too often loses sight of the fact that one of the biggest factors in his business is to deliver the goods as promised. If goods are advertised as one thing and sold as something else, there can be but one end. The profit may be greater as long as the advertising is continued, but the patronage of steady customers, which comes only from fair dealing, and which can be depended upon whether there is advertising or not, is lost."

THE UBIQUITOUS MIKE.

Ashes to ashes, dust to dust,
Is the way the old saw goes,
If the germs don't kill us, the microbes must,
And when we're gone, who knows?

There's microbes in the things we eat,
And microbes in the air,
And microbes in the telephone;
There's microbes everywhere.

There's microbes on the greenbacks
And it scares some folks a lot,
But we defy 'em one and all,
That's on the bills we've got.

There ain't no use, so we have found,
O making any fuss
About the microbe and his clan,
We just forget the cuss.

REMARKS OF THE JUNIOR CLERK.

Tackle the hard jobs first.

* * *

Forgotten your good resolves yet?

* * *

How far ahead of last January are you?

* * *

Don't do any worrying to-day that you can put off until to-morrow.

* * *

People who wait for the New Year to bring them prosperity are apt to die poor.

* * *

This is the time of the year when you discover that after all there is more cheer in the world than jeers.

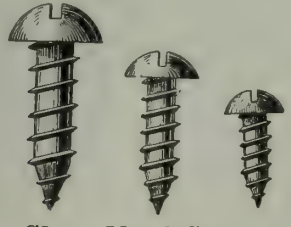
* * *

Every man should have his field of usefulness, but it isn't necessary to put a barbed wire fence around it.

New Goods Offered Canadian Hardwaremen

IDEAL PAINT PACKAGE.

Hanline Bros., paint manufacturers, Baltimore, Md., are putting on the market a special package containing sufficient paint, stain, dressing and polish to finish and polish an entire Ford touring car. Included in the package are the brushes necessary for the work, sand-



Ideal Paint Package.

paper, cheese cloth and waste. The package is called the Original Ideal Paint Package, and is shown in the accompanying illustration.

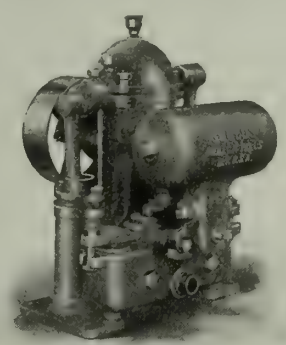
PARKER'S SHEET METAL SCREW.

Parker Supply Co., 517 W. 45th St., New York., are offering the trade the Parker sheet-metal screw here illustrated.

The screw is especially adapted for sheet metal work. It is tapered at the

Sheet Metal Screws.

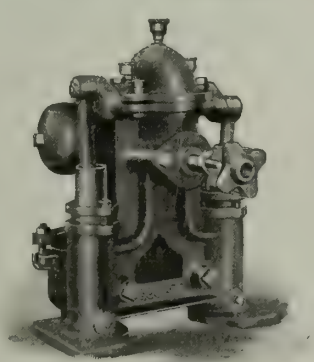
point, made of steel properly tempered and sharply threaded close to the head.



The screw is claimed to be particularly adapted for such work as connecting of joints in ducts, pipes, etc. By punching a hole slightly smaller than the size screw used, the screw will cut a sharp thread in the metal securing thereby a strong hold—and without injuring its thread.

The fact that the screw is tapered only at the point and threaded straight from the point up, it is claimed prevents the screw from working loose once it is in place. The screws are done up one thousand in a box and are made in the following sizes: — ⅛ in. x ½ in.; 3-16 in. x ¾ in.; ¼ in x ⅞ in.

GOULDS POWER PUMP SPRAY.

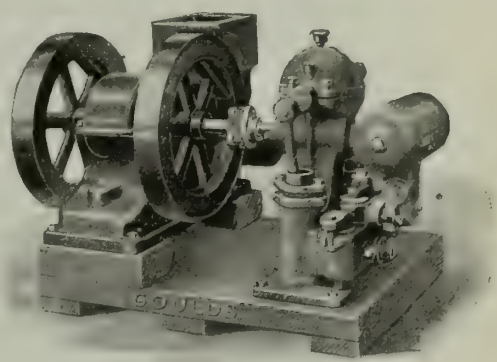


The new "Sturdy" Power Spray Pump recently developed by the Goulds Mfg. Co., Seneca Falls, N.Y., can it is claimed, be connected to any engine without the use of a jack, belt or gears.

To permit direct connection it was

Front view, equipped with pulley.

said to be necessary to have an especially high speed reduction between the driving and crank shafts of the pump. To acomplish this



Rear view, connected with flexible coupling.

result a worm gear is used which gives a reduction of 8 1-3 to 1. The pump can therefore be connected direct to engines of any speed from 400 to 600 revolutions per minute.

The two plungers are 2 inches in diameter and the stroke is 2½ inches, at pump speeds of 50 r.p.m., the capacity is 3.4 gallons per minute, and at 60 r.p.m., 4 gallons per minute and 70 r.p.m., 5 gallons per minute.

The plungers are heavy drawn brass tubing. The connecting rods are malle-

Connected to gasoline engine.

able iron. The shaft is steel, and a steel ball thrust bearing takes up the end thrust. The valves and seats are cast bronze. The suction is for 1 inch pipe or hose, and the discharges are for 3-8 or ½ inch hose as ordered.

The overall dimensions are: width 14½ inches, height 19¾ inches and length to end of shaft 16⅜ inches.

ONIX SHINE POLISHING CLOTH.

Onix Specialty Co., 2754 Germantown Ave., Philadelphia, Pa., are offering the Canadian hardware trade the Onix Shine metal polishing cloth.

The makers claim that the polishing cloth will do the work of one-half gallon of metal polish, and that it produces a lustre that is not easily affected by dampness, and will not leave chalky or greasy residue in the corners or ornamental parts.

It is said that there is no danger of soiling the hands, clothing, floors or woodwork.

The cloth can be used on gold, silver, brass, copper, brittania, tin, lead, pewter, steel, nickel and aluminum. The polishing cloth measures 12x14 inches.

A dealer remarks: "There is no question but what the cash business is the business to do. Some of the most successful business men in the country, however, are those who are doing a credit business.

Current News of the Hardware Trade

Business Changes.

Kennedy, Sask.—J. A. Armstrong has sold a half interest in his hardware business to T. H. Cunningham.

Neville, Sask.—McKenzie and Robinson have been succeeded in their implement business by W. H. Lant.

Tugaske, Sask.—Phillips and Swain hardware dealers have dissolved partnership. Frank Phillips is discontinuing the business.

Tofield, Alta.—R. G. Grieve & Co. announce that they have disposed of an interest in their hardware, furniture and implement business to Geo. McLaughlin and the firm will in future be known as Grieve-McLaughlin, Ltd.

New Firms.

Rapid City, Man.—J. K. Johnson has opened an electrical store in the Nelles Block.

Fire Losses.

Montreal, Que.—The Decbul Tools Ltd., have suffered loss by fire.

Guelph, Ont.—A small fire occurred in the japanning room of Griffin's foundry.

Montreal, Que.—National Stove and Foundry Co. have suffered damage by fire.

Ontario Companies Incorporated.

Kawneer Manufacturing Co., Ltd., Toronto, Ont., capitalized at $100,000.

The Canadian Oak Leather Co., capitalized at $100,000 with head office in Brantford, Ont.

National Vending Machine Co., capitalized at $100,000, with head office in Toronto, Ont.

Dart Cycle Car Co., Ltd., capitalized at $100,000 to manufacture and deal in cycle cars and power-driven vehicles.

Pneuma Tubes, Ltd., capitalized at $1,000,000, with head office in Toronto, Ont., to manufacture and deal in rubber tires, tubes, etc.

The Canadian Mantel and Refrigerator Co., Ltd., Hamilton, Ont., capitalized at $100,000 to manufacture and deal in grates, mantels, refrigerators, etc.

Non-Nitro Explosives Co., Ltd., capitalized at $180,000, with head office in Toronto, Ont., to manufacture and deal in explosives and by-products thereof.

Dominion Incorporations.

American Titanic Iron Co., Ltd., capitalized at $1,000,000, with head office in the City of Quebec, to manufacture and deal in iron, steel and all other metals.

Russell-Jennings Mfg. Co., Ltd., capitalized at $50,000, with head office in St. Catharines, Ont., to manufacture and deal in auger bits, machinery, tools, etc.

P. L. Schmidt Hardware, Ltd., with head office in the City of Montreal, capitalized at $50,000, to carry on in all its branches a general hardware and cutlery business.

To Increase Capital.

Winnipeg, Man.—G. S. Judson & Co., dealers in hardware and implements are applying for authority to increase their capital from $10,000 to $100,000.

Death of James Steele.

The death occurred in Guelph, Ont., after three days illness of James Steele in his 67th year. The deceased was at the time of his death, President of the James Steele Wire Works Ltd.

Burial of A. D. Harris.

The funeral of the late A. D. Harris, president of the Ontario Sewer Pipe Co., who died in London, England, on Dec. 12. took place in Toronto on Dec. 29.

Succumbed to Stroke.

As a result of a paralytic stroke William J. Shaw died at 227 Leslie street, Toronto, on December 29, aged seventy-three years.

Mr. Shaw had been engaged in promoting the International Tool Steel Company of Port Hope, the plant for which is in course of construction and is nearing the stage for manufacture to begin.

Mr. Shaw was formerly a resident of Whitby, and the body will be conveyed to that place for burial.

Burglars in Milton.

Burglars entered the premises of E. F. Earl, stove dealer of Milton, Ont. Several other stores were entered the same night.

Industrial Notes.

Kingsville, Ont.—The R. F. Green Co. Ltd., will build a stove foundry here on a site given by the town.

Brantford, Ont.—The A. J. Reach Co. are putting up a modern plant here to manufacture sporting goods.

Bedford, Que.—Plans for the new plant of the Bedford Mfg. Co., call for four buildings 150 x 50 ft. each.

Ft. William, Ont.—The new plant of the Steel Co. of Canada, will not be ready for operation until the spring.

Sarnia, Ont.—Brick masons have started work on the Perfection Stove Co. plant. The steel framework is all finished.

Petrolea, Ont.—The Canadian Oil Refining Co. are building a new wax works. The cost of the new plant is estimated at $75,000.

Ft. William, Ont.—The National Tube Co. have finished their plant and will employ 100 men in the manufacture of small pipe.

Gananoque, Ont.—The St. Lawrence Steel & Wire Co. have erected a large addition to their factory for storing raw materials.

Walkerton, Ont.—The Walkerton General Casting Foundry, owned and built by Isadore A. Ellinghausen commenced operations on Dec. 13.

Welland, Ont.—A permit for the new factory building and office of the Electric Steel & Metals Co. was issued by the city engineers department last week.

St. Catharines, Ont.—The Consumers Rubber Tire Co., which will establish its factory here, has applied to the Dominion Government for a transfer of lease of 2,000,000 feet of water per day from the Welland Canal granted to the H. Goodrich Co.

Personals.

J. C. Stewart has been appointed manager of the Toronto Wire Nail and Tack Co.

P. F. McClure has resigned his position as manager of the Manitoba Hardware & Lumber Co., at Hamiota, Man.

F. R. Falconer, proprietor of the Pioneer Hardware of the Gateway City, has been spending a few holidays in Edmonton, Alta.

Frank Parsons of Oak Lake, Man., has left for Gravelbourg, Sask., where he has been appointed manager of the hardware department in a large general store in the latter place.

P. L. Robertson president and manager of the P. L. Robertson Screw Co., Milton, Ont., is at present in England completing the organization of the Recess Screw Co., under British patents.

Owen Sound, Ont.—G. N. Griffin of the hardware firm, of Creeper and Griffin, has taken the position of manager of Canada Beds, Ltd., Chesley, Ont., a manufacturing concern, in which he is interested.

Mr. Griffin will still retain an interest in the hardware business in the city.

F. Isaac, of the Leopold Frank Company, of London, England, is returning from a business trip through the West and after covering Eastern Canada he intends sailing for England on the 24th of next month on the Corsican of the Allan Line.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

Retailers are busily engaged in taking the annual inventory and are only buying for immediate needs.

A considerable improvement has been noted in the metal markets. Tin, lead, spelter and copper have advanced in price. Metal merchants report that a better feeling exists all round. Trade in iron and steel is still quiet but the tone of the market in these lines has greatly improved.

Stove manufacturers report only a moderate amount of business passing. The continued mild weather is having a bad effect on stove sales.

Paint manufacturers are busy and expect a big years' business in 1914. Prospects for a good future paint trade are very bright.

MONTREAL.

Montreal, December 30th.—Business on the local market this last week has been rather brisk. As a rule, in practically all parts of the country with the exception of this province, business falls off to a marked extent after the holiday rush has been satisfied, but the French Canadians celebrate New Year's day in the same way as the English Canadians celebrate Christmas day with the result that local retailers are still handling quite a number of articles used for gifts and the wholesale houses are receiving repeat orders, although they are limited. The snow fall which came last Tuesday stimulated the Christmas buying greatly and one of the managers of a large firm in this city remarked that as soon as the snow appeared on the scene the Christmas buying, which had consisted of toys and such things up till that time turned into a demand for skates, hockey sticks, and all such seasonable lines. This year has been a very good one for skates, although the heavy demand only started a week or so ago. The amount of business done in this particular line locally has shown an increase over last year.

The fact that the travellers are now in and getting their samples fixed up for the New Year has had its effect on trade in general and the amount of business passing at the present time consists of a few orders of a sorting up nature and these are only in a small way.

Collections in the east are very good, especially in the maritime provinces. Although most of their factories are not doing the amount of business which they are capable of handling it is on account of the western conditions but as these are improving each day it is thought by many that things will be well in their old stride again by the middle of summer. Retailers are ordering in small quantities as they seem to prefer to order oftener.

The only change in prices which occurred through the week were in iron pipe and the following quotations are being given by local dealers.

Size.	Black.	Galvanized.
¼ inch	2.05	2.92
⅜ "	2.05	2.92
½ "	2.50	3.40
¾ "	2.86	3.98
1 "	4.23	5.90
1¼ "	5.72	8.00
1½ "	6.85	9.55
2 "	9.21	12.85
2½ "	10.85	20.55
3 "	19.40	26.90
3½ "	23.35	32.30
4 "	27.65	38.30

In the metal market conditions are improving daily and prices have had a tendency to firm up a little under a little stronger demand from American buyers. The quotations are as follows.

Tin.—The London and New York quotations have both increased since last week under a little stronger demand particularly from American buyers which has had a good effect in strengthening the market. London quotes £170 12s. 6d. for spot while £172 is asked for futures. The New York price this week has also advanced and the quotations are $37.30 for spots while $37.62½ is being asked for futures. It was reported that purchases on the New York market last Saturday easily exceeded 500 tons and that these were all for immediate consumption. It appears that the feeling now existing and the present demand are not of a temporary nature. The local market although not showing any change of price is firming up and if the present conditions are maintained on the primary markets we might expect to see an advance before long.

Spelter.—The demand is still very consistent, but holders will not sell with the same freedom with which consumers are willing to order. The London price this week is £21 12s. 6d., or an advance of 2s. 6d. over last week. New York price also shows an advance and quotation this week is 13 cents over that of last week or $5.15. Local conditions are much the same. In the primary markets it is reported that buyers are so anxious to secure spelter that they are over bidding themselves. It is reported that they are offering premiums over present prices to secure delivery for the distant months as they are, almost without exception, predicting a business boom after the opening of the new year and seem anxious to stock up as soon as possible. The heavy curtailment in the production of spelter and the strength and activity in the zinc ore market also tends to hold

MONTREAL QUOTATIONS ON PIPE.

Size.	Black.	Galvanized.
¼ inch	$2.05	$2.92
⅜ "	2.05	2.92
½ "	2.50	3.40
¾ "	2.86	3.98
1 "	4.23	5.90
1¼ "	5.72	8.00
1½ "	6.85	9.55
2 "	9.21	12.85
2½ "	10.85	20.55
3 "	19.40	26.90
3½ "	23.35	32.30
4 "	27.65	38.30

prices up. Some of the dealers on the New York market expect prices to advance to what they term "their proper level" and are credited with saying that they would not contract ahead for any quantity at 5.40. With these reports in circulation it looks as if this market will hold its present consistent tone for some time to come.

Lead.—The market has firmed up somewhat during the last week and the result has been an advance in prices. London quotation is £17 17s. 6d. or an advance over last week of 2s. 6d. while the New York quotation for the week is $4.05 or an advance of 15 cents. There is a good demand and the market seems to be quite active at the advance. However sellers continue shy and if the present demand from consumers continues prices no doubt will advance again in the very near future.

Copper.—This market has been subject to quite a change during the past week. The London price to-day is £66 for spots, an advance of £1 6s. 3d. over last week while futures have advanced £1 9s. 6d. and are quoted at £66 10s. The New York price has advanced 55 cents from last week and is to-day quoted at $1.55. Reports from the latter city are to the effect that the demand is very active and that the amount of business being done is tremendous. It is stated that the total sales for Christmas week were well on to 100,000,000 pounds and from a seller's standpoint it was the best week of the year. Although there does not seem to be any improvement in the brass and copper mills this is not expected during the closing week of the year. However it is encouraging to know that most manufacturers are anticipating better business conditions after the close of the year.

Antimony.—Although there is no change in the prices of antimony there has been more interest shown in this market lately. This was expected about the first of the year and of course although it is rather early it is not surprising.

Iron.—This market is about the only one that has not shown a change during the week. The London quotation of 50 shillings is the same as that which was quoted one week ago. Business in this line seems to be rather quiet at present as some of the mills are now closed down for their annual repairs. The local conditions are still rather quiet and not surprising for this time of the year.

In the Stove and heating lines the manufacturers are finding conditions rather quiet at present although the retailers are reported to be doing a fair amount of business. It is expected though at this time of the year that the demand needs some stimulation. The heating business at present consists principally of a general repair work.

TORONTO.

Toronto, Dec. 31.—With the Christmas rush over, hardware merchants are now busily engaged in taking the annual inventory. For the next two weeks very little buying will be done, except for immediate needs.

Before figuring on future needs to any heavy extent, the merchants will be anxious to know the results of the past year's business.

Despite the fact that there have been many complaints about business, in various lines of trade, there is every reason to believe that hardwaremen generally, will find that the past year has been a prosperous one for them.

It may be that in some sections of the country, they have not made the increases in business which they had expected to make, but taken on the whole, indications point to a good year's business for Canadian hardwaremen.

Reports from retail dealers in Ontario and the Eastern part of Canada show that in many cases they have shown a big increase in sales.

There is every reason to believe that 1914 will also be a good year for hardware merchants. Canada is bound to grow and prosper, and with growth and prosperity there is a big demand for hardware.

That retailers have faith in next year's business, is indicated by their willingness to book for 1914 spring deliveries. Hardware jobbers report that booking so far on some lines, for next year's business, is the heaviest on record.

Very few travelers are out at present, but by the middle of January they will be starting out in earnest after spring business.

Improvements in Metals.

A pronounced improvement has been noted in the metal markets, and dealers are quite optimistic.

Tin has advanced ¾ cent. per lb., and copper has taken an advance of ½ cent per lb. Lead and spelter have advanced 5 cents per 100 lbs. Pig iron remains unchanged.

Business in iron and steel products is still quiet, but there is a much better feeling in the market. The following prices are now quoted on metals:—

Tin—42c to 43c lb.
Copper—16½c to 16¾c lb.
Lead—5.45 to 5.65 per 100 lbs.
Spelter—5.45 to 5.65 per 100 lbs.

Rope, Twine, Etc.

The demand for rope is quiet, a condition which usually prevails at this season of the year.

The primary markets are easy. No price changes have taken place since the reduction anounced in Hardware and Metal two weeks ago, the reduction then took place on account of easiness in the primary markets.

Toronto quotations are as follows:—

Pure Manila rope.....	16c	base
African hemp rope.....	12c	base
British Manila rope ...	12c	base
Sisal rope	11c.	base
Lath yarn, single	10¼c	base
Lath yarn, double	10¾c	base

Dealers in rope report that the year just closing has been a very satisfactory one as far as business was concerned, and they are looking forward to a good volume of trade in 1914.

Quotations on binder twine for 1914 delivery will be issued in February.

Nails, Screws, Etc.

Wire nails are still quoted in Toronto at 2.25 base. The demand at present is not heavy. There has been considerable price cutting in nails, during the past year and competition has been keen.

No change has taken place in wood screw quotations since the ten per cent. reduction reported a short time ago. Quotations at present are as follows:—

Flat head bright screws..85-10-7½-10%
Round head bright screws 80-10-7½-10%
Flat head brass screws..75-10-7½-10%
Round head brass screws 70-10-7½-10%

A large number of poultry netting orders have been booked for spring delivery. In several instances jobbers re-

WINNIPEG AND FT. WILLIAM QUOTATIONS ON FENCE WIRE.

	Fort William.	Winnipeg.
Lyman 4 point, per 100 lbs.	$1.95	$2.30
Glidden 2 point, per 100 lbs.	1.82	2.15
Baker 2 point, per 100 ibs.	1.80	2.12
Emerican Special, per 100 lbs.	1.45	1.70
Plain Twist, per 100 lbs.	2.80	3.20
Coil Spring No. 9, per 100 lbs.	2.20	2.60

port that poultry netting orders are more numerous, and for larger quantities than the orders booked during the corresponding period of last year.

Two-inch mesh netting is quoted for spring delivery at 50-10 per cent. discount. Smaller sizes are quoted as follows:—

½	in. mesh	x 22 ga. x 12 in.	$3.00	roll.
½	" "	x 22 ga. x 18 in.	4.30	"
½	" "	x 22 ga. x 24 in.	5.65	"
½	" "	x 22 ga. x 30 in.	6.90	"
½	" "	x 22 ga. x 36 in.	8.20	"
1	" "	x 20 ga. x 12 in.	1.50	"
1	" "	x 20 ga. x 18 in.	2.10	"
1	" "	x 20 ga. x 24 in.	2.70	"
1	" "	x 20 ga. x 30 in.	3.25	"
1	" "	x 20 ga. x 36 in.	3.80	"
1	" "	x 20 ga. x 48 in.	5.10	"

Screen wire cloth for spring delivery is quoted at $1.50 per 100 sq. ft. in 100 ft. rolls, and $1.55 per 100 sq. ft. in 50 ft. rolls.

Electrical Goods.

With the Christmas rush over, there has been a relaxation in the demand for electrical appliances. As predicted in Hardware and Metal some time ago, hardware dealers had an unprecedented demand for this class of goods during the Christmas rush.

Household Goods.

As soon as stock-taking has been completed, there will be considerable activity in household goods. The annual household goods, and stock-taking sales will commence and a good demand for household goods will be created.

Such lines as woodenware, enamelware, tin and aluminumware, etc., will be greatly in demand.

Winter Goods.

The weather so far this year has been rather disappointing, as far as dealers in winter goods are concerned. Such lines as skates, sleighs, toboggans, snowshoes, skis, snow shovels, etc., have not been selling as rapidly as might be desired.

Should a severe cold snap set in during the early part of January, it would help in a large degree to move many of the lines, which have not moved as rapidly as they usually do at this season of the year.

NEW QUOTATIONS IN WINNIPEG.

Pure Manila Rope,	16½c lb| base
British Manila	12½c lb. base
African Hemp	12½c lb. base
Sisal	12½c lb. base
Solder ½ and ½	26c lb.
Planished Copper	37½c lb.
Tinned Copper	30c lb.
Turpentine	75c per gal.

22-24 gauge	4.10
26 gauge	4.25
28 gauge	4.50
10¾ oz.	4.75

Builders' Hardware.

Business in builders' hardware is quiet at present and will in all probability continue so until the resumption of building operations in the spring.

The Stove Trade.

Stove manufacturers are experiencing a quiet spell at present. The comparatively mild weather which has prevailed during the past two months has not been conducive to good business.

Retail dealers are, in the majority of cases, busily engaged in taking the annual inventory. Stove travelers are busily preparing for an early start in the New Year.

Trade in enamelware, tinware, aluminumware, etc., is holding up well and a very fair volume of trade is passing in these lines.

WINNIPEG.

With the New Year come many important changes in prices mostly a revision downwards. An important staple line which all western hardware men must carry is barbed wire on which the new prices and other changes in copper, Canada plates, galvanized iron, rope and solder, will be found in the list of Winnipeg wholesale prices.

For the present trade is very quiet. Travellers are off the road for the holiday season and the greatest wholesale and jobbing houses are stock-taking. It is generally understood that 1913 can be classed as a good year though not ranking with 1912 which, however, must be remembered as exceptional.

The general tone of business in the West is satisfactory and healthy, colder weather and snow will put considerable life into certain lines that have been quiet for some time. A largely increased acreage under crop in 1914 will undoubtedly lead to a considerable expansion of trade in certain lines and next year's building programme will be a large one.

Most hopeful for the hardware man too is the enormous construction work planned by the great transportation companies. The definite announcement that the C. P. R. will push active construction into the Peace river valley and further north is important. There is a vast territory in that direction awaiting development and thousands of settlers will pour in as transportation improves. Fortunately competition among the railroads to secure footing is very keen and development will be rapid.

CREATING BUSINESS IN DULL TIMES.

(Continued fro mpage 46.)

which can have a larger and a growing and a better business in bad times than it has had in good times, is the concern that is going to stay in business and the concern that is going to survive in spite of any obstacle.

This good old country of ours isn't nearly as bad as some of them would like to paint it. Let's all be full of optimism. Let's all make up our minds that we are going to have a good year in 1914, and start out the year 1914 with that in our minds, with that intention to make our business, each one of our businesses, whatever that business may be, whether we are the buyer or the seller—let's do that work thoroughly. Let's do whatever we try to do well, and let's go at it consistently and work, and we will all be successful next year.

A REVIEW OF FINANCIAL CONDITIONS.

(Continued from page 42.)

larger, and these figures will probably be exceeded.

The per cent. gain in fisheries in six years has been greater than most products. As a matter of fact it has amounted to nearly forty per cent.

Crops a Big Item.

Though second in total wealth valuation, the field crops of Canada are of primary importance as a producer of wealth. It is true that output in bushels of some grains show a falling-off this year; but this is largely counterbalanced by the larger wheat crop and the superiority in quality of crops this year. With net result, that total valuation of crops gives this year $526,295,410 compared with $511,977,600. Still, they were not up to 1911's $555,874,600 though better than 1910's $507,184,100.

Methods of Retailing Paints and Varnishes

1914 Outlook in the Paint Department

Balancing up for the Past Year—The Outlook for 1914 is Bright—Suggestions for Improvement Next Year—Your Paint Business Will be What You Make it.

The Christmas rush is over and hardwaremen in all parts of the country have started the annual stock-taking.

The inventory, if properly taken, reveals to the dealer, the condition, and value of his stock, and he is enabled to balance his books.

To some dealers, the results of the year's business, will be very satisfactory, and to others dissappointing.

There are very few dealers, who, on looking back over the business of the past year, will not be able to see where several improvements could have been made in their business organization.

It may be that improvements could have been effected in the advertising methods of the firm, the arrangement of the stock, the selling organization, the use of the show windows, use of free advertising matter supplied by the manufacturer, or in other ways, which are now apparent to the dealer.

Many of the improvements, thought of by the dealer, can be applied particularly to the paint department.

The progressive dealer will not sit down, and mourn over his mistakes of the past year. He realizes that all men make mistakes. He will start out with a grim determination to make 1914, a bigger, and better year, as far as his business is concerned.

Even if his expectations have been realized, he will not be satisfied to go ahead in the same manner as last year. The merchant who is satisfied to leave well enough alone, is standing still.

There is good business ahead, manufacturers, jobbers and retailers generally, are looking forward to big things during the next year.

During the past year, many buildings have been painted, but many remain unpainted.

The talk which has been circulated about the financial stringency, has caused many intending paint purchasers to put off their painting until next year.

Many of the prospective customers have had the money to spend, but owing to the reports of hard times, have been retrenching in their expenditures.

A man who owns several houses, and does a considerable amount of painting almost every year, was asked why he did not do any painting last fall. He stated that the financial stringency had prevented him from spending any money on paint. When asked how he knew there was a financial stringency, he stated, that he had read about it in the newspapers.

This man is not in a class by himself, there are many more like him. They have been holding on to their cash during the past year.

A spirit of optimism prevails at the present time ,and the New Year has many good things in store. There will be many good opportunities for making paint sales next year.

There are many people who realize that they should have done their painting last fall. They will be excellent prospects to follow up early in the new year.

In thinking over the mistakes of the past year, think also of a remedy and put it into effect during the first month of the new year.

Make your plans early. There are very few hardwaremen who do not have time during the winter to plan ahead with a view to doing bigger and better things.

Make up your mind that your paint department is going to show a big increase next year, not only in turnover, but also in profits.

Study the arrangement of the stock in your paint department, and see if a re-arrangement would not be advantageous. Because the goods have been kept in a certain location for many years past, is no reason why they should be kept there indefinitely.

Plan to make better use of your advertising matter in order to create more enquiries and sales. Spend some of the spare time early in the new year, in having conferences with your selling staff and give them a few lessons on paint salesmanship.

Get up a complete mailing list for use early in the spring.

Introduce a system, for going through your paint stock each week in order to find out if the stock is low in any line. Lost sales are lost profits.

Make up your mind to make the coming year, the bumper year in the history of your paint department. Your 1914 paint business will be about what you make it.

NEW CARTAGE SCHEDULE EFFECTIVE JAN. 1.

Montreal, Dec. 29.—The railways issued their new cartage schedule to-day to take effect January 1. They have established a rate in Montreal of four cents per 100 lbs., which is an increase over the present rate of one cent.

The rates for the other centres are:

Toronto, 3¼ cents; Hamilton, 3 cents; and the following points also 3 cents; Bothwell, Brantford, Glencoe, Guelph, Hamilton, Kingston, London, Ottawa, Sarnia, St. Catharines, St. Hyacinthe, St. Thomas, Thamesville, Valleyfield, Walkerville, and Windsor.

The minimum in all cases is 20 cents. A feature of interest to the shippers is the addition to the list of exceptions to the flat tariff of the following freight: Baskets, empty packages, furniture (excepting brass and iron bedsteads).

The request of the local shippers has been granted as promised by the Customs Department, namely: To hand the delivery of customs parcels over to one carrying agent under orders from the customs examining warehouse, and thus cheapen the cartage which importers have agreed to pay.

SIMPLE SOLUTION OF A VENTILATING PROBLEM.

(Continued from page 49.)

Take compasses and place at A, opening up to F. Then draw vertical line and make centre A. Then draw circle as shown in Fig. 4. Use the same stretch-out measurements as shown in Figs. 2 and 3, viz., 1, 2, 3, 4, 5, 6, 7, repeat the same operation as was required when developing flare D, the lower piece to be known as the deflector, being the exact size, the upper one or hood to be large, as stated before, to allow for seam. All these seams should be well sweated together, and made air tight.

For a 6-inch ventilator the position of hood should be one inch higher than the opening of pipe at line 3.

Vitralite

The Long-Life WHITE ENAMEL

Pratt & Lambert's Well Known Products

A VARNISH FOR EVERY PURPOSE

For over sixty years Pratt & Lambert varnishes and stains have been on the market. For three score years—longer than the life of the average user—they have been advertised to an appreciative public. They have found popularity with painters everywhere solely on their merits.

Sell your customers the best and retain their trade. If you are not a Pratt & Lambert dealer, let us supply you with full details of this stock. It will pay you to handle these well-known products.

Three Big Reasons Why

BERRY BROTHERS VARNISHES

Are Money Makers for the Dealer

1. Berry Brothers Have Been Making High-Grade Varnishes for Fifty-five Years.

The reputation of Berry Brothers as makers of good varnish dates back 55 years.

Painters, decorators, architects and home owners for over half a century have been friends and users of Berry Brothers' Varnishes. Berry Brothers' dealers have been successful because Berry products stand the test of time and repeat.

2. Berry Brothers' Progressiveness Have Helped to Make Our Dealers Successful.

There is now a Berry Brothers' product for every varnish need. No matter what your customer's need may be—interior or exterior finish—varnish for house, boat or furniture—there is a Berry Brothers' product best adapted for that use.

And your customers will appreciate your interest in recommending the proper varnish for the use they have in mind.

3. Our Extensive Advertising to Varnish Customers is a Big Sales Help to Our Dealers.

For many years we have been telling the Berry Brothers story to varnish consumers from Coast to Coast. That is one big reason why dealers have found it pays to push Berry Brothers' products.

Any good article which bears a reliable manufacturer's name, one that is backed by a large amount of money spent in national advertising, is bound to have an increasingly popular demand year after year.

This is especially true of Berry Brothers' products. They have unusual merit, they have the reputation, and they are backed by a large volume of intelligent advertising that brings varnish consumers into the stores of Berry Brothers' dealers.

If you do not handle our varnishes you will find it well worth while to send for our literature and dealers' proposition to-day.

HERE ARE FOUR OF OUR PRINCIPAL PRODUCTS.

Liquid Granite—A floor varnish whose name suggests its wonderful durability.

Luxeberry Wood Finish—For the finest rubbed (dull) or polished finish or interior woodwork.

Luxeberry White Enamel—Unequalled for white interior finishing. A white enamel that stays white.

Luxeberry Spar (It's Waterproof)—Widely employed for all kinds of outdoor finishing, exposed to the weather. Will not turn white or check.

Weekly Market Report---Paints

MONTREAL.

Montreal, December 30th, 1913.—Conditions in the local market at present are rather quiet owing to the majority of the manufacturers having closed down for their annual repairs. The travellers are in off the road and this, of course, has had a tendency to quieten things to some extent. In the prepared paints it is reported that the retailers are holding small stocks at present and the manufacturers are anticipating a big year in this trade. Orders being received at present are very small and it seems that the retailer prefers to order small and often instead of stocking up to any great extent. White lead prices show no change from last week and it appears that buyers are holding off. Linseed oil and turpentine remain unchanged with a seasonable demand in evidence. The demand for coal oil is, of course, very good as is usual. Gasoline has quieted down somewhat as has also benzine. The demand for glass and putty is much the same as in previous weeks. Owing to building operations having practically ceased for the winter months this business has, of course, slackened up a bit.

Local manufacturers, or at least some of them, will start operations again on Monday and they will devote most of their attention to their stock of prepared paints. They will, of course, have to stock up for the spring and summer demand and also stock up their branch houses for the same purpose. This no doubt will attract most of their attention until the spring rush starts in. The travellers will start back on the road again next week and this ought to stimulate business to some extent.

Linseed Oil.

The following prices are quoted on linseed oil:—

Raw Oil—

1 to 4 barrels	57c per gal.
5 to 9 barrels	56c per gal.
10 to 25 barrels	55 per gal.

Boiled Oil—

1 to 4 barrels	60c per gal.
5 to 9 barrels	59c per gal.
10 to 25 barrels	58c per gal.

With open prices for carload lots.

White Lead.

Buyers of white are purchasing only for immediate needs. The following quotations are still ruling:—

Dry White	6¾ cents.

Lead in Oil—

5 ton lots	$7.75
1 ton lots	8.05
Less than 1 ton	8.25

Glass and Putty.

There is a reasonable demand for glass and putty. No price changes have occurred. Standard putty is quoted as follows:—

Putty quotations as follows:

Bulk, in casks ....$2.30 per 100 pounds.
Bulk, in drums.... 2.50 per 10 pounds.
Bladders, in barrels 2.80 per 100 pounds.
With the usual advance of 70 cents per 100 pounds for pure putty.

TORONTO.

Toronto, Dec. 31.—With the holiday spirit still very much in evidence, there is only a limited amount of trade passing in the paint business.

Very few travellers are out at present, but a start will be made early in the New Year. Varnish manufacturers report that business is holding up exceptionally well for this season of the year.

The year just closing has been a very fair one for the paint trade in general. There is every reason to believe that a large volume of paint business will be transacted during 1914.

Retailers are busily engaged with the annual stock-taking, and until it is completed very few new orders will be placed.

A large number of heavy orders have been booked for spring delivery, in fact up-to-date they appear to be heavier than during the corresponding period of last year.

Manufacturers of paint are, in the majority of cases, very optimistic regarding the outlook for 1914, and are making preparations for a big year's business.

The fact that retailers who have booked their spring orders, have ordered heavily, indicates that they too, expect a good share of trade in 1914.

No price changes have occurred in Toronto quotations during the past week.

Linseed Oil.

Quotations on raw and boiled linseed oil remain as follows:—

Raw Linseed Oil—

1 to 2 barrels	59c per gal.
3 to 5 barrels	58c " "
6 to 9 barrels	57c " "

Boiled Linseed Oil—

1 to 2 barrels	62c per gal.
3 to 5 barrels	61c " "
6 to 9 barrels	60c " "
10 barrels	Open.

Oil for less than 1 barrel 7 cents per gallon additional, with the usual charge for cans.

White Lead.

The demand for lead is quiet at present, and dealers are only purchasing for immediate needs. A number of orders have been booked for spring deliverey. Quotations for delivery up to May 15, 1914, are as follows:—

5 ton lots, $7.90 per 100 lbs.
1 ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

Turpentine.

Receipts at Savannah last week were 3,260 barrels, and sales 2,502 barrels. The market continued unchanged. Toronto dealers are selling turpentine at 66 cents per gallon, in single barrel lots, and 65 cents per gallon, in 2 to 4 barrel lots.

Glass and Putty.

There is a seasonable demand at unchanged prices.

Standard putty is quoted as follows:—
Bulk in casks, $2.40 per 100 lbs.
Bulk in 100 lb. drums, $2.60 per 100 lbs.
Bladders in barrels, $2.90 per 100 lbs.
Pure Putty, 70c per 100 lbs. advance.
Glass is quoted at 15 per cent. discount.

THE VALUE OF PRICE CARDS.

(Continued from page 44.)

In the accompanying illustration is shown an interior view of the hardware store of John Corbett, Kingston, Ont.

Mr. Corbett is a firm believer in the value of show and price cards, and in the accompanying view a few of the many cards used in this store are shown.

Neat price cards, with large clear figures, are used, and some of the lines on which prices are quoted are:—Knife boards, thermometers, kalsomine brushes, door mats, corkscrews, and many others.

The store is a model for neatness, each article has a place, and can be found in its place.

Another feature in this store is the manner in which the goods are displayed. No waste space is allowed. Samples of all goods carried in stock are shown.

Seasonable goods are always kept well to the front.

Price and show cards are used literally and assist materially in making sales.

ALL PAINTERS KNOW

that if wide and long continued use is any indication, then

Brandram's B.B. Genuine White Lead

is the very type of success, for it is doubtful if there is any other branded product that has endured for so many years and held its own against time and change, and the reason for it is this:

The nature of the Brandram process is such that the White Lead produced by it is strictly amorphous and noncrystalline, 100% pure and of perfect evenness of grain; and this is *always* true of it, hence a uniformity of product unknown in leads made by other processes.

Such lead as this is the only kind that you can always depend upon. It is unequalled in covering qualities and durability and makes the most perfect known base for paints.

This is the White Lead you should sell—the only kind that pays in the end.

Write for booklet telling all about it.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

CURRENT MARKET QUOTATIONS

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for large quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Minerva Co-operation Is Real

How is your paint stock? Does it hang fire and stick on your shelves? The full margin of profit in your paint department can only be realized by handling a good clean-cut quality stock, of known reputation and backed by common sense help in direct support of your business, **the kind of co-operation that counts.**

Feature—**MINERVA PAINTS**—the famous British Brand, and watch your paint sales grow.

Ask any Minerva agent for his opinion.

We will be pleased to supply their names on request. There are hundreds with daily increasing sales.

You should know about our 1914 campaign. Write for details.

PINCHIN, JOHNSON & CO.
(CANADA), LIMITED.

MINERVA HOUSE **377 Carlaw Ave., TORONTO**

Established in England in 1834 Y-67

What Are You Going To Do?

Success for the New Year depends largely on the plans and decisions you make now. Paints and Varnishes are important lines, and should have your full consideration before deciding what brand you are going to sell.

Compare all the various makes that the market affords, keeping "Service to your customer" uppermost in your mind, for your profit and success for the next twelve months will be in proportion to the service you render your customers.

Martin-Senour "100% Pure" Paint is the line of least resistance—the easiest paint to sell, by reason that buyers are pre-convinced that purity in paint means greatest service and greatest satisfaction.

Before deciding on your line of Paints and Varnishes for 1914, look well into this Martin-Senour Proposition — the quality of the goods—the forcefulness of our *nation-wide* advertising campaign—you will find many points of advantage that are bound to interest you. A postal will bring you full particulars.

"Best Wishes and Our Thanks"

At this—the dawn of 1914—we just want to wish you the compliments of the season, your full share of good health, a large slice of prosperity in the New Year.

And at the same time we would like to express our sincere thanks and appreciation for your patronage during the past year and to assure you, that if you try us out in the coming one, you will not find us wanting.

Benjamin Moore & Co., Ltd. **Toronto, Canada**

"SILKSTONE" Flat Wall Colours

(COPYRIGHT)

good in your store for the customers they bring—good for your customers for the service they give.

Silkstone—smooth as silk, hard as stone—is sanitary, washable and better than wall paper. Your customers will be satisfied with it—they'll come again, and the nice profit will make you glad to see them.

We want agents in some places yet. Write.

G. F. STEPHENS & CO., Limited

Branch at Calgary, Alta. **WINNIPEG, CANADA**

Over half a hundred years of paint production

has brought us to the point where we can unhesitatingly recommend Jamieson's various Paints to be unsurpassed for the particular work for which they are manufactured.

The dealer is protected

because this recommendation amounts to a guarantee on every drop of paint that goes out of our factories.

We want to talk over the paint proposition with you. How about it?

PARIS GREEN.

24½ cents per 112 lbs.

Do You Know—We Told You

I.C. RED LEAD IN LINSEED OIL

IS BETTER

Than other Red Leads or Red Lead substitutes.

BECAUSE

It is always ready for use—Remains suspended in oil indefinitely—Dries quickly without the use of driers—Is more economical.

IT DOES NOT

Contain any adulterants—Disintegrate or chalk off—Harden or Solidify—Turn white after applying—Cost proportionately as much

AND WE PROVED IT

By having Canada's Most Noted Chemists, Milton Hersey, Limited, Montreal, make not only a chemical but a PRACTICAL WORKING TEST of it.

That report has been published several times recently in HARDWARE and METAL. We shall be glad to send you a copy of it.

NOW WE ARE GOING TO PROVE

I.C. Everlasting Paint

Is BETTER than other paints you are now buying or are able to secure

BECAUSE

It has greater covering power—It will not blister—It will not disintegrate or chalk off—It will hold its color—It works more smoothly under the brush—It contains pure linseed oil only—It sheds water like a duck's back.

YOU CAN TRY IT OUT YOURSELF—MAKE YOUR OWN TESTS—AND PROVE IT.

Write us for samples and particulars.

Watch this space for report of tests which are now being made.

Vancouver, or St. John, N. B.

THERE'S MONEY IN THE RIGHT PAINT

If you stock a complete line of **Ramsay's Paints and Varnishes** there's no danger of a customer going to "the other store" because you couldn't fill the bill.

Furthermore, that customer will be **satisfied.** Time and climate won't alter his first good impression of the paint you sold him because Ramsay's Paints have stood the test since 1842, and have built up a reputation for right down durability and unfading qualities in spite of our strenuous weather conditions.

Ramsay's paints sell themselves—stock them, there's money in it for you.

YOU DON'T HAVE TO WORRY

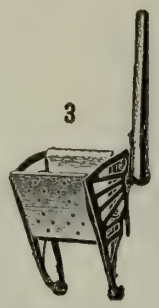
If you don't want to worry about the quality of the paint you sell, the profit from your paint stock, and the satisfaction the goods are giving your customers, try out the Canada Paint Co.'s proposition.

You can't have a satisfactory paint business unless there is quality in the line you push.

You can't get the greatest volume of business from your Paint Department unless you concentrate on the full line of some good maker.

You can't make the biggest profit out of your Paint Department unless you have the hearty co-operation and backing of the manufacturer and the right kind of advertising and sales plans.

It will be worth your while to consider seriously all the above points and if the Paint Agency that you are now handling lives up to them all, you are in the paint business to make money. But if it does not, send a Postal Card at once to our nearest office and have one of our Salesmen call on you and explain what we have to offer. We have a profitable proposition for you, and by allowing our Representative to lay it before you in detail, you put yourselves under no obligation of any kind.



The New Year is here—The Canada Paint Co.'s Paints, Varnishes, Stains, Enamels, White Leads, etc., will help you make it a bright and prosperous one. Place your spring stock order early.

Be Influenced by Successful Men

What one man can do—another man can equal. The record of success made by some of Lowe Brothers' Exclusive Agents should merely point the way to a bigger success you can make in co-operation with us. The methods that have increased one man's turnover 200% in one year (name on request)—can be made to increase yours that much, or more.

The important thing is to get into touch with the house that can show you *how,* and then help you to become more successful. In point, that house is—

The Genius of the Fleet

In the January issue of MacLean's Magazine Admiral Von Tirpitz is called the creator of the German Navy. His position in the making of this modern state is most graphically told in the third of the series by Frederic W. Wile in the first issue of the new year.

The Rise of McCurdy M.P.

The Millionaire of Nova Scotia

This story shows how this young Napoleon of Finance became the head of a powerful brokerage and achieved political renown. Don't miss reading this sketch.

The other excellent articles are no less interesting to business men. In fact the January Issue is teeming with information and interest, peculiar to the Merchant, Business and Professional men of Canada.

Here are the titles of other articles that will interest them:

Culture in Business Life, by Alexander F. Eastmen, M.P.

A King in Poultrydom. A University Graduate and a School Master whose hobby has made him, by Herbert Gransford.

How it Feels to Carry Money; Money Making Fur Animals, and other features in Fiction and Romance, **Review of Reviews,** etc.

And a numerous selection of clever short stories. "MacLean's — the National Magazine."

Send two dollars for a year's subscription of this magazine. Single copy twenty cents.

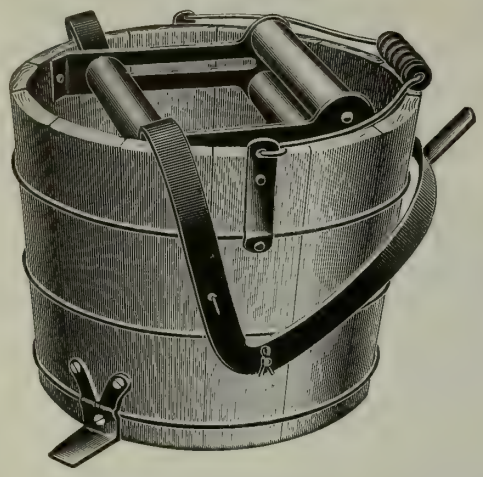
TRADE JENKINS MARK
Jenkins Bros.

Why Should the Dealer Handle Jenkins Bros.' Valves?



Because they are recognized as the Standard wherever valves are used.
Because the dealer is able to reap the benefits of many years of advertising and missionary work by the manufacturer.
Because we never find a dealer with a stock JENKINS BROS'. valves which are unsaleable.
Because in building up a high-grade business it is easier to do it with high-grade goods.
Because when the salesman announces that he is selling "**GENUINE DIAMOND BRAND JENKINS BROS'. VALVES,**" he is not calling attention to an unknown or untried article.
Because the consumer specifies them in preference to cheap and inferior makes.
Because when the user specifies "**JENKINS**" he always means the **GENUINE JENKINS BROS'.**

SANITARY ENGINEER

BECAUSE

1. **Its Advertisers**—are those who sell the best goods at the right price.
2. **Its Question Box** "is practical."
3. **Its Articles**—are of vital interest to those engaged in the craft.
4. Its course in sheet metal work has been very favorably commented upon; in fact one subscriber stated to us recently that his course was worth over $25.00 alone.
5. We solve problems for you through our columns which are at times beyond the best of us.
6. It is the voice of the trade.
7. It stands for all that is along the lines of progress in Sanitation, Heating and Ventilation.

THE TRINIDAD-LAKE-ASPHALT

Ready Roofing

is the roofing that gives the greatest satisfaction to customers.

Its **lasting** waterproof quality appeals strongly to them because they know it means trouble-proof, economical roofing.

And when they learn that the patented Kant-leak Kleet, in rolls of Genasco smooth surface roofing, makes seams lastingly waterproof without cement or large-headed nails, they want it double quick.

Take hold of this easy-selling satisfaction-giving proposition and make your share of money out of it now.

Order from your jobber. Write us for samples and full information.

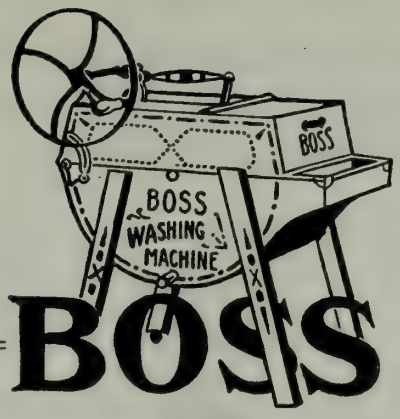
Sell Your Customers The MAXWELL "Puritan" Motor Washer!



A PERFECT and complete self - washer which runs by water power from the ordinary pressure obtained from the faucet. Requires no attention and does the work in a fraction of time required by any other method. Simple and easy to operate. No delicate parts to break or get out of order.

MAXWELL'S "PURITAN"

Motor is of the reciprocating type—the most reliable and satisfactory of all styles of water motors. Valves built to resist action of grit or sand. Write to-day for Catalogue.

DAVID MAXWELL & SONS, St. Mary's, Ont.

BOSS

No. 23

The "**Boss**" is pre-eminently the washer for the home. Its moderate price and efficiency as a washer, make it a very desirable aquisition from the housewife's viewpoint. And where you might sell **one** more expensive machine, you'll sell **ten** "Boss" washers, so it will pay you to keep the "Boss" always in stock.

Besides we allow you a very handsome margin of profit.

Our line of woodenware is complete. **Write us for catalog.**

Housewives Want An Easy Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.

The Thermo Washer is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.

Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

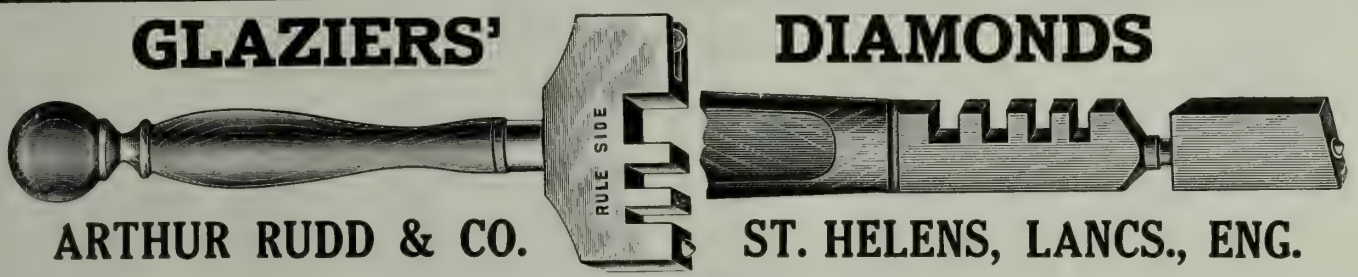
Amatite ROOFING

Needs No Painting

Tin makes a good roof *if you paint it.* Canvas makes a good roof *if you paint it.* Any felt makes a good roof *if you paint it.* Even paper makes a good roof if you paint it. But Amatite makes a good roof if you *DON'T* paint it.

On a painted roof, the paint is what gives the real protection. The rest of it has no function except to provide a smooth, unbroken surface with no seams or cracks, to which the paint can be applied. Anything which has strength enough to keep the wind from blowing it away or the rain from beating it in, will be waterproof if you use paint enough.

Amatite Roofing, however, needs no painting. *It is a real roofing,* a roofing that can be left out in the rain without the slightest damage.



The wearing surface is mineral matter embedded into a heavy coating of pitch and never needs painting.

We shall be glad to send you a sample of Amatite free of charge if you will send a postal request for it to our nearest office. The sample will show you what the mineral surface is like.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phrases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.50 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infiite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business, Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

MEN WHO SELL THINGS. BY WALTER D. Moody, Business Manager of the Chicago Association of Commerce. An indispensable book for merchants, manufacturers, employers, salesmen and all who have goods of any kind to sell. The author forcibly sets forth such themes as how to approach men; how to create and develop the compelling personality, the genial address, the engaging presence of the energetic business-getter; how to attract, convince and sell a prospective customer under adverse conditions; how enmity may be turned into friendship, interest into desire, curiosity into sales, and sales into permanent custom. A few of the subjects discussed are: Right Kind of Salesmen; Specializing Efforts; Letters to the Trade; Getting the Price; Retail Salesmen; Sales Manager, etc. 205 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

When writing advertisers kindly mention having seen the ad. in this paper.

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

A Bargain

must have two essentials in order to deserve the name—it must be useful and cheap.

Hardware and Metal

offers a real bargain in its Want Ad. Department. Here, at the lowest possible cost, you can place before the very persons most interested, **hardware men and men in the allied trades,** any respectable business proposition.

Here is Proof of the Value

SIXTY SWISS ARMY RIFLES, at $2.50 each. Box 920, HARDWARE AND METAL, Toronto. (48)

"WILWEAR"

BATH-ROOM FITTINGS

Years of experience in manufacturing bath room fixtures has made it possible for us to supply all parts of the world with medium price goods and the demand for WILWEAR to-day is of course greater than ever, simply because the prices are so reasonable the consumer is forced to admit they are necessities, not luxuries. They will buy six articles at a time instead of one if you handle WILWEAR made of heavy brass, highly polished and heavily nickel plated. Start the new year right. Send for catalogue "B" and other helps.

NOVELTY MFG. CO.
WATERBURY, CONN.

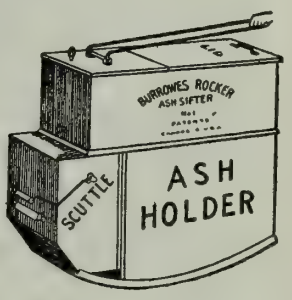
HEADQUARTERS FOR LAMPBLACKS

Old Standard, Eagle, Pyramid & Globe

GERMANTOWN LAMPBLACKS

are made by the largest and oldest lamp-black makers in the United States. They have proved that they are the world's best by open and international competition.
Why buy the Near Brand when the Best is Procurable?

The L. Martin Co. Established 1849
NEW YORK, PHILADELPHIA, CINCINNATI, LONDON, ENG.



This is the King of Ash Sifters

Attached Scuttle and Double Rims Confine All Dust to the Sifter.

The rocker motion with large space for ashes to spread over double screens means quick work. Large lid and convenient height. Nothing better to offer your customers. More sold in the last four months than the previous two years.

Reliable QUALITY

NOVA SCOTIA STEEL & COAL CO., Limited,

NEW GLASGOW, N.S.

Manufacturers of

FERRONA PIG IRON

and SIEMENS-MARTIN

OPEN HEARTH STEEL

Bright Tools

glistening in your show cases, reflecting back the light, showing their beautiful finish—a testimonial to the excellence of their workmanship. Can't you sell that sort better? Doesn't their brightness half make the sale for you?

Then insist that your jobber and manufacturer when filling your orders, supply all bright tools wrapped in

British-American Wax Paper

and your stock will arrive and remain just as bright as when it left the polisher's hands.

You and your staff have plenty to do without adding the drudgery of cleaning tools. And it will benefit the manufacturer and the jobber to wrap their goods in "British-American" because your appreciation spells more orders for them.

So drop them a line to-day.

Note the Contour of the Grooves

This is a head-on view of a Wilt Twist Drill showing the successive steps in its manufacture all made at a single chucking.

The dotted lines show the three roughing cuts and the finishing cut that takes off the last fifteen thousandth of an inch and gives the drill its final scientifically accurate contour.

Then before the drill is released from chucking the relieving cut is taken and the clean, well defined clearance is produced.

Wilt Twist Drills are made by a process that marks the most revolutionary progress that has been made in the manufacture of Twist Drills in a quarter of a century.

If your regular supply man cannot supply you with Wilt Twist Drills, write direct—we want you to try them.

The Wilt Twist Drill Company of Canada, Limited

Walkerville, Ontario.

Hated by Sneak Thieves

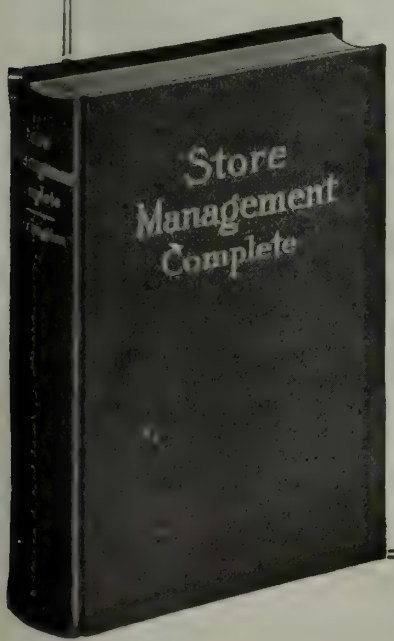
This Stanley No. 915 is a bona-fide Safety Hasp

It keeps sneak thieves on the right side of the door. It baffles the skill of intending intruders, who find no means for getting at the screws and balk at its great strength and resistance to a prying leverage

TRADE S.W. MARK

This trade Mark guarantees its genuineness and protects our patent on this 915 Hasp. You can supply yourself with four sizes: 3½, 4, 6 and 7 inch—The 7 inch being extra heavy, and strong. Plain Steel, Japan, Brass, Bronze or Antique Copper Plate, Galvanized or "Stanley" Sherardized. Stock them generously.

All Stanley Goods are ready for immediate Shipment.



The Stanley Works, New Britain, Conn.

A. McFarlane & Co., Montreal, Canadian Rep.

ARE YOU THE MAN AT THE HELM?

Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.

STORE MANAGEMENT COMPLETE

is a guide that will show you how to get the maximum trade and profit out of your business. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete.") It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

Ross Rifle Luck

Users of "Ross" Rifles invariably comment on their good luck, because the power is such that judging of distance is scarcely necessary, so if game is **seen**, it can be **hit** and **bagged**. Dealers are wise to order early, as, despite increased facilities, it is difficult to keep up with orders.

ROSS RIFLE CO. Quebec

An Easy Way To Sell Saws

ATKINS STERLING SAWS

Made in Canada. The Saws that pay **two profits.** The first is the largest legitimate profit of any manufacturer's brand. The second is the profit made by satisfying your best customers.

We'd like to tell you all about them and how "We Help You to Sell."

E. C. ATKINS & COMPANY

HAMILTON, ONT. **Vancouver Branch, 109 Powell St.**

We have moved to our new warehouse, Shaw and Dupont Streets. Owing to our floor space being trebled we are in a position to carry a much larger and more complete stock.

MEAKINS BRUSHES

Get the most particular of painters coming and keep them coming—with re-orders.

The materials that we use are selected with greatest care and put in "brush shape" by experts.
Meakins Brushes have the attractiveness and quality that appeal strongly to the trade.
We have made quite a large addition to our factory so as to give us more room to turn out **Flat Varnish Brushes**—a line of which we could not begin to supply enough last year.
We are now able to turn out any quantity of brushes we might be called upon to supply.
If your jobber does not handle the "Meakins Line" write us.
May we send our illustrated catalogue?

LOWE BROTHERS PAINT GIVES BEST RESULTS

There are some hardware dealers who, as far as the eye can see, are alert—up-to-date—keen for profits. They have clean, modern stores, resourceful, well-trained clerks. They use cash registers to get all that's coming to them.

They believe in brightly lighted windows and window displays—in fact, their stores are just about ready to pass as A Number One Hardware establishments. But—

The root—the heart—the very soul of the business, the PAINT DEPARTMENT, falls far short of being the progressive, up-to-date, trade-keeping, big-profit-making, business-in-itself that it ought to be.

That's because the boss hasn't just taken the time to sit down and reason out the paint facts of his business and his town.

To get to brass tacks—

YOUR Paint Department, Mr. Reader, is it honestly doing all the business you want it to? Are you honestly satisfied that you are giving your customers the very best paint their money can buy? Are you honestly sure you're getting the intelligent, reasonable, energetic, carefully-thought-out, plentiful, non-faddish advertising you actually want from your manufacturers?

If not—and if YOU are wide-awake and progressive enough to listen to a new idea in paint selling, tell us where and when we can meet you to talk it over. If we're not the men you want, you can soon tell us so. If you're not the man we want, we'll be just as frank. It isn't everyone we can work with and for.

To-day is the day to write us.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

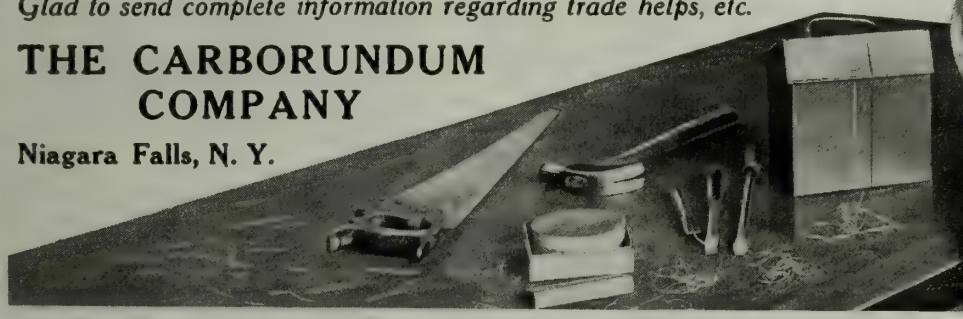
The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

In case lots of 24, $1.95 each. In broken lots, $2.05 each. Less 2%.

PETE SAYS: "When you take that inventory you will find a lot of gaps in your stock of Carborundum Products. Fill 'em up. See that you always have a complete stock of the hardest and sharpest.

"There is scarcely a customer that comes into your store but has use for

CARBORUNDUM



Go to it. Put ginger into your sales by being a Carborundum dealer. Use our window display material—take advantage of our advertising—and count the profits."

The Carborundum line includes sharpening stones, razor hones, knife sharpeners, scythe stones, razor strops, grinders, etc.

Glad to send complete information regarding trade helps, etc.

THE CARBORUNDUM COMPANY

Niagara Falls, N. Y.

This tool will drive a 5/8 in. hole into white pine or 3/8 in. into any grade of wood easier and quicker than a bit brace, and it gets into tight corners where you can't use a brace. One thrust of the plunger means three revolutions of the bit.

It will take any tool you can put into a brace. Great for driving large screws, tapping small nuts, or running them up on bolts. Takes very little room in the carpenter's tool box.

Display them in your window with a set of Boosters and Show Cards, which we will be happy to send you upon request. Shall we send you a supply of "Yankee" Tool Circulars with your name and address? Command us. Your Jobber sells the "Yankee."

Every mechanic will be quick to recognize the value of this "YANKEE" No. 75

How the Hardware Man Can Make Money Selling Farm Engines

Every farmer is a prospect for a farm engine. Thousands of engines are being sold annually throughout Canada. The agricultural papers are full of farm engine advertising and long articles on the many uses and economy of the farm engine. Farmers read these papers very closely and are buying engines as rapidly as they can afford to. Farmers must come to the hardware dealer for supplies, and while there will look at a farm engine if you have one in stock.

You can add to your profits by securing the agency for a reliable farm engine.

FAIRBANKS-MORSE FARM ENGINES

Have an international reputation for reliability and long service. Farmers like them and speak well of them. Fairbanks-Morse engines are made in Canada, and are backed by a strong organization. We relieve you of all responsibility. Our engines are made in all the common sizes for farm use. By representing us you can supply any size or type of engine the farmer may need. The Eclipse engine shown here is in universal use and would be a safe engine to carry in stock, as there would never be a chance of your having it left on your hands. It is easy to sell. We are selling them all the time direct to farmers.

Write us in regard to handling our farm engines.

BLACK DIAMOND HOCKEY SKATES

No. 300. Full Nickel Plated. Sizes, 10, 10½, 11, 11½ inches.

Our List Price per Pair, $5.30

Made from **the very best** materials and in a manner which gives it many advantages over other skates — advantages which are in plain sight and which can be pointed out to your customer.

The Foot Plate and Heel Plate are of Cold Rolled Steel, and are supported on Standards in such a way as to distribute the weight of the skater to advantage.

The Blade is of the Best Hand-Tempered Steel, and is beveled to prevent cutting too deeply into the ice.

Many of our customers who have been handling this Skate express much satisfaction with the reception it has received from skaters.

You might add this line to our Mutual Advantage.

"To Sit Down to Enjoy 'Paradise' is to Lose It"

The other day an old man—a sad-eyed derelict, a tramp—who had wasted the important years of his life, stood in front of a saloon, shaking his fist and cursing the place, not because he objected to the existence of these places, but because he was no longer permitted to enjoy the things which had brought about his failure and his undoing.

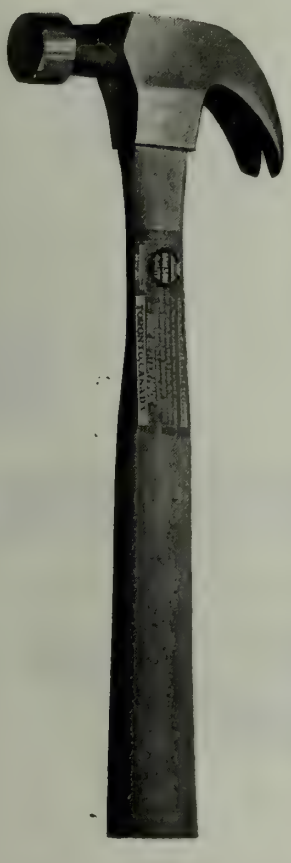
The great handicap the average man who is just coming out of college must overcome, is the idea that certain kinds of work are menial and degrading. This idea on the part of many college men is the result of having been supplied with the necessary funds to complete their college course, or to spend a number of years in college, during which time they are not actually self-supporting—all of which constitutes a period in the life of the average young man when he is apt to indulge in day-dreaming, in useless fancies, which take him away from the world of activity, away from the world of life and usefulness.

The problem of civilization is to set each individual to doing something useful, something worth while, and the ideal race will be evolved when each individual is set at work to do the thing which he is best fitted or prepared to do. This condition of things, perhaps, will never be reached because it is impossible for most of us to know what we are best fitted for until after we have passed the age of thirty—and, in reality, the crucial period or the great turning point in the career of the average man is between the age of forty and forty-five.

Many men at the age of thirty-five have succeeded to a certain degree, yet at the age of forty, when they have accumulated a little money, and are permitted to enjoy a few of life's pleasures of which they have been deprived, they neglect their business, neglect their responsibilities to enjoy the things which, perhaps, five years of success have placed at their disposal. This means a "letting-up" or a going-back in the career of an individual.

The only success in life which is worth while, the only success which is permanent and the only success worthy of the consideration of the real man is that success which shows a growth to-day founded on yesterday's experience. To sit down to enjoy 'Paradise' is to lose it. To sit under the shade of a tree and pine for the shade trees of the 'New Jerusalem' is to lose the benefit and pleasure of shade trees in this world and to lose also the opportunity to enjoy the shade trees of the 'New Jerusalem.'

We make ourselves worthy of better things only by using what we have. The only way we can successfully and consistently use what we have is to do well that which is placed in our hands to be done. The man who has nothing to do is not happy. The man who has unlimited money to spend without consideration or concern as to its production is not happy; because happiness lies in the pursuit of things and not in the attainment of them.



If we stop for a moment to enjoy or to indulge in "yesterday's success," we take a step backward toward imperfection, and there will be no success for us to enjoy to-morrow. The supreme degree of happiness, that is, the happiness which is most lasting, the happiness which is really worth while, the pleasures which are really substantial and which lend sunshine and gladness to all the hours and days of our lives, is the feeling that all work is useful, that the greatest sin is idleness, that the only happiness is to be employed at some useful work.

Too many young men start out in life facing work and responsibility as a great 'green dragon.' This idea is wrong, and no man will ever know what real happiness is until he realizes that all work is useful, honorable and worthy, and that all laziness and idleness is sinful, degrading and disgusting.

The Rope Was Plymouth

TUFTS BOYS FLEE FLAMES

Slide Down Ropes When Blaze Cuts off Escape.

Seventy-five Tufts College students of East Hall executed thrilling slides for life down rope fire escapes last night when a fire damaged the dormitory to the extent of $2000. The fire came near being marred by tragedy.

When the cry of fire was raised the students thought it a joke and declined to flee. By the time they came to a realization their escape was cut off.

Instantly all was confusion. Seizing hand extinguishers two instructors and a squad of students attempted to subdue the flames. The other students shook their ropes out of their windows and started to slide. Personal effects showered the ground around the burning dormitory as the frantic owners attempted to save their knick-knacks

Lives were saved in this case because somebody had taken pains to install dependable fire-escapes.

The escapes were equipped with Plymouth Rope which is strong, pliable and free from splinters—they did their work well.

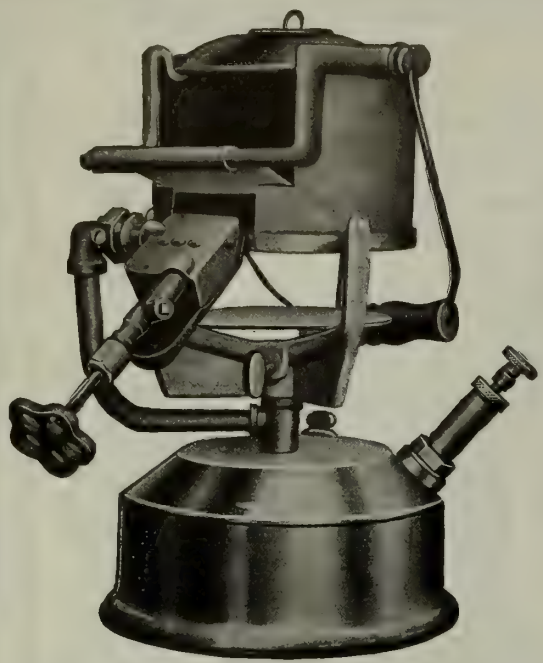
Here's the statement of the man who made them:

Lowell, Mass., Dec. 15, 1913.

"Your Plymouth Rope has always given the best of satisfaction."

DAVID D. SMALL.

You are in the same situation as this man—to satisfy your customers you must give them dependable rope.



See to it that *your* rope is Plymouth—the kind that is equal to emergencies.

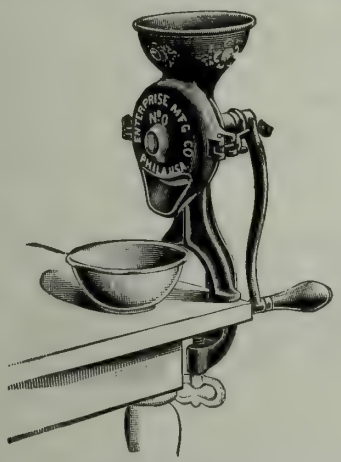
For 1914!

We're through with 1913, hard times, money-stringency, hoodoo—and all that; we've said good-bye to the old year—most of us without regret. 1914 is upon us and we all look forward to making it one of the best years we've had.

We expect that money will loosen up, that there'll be a return to the vigorous trading of a year or two ago. And we're not going to be disappointed.



But it depends largely on you, on the skill and judgment that you use in selecting your new stock, whether you get your fair share of the returning good times, or not.

And that's why you cannot afford to overlook the profits and good-will producing qualities of the

ENTERPRISE

line of patented Hardware specialties. That's why Enterprise food choppers, sausage stuffers, coffee grinders, etc., should not only find a place in your store, but should have your best sales effort behind them.

We illustrate here, just three out of our many products, because there is a big demand for them at this time.

Coffee Grinder

Enterprise Tinned Food Choppers in two sizes—family and large—for all household food chopping purposes, appeal to your housewife patrons because they open up the way to many delightful dishes—to many domestic economies.

The Enterprise Sausage Stuffer and Lard or Fruit Press, is a thoroughly efficient machine, at a moderate price. Its many special features, such as the Patented Corrugated Spout which keeps all air out of the sausage and the latch which prevents breakage of plates, make it distinctive.

And Enterprise Coffee Grinders are for all who appreciate a good cup of coffee, and know that to get it, the coffee must be ground fresh each time.

Sausage Stuffer and Lard Press

Get in line for those 1914 profits by sending for our price list now.

Yours just for the asking.

STARRETT

Make a Guess on the Total Hack-Saw Sales in Your Locality

Then determine *your* quota by dividing this total by the number of hardware stores that may supply that demand. Now why not sell more—much more than your theoretical allotment? You can if you will just profit by the experience of other dealers. Their results prove that

Starrett Hack Saws Will Increase Your Sales

In the first place Starrett Hack Saws have good talking points. There is a Starrett for every job. You can point out that for cutting everything from brass tubing to steel I-beams there is a hack saw made to cut quicker and last longer. That is our hack saw slogan, "cut quicker, last longer." Rem ember it.

Then the steel these saws are made from is special Starrett tungsten steel. The tungsten gives great hardness without brittleness which comes from hardening ordinary steel.

But more important than the sales points, is the actual service Starrett hack saws give. When you sell a Starrett it gives long service and absolute satisfaction throughout its life. It cuts quicker than other saws and it lasts longer. That is why a stock of these saws will increase *your* hack saw sales.

Let us send you our catalog No. 20MA so that you may help select the proper saws for your customer's work.

1883 WRIGHTLIGHT 1913

Short Globe Lanterns have behind them the guarantee and backing of the oldest established firm of Lantern manufacturers in Canada.

It was in 1883 that E. T. Wright & Co. turned out the first Canadian Tubular Lantern, and to-day (30 years afterwards) the same firm under the same management, are still the pioneers of the Lantern world.

Our **WRIGHTLIGHT** Lantern is the latest product of thirty years of Lantern experience. Let us tell you at least a few of the **WRIGHTLIGHT** exclusive features, which are not found on any of the Canadian imitations of our Lantern—

NON-DETACHABLE WIRE EARS AND BAIL—This patented idea of ours makes it impossible for the handle to work loose or drop off. The Lantern must be torn to pieces before the handle will break away.

RISING CONE—The burner cone is attached to the globe disc, and rises with the globe when you are ready to light the Lantern. This leaves the wick exposed ready for the match, and insures a perfect fit when the globe descends.

And then there is

THE SHORT GLOBE, which allows the hand to be easily inserted for cleaning purposes.

TO CORRECT A FALSE IMPRESSION that is being circulated among some of our Lantern friends, let us assure them that all patent rights in connection with our No. 3 **WRIGHTLIGHT** Short Globe Lantern are vested solely in ourselves, and are nobody's concern but our own—and our lantern friends, who benefit by them.

Buyers who prefer a full-length globe will find that our No. 4 Cold Blast Pattern will answer their requirements perfectly.

A large stock of both patterns on hand always, and prompt shipments a certainty.

Vol. XXVI. JANUARY 10, 1914 No. 2

Fighting Mail Order Competition

Business of Mail Order Houses is Increasing—Their Operations Are Extending—Parcels Post Will be Worked Hard—Retailers Should Fight Competition.

DURING recent years Canadian mail order houses have made great strides in securing trade, particularly in the smaller towns and rural communities.

With each succeeding year the operations of the mail order houses are extended into new communities, and the volume of business secured by these large firms shows a steady increase.

These mail order firms are becoming so powerful that they now own or control the output of several factories

They also hold large interests in daily newspapers.

Another force which the mail order houses will use to secure business will be the parcels post system, which we expect will be inaugurated during the next two months.

The introduction of parcels post will undoubtedly be of great benefit to mail order houses, but not to the extent that they would have benefited had a flat rate system been decided upon.

Under the zone system, if the local zone rate is low, the small merchant will have a good chance to compete with the mail order house.

With the advent of Parcels Post, increased activity will be noticeable on the part of mail order firms.

They will use every effort at their command to induce the public to order by mail. The moment the final announcement is made that Parcels Post will become operative on a certain date, the mail order houses will flood the country with announcements regarding what they will claim to be the "the advantages of buying direct by Parcels Post.

Canadian retailers can take fair warning from the extent of the mail order business in the United States.

According to a report of the American Fair Trade League, 20 per cent. of the total retail business of that country is secured by mail order houses.

The report also states that retailers in the smaller towns are continually losing ground. This is a serious condition for the small dealer, and no time should be lost by Canadian dealers in devising plans to prevent such a condition of affairs from infecting this country.

In order to prevent the loss of a vast volume of business to the retailer, various methods will be found necessary.

Methods that would prove successful in one locality might not prove satisfactory or effective in another.

Each dealer must, to a great extent, study out his own system. Locality, needs, and occupations of customers must be taken into consideration.

A class of goods that is a good seller in one locality might be a poor seller in another. The dealer must study the needs of his customers, and sell the people what they want.

Mail order houses are extending their operations.

Each dealer has a much better opportunity of studying the needs of the people in his immediate vicinity than the mail order houses have.

Studying the needs of your customers, however, is not all. You must let the customers know that you have the goods.

If the mail order house did not tell the public (by catalogues giving illustrations, descriptions and prices) of the goods they have to offer the chances are that their sales from a mail order standpoint would be practically nil.

Retailers should always remember that, in addition to studying what the people need, the dealer should also let the people know what he has in stock.

One of the strong points of the mail order houses is what they call good and efficient service. They also work on the principle that the customer is always right, and one of their chief aims is to always have satisfied customers.

The mail order house has to show the goods on paper, the local dealer has an opportunity of showing the actual goods to his customers.

In dealing with a mail order house the customer has to part with his money before he sees the goods; not so when dealing with a local merchant.

There is also a delay of considerable length in getting deliveries from mail order houses. In a catalogue issued by a large mail order house the statement is made that the mail order house in question receives daily dozens of letters asking why orders have not been shipped. This is conclusive proof and an admission on the part of the mail order house, that a good many customers do not receive their orders as soon as they expect them.

Another objectionable feature which retailers can point out to their customers is the fact that goods shipped from mail order houses are often liable to be damaged in transit, necessitating delays and other disagreeable experiences with transportation companies in getting claims adjusted.

Prices charged by mail order houses are in many cases about the same as those charged by dealers in small towns. In some of the larger places some lines are sold at even lower prices than those charged by the mail order house.

In the accompanying panel a number of price comparisons are shown. These comparisons were made on articles of similar brand or quality. One line—scales, for instance, shows a big difference in price, but in other lines there is very little difference.

The secret of the success of the mail order houses in Canada is not so much the fact that their prices are low. It can be attributed largely to the fact that they let the people know they have the goods, and are very open in quoting their prices.

The very fact that the mail order houses quote prices openly and fearlessly (even though the prices are not always low) leads people to believe that the prices must be right, or they would not be published and distributed.

Retail hardwaremen should start immediately to work out plans to make the new Parcels Post system beneficial to them. When the new system commences the retail hardware dealer will have three splendid forces to help him—viz., rural mail delivery, parcels post and rural telephones.

These three forces can be harnessed by the dealer, and used to secure business for him, instead of allowing them to be used principally for building up large revenues for the mail order houses.

HARDWAREMEN IN MUNICIPAL ELECTIONS.

Among the hardwaremen recently elected to municipal offices are the following:—W. Black, elected for fourth term as Mayor of Durham, Ont.; J. A. Wallen, elected for second term as Mayor of Newmarket. Milton Adams, of Adams & Vandusen, Picton, Ont., was elected for Mayor for a second term.

Aldermen elected were: H. Occomore, hardware merchant, Guelph, Ont.; Thos. Houghton, hardware merchant, Parkhill, Ont.; W. S. Smith, of Smith Hardware Co., Belleville, Ont.; H. P. Morgan, hardware merchant, Peterboro, Ont.; J. H. Christie, of Christie Bros., Owen Sound; W. Bartlett, of the St. Mary's Hardware Co., St. Mary's, Ont.; W. Wright, of Wright's Hardware, Strathroy, Ont.; S. Penfold, of S. & G. Penfold, Guelph, Ont.; Ed. Wanless, of Wanless Hardware, Chatham, Ont.

E. J. Creeper, of Creeper & Griffin, Owen Sound, was elected as school trustee; J. H. Crowe, of Welland, was elected as deputy reeve.

BONUS FOR EMPLOYEES.

In December, 1912, the L. S. Starrett Co., of Athol, Mass., by a vote of the directors decided that on account of a very successful year's business, they would pay to each employee a sum equal to two per cent. of the total wages paid him during the year, which, for those who had worked with the firm the full year, meant about one week's extra pay.

On Dec. 24 of the year just passed the firm sent notices to their employees giving a review of the year's business, and the following announcement:—

At this Christmas time we wish you all happiness, and take pleasure in informing you that at the meeting of the directors of this company held the 10th instant, a vote was passed similar to that of last year, namely that this company, pay, as soon after the first day of January, 1914, as practicable, to each person in the employ of the company on that date, a sum equal to two per cent. of the entire amount of wages paid to such employee during the year 1913.

MASTER PAINTERS' CONVENTION.

Preparations for a record-breaking attendance at Indianapolis, February 10 to 13 inclusive, are being made by the International Association of Master Painters and Decorators of the United States and Canada for their annual convention.

The convention is not confined to members of the Association itself, but cordial invitations are extended to, and special arrangements are being made for the entertainment of everybody in anyway connected with the paint industry.

Amendment to Weights and Measures Regulations

No Scales to be Admitted to Verification as Family or Household Scales—Manufacturers' and Dealers' Stocks May be Inspected and Stamped for a Period of Sixty Days from Date of Order.

IN the January 3rd issue of Hardware and Metal a notice appeared, regarding an order in council which had just been passed, amending the weights and measures regulations of the Inland Revenue Department.

Hardwaremen will be particularly interested in the new regulation regarding the importation and manufacture of dead load spring scales.

In this issue we will go more fully into the new regulations, and publish extracts in which hardware men particularly are interested. The amendments became operative from Jan. 1, 1914.

Dead Load Spring Scales.

No spring scale of the dead load type and no spring scale of the combined lever and spring scale type except such as are constructed upon the correct knife-edge principle and approved by the Department of Inland Revenue shall be manufactured in or imported into Canada except as herein otherwise provided for, and no such spring scale shall be sold, offered for sale, taken into use, or kept in stock under the penalties provided for by section 65, etc., after sixty (60) days from the date hereof, and that all such scales now in use and daily inspected and stamped according to the weights and measures regulations, may continue to be used and periodically inspected and stamped as required by law until found incorrect and incapable of being made correct without the renewal of some fundamental part of their mechanism."

Exceptions.

Dead load scales may be inspected and stamped for the weighing of ice only, when found to comply with the following regulations:—

Ice Scales.

Ice spring scales.—Suspension spring scales of the dead load type, straight dial, pull down class, may be admitted to verification for use in the ice trade, when approved by the Department of Inland Revenue under section 15 of the regulations and when permanently stamped or branded in bold legible letters with the words 'Ice Scale," a consecutive shop number and the maker's name.

The scale shall be graduated into equal parts, the value of the graduations complying the regulations set down in the new order.

A lead or soft metal plug shall be provided for the reception of the stamp of verification and inspection.

Should any of the scales be found in use for any other purpose than the weighing of ice, they shall be at once seized and confiscated and the user liable to the penalties provided by section 65, etc., etc.

Other Exceptions.

Sportsman's spring balances, when of the Pocket Tubular type, and not exceeding 15 pounds capacity, may be sold unstamped.

Photographer's scales used for solution mixing, when permanently branded "Photographer's Scale," and not exceeding 16 ounces in capacity, may be sold unstamped.

The spring scale known as the Farmer's milk scale, having two pointers, shall, when approved by the Department of Inland Revenue under Section 15 of the Regulations, continue to be inspected and stamped as provided by Circular G. 1072, amended by G. 1090.

Auxiliary spring scale attachments used in conjunction with, and over the mechanical ratio of lever scales, for automatically indicating parts of the load weighed, may be permitted when approved by the Department of Inland Revenue under the provisions of Section 15 of the Regulations, and when the weighing to be done is not required to be of the regular trade fineness.

The barrel-shaped Hanging Spring scale, with double rack and pinion, one at each end of the drum, and with thermostat attachment, may continue to be inspected and stamped when otherwise complying with the Weights and Measures Regulations.

(Continued next page.)

SMALL REDUCTION IN INSPECTION FEE.

The Federal Government must have anticipated the deputation of merchants at coming session. The following section of the Order-in-Council notes a small reduction in the annual inspection fee—but so small it scarcely can be seen:—

"That the Order in Council dated June 5, 1911, amending Order in Council dated April 21, 1908, establishing a rate of two-thirds of the ordinary fees as respects scales inspected oftener than biennially, shall be and the same is hereby repealed, and the following established in lieu thereof:—

"The fee to be charged for the periodical re-inspection of all scales which are inspected oftener than biennially, shall be at the rate of 60 per cent. (i.e., three-fifths) of the regular schedule of fees established by Section 21 of the Weights and Measures Regulations, Order in Council dated December 17, 1898, when the regular fee, or the sum of the fees due at such inspections, amounts to $1 and over.

"When the Inspection of Scales is requested to be periodically made once, or more frequently than once every three months, the fee to be charged for such periodical inspections shall be at the rate of 30% or 3-10 of the regular fee, as established by Order in Council dated December 17, 1898, provided that such fee or the sum of the fees due at such inspections, amounts to $2 or over.

"In those cases where extra fees are collected for scale weights, this 60 and 30 per cent. rate shall apply to the local fee collected, including both scale and weights.

"The full fee provided by Section 21 of the Regulations herein referred to, shall be charged for the original verification of all scales."

SELF MEASURING PUMPS.

That the following regulations be established as regards self-measuring pumps:—

1. *All stops where there are such, and piston rod adjusting mechanism, must be so arranged that they can be sealed with a Lead Plug, a wire and lead seal, or with a cap and wired lead seal.*

2. *The amount of oil delivered must be the same whether the pump is worked rapidly or slowly; it shall also be correct whether the pump has been standing unused for several hours or days or not.*

3. *Each owner or user shall provide a set of cylindrical standard measures of capacity, to include at least one quart, and one gallon measure, for the use of the inspecting officer.*

Failure to comply herewith shall render such owners or users liable to all the expenses incurred by the officer in procuring such necessary measures, and for the actual expenses incurred in making a second visit, should the same be rendered necessary.

4. *The amount of liquid delivered shall be correct within the toleration of error provided in the following table:—1 quart, 6 fluid drams; ½ gallon, 1 fluid oz.; 1 gallon, 2 fluid oz.; 2½ gallons, 3 fluid ozs.; 5 gallons, 4 fluid ozs.;* 10 *gallons, 6 fluid ozs.*

The above tolerations are for original verification; twice these tolerations on subsequent reinspection.

5. *Each capacity stop must be permanently branded with the capacity it is intended to deliver. If all the stops are controlled by one handle over a graduated quadrant, such individual branding will not be necessary.*

6. *Each pump shall be permanently branded or labelled with the maker's name, shop number, and its maximum capacity.*

Household and Family Scales.

That Section 7, paragraphs 3 and 4, of the Order in Council dated December 17, 1898, and also the Order in Council dated December 6, 1910 (G. 938), be repealed, and the following substituted therefor.

"No weighing machine of any type whatever shall be admitted to verification as 'family' or 'household' scales only. All weighing machines submitted for original verification and stamping hereafter must comply with the regulations provided for Trade Scales of their respective class.

Provided, that manufacturer's and dealer's stock of such scales may be inspected and stamped for a period of sixty days from the date of this order in council.

Weight Graduations.

The weight graduations on beams and dials of all weighing machines shall be equal amongst themselves unless otherwise specially authorized by the Department of Inland Revenue under Section 15 of the Regulations.

Provided, that manufacturer's and dealer's stock of machines having unequal graduations may be inspected and stamped for a period of sixty from the date hereof, and that such machines already stamped may be periodically inspected and stamped when found correct.

Computing Scales.

The order in council dealing with computing scales is of particular interest to retail grocers. It reads:—

"That Section 7, paragraph 6, of the Regulations, Order in Council, December 17, 1898, be repealed, and the following substituted therefor:—

(1) On and after the date of this Order in Council, Computing Scales shall be verified both as to the accuracy of the weighing machine proper and also as to the accuracy of the money valuations.

(2) If the scale satisfies the conditions provided by the regulations for its special class, the computing chart shall be tested through a complete range of money valuations.

(3) The indicating line shall not exceed 1-32 inches in thickness nor be distant from the chart more than 1-16 inches, or such that by shifting the eye to either right or left, up or down, an appreciable error in the reading will result.

(4) A computing chart in which there is more than one figure of the same denomination in the same column or row at a given price per pound shall not be stamped.

(5) The lens or magnifying glass must be wide enough to give a clear

(Continued on page 44.)

FEES FOR INSPECTION.

Ice Scales not exceeding 100 lbs. .....20 cents.
Ice Scales not exceeding 300 lbs. .....30 cents.
Ice Scales not exceeding 500 lbs. .....50 cents.
Self Measuring Pumps not exceeding 2 gals., 50 cents.
Self Measuring Pumps not exceeding 5 gals., 75 cents.
Self Measuring Pumps not exceeding 10 gals., ..$1.00
On glass measures the fee must not exceed:—
1 gallon measures, 20 cents.
½ gallon measures, 15 cents
1 quart and under, 10 cents.

DRY MEASURES OF CAPACITY.

1. *All dry measures of capacity of one bushel and under shall be of circular cylindrical form, and the external diameter shall not differ by more than 5% from the depth or double the depth.*

2. *Measures made of wood of the capacity of one gallon and upwards shall be bound or strengthened with metal or wooden straps or hoops. A metal band shall be placed around the rim of all wooden measures of the capacity of one peck and over.*

3. *Measures of over one-half (½) bushels shall be provided with handles.*

4. *Double ended or reversible measures, that is, measures with one bottom part of the way up, one side being used for one capacity and the other side for another capacity, are not permitted. Bottomless measures are also prohibited.*

5. *The use of liquid measures of capacity instead of dry measures for the sale of dry commodities is forbidden, and all liquid measures of capacity found in use for such purpose shall be seized and confiscated, and the user liable to penalties provided by Section 65 of the Weights and Measures Act, Chapter 52 R. S.*

6. *The toleration of Error for Measures of Capacity shall be as provided by Section 29 of the Weights and Measures Regulations, amended by this Order-in-Council.*

Using Parcel Post to Get More Rural Business

Where There Are No Rural Phones the Ready-Made Post Card Presents Itself—Suggestions on Obtaining Mailing List of All Country People Supplied by Rural Free Delivery—Get in Ahead of Mail Order Houses.

WHETHER or not a country community has rural telephones, if the government is giving it a rural free mail delivery, the nearby village, town and city dealer will have a splendid opportunity of obtaining good business under the new Parcel Post service we are promised this or next month. The rural phone, of course, makes it convenient to call up one's customers and probables and suggest that certain articles be sent out by Parcel Post. This phase of the question was gone into fully two weeks ago in the first of a new series on this question.

But what about country districts where there are no rural phones? Also what about customers on rural phone lines who have no phones installed? How are they to be reached in order that they may secure some advantage of the new system and that mail order houses will be beaten to the business?

The Ready-Made Post Card.

The obvious answer is—use the return, addressed post-card. It will cost but little to have a few hundred of these printed and tried out. They should be ready for distribution at least the moment the Parcel Post system is ready to open up its wings over us. That means almost any time now—probably within two, three or four weeks.

A sample card is herewith suggested. It points out to customers living in the country that they have an opportunity to take advantage of a new system under the auspices of the Post Office department at Ottawa. It gives them information in brief about the terms of the new plan. It contains a ready-made letter to yourself with blanks left for listing the goods required. In short, it permits the customer to send in an order with the least possible work and loss of time on his or her part. A post-card such as this, should be "ready-made." The less the customer has to do, the more readily will he do it.

The Preparation Work.

A course somewhat similar to that mentioned in the first article of the series might be followed up to a certain point:—

(1)—Get from post office list of all rural free mail delivery routes in the district.

(2)—Secure from post office or from the men who have the contracts for delivering mails into the country, a list of all farmers and others on these routes. (Another method would be to get the names from the farmers' mail boxes on the roadside.)

(3)—Divide these names into two lists—customers and non-customers.

(4)—Have post cards printed containing your name and address on one side and instructions, return letter and blanks on other, allowing several cards for each customer and a few for each non-customer.

(5)—As customers come into the store give them their cards explaining their use. Cards of others should be mailed with an explanatory letter.

(6)—Tabulate results, checking off list, names of those who have responded.

(7)—After lapse of a couple of weeks, those who have not sent in an order should be reminded again of this service and urged by a judicious letter to at least give it a trial. Follow up non-respondents until you are assured you are securing all the business possible to obtain in this way.

If You Don't Someone Else Will.

Every dealer, in discussing in his mind, whether he should attempt this idea or not should remember that the mail order houses will work it for all they are worth. They no doubt have already their plans well laid, ready to jump into the game as soon as the Postmaster-General blows the whistle. It will not do for the retail merchants of Canada to sit passively by and watch these distant houses corral more of the trade of the country district. They are getting enough now, Providence knows, and why should they obtain more? Retailers should ever appreciate the fact that only their own aggressiveness is going to stop the tide of money becoming centralized in the big catalogue houses of our metropolitan cities. They have money, and power to sway many of our parliamentary representatives through the big metropolitan daily papers which are often used as their tools. So it is up to the trade to use every available means within its reach to beat them at their own game—to be just a little more aggressive than they.

MAIL THIS CARD FOR RUSH ORDERS

The new Parcel Post Bill passed by Parliament which comes into effect January permits us to send you parcels by mail up to 11 pounds in weight. The rural mail delivery man takes them to your gate. Fill in the blanks on this card with the goods you want and mail it to us. You will get the goods next day.

A. H. HARVEY, 75 Centre St., Jonesville.

Dear Sir—Send me the following goods by Parcel Post:

Yours very truly,

MRS. _____.

R. M. R. No. 4.

Above is one suggestion for a return private postal card to be used when we get Parcel Post. On opposite side should be dealer's name and address and place for 1 cent stamp.

PARCELS POST EXPECTED WITHIN A MONTH.

Ottawa, Jan. 2.—The final arrangements for inaugurating the parcels post system are expected to be concluded when Hon. L. P. Pelletier returns to Ottawa early next week and it is probable that the service will be commenced within a month. The railway subsidy question is the only feature to be settled.

The impending inauguration of the parcels post is causing the department to be flooded with all sorts of devices for carrying agricultural and dairy produce. The devices consist principally of corrugated paper boxes suitable for the transport of eggs and butter.

HARDWARE AND METAL

VOL. XXVI. No. 2 Toronto, Canada, January 10, 1914 Two Dollars per Year

THE BUSINESS OUTLOOK.

CONDITIONS are developing along the lines laid down. Business is quiet, perhaps a little more than seasonably so, but not more than had been expected by even the most sanguine. It was almost universally predicted toward the end of the year that the first few months of 1914 would be quiet and that the real improvement would come with the late summer and fall months. Coupled with this was the belief that a steady improvement would be maintained during the early months, worked up to the period when the real impetus toward sweeping prosperity would be felt. This also is being borne out for various reports are received of brightening lines. Reports from the metal markets are particularly bright, there being a decided stimulus noted in the demand for metals. This naturally reflects a more active tone in manufacturing. Not in any quarter is there much evidence of real anxiety or of fear for the future after the next three months have been passed.

THE REAL MAIL ORDER MENACE.

THE MENACE of the mail order houses does not exist in the fact that the catalogue price is lower than the retail price. The table of comparative prices published elsewhere in this issue establishes the fact that on many hardware lines at least, the mail order catalogue does not offer the people any considerable reduction under the prices that the retail hardwareman offers his goods at—certainly not enough of a reduction to outbalance the disadvantages of buying by mail.

The growth of the mail order business can be attributed to one factor, therefore. They have developed a new field. The farmer living some distance from town seldom sees a newspaper and rarely gets in to visit the stores. Up to the time that the big catalogues began to circulate, he was left pretty much to himself, to buy what necessity impelled or his desire dictated. He was practically an unworked prospect. The mail order houses realized the opportunity and they began to reach this unworked prospect by a publicity campaign conceived and carried out on a gigantic scale. And it worked; fully up to the expectations of the men who had grasped the idea. The isolated buyer saw things in the catalogues reaching him which would never have appealed to him otherwise, but which now aroused the desire of possession. His wife caught the fever faster and in a more virulent form than he did.

The remedy from the standpoint of the local dealer is to reach the isolated buyer as well. It can be done in various ways, by advertising, by keeping up a well-stocked and thoroughly attractive store, by giving the best of service. The last consideration in a sense includes all the others.

GIVE THE CLERKS A CHANCE.

A NUMBER of hardwaremen have signified their intention of taking, or sending, one or two of their clerks, to the exhibition and convention to be held in Ottawa, Feb. 16 to 21.

This is a commendable move on the part of the retail merchants.

The hardware clerk attending meetings of this kind, will receive many valuable pointers, and much interesting and up-to-date information, which will reflect to the advantage of the firm he represents.

The clerk attending the exhibition will have an opportunity of meeting manufacturers, and getting information, which will aid him in making sales. He will also come in contact with many new lines of goods which have been produced during the past year.

The live topics which he will hear discussed at the meetings of the retailers will also be interesting and educative.

The cost of sending one or two clerks to Ottawa will not be high, and the money thus expended will prove a splendid investment.

WEIGHTS AND MEASURES.

HARDWAREMEN will be particularly interested in the new amendments to the weights and measures regulations of the Inland Revenue Department. Elsewhere in this issue the new amendments are published.

Many hardwaremen in all parts of Canada now have in stock, scales which come under the heading of Dead Load Spring Scales. The sale of these scales is apparently to be prohibited after 60 days from Jan. 1, 1914.

If the new regulations are carried out, and no further time extension is allowed, the chances are that some dealers will have scales on hand, which under the new law are not saleable.

Retailers in order to be on the safe side, should try and dispose of their present stock of these scales in order to protect themselves from loss.

PREVENT CO-OPERATIVE LEGISLATION.

IT IS quite evident that another attempt will be made this coming session at Ottawa to push through a Co-operative Bill designed to extend special privileges to the few. Among the requests made by the Western grain-growers deputation at the Capital recently was one asking for permission to establish and operate co-operative stores in the West without having to go through the formalities of the Joint Stock Companies Act.

If these co-operative associations are in any way different from joint-stock companies and therefore entitled to special consideration, we are from Missouri, and want to be shown. This should be the attitude of every merchant in Western as well as Eastern Canada. Merchants out west organized pretty thoroughly during the past year and are now in position to bring great force to bear on their Federal representatives. But they must act NOW. They should not wait until a Bill has been introduced into parliament. Now is the time to formulate plans and demand of their representatives that no special privileges shall be given. Co-operative stores are being formed today. That is probably all right. They come under the Joint Stock Companies' Act, but they should never be given class legislation—and only the merchants can prevent it.

POINTED EDITORIALS.

Have you reserved accommodation for the Ottawa Convention?

* * *

Give your clerks a chance to attend the Ottawa Convention.

* * *

Prepare for the coming of Parcels Post.

* * *

A more active tone is shown in the metal markets; the most hopeful sign yet.

* * *

Stock-taking will show up many lines of slow sellers. Make an effort to dispose of them.

* * *

Only seven weeks to dispose of scales, which will be banned under the new regulations.

* * *

Parcels Post is getting uncomfortably close. Are you ready to cope with the new conditions?

* * *

Happy is the man who is happy in his work. Every really efficient man is never more happy than when at work.

* * *

One Toronto hardware merchant dressed a paint window this week. What are you doing to promote paint sales.

* * *

Those "resolves" are probably all "busted" already, but keep going along trying to do the best work in you just the same.

* * *

Why should the merchant pay the shot for weights and measures inspection, when every other form of inspection in the interests of the public is paid for by the public?

The Paint Situation

DESPITE the fact that during the year just passed, a great deal was heard about the financial stringency, etc., paint manufacturers appeared to be busy, and in the majority of cases reported that the year's business was very fair indeed.

Hardware and Metal has received a letter from one of the leading paint manufacturers dealing with conditions of the past year, and the outlook for the future.

Extracts from the letter are here appended:

During the year 1913 we found that the demand for paints and paint materials of all classes was very steady and good, and that an increase was realized over all previous years. This we attribute largely to the fact that the general public is growing in its appreciation of ready prepared paints, and this appreciation is leading them to its more general use in the up-keep and preservation of their buildings. We also feel that property owners are realizing more and more the value of good paint and good painting in the preservation and conservation of property. The demand of manufacturers for paints and varnishes, while not showing any phenomenal increase has been steady and we consider perfectly normal.

While increases this year may not be expected to be as large as in the past, yet staple demand for paints of all classes will be normal and we expect steady, with perhaps slight increases in certain lines.

It is highly advisable on the part of both retailer, jobber and manufacturer that long credits should not be extended, and that with careful attention to collections and close economy in internal administration that these three parties should not be at all alarmed over the present slight depression that hovers over the country.

Attention to such items as these will do a great deal to keep trade steady and in the right lines, and to also bring it back to its normal condition which will allow this country to assume the marked progress to which it is entitled. We feel that taking all things into consideration a general note of optimism can be struck in regard to the outcome for 1914.

The remarks from one of the leading manufacturers of paints encourages the belief that there is a growing inclination on the part of the public to use ready-mixed paints in preference to the hand-mixed product which held sway for many years.

Much of the old-time prejudice on the part of painters has died out, and many of the largest painting contractors are now heavy users of ready mixed paints.

As recommended in the letter, retailers should pay strict attention to credits.

Retail merchants should enjoy a large paint trade during the present year.

An early start is half the battle, and merchants should begin, as soon as the stock-taking period is completed, to start their 1914 paint campaign.

Hardware Manufacturers Offer Prizes

Two Prizes Offered to Salesmen Sending in Largest Number of Reservations.

The Canadian Hardware Manufacturers' Exhibitors' Association are offering two prizes to the travelling salesmen who will send in the greatest number of dealers' reservations, for railway and hotel accommodation, at the convention to be held in Ottawa from February 16 to 21.

Prizes.

The first prize will be $25 in cash, and the second prize a round trip ticket to Ottawa to attend the convention.

The competition is open to salesmen of exhibitors, or jobbers only, and application blanks may be secured by applying to F. M. Tobin, sec.-treas. Canadian Hardware Manufacturers' Exhibitors' Association, Woodstock, Ont.

Arrangements for the Exhibition and Convention to be held in Ottawa next month are progressing rapidly, and a large attendance is expected. A large number of new features will be introduced during the Convention.

A number of very important questions will be taken up by retailers at the coming season.

Those who are contemplating attending the Exhibition and Convention should lose no time in making their reservations.

Excellent arrangements have been made by the Manufacturers' Association for the accommodation of visitors, providing the latter send their reservations in early.

Special trains will leave Toronto and Montreal on Monday, 16. Special cars will be reserved for ladies.

Special Rates.

Round trip Toronto to Ottawa and return, including five days' room at either Chateau Laurier or New Russell Hotels, will cost $12.70.

Round trip Montreal to Ottawa and return, including five days' room at either Chateau Laurier or New Russell Hotels, $8.45.

These rates are exceptionally low, and are easily within the reach of all hardware men.

ADDITION TO S.-W. P. STAFF.

The Sherwin-Williams Co. announce the addition of L. B. Moore to their staff of travelling representatives.

Mr. Moore was born and educated in St. John's, Nfld., and he graduated from the Methodist College there. His first experience in the business world was with the T. B. Clift & Co., commission merchants, St. John's, Nfld., with whom he remained for four years. For the past few years he has represented the Union Blend Tea Co., of St. John, N.B., his territory covering Newfoundland, Nova Scotia and Massachusetts.

Mr. Moore's experience and familiarity with local conditions in the Maritime Provinces and Newfoundland, coupled

L. B. MOORE,
who has joined the S. W. P. sales-staff

with his personality, will undoubtedly ensure his success as representative of the Sherwin-Williams Co. in Prince Edward Island and Newfoundland.

AMENDMENT TO WEIGHTS AND MEASURES REGULATIONS.

(Continued from page 40.)

view of at least three money value indicating lines in that column or row showing the lowest price per pound.

In the accompanying article, the extracts taken from the new regulations of the Inland Revenue Department, are those in which the hardware dealer is likely to be most interested. We will gladly supply any of our readers with further information regarding toleration of error, weight regulations, etc., if they desire this information.—Editor.

(6) The minimum space between one-cent graduations shall not be less than 1-32 inches, and all money values up to and including 35 cents per pound shall give 'cent' valuations; over 35 cents per pound the minimum space between consecutive graduations must not exceed 5-cent valuations.

Testing.

"The money values shall be tested through the entire range of valuation at each pound-weight graduation and at each aliquot division of the pound, that is, at the ¼, ½, and ¾ marks.

"If the scale and computing chart are both found correct, the machine shall be stamped, and the certificate shall certify to the correctness of both.

"If the scale is correct, but the computing chart incorrect within the provisions of these regulations, the chart alone shall be condemned by means of an adhesive or other rejection seal provided by the Department. If the owner or user objects to such labelling of the chart, then the machine shall be tagged and sealed with the usual rejection label and its use forbidden.

"The provision of this Order in Council shall apply to all computing scales submitted for original verification after the date hereof; but nothing contained herein shall affect the periodical inspection of computing scales duly admitted and inspected prior to the coming into force of this order in council, but no such scale shall be reinspected after fundamental repairs unless the chart is also made to pass inspection."

Glass Measures.

Section 19 states that 'glass' be added as a material of which measures of capacity may be made, and admitted to verification under section 19 of the regulations.

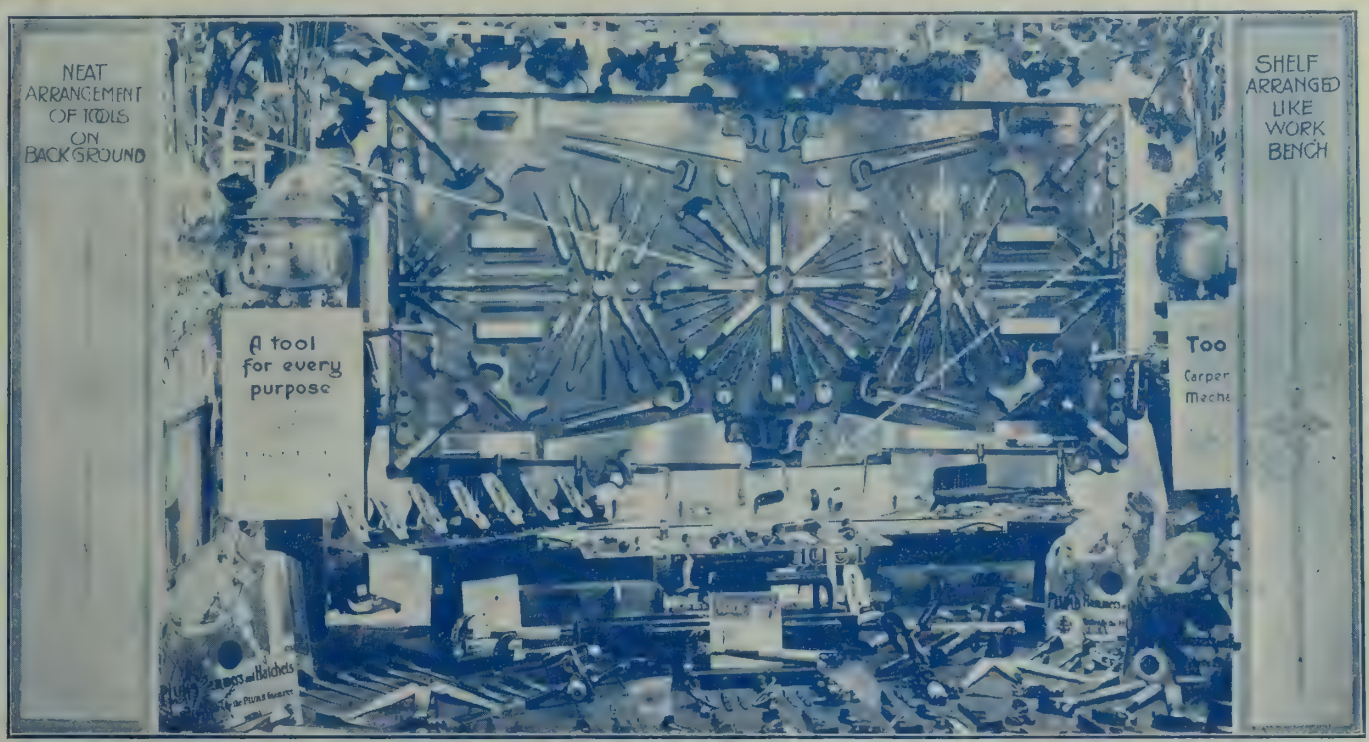
ISSUE NEW CATALOGUE.

Hall, Zyrd Foundry Co., Ltd., Hespeler, Ont., makers of the Pilot stoves, ranges and furnaces have just issued a new 64 page catalogue which is gotten up in a very attractive manner.

The catalogue contains excellent half-tone illustrations on coated paper.

Valuable information is given regarding the products of the firm. Dimensions, shipping weights, etc., of the various lines are also shown.

The front cover design of the catalogue is very attractive, illustrating the pilot, piloting his vessel.



Fire at Cheadle.

Cheadle, Alta.—Fire completely destroyed the hardware store and residence of F. H. Amidon.

Adopt the Attitude of the Spectator

The Display Man Should Try to Place Himself in the Position of the Person to Whom the Trim is Calculated to Appeal and Thus Find What Would Prove Most Effective in Gaining his Own Interest.

A RULE which no window trimmer should neglect is that, in arranging his displays, he should try to cultivate the mental attitude of the class to whom that window will most directly appeal. In other words, if he is arranging a display of sporting goods, he must endeavor to regard the question of sporting goods from the standpoint of the man especially interested in athletics and out-door sports. In this way he will be able to find just about the kind of window that would appeal to the sporting enthusiast and is more likely to make the display that he finally evolves a strikingly effective one.
Herewith is presented a tool window of unusual merit, which, one believes, was prepared on this basis. In

A Tool Trim by Chas. H. Smith, Calgary.

planning a tool display, the trimmer will have on object in view—to so arrange his trim that it will appeal to mechanics and, in fact, to all men interested in tools. If he endeavors to put himself in the place of a man who wants to buy a new tool, he will almost certainly produce a trim very similar to that presented. This window would appeal strongly to a prospective purchaser of tools. In the first place there is a large assortment of tools of all descriptions shown. The stock has been most conveniently as well as attractively grouped. Finally the suggested bench effect gives a touch of the proper environment. Perhaps the one fault that can be found with the window is the use of the floral scroll at the top and the brass jardinieres with palms at each side. This gives rather too ornamental a setting to the display. A tool trim should be severely plain, depending upon winning its way through the merit of its arrangement.

One of the best possible tool trims would be one where a workman's bench was placed in the window, together with such other material as was needed to make up a semblance of a workshop. This would catch the eye of the mechanic at once and attract his attention to the stock.

It is wise where possible to put in cards with brief references to the tools shown. A man may see a saw which appeals to him as a good one, but to bring his interest up to the point where he will decide to buy, it is necessary to tell him exactly why that saw would suit him better than any others. The card will fulfill this purpose. Here again is seen the necessity of mentally placing oneself in the position of the spectator before arranging a trim. What would I want to know about these goods if I were to come along and look in at the display? is a question which the trimmer should decide before going about the arrangement of the trim.

There's a Kyanize finish for every purpose about the house

Preventing Waste of Material in the Tinshop

Journeymen Should Devote Considerable Time to Study—Many Savings in Material Can be Effected in the Tinshop—Examples Showing How Material Can be Used to Advantage.

ONE of the chief troubles encountered by our journeymen tinsmiths and sheet metal workers has been found to be the lack of knowledge regarding the laying out, method of construction, and development of the various patterns which, from time to time they are called upon to make.

While it must be said there are some very complicated patterns to be developed once in a while, it can also be said that providing the general principles are thoroughly studied, these too can be much more easily overcome if one sets their mind on mastering these principles.

More Study Necessary.

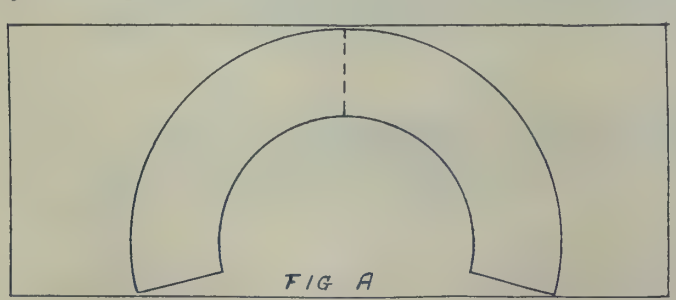
Despite the great improvement in machinery which stamps out parts and in some cases blank articles complete, which at one time was made by the tinsmith, there is still a dearth of practical men, men who can cut out patterns of almost any shape from sheet metal. These men are in many cases only to be found in large shops where not only is machinery employed, but where the original patterns must be developed before the blanking dies can be made for this machinery.

The same problem confronts every trade, the need that our journeymen should devote more time to study.

In the case of tinsmiths and sheet metal workers the chief problems are of a geometrical nature, and of course draftsmanship, and some of these problems which until a certain amount of study has been given to them seemed at first to be more or less complicated. As we have said before by becoming thoroughly versed in the general principles these will soon be found easy. One of the main features, when working out the construction of an article is, can it be made in one piece and not involve too much waste of material? Often times only half a pattern need be developed and in that case it may be able to reverse the half pattern and thus save material, as an example we will look at Fig. A and B.

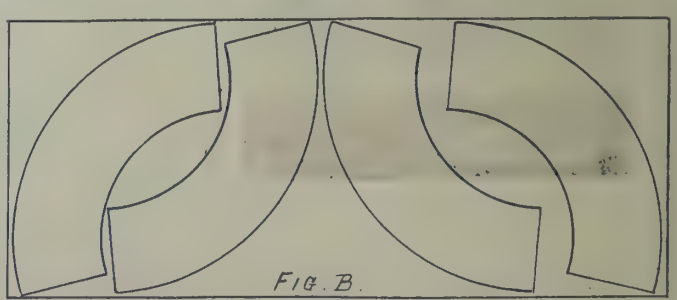
This, while being a very simple example is only one in a thousand instances where saving of material can be made.

It has been said, and truly so, that one of the greatest leaks in a tinshop is the waste in material. This should not be so, by any means, and in these days especially as by careful buying almost any size of sheet can be bought. Hence if more study along the lines of pattern developing and a little care is used when buying the material, such waste in material would be a thing of the past, and those in business would find a great saving in their tinshops if they would encourage more study by their workmen and supply a first-class book on the development of patterns as one of the necessities of the shop. Nothing is more discouraging than to see piles of scrap sheet metal under the benches.



Have Small Patterns on Hand.

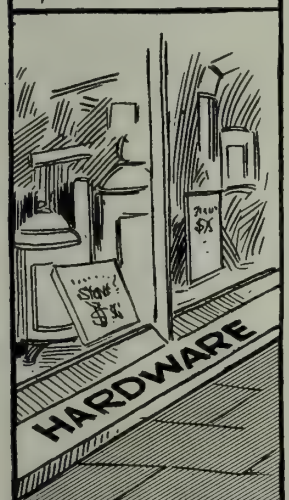
And while discussing this matter of the accumulation of waste material under the benches and shelves, it would be a good thing to go over all stock patterns, and if the shop execute work of a nature which calls for small work as well as work of an ordinary nature and size, there should be a number of small patterns on hand, then a shop rule made, informing the men and apprentices to see that no scrap be thrown out which could be used for these small articles; for instance, pieces which would be large enough to make a 2, 3 or 4 piece 3 in. elbow could be marked and cut out in slack times, or the apprentices could be encouraged to do this work instead of doing so much hanging round. It may be stated, and rightly so, that these can be bought cheaper than they can be made by hand. But when such a habit has been established in a shop, it is not so much the actual cost of these small articles as the fact that saving along other lines is thoroughly established.



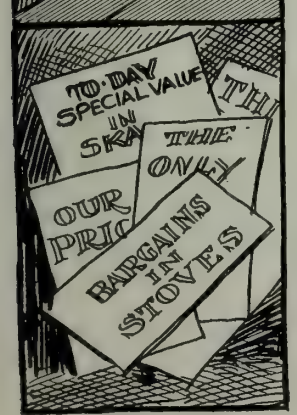
The writer has in mind a certain young fellow who learned his trade (or thought he had learned it) in a large city. This fellow worked 8 years at making up all kinds of hot air furnace work. He went into the shop and began helping to fit up the piping and casings. His next step was marking out elbows, register boxes, and the like. He then took up the brake work and made up stack pipe, and in all he made good, and saved a few hundred dollars. He felt he knew the trade, and heard of an opening in a small town where a tinsmith was needed, and where a hardware business was for sale. This seemed a good proposition to him. However, not knowing much in connection with the hardware line, he looked around for a possible partner, and the result of his search was that he met a man and they took over the business.

All went well for a few weeks, when one day a dairyman called in and wanted a large funnel making of heavy sheet tin, such as is used for dairy work. This funnel had to have a peculiar offset on the spout. Well, of course, the order was taken, but the fellow began to figure out his pattern and could not do it. This and many more problems came up, with the result that he simply had to sell out, and his partner had to look for another man. This is only one case in a thousand, and is an actual fact. Hence, again we repeat the cry that more study should be given to the study of sheet metal pattern development by those who are in the trade, and also by those who are about to take this trade up as a calling.

We will continue in future issues several problems along the same lines, which embody the general practices of the tinshop.



Pattern Making in One Piece, thus Making Too Much Waste from a Given Sheet of Material.



By Pattern Being Made in Half, More Pieces Can Be Made From Same Size Sheet.

Methods That Won in "Off" Year

An Interesting Recital Which Shows How an Industry's Inactivity Was Turned to Advantage—Concentration and Close Following-up Brought Results—A Lesson to be Applied in the Retail Business.

THE point was made in an article appearing in last week's issue that during times of trade depression, the merchant should redouble his efforts rather than relax them. This was applied particularly to advertising and the point was forcibly brought forward that to give up advertising when conditions were not of the brightest was the surest way of making business worse.

The same rule applies to every other phase of merchandising effort as well as advertising. The merchant must, instead of taking the line of least resistance, take that of greater resistance. Strongest efforts must be made to secure business inasmuch as business is harder to get.

The following article is reproduced from Printer's Ink, because it expresses in a nutshell the exact position in which the retail merchant finds himself when the first touch of trade depression is felt. It is from the pen of R. W. Wadman, advertising manager of the Sterling Engine Co., Buffalo, N.Y. The article deals with the sale of engines, but the same arguments could be applied to the sale of hardware:

For the past two seasons something has been the matter with motor-boating. Whether it is a lean public pocket-book, too much automobile, the decline of boat-building or the rise of gasoline makes little difference. The fact remains that business has not been so good as formerly.

As usual, the "off" years hit the little fellow a hard blow. The mechanic who took his few hundred dollars savings and started a marine-engine shop a few years ago has had a rude awakening. Most of this type have not been able to swim against the tide. Many have closed up shop; others—the fighting kind—have had their shops closed for them. And even among the stronger is heard the universal complaint, "Business ain't what it used to be," and whisperings of "hard times."

For our part, we can't conscientiously join in the wail. Just now the Sterling factory is working double shifts and, when the tide is at its ebb, turning down orders on many sizes when less than a two months' delivery is demanded. The books show that up to October first business increased 28 per cent. over a year ago.

This good fortune is partly because of the reputation our engine enjoys, partly because of an aggressive sales organization,

but chiefly because we foresaw conditions early last spring and laid our plans just the opposite from what inclination prompted, knowing that our competitors would do that very thing.

Instead of taking the line of least resistance, we took the line of greatest resistance; instead of shortening our canvas along with the rest of the fleet, we kept every inch up; instead of getting cold feet and retrenching and economizing, we planned to make a greater effort than ever.

We knew there was a certain amount of business—that of the moneyed class—which would go out just as it always had, and we planned to concentrate on this "big game." The smaller fry we would also get if we could.

Our policy of concentration forced us to drop many of our old-line list. Past experience had taught that big space in a few publications paid better than small space in many, so we confined our ads. to papers which reached only actual boat-owners.

In other words, we threw overboard one of the most cherished theories of the marine-engine manufacturer: the easiest business to get is the order of the fellow who is in the market for his first engine. We had no time or money to spend on this class of prospects; too many were after them, anyway. What we wanted was the man who already had bought an engine—the fellow perhaps who was struggling with some "dollar a pound" affair trying to make it go through the motions of a real engine. We knew that what every motor-boat fan has to find out sooner or later is that the best is the cheapest, and the only way for him to find this out is to buy a cheap engine and "get up against it." After he has done that he is ripe for our proposition, just as every owner of a cheap and more or less reliable car is a prospect for a Packard or Pierce-Arrow if he has the wherewithal.

Putting Pull Into the Ads.

Having decided to concentrate on a few live prospects, the next step confronting us was to conserve our appropriation and make the dollar do the greatest possible work.

We decided to accomplish this by doing less, but doing what we did better. At a time when other manufacturers were cutting quality of literature and trade-paper copy, we began getting out more expensive literature than ever. We took more time and spared no expense to make our copy effective. But we spent no more money; we simply conserved our appropriation.

Perhaps the master stroke of our campaign was our decision to raise our prices at a time when others were on the fence as to whether or not they ought to cut. With the advance in labor and material a raise in price was in order. We figured that if this increase was blazoned abroad at a time when it appeared the least expedient, we would do a good deal toward getting confidence, and we did. For the past two months we have advertised that after the first of the year our prices would advance. This condition invites those who might be going "to hold over" to come in now, when we are in a position to handle orders conveniently and distribute the usual spring rush over the dull winter season.

We also increased the use of testimonials in our copy, and added a coupon which seemed to have a very stimulating effect on inquiries. The copy was written by a motorboat enthusiast who was able to talk to the readers in their own language.

A Remarkable Increase in Inquiries.

This policy of concentration and the strengthening of our copy had an immediate effect on sales, even before we began to make use of our "prices advanced" argument. Up to the time of beginning to concentrate, the best we had received in inquiries from any class journal was 81 to the issue; after using the new copy, inquiries frequently ran up as high as 150; in fact, one month reached 161 from one paper.

I don't mean to say this increase in inquiries, which had a good deal to do with our 28 per cent. sales increase, was wholly the result of our copy or general plan. Naturally, when we saw we were up against an "off" season, we began to put on more agents than ever. This was comparatively easy, as at such times dealers are only too glad to connect with a firm that is going to do something instead of economize and prepare for a big business next year. This strong sales organization, made possible because of our aggressive policy, did more than its share toward swelling the sales.

Then every effort was made to get our dealers pulling together, and to place at the disposal of all the experiences of the few. We issued weekly sales bulletins with great success, and we expect this feature to develop into an organization paper next spring when the season opens.

Another reason for the success of our plans lay in a carefully thought out follow-up system. Having spent a great deal of money in experimenting in this direction, we instituted some radical changes in following up our inquiries. That is, radical from a marine-engine point of view, where it has always been the practice to follow an inquiry up indefinitely. We stole a leaf out of the auto manufacturers' experience.

An Automatic Follow-up System.

As each inquiry came in, a card was made out which had a row of numbers from one to thirty-one printed along the upper edge. On these numbers rode a metal clip signal, projecting above the top of the card. If the inquiry came in to-day and was to be followed up a week from to-day, the clip would be placed over that date. Every morning the clerk would go through the file and send out circulars for all cards requiring them and move signal ahead to next follow-up date. A brief summary of the inquiry was kept for the purpose of following up the agent.

Having a country-wide organization, we really had very little need to try to sell the prospect by mail. With us we followed the inquiry merely to help the dealer. We worked him at both ends at one time. There is something about the printed word that impresses, and so our plan was more in the form of co-operation than anything else.

"One letter for all" follow-ups won't do, because the average prospective engine buyer answers the ad. of every marine engine maker in the country, and by the time he gets done reading catalogues, follow-ups and circulars he is more at sea than ever, and only the personal letter, woven around his particular situation and requirements, will have any effect. We can do very little with a prospect until we know what his requirements are, when we get that information we have something to work on, for a man's motor-boat is often closer to his heart than his wife or youngsters, and every letter that goes to him, after we get this information, contains some reference to his actual boat, a useful suggestion concerning a propeller wheel, etc. These letters are not written to obtain a man's order by mail, but simply to keep our engine prominently before him, so that our dealer may have a fertile field on which to sow his seed of facts and reap his crop of orders.

Circulars Instead of Letters.

A feature about our follow-up which worked out very nicely was the liberal use we made of circulars instead of the conventional filled-in form letter. Results seem to indicate that a neatly printed, well-illustrated circular sent to an interested prospect receives almost the same attention, and certainly is a good deal easier and more convenient to handle than a form letter.

What few letters we did use were built up around testimonials, which we use to a great extent. Facsimiles of these testimonials are enclosed in all sales letters, a special paragraph being inserted by the stenographer calling attention to them. Then, too, the testimonial is very effective as copy and carries more weight than six times the

Lewis Brothers Ltd. Sales Staff in Convention

Ninth Annual Convention Held in Montreal — Presentation to Sales-Manager—Tribute Paid to Late Salesman—Annual Dinner Held in Engineer's Club.

ON Saturday morning, December 27th, the salesmen of Lewis Bros., Limited, from East and West, commenced to arrive, to attend the annual convention, which this year was held on the 29th, 30th and 31st of December. As usual, they were guests at the Engineers' Club, and besides, this year, had the privilege of using the National and Commercial Travellers' Clubs all of which seemed to be very much appreciated.

On Monday evening, Dec. 29th, at 7.15, forty-two sat round the festive board, of the ninth annual dinner, at the Engineers' Club, to do justice to the good things that had been prepared by the chef.

After the King's health had been proposed, and duly honored, C. M. Strange, director and sales manager, who presided, in proposing the health of Lewis Brothers, made fitting tribute to their late respected oldest salesman, H. H. Clark, who passed away at the Royal Victoria Hospital on Tuesday, Dec. 23rd at 11.55. Mr. Clark was born on Sept. 10th, 1867, at Peckham, London, S.E., Eng., and had represented Lewis Bros., Limited, in the Eastern Townships for sixteen years. A committee, consisting of Messrs. Strange, Watson, Devitt, and Borland, were appointed to draft a letter of condolence to his widow.

A cablegram was read from F. Orr Lewis, who extended good wishes to the salesmen, and a letter of regret from J. G. Lewis, vice-president and general manager, who referred particularly to the loss sustained by the firm in Mr. Clark's death. Letters of regret also were received from H. M. Reid, of "Hardware and Metal," J. E. Beaudry, of "Le Prix Courant," and Messrs. C. F. Smallpiece, of Taylor-Forbes, Montreal; G. N. Gray, of Gray, Harvie Co., Ltd., Ottawa; H. H. Valliere, of Montreal; all old employees, after which Mr. Strange read a very interesting letter from John Hall, the veteran sales-manager of the Simmons Hardware Co., St. Louis, U.S.A., who kindly, as usual, extended loyal greetings to his brother salesmen in Canada.

J. T. Smith presided at the piano, and Messrs. Bureau, Cantin and D'Auteuil rendered several vocal selections, while Alfred Trempe, the "Baby Traveller," gave some violin solos, all of which were warmly received.

Presentation to Mr. Strange.

Mr. Watson, who acted as vice-chairman, being the oldest salesman in the employ of Lewis Bros., Limited, spoke very feelingly and expressed the sentiments of all assembled when he stated that it would be hard indeed to get any one to fill Mr. Clark's place in the Eastern Townships.

The surprise of the evening, was when he asked C. M. Strange, director and sales manager, to accept from all the travellers gathered there, a leather covered oak chair, and an oak humidor, filled with good smokes.

Mr. Strange, in thanking the salesmen, explained what a difficult position his was to fill, but felt assured from the

C. M. STRANGE,
Director and sales-manager of Lewis Bros., Ltd.

happy expressions of one and all that the little he had been able to do in the past was appreciated by their magnificent tokens.

He also gave those present a slight history of the business since he joined the staff as a salesman twenty years ago, at which time there were five travellers. The firm now employs twenty-eight salesmen.

At midnight the dinner party adjourned.

On Monday evening the annual convention was held, at which J. G. Lewis presided, and after a heart to heart talk all went away determined to make 1914 a banner year.

During the days of Monday, Tuesday and Wednesday, addresses were delivered by A. Cabana, vice-president of the Buffalo Specialty Co.

F. H. Petrie, manager of the Automatic Damper Co., Hamilton.

T. P. Bolger, vice-president and general manager of the Success Manufacturing Co., Gloucester, Mass.

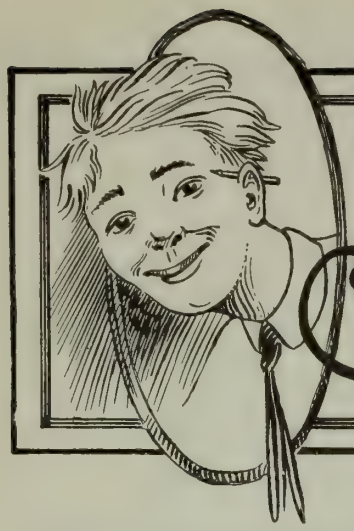
Mr. Weir, of the Canadian National Carbon Co., Cleveland.

Mr. Maguire, of the Gillette Safety Razor Co., Montreal.

Mr. Young, of the Ross Rifle Co., Quebec, Que.

W. F. Lewis, of the Warren Scale Co., Montreal.

And the balance of the time was spent going over the warehouse, picking up information about new goods, etc.



The salesmen departed for their various homes, determined to start out the first week in the new year, and make it a banner one for Lewis Bros., Limited, and with the assistance of their new catalogue, are quite confident of so doing.

Those present at the various functions were:—J. G. Lewis, vice-president; Wm. J. Lewis, director; C. H. Lewis, director; J. T. Smith, director and sec.-treas.; C. M. Strange, director and sales-manager; G. Bamridge, H. M. Borland, G. Bernard, L. M. Brown, J. A. Bureau, A. D. Cantin, F. Cantillon, H. H. Clark, C. Deacon, C. L. Devitt, J. R. D'Auteuil, G. C. Dufresne, V. Gagne, A. Gamache, A. R. Hart, G. E. Karch, J. T. Laferriere, A. D. LaBlane, L. J. LeClair, V. Lilly, I. H. MacQuarrie, G. Miller, F. G. Moxley, A. R. Payne, E. Pilon, J. E. Pilon, L. R. Rettie, E. Runions, T. L. Thacker, J. A. Trempe, Alfred Trempe, Geo. Walker, R. F. Warren, J. C. Thompson, G. C. Young.

CHANGES IN MANAGEMENT OF HENDEE MFG. CO., AND CORBIN SCREW CORPORATION.

Clarence A. Earl, vice-president of the American Hardware Corporation and manager of the Corbin Screw Corporation division will sever his present business connections to become the vice-president of the Hendee Manufacturing Company of Springfield. The new position offers such advantages that the officers of the American Hardware Corporation could not hope to retain Mr. Earl as one of their number and have reluctantly accepted his resignation, with the understanding that Mr. Earl will remain until all the details connected with the transfer of authority are

(Continued on page 52.)

THE JUNIOR CLERK'S PAGE

THE SECRET OF SUCCESS.

By Thomas Dreier.

The secret of success is not a secret. Nor is it something new. Nor is it something hard to secure. To become more successful, become more efficient. Do the little things better. So work that you will require less supervision. The least supervision is needed by the person who makes the fewest mistakes. Do what you can do and what you should do for the institution for which you are working, and do it in the right way, and the size of your income will take care of itself. Let your aim ever be to better the work you are doing. But remember always that you cannot better the work you are doing without bettering yourself. The thoughts that you think, the words that you speak, and the deeds you perform are making you either better or worse. Realize with Henley that you are the master of your fate and the captain of your soul. You can be what you will to be. Forget yourself in rendering service to others. If an employee, strive to make yourself of greater value to your employer. Look upon yourself as a manufacturer. Think of yourself as being in business for yourself. Regard yourself as a maker and seller of service, and ever bend your thought and your energies toward the improvement of your product. The wise manufacturer never injures his machinery wilfully. Your body, your mind, your soul serve as your plant. Eat and drink only that which will nourish your body, entertain only those thoughts that will enrich your mind, and if you feed your body with the best physical food and your mind with the best mental food you will build up a service factory that will find its products in constant demand. The world is hungry for quality service. It wants to pay for it. It is paying for all it can get. The market is not crowded. There is a chance for you right now. There is a chance for you right where you are. The time to start is now. Your reward will take care of itself.

TEAM WORK IN THE STORE.

If you have a clerk that can't make a suggestion that will improve the business, fire him.

If you are a clerk, and your employer does not welcome suggestions, get another job.

The clerk should devote serious thought to the business and offer suggestions; and all suggestions should be heartily entertained by the employer. Co-operation between employer and employee will put ginger into any business. A one-man business is for one man. If any other person is employed, from a delivery boy up, co-operation becomes necessary. If a clerk's (or delivery boy's) suggestion is impracticable, point out its defects clearly, and don't act like a snob or an autocrat. A weekly "store-meeting" is held with splendid results by many dealers. Don't make this too formal. Give every employee a chance, and show in some substantial way that ideas are appreciated. The large department stores have found these conferences invaluable, and their success is due as much to co-operation inside the store as to other causes.—Merchants' Journal and Commerce.

REMARKS OF THE JR. CLERK.

Taken on anything you gave up yet?

* * *

If you want to hear powerful language ask a barber what he thinks of a safety razor.

* * *

A man has a right to expect a square deal in a trade—and so has the other fellow.

CHANGES IN MANAGEMENT.

(Continued from page 51.)

perfected, a process which may cover several months.

Charles Glover, vice-president of the American Hardware Corporation will assume the responsibility of the place left vacant by Mr. Earl's resignation. Mr. Glover founded the Corbin Screw business, and was in charge of it as president of the Corbin Screw Corporation until his appointment two years ago to the charge of the mechanical equipment of the factories of the American Hardware Corporation. Its growth and development up to that time were made under Mr. Glover's management, and in again assuming charge, he simply resumes the connection which he dropped for the two years which Mr. Earl has been manager, and will carry on its policies without interruption.

Mr. Earl's new position comes to him unsolicited, and is an eloquent testimonial of his talent. He will assist President Hendee in the management of the business, which will give ample scope for the splendid ability Mr. Earl possesses. The Hendee Company are large manufacturers of motor cycles, having a capital of $12,500,000, a force of over 3,000 people, and a product which it is claimed, will reach 50,000 motor cycles in 1914.

Mr. Earl's career has been marked by rapid advancement. He entered the New York office of Russell & Erwin Mfg. Co., as a boy in 1892, and by a succession of promotions, soon gained a place on the sales force, becoming the banner salesman for his concern. In 1900, he was transferred to New Britain, as secretary of the company. When the Corbin Screw Corporation was formed, he was made its vice-president, and for the last two years has been its manager, which position he now relinquishes. He is kindly in his nature, social in his instincts, public spirited and popular, and has become so connected in the social and business life of New Britain that his departure will be a source of sincere regret. He will take with him the cordial good wishes of his associates in the American Hardware Corporation and the various other organizations with which he has been connected.

Current News of the Hardware Trade

Will Erect New Store.

Suffield, Alta.—The McGregor Hardware Co., Ltd., have just landed lumber, etc., for the erection of a new building in Retlau, Alta., where they opened a branch in May, 1913, in temporary quarters.

Elected for Fourth Time.

H. Occomore, Guelph, Ont., hardware merchant and president of the Ontario Retail Hardware and Stove Dealers' Association, was last week elected as Alderman for the fourth consecutive term.

Pioneer Dies.

Passaic, N.J. — Geo. J. Kittrick, 65 years old, one of the pioneers who introduced the use of sheet metal for architectural ornamentation, and who was editor of the technical journal named "Sheet Metal," died at his home here.

Ontario Incorporations.

Northern Canada Supply Co., capitalized at $200,000 with head office in the town of Cobalt, Ont., to carry on the business of jobbers, wholesalers, manufacturers, and dealers in shelf and heavy hardware, railroad, factory, steamboat supplies, etc.

Death of C. A. Sterling.

The death occurred from typhoid fever in St. Boniface hospital on Dec. 30 of Charles A. Sterling, age twenty-four years. The deceased was born in Halifax, N.S., where his father and mother still reside. For the past four years he was employed by the Miller-Morse Hardware Company as a traveler.

Death of Wm. Poage.

Wm. Poage, manager of the British department of the Meriden Britannia Co. of Hamilton, dropped dead in a Toronto hotel on January 5. Mr. Poage, who was 45 years of age, was well known in Toronto and Hamilton, and came to Toronto to visit friends for a few days. Death was due to apoplexy.

Business Changes.

Winnipeg, Man.—Western Radiator and Electric Co. are reported discontinuing business.

Winnipeg, Man.—John Millen & Son & Urquhart, dealers in wholesale auto supplies, are applying for authority to change name to Jno. Millen & Son, Ltd.

Mayor for Second Term.

Mayor Adams, of Adams & Vandusen, Picton Ont., major of the 16th Regiment, who was elected by acclamation last year, was again elected this year by a majority over his opponent. What was expected to have been a more than usually close contect proved an easy victory for Picton's hardware man.

Chicago Spring Butt.

The Chicago Spring Butt Co., Chicago, Ill., have issued a very neat 1914 calendar which they are sending out to the trade along with some literature regarding their products.

Philibin Hardware Destroyed by Fire.

Montreal, Que.—The hardware store of M. Philibin & Co., on St. Catherine St., West, Montreal, Que., has been destroyed by fire. The Philibin store was one of the finest retail hardware stores in Montreal.

Fire Losses.

Calgary, Alta.—Smoke did damage in J. T. MacDonald's hardware store, which was in close proximity to another building in which a fire took place.

Didsbury, Alta.—In a disastrous fire which destroyed the entire business section of this town the hardware store of W. G. Leismenk & Shantz, was destroyed.

Partnership Formed.

St. Thomas, Ont.—G. R. Firth has entered into partnership with W. J. Jackson, and the hardware firm will now be known under the name of Jackson & Firth. Both members of the firm are well known in the trade. Mr. Jackson has been in business in St. Thomas for the past sixteen years. Mr. Firth was for three years associated with G. W. Brown in the hardware business in St. Thomas.

Burglary in Winnipeg.

Winnipeg, Man.—Burglars entered the Hingsworth-Smith sporting goods establishment on Main Street and secured about one dozen automatic revolvers and a large amount of ammunition.

Burglars broke into the premises of Messers. Sibley & Huot, roofers and sheet metallers, at the corner of St. Martin and St. James street on New Year's eve, and stole $300 worth of sheet copper, using a horse and rig from the stables of the same firm to take away their booty.

New Firms.

Calgary, Alta. — The Riverside Iron Works is starting business.

Assiniboia, Sask. — W. S. Davis has opened a store for the sale of electrical supplies.

Merritt, B.C.—The Merritt Hardware and Sporting Goods Co. has incorporated.

Victoria, B.C.—A partnership has been formed between Charles W. Jordan and A. H. Nunn to take over the business of the Macdonald Electrical Company on Oak Bay Avenue, to be known in future as the Reliable Electrical Company. The premises will open under the new management on Friday. Mr. Jordan was formerly foreman for the Macdonald Company.

Hardware Firm Wants Catalogues.

The Morgan Hardware Co., which recently opened a new hardware store in Peterboro, Ont., is desirous of receiving catalogues from firms manufacturing or selling hardware lines. The new firm is under the management of H. P. Morgan, formerly manager of the Peterboro Hardware Co.

Mason Safety Tread.

The American Safety Tread Co., Lowell, Mass., have just issued their new catalogue, consisting of 24 pages illustrative and descriptive of their various lines of Mason Safety Tread. On page 9 of the new catalogue is shown a new tread for use on concrete, said to be an improvement over the cast iron formerly used. Copies of the new catalogue will be mailed to the trade on request.

Presented With a Club Bag.

Frank Hay, salesman in the Wood-Vallance Company store, who is severing his connection with that firm, was the recipient of a handsome club bag from his fellow-employes on Saturday afternoon. H. W. Smye made the presentation and in a few appropriate words expressed the esteem in which Mr. Hay is held, and wished him every success in his future position. Hartley Allen assisted in the presentation. Mr. Hay expressed his gratitude at the kindly gift and assured his friends that he would always think of them with the deepest regard. He will take a trip to the old country in the near future, after which he will take a position with a hardware firm in the West.

Winnipeg Personals.

A. E. Dykes, general manager of the Ashdown Hardware Co., is on a business trip to Saskatoon.

F. N. Humphries, Bengough, Sask., formerly of Humphrey & Son, Griswold, is in town. He speaks encouragingly of business prospects.

H. Hunter Hartney, pioneer among Western hardwaremen, is visiting Winnipeg. Mr. Hunter seems to have drank of the fountain of youth.

Lionel Haney, manager of the Burrow, Stewart and Milne Co., left for the East January 2, via Chicago and Detroit. He will be absent some three weeks.

Alec Anderson, of Gladstone, hardware and implements has disposed of his hardware business to Williams Bros., former owners of the business.

C. R. Morton, hardware merchant, Vegreville, Alta., spent the holiday

season in Winnipeg. He is confident of improvement in business in 1914.

David Campbell, of Campbell and Cooper, Saskatoon, was in town last week en route to Chicago. He will also be here some days and call on the trade on his return trip.

The annual convention of the Ashdown travellers will be in progress Jan. 5 to 10. An exhaustive programme has been arranged and addresses will be delivered by practical men from different manufacturing centres.

J. W. Anderson, general manager of the Gull Lake, Vanguard and Shaunavon Hardware Companies was in the city during the holiday and left New Year's Eve for Eastern Canada. Reliable authorities opine that he is on most important business and will not return alone.

Personals.

W. H. Manning, hardware merchant, was elected Reeve of Coldwater, Ont.

Mr. McKinley, of the McKinley Hardware Co., Parry Sound, was a visitor in Toronto this week.

W. E. McCray, representative of the Bullock Manufacturers' Association, was in Montreal on business this week.

H. Porter, Toronto, representing the Bissell Carpet Sweeper Company, called on the trade in Montreal this week.

E. S. Knox, of the New York Stamping Company was in Montreal this week on a business trip.

B. Dalelheim, representing Vogel & Company, of Germany, was in this city last week on a business trip.

Wm. Parrott, dealer in stoves, tinware, etc., Collingwood, Ont., was a business visitor in Toronto this week.

Fred. L. Stellwagen Jr., representing the firm of John H. Graham & Company, was calling on the trade in Montreal this week.

Scott C. Ball, of the firm of Sargent & Company, New Haven, Conn., was calling on the trade in Montreal this week.

Mr. Merry, representing Wilkinson, Heywood & Clarke, London and Liverpool, was a business visitor in Montreal this week.

A. A. Seligman, representing the firm of L. B. Wasserstrom of New York, was calling on the trade in Montreal this week.

A. R. Woolridge, manager of the scale department of the Canadian Fairbanks-Morse Co., Toronto, has gone to Texas for a month's holidays.

J. C. Hance, Canadian manager of the S. F. Bowser Co., and members of the Canadian sales staff, are in convention at the home office, Fort Wayne, Ind.

F. S. Amidon, representative of the Trimont Manufacturing Company of Roxbury, Mass., was in this city during the week calling on the local trade.

W. H. Gerke, general manager, Martin-Senour Company, Montreal and Secretary of the Paint Dealers' Association is at present on a business trip to Quebec. On the eve of his departure for Montreal he was the recipient of a handsome present from the office staff and heads of departments of the D. Moore Company.

CHANGES IN BRANDRAM-HENDERSON STAFF.

The following changes and promotions are announced by Brandram-Henderson, Limited:

J. H. Cleveland, formerly Montreal sales manager, succeeds J. M. Fraser as manager of the Winnipeg branch.

A. W. Poole, formerly manager of the Toronto branch, is promoted to the sales management at Montreal.

E. F. Lowe, formerly manager for

A. W. Poole, Who Has Been Promoted to the Sales Management at Montreal.

Wm. Harland & Son, Toronto, succeeds Mr. Poole as manager of the Toronto branch.

G. M. Scott for many years with Martin-Senour Co., has joined the sales staff of the Winnipeg branch of Brandram-Henderson, Limited.

A. W. Poole, who has been promoted to the sales management at Montreal, took over the management of the Toronto branch in October, 1910.

Prior to that time he was for two years sales manager of the paint department of the James Robertson Co., Toronto.

Mr. Poole was for several years connected with the F. Hammar Paint Co. of St. Louis, Mo., as manager of their sales force.

Catalogues and Booklets

John Rabone & Sons Catalogue.

John Rabone & Sons, Birmingham, England, have issued a new catalogue and price list which they are supplying to the Canadian trade through their Canadian representative T. Mortimer, 64 Wellington St. West, Toronto, Ont.

The catalogue and price list has been specially prepared for the Canadian trade. The list is fully illustrated with excellent reproductions of the goods manufactured by the firm; each article is priced at retail figures which it is claimed allows a substantial margin of profit for the dealer.

Some of the lines made by the firm are boxwood, ivory and steel rules, metallic and steel tapes, spirit levels, etc.

Arrangements have been made to carry in Canada stocks of all articles illustrated.

Those who have not secured copies of the new catalogue can do so by writing to the Canadian representative of the firm.

B. Greening Co. Calendar.

The B. Greening Wire Co., Hamilton, Ont., have issued their 1914 calendars, which they are distributing among the trade. The calendars are attractively gotten up, being lithographed in colors, and show a general view of the firm's head offices and plant. The calendar also shows the members of the Greening family, who have been connected with the firm since its inception.

Personals.

A. Hossie, district manager, Winnipeg, for the Dominion Flint Glass Company, was in Montreal this week on business and took advantage of the opportunity to look up his old acquaintances here.

Robert D. Bailey, foreman of the cogging mills at the plant of the Nova Scotia Steel and Coal Co., New Glasgow, N.S., was the recipient of an easy chair on Christmas eve, the gift of his fellow-workers.

J. E. Mosley, hardware merchant, Huntsville, Ont., was a visitor in Toronto this week. He reports trade as being very good in his district, and is very optimistic regarding the outlook for spring business.

Thomas A. Treen, who for the past fifteen months has been associated with the D. Moore Stove Co., Hamilton, has left for Montreal, where he will in future be identified with the Detroit Stove Works, with headquarters in Montreal.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

There is a much better feeling in the metal markets and dealers are optimistic regarding the future.

The market is showing strength, lead has advanced ¼c per lb.

Linseed oil has advanced 3 cents per gallon and as the flax market is showing an upward tendency there is a feeling among the trade that prices of oil may go higher.

Some changes have also taken place in the price of ammunition.

Stock-taking is still under way in many places.

The trade in general is optimistic regarding the future and expect to do a good volume of business this year.

MONTREAL.

Montreal, January 7.—The business on the local market during the past week has been rather quiet owing to the fact that travellers have been in off the road and the local firms have been busy taking stock. The stock-taking end of the business is now over and they are now busy rushing the extensions, etc., in order to close this business out for the year. The travellers have started out once more, and this, no doubt, will start things going once more.

The lines which were most in demand a couple of weeks ago are at the present time practically dead due to the fact that the rush of Christmas is over. Such lines as cutlery, electrical utilities and soforth are very quiet at present. There is, however, still quite a consistent demand for skates and hockey sticks as well as all sporting goods used in winter sport which are handled by the hardware merchant. Apart from this demand, orders which are now being received are principally of a sorting up nature.

The old idea of re-adjusting prices at the end of the year seems to be a thing of the past with most concerns and it is interesting to note that nearly all travellers coming to this city from large firms in the States are still quoting their old prices.

Price Changes.

The price changes for the week were few. Following the adjustment of prices on galvanized and black pipe there comes a new discount on pipe nipples, it being 80 per cent. There was also a change in prices of Dominion Metallic cartridges, the following prices now being in effect.

BB Caps .....$1.75 per 1,000.
Rim fire ball black powder, 22 short, 22 long, 22 long rifle; Less....50.2½.10
Rim fire ball black powder 22 short, 22 long, smokeless, short; Less ..50.5.20
Rim fire ball black powder, 22 short, 22 long, smokeless, long rifle; Less 50.5.20
All other Dominion rim fire, ball or shot, Less 45.2½%
Centre fire revolver and rifle, ball or shot, less 20.2½%
Sporting and military sizes, less....10%

The local manufacturers and wholesalers have every confidence in the present year and look for conditions to right themselves by mid-summer. Although the amount of business passing at present is very light this is not unseasonable and is expected at this time of the year. The travellers have been in for some time and naturally the orders which are received from them at other times are not forthcoming. It is thought that the retailer has the same confidence in the future and a good year is looked for.

In the metal market there has been a falling off in most prices since last week and the demand in evidence locally can only be called moderate, but this is considered quite seasonable at this period.

Tin.—The local market for tin is easy with a fair amount of business passing at present. An increase is shown this week in Gorbals best rest tin plates which have been advanced about 20 to 25 cents all round. The London quotation this week is £2.17.6 lower than that quoted one week ago and is given out as £167.15.0, while futures have suffered to the extent of £2.15.0 and are quoted at £169.5.0. There does not seem to be a great deal of enquiry from buyers and it is reported that most of the orders placed recently came from the large consumers and were for future shipment. The New York prices have also suffered a decline since last week and are quoted at 36.85 for spot, while 37.10 is asked for futures. There is not much change looked for in this market for some time.

Spelter.

For the first time in weeks, this market has fallen back a little and the London quotation to-day is five shillings under last week or £21.7.6, while the New York price to-day of 5.10 is five cents under last week. It is claimed that the falling off in buying which has been a feature of the New York market during the past few days is responsible for these decreases. That market at present is assuming an easier tone. A report from New York says that the state of the galvanizing trade is so unsatisfactory at present that any change must necessarily be for the better and while there may not be much room for an advance in spelter for the next two or three months still there is not much room for a decline as it is claimed that the production of spelter at present prices is very unprofitable to so many smelters that it is doubtful if we have a reaction it would carry the prices down very far. The local market is much the same in previous weeks with the same prices ruling under a steady but quiet demand.

Lead.

This market has been subject to a good demand during the past week on the primary markets with the result that prices have firmed up and show an increase on the London market of £1.2.6 and are now quoted at £19.0.0, while the New York price has advanced from 10 to 15 cents and is now given as 4.15 to 4.20. Apparently buyers have been holding off expecting cheaper prices and as there is reported to be a scarcity of spot at present the result is that the demand has been picking up. Local prices, however, remain unchanged under a steady but quiet demand.

Copper.

The local price of copper has declined 25 cents on casting ingots and is now quoted at 16.50. The demand is light but steady. The London price for the week has dropped off £2.2.6 for spots and £2.16.3 for futures, the quotations being £63.17.6 and £64.10 respectively. The New York price has also taken a slump and is 17½ cents under last week's quotation or 14.37½. A report from New York says that there is no improvement in the demand for manufactured copper yet in sight and that the factories are still running at the reduced rate that began a few weeks ago. It goes on to say that there is no change in the situation there and the buyers show no improvement so far as interest is concerned which is practically nil.

Antimony.

The price of antimony, which is thought to be as low as it will go, is the same as during the past few weeks. The demand is also limited.

Iron.

The London quotation for the week is the same as it has been for the past couple of weeks and apparently there is little interest shown in the market although the demand is sufficient to maintain prices. On the New York market there does not seem to be a very heavy demand although there is a certain amount of business passing daily which has had a tendency to keep prices about the same. Locally, there is little or no change in the situation with a fair demand from buyers.

In the stove and heating business conditions are much the same as in the past couple of weeks. The retail trade seem to be handling the bulk of the business which is passing at present although this is reported to be limited. There is very little to report in the wholesale lines as business has been quiet during the past few weeks. The heating business is subject to quite a demand for repair parts and soforth but the big business is practically over for the present.

TORONTO.

Toronto, Jan. 8.—Quite a number of hardware firms are still engaged in taking the annual inventory, and orders at present are not very heavy. This condition usually prevails at this season of the year.

Hardware jobbers are quite satisfied with the volume of business now passing and report that it compares favorably with corresponding periods of former years.

In the metal market there is a much better feeling existing, and the trade is very optimistic regarding the outlook for future business.

The store trade is naturally quiet at present.

Paint manufacturers report a good volume of business passing. Oil and turpentine have advanced.

Metals.

In the metal market there is a very optimistic feeling and a considerable improvement is noted. Toronto quotations are shown in the accompanying panel.

There appears to be an all-round better feeling in the metal markets.

The American metal market also shows an improvement as noted in the following extract from the Engineering and Mining Journal:—

Was It a False Start.

"The change in the commercial atmosphere, which occurred during the last ten days of December, was remarkable. Where previously there had been gloom and pessimism of the deepest dye, there began to be optimism and even some buoyancy of spirit. This shows the bearing of the sentimental factor. Economic conditions remained as they were previously, but the passage of the currency bill and the assurance of Washington that the trust question would be handled in a fair and friendly way, relieved vague fears. The successful weathering of a trying year by American finance has also dissolved the haunting forebodings of a panic, which, during 1913, obsessed many minds . American business feels that it can now go ahead without seeing ghosts.

"The strain on the world's capital resources, which is considered to be the fundamental cause of recent troubles, has probably been relieving itself by natural processes for some time. The focus of this difficulty was always in Europe, the American market having been all along the strongest of any of the great markets. The ease with which America met the prolonged liquidation of Europe was always impressive.

"Business in the United States in 1913 did not suffer from over-speculation in industrial enterprises, or in commodities. Stocks of the latter have probably been low all along and lately have become very low. The feelings of uncertainty respecting the future, which prevailed until lately, caused merchants to proceed with caution and abstain from buying, except to cover hand-to-mouth requirements. Their abstention from buying was felt keenly in the basic markets, including the metal markets, but while producers had to accumulate some stocks the conditions seem now to be ripe for a rapid depletion of them.

"The spurt of the last week may turn out to be a false start, or it may be the beginning of a steady upward movement. The recovery from the depression in 1904 occurred in just the latter way. As to how it will turn out in 1914 it must be left to time to tell. Anyway, there is ground for confidence in the ideas that we enter 1914 with business in a sound condition and good prospects for an improvement in activity."

The Stove Trade.

The stove trade is rather quiet at present, owing partly to the continued mild weather.

The following extract taken from a letter received by Hardware and Metal, from a prominent stove manufacturer gives one manufacturer's view of the situation:—

Apart from Manitoba, Alberta and Saskatchewan, business has been universally good in the stove business, although there was a falling off in the late autumn of November and December owing to the exceedingly mild weather, which interfered to a certain extent with the dealers getting rid of their heating stoves.

As regards 1914, the trade outlook we believe will be universally satisfactory throughout Canada providing a good crop is harvested in the West.

Rope, Twine, Etc.

The market is featureless at present, with quotations unchanged. Toronto quotations are as follows:—

Pure Manila rope	16c	base
African hemp rope	12c	base
British Manila rope	12c	base
Sisal rope	11c	base
Lath yarn, double	10¾c	base
Lath yarn, single	10¼c	base

Nails, Screws, Etc.

There is a moderate demand for this season of the year.

Wire nails are quoted at $2.25 base.

Wood screws are quoted at the following discounts:—

Flat head bright screws	85-10-7½-10%
Round head bright screws	80-10-7½-10%
Flat head brass screws	75-10-7¼-10%
Round head brass screws	70-10-7½-10%

Other lines of hardware remain unchanged.

Shovels are being booked for delivery up to Mar. 1 at present prices.

WINNIPEG.

Winnipeg, Jan. 7.—Stocktaking, conventions and holiday visits are occupying most of those engaged in the hardware trade for the present. Travellers are not

TORONTO QUOTATIONS ON METALS.

Prices are gauged according to quantity purchased.

Ingot Brass, red	14 to 16c	lb.
Ingot Brass, yellow	13 to 15c	lb.
Wire Solder	26½ to 28c	lb.
Wiping Solder	23½ to 26c	lb.
½ and ½ Solder	24 to 26c	lb.
Pattern Aluminum	23 to 24c	l.b
Ingot Aluminum 99% pure	19½ to 20½c	lb.
Spelter	$5.35 to $5.65	per 100 lbs.
Copper	16 to 16¾c	lb.
Tin	38½ to 43c	lb.
Lead	5¼ to 5¾c	lb.
Tinkers Bar Solder	28 to 29c	lb.

on the road again yet, but many of the big retail men from the West have been in town during the holiday season and have placed some very satisfactory orders for spring goods.

Collections are fairly good if not quite up to the expectations of some. There is no doubt that a general improvement in this respect is noticeable.

No further changes in prices are reported since the important revisions announced last week and no fluctuations in staple lines are for the present anticipated.

Cement in Store.

It is of interest to note that reports state that reserves of cement in store at Fort William amount to only 343,000 sacks or about one-third the amount in store last year. A late opening of navigation would mean something very much like a cement famine in the spring, most embarrassing to the construction programme of the West.

It would seem that probabilities are for sharp advances in linseed oils during the next six months which eventually would lead to dearer mixed paints and all manufactured products of which linseed oil is a component. Flax is rising rapidly in value and with shorter crops than last year both in Canada and the United States, a poor crop in Argentina and very little hope of any exportable surplus in India, flax holders are in a very strong position. In London, the oil market is very strong and futures are much in advance of spot prices.

As regards special developments of trade in particular lines in the future it seems to your correspondent that electrical devices, as they become cheaper, will be very generally in demand not only in the cities and towns but even in villages and on farms. The power resources for development in the northern parts of the provinces are enormous and are attracting much attention.

Chance for Development.

Wholesalers and manufacturers should keep a sharp eye on the Peace river country which in a half a decade will be a great field for business development and only needs transportation facilities to attract settlers and produce enormous quantities of farm produce.

PARCELS POST TO AUSTRALIA.

A reduction in parcel post rates between Canada and Australia went into effect on Jan. 1. The rate to and from Vancouver for two-pound packages is reduced from 48 to 36 cents, for three-pound packages from 73 to 48, five pounds from $1.21 to 73 cents, with corresponding reductions up to ten pounds for which the old rate of $2.67 is reduced to $1.46.

DESROCHERS CO. CALENDAR.

Desrochers Company, 268 Centre St Montreal, Que., dealers in hardware, paints, oils, electric and gas fixtures, etc., have issued a large calendar measuring 20 x 26 inches.

On each page of the calendar a large number of illustrations appear showing various lines of goods carried in stock by the firm. Several hundred cuts have been used.

A small space is reserved on each page for showing a yearly calendar in addition to showing the prevailing month.

A large number of catchy phrases are shown, on the pages of the calendar, a few of which run as follows:

All things come to those who wait except what you are waiting for.

* * *

Don't lose any time brooding over a mistake or failure, look ahead not behind.

* * *

Thoughtfulness for others, generosity, modesty, and self respect are the qualities which make a real gentleman.

* * *

Our efforts to please you, when we succeed please us more.

* * *

There is just as much as much time and trouble taken in saying a bad as a good word, so why not say the good one.

* * *

Fortune's ladder was made to climb and it is not considered lucky to spend one's time walking under it.

* * *

Initiative consists of doing on the spot, without being told and without complaining what the other fellow never thought of doing and didn't do when he was told.

A nicely worded letter accompanies each calendar.

THE TEN GREATEST INVENTIONS.

"What are the ten greatest inventions of our time?" asked a scientific journal recently. It awarded the prize to the contestant sending this list:—The electric furnace, the steam turbine, the gasoline automobile, the moving-pictures, the aeroplane, wireless telegraphy, the cyanide process, the induction motor, the linotype, the electric welding process. And all this was accomplished in a quarter century. Can you name offhand seven of the inventors?

Ludger Gravel Calendar.

Ludger Gravel, dealer in carriage and blacksmith supplies, 26 Place Jacques-Cartier, Montreal, has issued a very attractive 1914 calendar which he is sending out to the trade.

The following items were taken from the issue of Hardware and Metal of Jan. 13, 1894:

"The hardware store of Lawrence & Campbell, Miami, Man., has been destroyed by fire."

Editor's Note.—The store was rebuilt and Lawrence & Campbell are still in business in Miami.

This firm is one of the pioneer firms of the West, and has grown considerably during the past twenty years.

* * *

"Stewart & Wood claim the honor of having received the first shipment arriving on the Toronto market this year."

Editor's Note.—Stewart & Wood are still located on York Street, Toronto.

* * *

"Lewis Bros., of St. Suplice St., have bought out the complete stock of general hardware of the late firm of Beury, Macpherson & Co."

Editor's Note.—Lewis Bros., Ltd., are still located in Montreal. A report of their ninth annual convention appears elsewhere in this issue.

CONTINUED FROM CLERK'S PAGE.

Some men resolve to earn a little more than they spend, and the wiser ones resolve to spend a little less than they earn.

* * *

It's a safe bet that the average citizen is more interested in the downfall of a neighbor or a competitor than in the downfall of Huerta.

* * *

The trouble with some men is that they are all the time thinking that tomorrow is going to be better than they are making to-day.

* * *

39 OF THEM DEAD.

A man was fixing his motor car.

"Trouble?" asked a bystander.

"Yes," was the laconic answer.

"What power car is it?"

"Forty horse," came the answer.

"What seems to be the matter with it?"

"Well, from the way she acts I should say that thirty-nine of the horses were dead."

Methods of Retailing Paints and Varnishes

Making Paint Sales in January

Merchants Should Create Demand — Many Opportunities for Paint Sales During Winter Months—Brush Sales Should not be Overlooked.

NOW that the Christmas rush is drop off to a certain extent for over and, as usual, business will the winter months, what are you going to do to make use of this slack season? There are many ways in which the hardware dealer can devote his spare time to advantage and not only educate himself but also his customers by pushing lines which are supposed to be anything but seasonable at this time of the year. Too many hardware dealers to-day are satisfied to wait until each line is in actual demand whereas they could employ methods at times when these lines were quiet, to create a demand.

Let us look, for a few moments at the question of winter paint sales. It is the general opinion of quite a number of dealers to-day that after the early fall rush has been satisfied and paints get quiet, that there is no further demand for them until the following spring rush starts in. Many merchants seem to be satisfied to wait for this demand and apparently are following the old proverb which runs somewhat in the following manner—"Everything comes to him who waits.' Why wait for a demand when you could, by throwing out a suggestive hint to your customers, create one? Is it your opinion that the merchant who "waits" makes the same progress as the merchant who is not satisfied to wait but goes out after this demand and meets it two or three months in advance of his competitor? Which of the two appeals to you as the one to succeed?

Some people will ask, "what class of painting can be carried on during the winter months.' Outside work of course is suspended during the cold weather so naturally we will have to direct our attention to inside work, altogether. Now the question arises what advantages are there in painting at this time of the year. First and foremost comes the answer temperature. There is but little doubt that when the stoves and furnaces are going full blast that the air as well as the walls and ceilings of any house is much dryer than during the summer, spring and fall. Therefore, it seems that for inside decorating a better season could not be chosen.

The home of every man is used during the winter months for entertaining, or even spending quiet evenings there, and everyone will admit that the more attractive and pleasant the home appears, the more pride the family will take in it. Almost every man spends quite a number of evenings at home during the winter months and these could be devoted to the brightening up of his house.

These facts will have to be brought to the attention of your customers as most people think the proper time for this work is in the spring. Why should any man live in his house all winter and then as soon as he can take advantage of the outdoor air by enjoying his evenings on the verandah or elsewhere, start to paint up the interior of the house and leave it open all summer? By the time he is forced back indoors in the fall his house will look almost as if it had never been painted.

One of the quickest ways to bring these facts before your customers is to make a window display of paints used for inside work. Possibly a couple of neat window cards bearing helpful suggestions would break the ice, or in other words, bring the attention of your customer or the passer-by to the idea of brightening up his home. It might also be well to mention these things to customers who enter your store, as it could be done with out any trouble while waiting on them, and point out to them the advantages to be gained by doing this work at the present time.

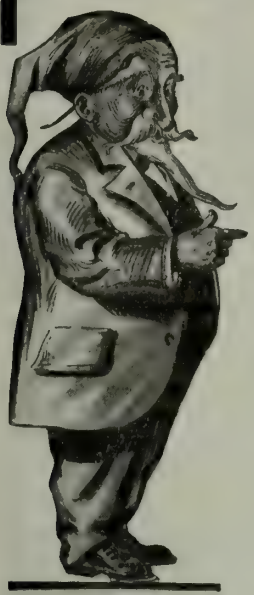
There is one important feature in connection with this work which does not come into play as often as it should and with some dealers, it is never thought of. To use paint it is necessary to use a brush, and there are very few homes today possessing a good paint brush. It, therefore, might not be a bad idea to make a display of some brushes as well. If a merchant gets after this business hot foot there is no earthly reason why he cannot show a decided increase in his paint sales during the winter months. The demand will have to be created and this can be done by suggesting the idea in different ways to the customer.

Perhaps the most redeeming features of brightening up during the winter months by the man who does not do this work himself will be the argument of cost. In the first place labor is cheaper than in the summer months, as it is the off season of the trade, and naturally those employed in that work are only too anxious for employment and will not make their prices too stiff. Then again, skilled workers could be secured, as there would be a larger field of men to choose from. The lines which would come into prominence would be floor preparations, varnishes, stains and paints for walls, etc. Even if it is impossible for a man of ordinary circumstances to spend the money for labor this work can all be done by an amateur as there are no fancy or delicate parts to paint.

As for the matter of color effects, if a salesman is a thoroughly up-to-date paint salesman, he can make suggestions as to color schemes, and therefore assist the customer to choose wisely.

There are many methods, which can be used successfully, in bringing paints before the public during the winter months.

An early start is half the battle, and the dealer who begins to roll in paint sales during the first month of the new year, will be off to a good start and will in all probability have a very successful year in his paint department.



METHODS THAT WON.

(Continued from page 50.)

space filled with generalities or specifications. Practically all our sales literature issued in conjunction with our plan of concentration has been built upon the testimonial. We even worked one into the cover design for our catalogue supplement.

The fact that our efforts have met with success and that we have been able to turn an "off" year into one of our best dividend payers, showing a 28 per cent. sales increase, is largely due in the last analysis to applying the experiences of those in other fields to our business. After all, there is little "new under the sun," and the safest way seems to be the tried and proven way. The fellow who sets up claims as to being the originator of any business plan is taking a long chance; he might be surprised to know that the same thing was new when Nero was a boy.

CALCIMO

The Sanitary Wall Finish

Calcimo is in dry powder form and requires only mixing with cold water to make it ready for immediate use.

Calcimo will not peel or crack if applied to a solid surface.

Calcimo is the only Kalsomine soluble in cold water that can be re-coated.

Calcimo will not rub off.

A GOOD PROFIT-MAKER

Many of your customers will be anxious to brighten up the different rooms in their homes, but are not willing to go to the expense of having a painter do the work. Anyone can use Calcimo. You are not dependent on the trade of the limited number of painters in your town—every householder is a possible buyer of Calcimo.

Weekly Market Report---Paints

MONTREAL.

Montreal, Jan. 7.—Although the business so far this year on the local market has not shown much change over last year it is a little early to draw a comparison. The travellers have started back on the road again and as soon as their orders commence to arrive it will be quite easy to judge what sort of opinions the retailers have for the coming year. All the wholesalers have great confidence for the future and although they look for a quiet time during the next couple of months they expect to see business pick up after that period. The orders which have been received to date point out clearly the fact that the retail trade also have confidence in the future and although business will take some time to right itself it is thought by all that midsummer ought to see things pretty well back in shape. It is indeed very pleasing to learn that the West is picking up rapidly and business men in that part of the country are placing their orders for spring deliveries and by the size of these it is quite plain to see that they look for a good year. There are a goodly number of orders being received at present, although the bulk of business is for spring delivery.

White Lead.

The market for lead is subject to a seasonable demand the quantities being ordered being just sufficient to fill actual wants with the following prices quoted. There is a very firm feeling on the market due to the increase in price of pig lead and the supplies available which have suffered owing to the Mexican situation. The increased cost of linseed oil will also have a tendency to hold this market up and cheaper prices are not looked for by local dealers.

Dry White .....6¾ cents.

Lead in Oil--

5 ton lots $7.75
1 ton lots 8.05
Less than 1 ton..... 8.25

Linseed Oil.

Owing to the present condition of the flax market the prices of oil have been advanced three cents and the market is very firm at the present figures. It is not thought that there will be cheaper oil as the decline which took place in December is thought to have been in sympathy with the lack of business during the holiday season. The amount of business passing at present is quite seasonable and although orders now being received are small and just sufficient to fill actual wants they are quite consistent. The following prices are being quoted by local dealers.

Raw Oil—

1 to 4 barrels.....60c per gal.
5 to 9 barrels..... 59c per gal.
10 to 25 barrels.... 58c per gal.

Boiled Oil—

1 to 4 barrels..... 63c per gal.
5 to 9 barrels..... 62c per gal.
10 to 25 barrels.... 61c per gal.

With open prices for carload lots.

Prepared Paints.

As stated, the amount of business passing at this season of the year is very good although most of the orders being received are for future shipments. All manufacturers state that the retailers' orders being received at present go to show that they have great confidence in the future and the manufacturers in general look for a much better year than the one just passed, which, by the way, was a very satisfactory one from their standpoint.

Glass.

The amount of business passing is rather light although quite seasonable with the same prices ruling.

Putty.

This market is governed pretty much by the demand for glass and as that market is rather quiet at present it may be said that the demand for putty is very much the same. The following prices still rule:

Bulk, in casks....$2.30 per 100 pounds.
Bulk, in drums.... 2.50 per 100 pounds.
Bladders, in barrels 2.80 per 100 pounds.

With the usual advance of 70 cents per 100 pounds for pure putty.

Gasoline.

Although this is the "off" season for gasoline the amount of business passing at present is quite seasonable with quotations for barrel lots at 26c per gallon in wood, 23c per gallon in steel and drums, while the local tank waggon price for 100 gallons and over is 21½ cents.

Turpentine.

Locally, the demand is limited but very steady with quotations for barrel lots at 64c per gallon, while 59 cents is quoted for lots of 5 bbls. The market is very firm at these prices.

Benzine.

The demand at present is limited in this market and the following prices are in effect. For barrel lots in wood 25 cents is asked, while 22 cents is asked for the same quantity in steel and drums.

TORONTO.

Toronto, Jan. 8.—The feature of the paint market this week is the advance in the price of linseed oil which goes into effect to-day.

Toronto quotations have advanced three cents per gallon. The rising flax market has had the effect of boosting oil prices, and some members of the trade are of the opinion that quotations will be still higher.

The present quotations are claimed to be much lower than the price at which foreign oil can be imported.

Turpentine has also advanced one cent per gallon and the market is showing strength owing to the increased demand in the South.

A large number of lead orders have been booked for spring delivery.

Prospects for future business are exceedingly bright and the trade in general, expect to do a large volume of business this year.

Spring booking has already commenced and with the completion of stock-taking in many of the retail stores there should be a general influx of booked orders.

Linseed Oil.

The market has exhibited considerable strength, and Toronto quotations have advanced three cents per gallon. The new quotations are shown in the accompanying panel.

TORONTO QUOTATIONS ON OIL.

Raw Linseed, 1-2 barrels	..62c	gal.
" " 3-5 "	..61c	"
" " 6-9 "	..60c	"
Boiled Linseed, 1-2 "	65c	"
" " 3-5 "	64c	"
" " 6-9 "	63c	"
Turpentine, single barrels.	66c	"
2 to 4 barrels.....	65c	"
5 gal. lots	73c	"

Turpentine.

Reports from the South indicate that there has been an improvement in the demand for naval stores.

Toronto quotations have been advanced one cent per gallon and the prices now quoted are as follows:—Single barrels, 66 cents per Imperial gallon; 2 to 4-barrel lots, 65 cents per Imperial gallon; 5 gallon lots, 73 cents per Imperial gallon.

The Southern market exhibited considerable firmness the early part of the present week.

White Lead.

No change has taken place in white lead quotations and orders are being taken for delivery up to May 15, at the following prices:—

5 ton lots, $7.90 per 100 lbs.
1 ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

SELLING "QUALITY"

NATURALLY, everyone considers the cost of painting. Some consider the first cost only—but this is the wrong view and is the most expensive in the end. The *only* economical paint is the paint that endures, and the fact that people are getting educated up to the point of realizing this makes

B-H "ENGLISH" PAINT

unquestionably the best paint for the dealer to handle. With every can going over your counter, you also sell "quality."

Every job of painting involves two elements of cost—labor and material; and the oftener the job has to be repeated, the greater the cost of maintenance of that particular building.

As B-H "English" Paint excels in durability, it necessarily follows that you will have to paint less often with it than with any other paint, hence the cost of keeping a building properly protected with B-H "English" is less than with any other paint. This is an unanswerable argument and is a sales-builder for B-H Paint. Consider this when stocking paints.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

CURRENT MARKET QUOTATIONS

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for large quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

BRINGS BIGGER BUSINESS BETTER PROFITS

MARTIN-SENOUR PAINTS & VARNISHES

"A Repeat Order in Every Can"

Success isn't made up of orders. It is made up of re-orders. A satisfied customer returns to be satisfied again, while a good customer, poorly served, lasts no longer than the shoddy he buys.

Martin-Senour Paints and Varnishes are of best quality — producing best results for the purpose for which they are intended, so that each sale makes a satisfied customer and widens the way for more sales to follow.

Our big *nation-wide* Advertising Campaign in the leading Magazines, Farm, Religious and Commercial Publications will lead many new customers to the stores of our Dealer-agents—but these are only some of the many advantages of the Martin-Senour Full Line Agency.

The individual benefit of offering "100% Pure Paint" to pre-convinced buyers makes selling easy, and the repeat orders in every can build business.

Look well into our exclusive agency proposition. It's bound to interest you. A postal from you will bring particulars.

ROBERTSON SOCKET HEAD WOOD SCREWS

Will Give the Wood Worker the Best Satisfaction

They Save Time, Labor and Material

This is a real wood screw. A specially designed screw driver fits snugly into the square hole, and there it stays until the work is done.

This is the only wood screw of this type on the market and it is invaluable to carpenters, cabinet-makers, carriage-makers and for electric wiring.

Be sure to stock a few.

We manufacture high quality Hand Drivers, Yankee Bits, Brace Bits, Rivets, Bars, Washers, Nails, Wire, etc.

Drop us a card for catalogue.

BENJAMIN MOORE & COMPANY, Limited

MAKE **TORONTO, CANADA**

MURESCO, The best Wall Finish.
SANI-FLAT, The best Flat Oil Paint, washable and non-poisonous.
MIXED PAINT, Moore's House Colors, second to none.

YOU Should know our proposition. It's worth while.
Should write us to-day for full particulars.
Should sell the MOORE Line and make more money with less investment

The F. R. Murray Co., Ltd., Vancouver **Distributors for British Columbia**

Stephens Oil Stains

are sure profit-makers and custom-keepers. Users find them so satisfactory they patronize the dealer who sold them.

And not only for more oil stains but for those other lines you handle. You can't afford to be without this trade help.

Write to-day for agency proposition and color card.

G. F. STEPHENS & CO., Limited

Branch at Calgary, Alta. **WINNIPEG, CANADA**

Over half a hundred years of paint production

has brought us to the point where we can unhesitatingly recommend Jamieson's various Paints to be unsurpassed for the particular work for which they are manufactured.

The dealer is protected

because this recommendation amounts to a guarantee on every drop of paint that goes out of our factories.

We want to talk over the paint proposition with you. How about it?

PARIS GREEN.

24½ cents per 112 lbs.

Do You Know—We Told You

I.C. RED LEAD IN LINSEED OIL

IS BETTER

Than other Red Leads or Red Lead substitutes.

BECAUSE

It is always ready for use—Remains suspended in oil indefinitely—Dries quickly without the use of driers—Is more economical.

IT DOES NOT

Contain any adulterants—Disintegrate or chalk off—Harden or Solidify—Turn white after applying—Cost proportionately as much

AND WE PROVED IT

By having Canada's Most Noted Chemists, Milton Hersey, Limited, Montreal, make not only a chemical but a PRACTICAL WORKING TEST of it.

That report has been published several times recently in HARDWARE and METAL. We shall be glad to send you a copy of it.

NOW WE ARE GOING TO PROVE

I.C. Everlasting Paint

Is BETTER than other paints you are now buying or are able to secure

BECAUSE

It has greater covering power—It will not blister—It will not disintegrate or chalk off—It will hold its color—It works more smoothly under the brush—It contains pure linseed oil only—It sheds water like a duck's back.

YOU CAN TRY IT OUT YOURSELF—MAKE YOUR OWN TESTS—AND PROVE IT.

Write us for samples and particulars.

Watch this space for report of tests which are now being made.

ESTABLISHED OVER 130 YEARS

The dealer who wants to make a big **paint** profit should stock a **complete** line of paints, varnishes and supplies.

He must handle a product of **known** worth, that will give satisfaction to householder, contractor and painter—a product that will bring his customer back for more and add to the good reputation of his store.

Since 1842 dealers have found that it is an easy matter to hold the whip hand in the paint trade of their district if they handle

RAMSAY'S PAINT

A. RAMSAY & SON CO., MONTREAL

DOUGALL

HOW TO SAVE MONEY IN VARNISHING

Explain to your customers that fine Varnish covers more surface than low-grade quality, which means less gallons for the job—time is saved in the putting on—a saving in labor—and the durability of Dougall's Varnish saves revarnishing, thus the upkeep is less.

The Dougall Varnish Company, Limited
MONTREAL

The Genius of the Fleet

In the January issue of MacLean's Magazine Admiral Von Tirpitz is called the creator of the German Navy. His position in the making of this modern state is most graphically told in the third of the series by Frederic W. Wile in the first issue of the new year.

The Rise of McCurdy M.P.

The Millionaire of Nova Scotia

This story shows how this young Napoleon of Finance became the head of a powerful brokerage and achieved political renown. Don't miss reading this sketch.

The other excellent articles are no less interesting to business men. In fact the January Issue is teeming with information and interest, peculiar to the Merchant, Business and Professional men of Canada.

Here are the titles of other articles that will interest them:

Culture in Business Life, by Alexander F. Eastmen, M.P.

A King in Poultrydom. A University Graduate and a School Master whose hobby has made him, by Herbert Gransford.

How it Feels to Carry Money; Money Making Fur Animals, and other features in Fiction and Romance, **Review of Reviews,** etc.

And a numerous selection of clever short stories. "MacLean's — the National Magazine."

Send two dollars for a year's subscription of this magazine. Single copy twenty cents.

Housewives Want An Easy Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.

The Thermo Washer is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.

Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

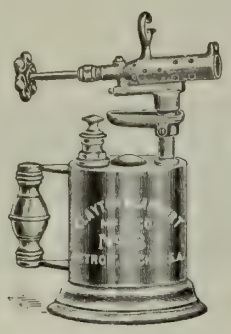
You will find this



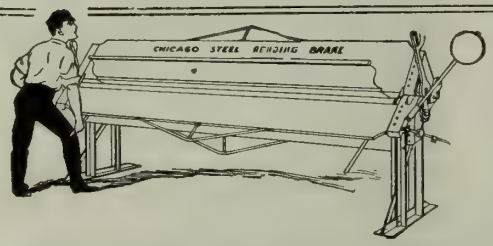
MAXWELL "HOME 65" FOOD CUTTER

one of the best selling lines you ever handled.

The "Home 65" is a new machine embodying all the latest principles. Made in the standard family size and much stronger than the ordinary type of machine. Cap fits close, rendering the machine quite watertight. The open-end cylinder makes it easy to clean. Supplied with different cutting plates.

DAVID MAXWELL & SONS, St. Mary's, Ont.

A WISE MECHANIC



is always very careful in the selection of his tools. This is essential and of vital importance to the user of a Fire Pot or Torch. Any tool that uses gasoline as fuel should be made very strong and durable, for gasoline is hard to confine under pressure.

Our tools are made of the best materials to withstand hard usage, and are reinforced. Our burners are made of special generator metal, producing intensely hot blue flames, using very little fuel, and will soon save their cost in the saving of fuel alone.

All leading jobbers will supply at factory price, or we will ship direct if cash accompanies the order.

No. 32 TORCH
Price each, $5.20 Net.

Establish a Profitable Ornamental Fence Department

Handle a line of fencing that is bound to give long continued satisfaction—fencing that not only protects but beautifies property, as well—fencing that can't help bringing more trade to your store. Such is

Peerless Ornamental Fencing

Every stay is made of strong, stiff wire that will not sag. This fencing is made from galvanized wire and in addition, is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless fence is easy to erect and will hold its shape for years to come. We also build a full line of ornamental gates.

Send for Dealers' Proposition

Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc. Also ask about our farm fencing and gates.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Dull or Bright?

Which way do you prefer to have your tool orders shipped to you?

Dull and tarnished—perhaps spotted with rust—or bright and shining—ready for your showcases?

If those tools come dirty, you know, you'll have to set to and clean them, before putting them on show; if they come wrapped in

British-American Wax Paper

they'll be just as bright as the day they were made—they'll be right ready for your customer!

So tell your jobber and manufacturer to wrap all bright things in "British American," they'll be glad to do it when they know that it means your appreciation.

But write them to-day—before you forget.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phrases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.50 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infiite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business, Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

MEN WHO SELL THINGS. BY WALTER D. Moody, Business Manager of the Chicago Association of Commerce. An indispensable book for merchants, manufacturers, employers, salesmen and all who have goods of any kind to sell. The author forcibly sets forth such themes as how to approach men; how to create and develop the compelling personality, the genial address, the engaging presence of the energetic business-getter; how to attract, convince and sell a prospective customer under adverse conditions; how enmity may be turned into friendship, interest into desire, curiosity into sales, and sales into permanent custom. A few of the subjects discussed are: Right Kind of Salesmen; Specializing Efforts; Letters to the Trade; Getting the Price; Retail Salesmen; Sales Manager, etc. 205 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

A Bargain

must have two essentials in order to deserve the name—it must be useful and cheap.

Hardware and Metal

offers a real bargain in its Want Ad. Department. Here, at the lowest possible cost, you can place before the very persons most interested, **hardware men and men in the allied trades,** any respectable business proposition.

Here is Proof of the Value

SIXTY SWISS ARMY RIFLES, at $2.50 each. Box 920, HARDWARE AND METAL, Toronto. (48)

F. Y W. Braithwaite, Blind River, Ontario, who inserted this ad., says "It brought us replies from nearly every province of the Dominion."

The Cost was 39c

If you have any proposition, in which you consider hardware dealers, clerks or travellers would be interested, try a want ad. in

Your Vacuum Cleaner Business

THE holidays are over, and we are down to business again; planning for another year. Have you decided what Vacuum Cleaner you will sell during 1914? A good line means large and quick sales and big profits. Therefore handle the

CADILLAC LINE

First in Service **Lowest Priced**

The Cadillac Electric (pictured above) retails at from $25.00 to $35.00. The Cadillac Combined Carpet Sweeper and Vacuum Cleaner sells at from $9.50 to $14.00.

The latter is just what women need where electric power is not available. All the price is for the machines and not partly import duty.

Write to-day for full information.

"Sure, Mine is an O-Cedar Mop"

"Why, I would not even try to keep house without it. You have no idea the hard work and time it saves me."

That's the verdict of 1,000,000 enthusiastic users of the O-Cedar Polish Mop. Every one of them satisfied.

The O-Cedar Polish Mop

(Made in Canada)

affords practically every hardware dealer in Canada an excellent opportunity to effect more sales.

This mop makes a hit with the housewife because it gets into every crevice and corner, and makes it easy to clean those hard-to-get-at places, such as between the banisters, tops of high furniture, under the beds, between the radiators, etc.

The O-Cedar is extensively advertised in the daily papers in the important cities from coast to coast in Canada, also in the largest and most popular magazines. Housewives in your vicinity are reading about its advantages—let them see it in your window and they'll buy.

The O-Cedar is sold on the "satisfaction or money back" principle.

CANADA'S DEPARTMENTAL HOUSE FOR MECHANICAL GOODS

Increase your cash sales by bringing the Automobile Owner to your door. The Automobile Accessory business pays a very attractive profit.

HANDLE only staple or well advertised Automobile Accessories and send every customer away satisfied, both as to the quality of your goods and the price which he has paid for them and you will soon have a supply trade to be proud of.

It is essential to success that you should select a line of goods which will move quickly and are right. We will carry complete stocks in our various branches throughout the country, and can make prompt shipment to your order. You should carry a complete stock of all staple articles. It is just here that we can be of most service to you. We have experts in our employ who will be glad to advise you just what you should carry. It is not to our interest to overstock you and you can rest assured that our recommendation will be very conservative.

As a preliminary send for our Supplementary Automobile Supply Catalog No. 54A. If there are a number of Ford Cars in your vicinity send for the Ford Special Catalog No. 55.

They will show that we have the finest line, and the prices are right.

"How Much Do I Owe You, Sir?"

Mr. Merchant, you've had this question to answer so often it's part of your daily business; and each time you've wanted a bookkeeping system that would not keep your customers waiting.

Waiting Customers are not generally satisfied customers.

A hurriedly prepared bill is not always correct.

Mistakes destroy confidence.

So why not install the

Barr Account Register

for your credit accounts? A system that gives a complete statement of account and satisfies a customer with each purchase means money to you.

Barr Registers are built in two styles—large floor cabinet style, which combines desk, credit register and filing cabinet to handle any number of accounts, and the smaller counter cabinet style for the smaller credit account business.

Why not write to-day for information and demonstration that awaits your request?

Barr Registers Limited

TRENTON, ONT.

Great Britain—Head Offices, Dacre House, No. 5 Arundel St., Strand, London, W. C.—Factory, Birmingham, England.

Special Notice

The Barr Register is a bona fide Canadian invention, fully protected by valid patents. There is not and never has been any legal proceedings against above patents, notwithstanding all competitors' talk to the contrary. We make this announcement as we understand that some merchants have been imposed upon and induced to buy other account registers through such talk.

What Motor Trucks Can Do For The Hardware Dealer

Mack Truck used by The James Walker Hdw. Co. Hardware Dealers, Montreal.

The motor truck will enable you to deliver goods over a much larger area than is possible with horse and wagon. Expanding your area expands your business.

A large number of your orders are received over the telephone. With the motor truck these orders can be given prompt attention and sent out C.O.D. Your customers will appreciate this ready service.

The motor truck will enable you to send to the wholesale house for goods that are wanted in a hurry and which are needed before the wholesaler can make delivery.

The motor truck will not require your attention on Sundays or holidays.

We are sales agents for the leading gasoline motor truck of the world—MACK.

Let us make a study of your business and recommend the kind of truck you should have, type of body, capacity, etc. If, after an investigation, we find it would not be profitable for you to operate a truck, we will not attempt to sell you one. Give us a chance to tell you about the Mack.

Ask us for Facts and Figures.

BLACK DIAMOND HOCKEY SKATES

No. 300. Full Nickel Plated. Sizes, 10, 10½, 11, 11½ inches.

Our List Price per Pair, $5.30

Made from **the very best** materials and in a manner which gives it many advantages over other skates — advantages which are in plain sight and which can be pointed out to your customer.

The Foot Plate and Heel Plate are of Cold Rolled Steel, and are supported on Standards in such a way as to distribute the weight of the skater to advantage.

The Blade is of the Best Hand-Tempered Steel, and is beveled to prevent cutting too deeply into the ice.

Many of our customers who have been handling this Skate express much satisfaction with the reception it has received from skaters.

You might add this line to our Mutual Advantage.

THE HALO OF QUALITY THAT SURROUNDS

WINCHESTER

Rifle And Pistol Cartridges

Makes Them Ready Sellers

You don't have to "talk up" a sale when you offer a customer Winchester make of cartridges, because sportsmen everywhere know that the name means high quality in ammunition. The dealer who stocks Winchester make of cartridges can turn his money over very much faster than the one who handles other brands, which are not so well known or such ready sellers. In fact, Winchester make of cartridges are almost as readily disposed of as if they were legal tender. If you want your share of the ammunition business in your section you can get it and keep it by carrying Winchester make of cartridges, and letting the sportsmen know that you do.

The Dana Peerless Freezer

means good profits and lasting satisfaction

This is the same Freezer that has been on the market for forty years—the Freezer that has established a reputation for the Dana Mfg. Co., of Cincinnati, Ohio.

The Dana Peerless Freezer, by scraping the cream positively from the inside of the can, allows fresh cream to get next to the can and get chilled and freeze, consequently by the quick action and rapid replacement of cream, which is frozen quicker than by any other Freezer made at any price, which means the saving of ice and time, and gives the acme of satisfaction.

Place your order with us now for Spring delivery.

Every Sea is Crossed

by Disston products. From their birthplace in Philadelphia they flow out in ever-increasing volume to the very ends of the world. By river boat and ocean steamer—by railway trains and pack trains—they spread out over the oceans, the plains and the mountains. In the forests, the mills, the mines, in big cities and on the farm—wherever saws and tools are used, the ones bearing the Disston Brand are pre-eminent and predominate.

DISSTON BRAND GOODS

(Quality Guaranteed)

possess three great features that have placed them first in the world's demand. First, quality of material. From the raw materials to the finished product, every process is performed within the Disston Works by special methods that are not possible of duplication, and keep Disston quality unequalled. Second, efficiency. Distinctive patterns, original methods of manufacture, and the long experience of the Disston Works, coupled with the skill of the workmen and the quality of materials used fosters an efficiency that can not be successfully imitated. Third, reputation. Generations of mechanics have already tested and approved them. The present demand, which is greater than ever, and constantly growing in size and scope, offers the strongest kind of testimony to their continued superiority. You can

TRADE MARK

Reg. U.S. Pat. Off.

Far-reaching effects follow the wise policy of buying early, but when the demand comes, it is of paramount importance that the article you have for sale is of recognized first-class quality.

Patent applied for

McClary's

Railroad or Delivery Cans, with the "Samson" one-piece bottom and the *new improved* method of joining the breast to the body, makes them the strongest cans ever made.

Note in the illustration how the body overlap comes outside the breast —this prevents possibility of the can separating at this point. To ensure absolute rigidity, a half-circle piece of cast iron is placed between the breast and body.

The "Samson" bottom is made from one-piece heavy sheet steel and pressed by the most powerful machine of its kind in Canada. There are no rivets to hammer in, no screws to tighten up, no hoops to adjust, everything smooth and sanitary.

Our new booklet explains everything—write our nearest branch for a supply.

McClary's Quality Goods

MEMBER OF CANADIAN HARDWARE MANUFACTURERS EXHIBITORS ASSOCIATION

This is made possible not only by the recognized standard quality of the goods but by the tremendous pulling power of our complete system of advertising and the enthusiastic organization of the largest Stove Manufacturers in the British Empire.

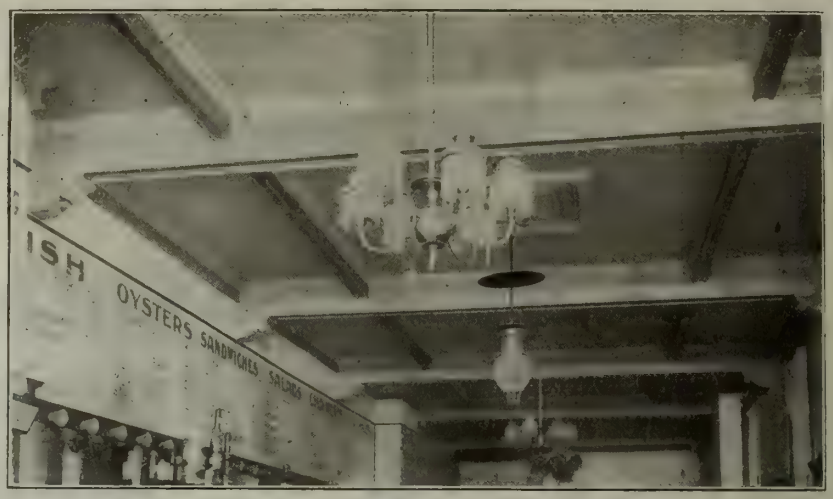
Glance at the sterling features of our Saskalta Range.

SASKALTA RANGE

The fact that it is our highest class Range guarantee material of the finest grade, and construction and finish, the best that skilled workmen can give.

The linings of the Firebox are constructed of extra heavy semi-steel in nine pieces; this enables the user to replace any worn-out section at minimum cost.

The nickelled steel oven is easy to clean out and ensures sanitation, also the nickel is a powerful heat attracter which means considerable saving in fuel.



The automatic lift top works in conjunction with the Broiler Door, that is to say one movement operates both; a patented idea.

If these features interest you, write our nearest branch for further particulars.

Note the Contour of the Grooves

This is a head-on view of a Wilt Twist Drill showing the successive steps in its manufacture all made at a single chucking.

The dotted lines show the three roughing cuts and the finishing cut that takes off the last fifteen thousandth of an inch and gives the drill its final scientifically accurate contour.

Then before the drill is released from chucking the relieving cut is taken and the clean, well defined clearance is produced.

Wilt Twist Drills are made by a process that marks the most revolutionary progress that has been made in the manufacture of Twist Drills in a quarter of a century.

If your regular supply man cannot supply you with Wilt Twist Drills, write direct—we want you to try them.

1883 WRIGHTLIGHT 1913

Short Globe Lanterns have behind them the guarantee and backing of the oldest established firm of Lantern manufacturers in Canada.

It was in 1883 that E. T. Wright & Co. turned out the first Canadian Tubular Lantern, and to-day (30 years afterwards) the same firm under the same management, are still the pioneers of the Lantern world.

Our **WRIGHTLIGHT** Lantern is the latest product of thirty years of Lantern experience. Let us tell you at least a few of the **WRIGHTLIGHT** exclusive features, which are not found on any of the Canadian imitations of our Lantern—

NON-DETACHABLE WIRE EARS AND BAIL—This patented idea of ours makes it impossible for the handle to work loose or drop off. The Lantern must be torn to pieces before the handle will break away.

RISING CONE—The burner cone is attached to the globe disc, and rises with the globe when you are ready to light the Lantern. This leaves the wick exposed ready for the match, and insures a perfect fit when the globe descends.

And then there is

THE SHORT GLOBE, which allows the hand to be easily inserted for cleaning purposes.

TO CORRECT A FALSE IMPRESSION that is being circulated among some of our Lantern friends, let us assure them that all patent rights in connection with our No. 3 **WRIGHTLIGHT** Short Globe Lantern are vested solely in ourselves, and are nobody's concern but our own—and our lantern friends, who benefit by them.

Buyers who prefer a full-length globe will find that our No. 4 Cold Blast Pattern will answer their requirements perfectly.

A large stock of both patterns on hand always, and prompt shipments a certainty.

THE MacLEAN PUBLISHING CO., LIMITED

BOOK DEPARTMENT

143-149 UNIVERSITY AVENUE, TORONTO

It's The Little Things That Count

A few yards of wire cloth—a new roll opened before the old one is used—those odd lines poked out of sight and forgotten till they're tumbled upon accidentally. These are the sort of store leaks that add up to a formidable total at the end of each year.

Wire Cloth is awkward stuff to display—it's awkward to handle and to cut up unless you keep it on a

Bowser Wire Cloth Display Rack

where it becomes easy to sell as silverware and as easy to get at as your wrapping paper.

The "Bowser" saves floor space, is convenient and adds greatly to the appearance of your store.

Once you've tried it for a few weeks, you'll wonder how on earth you managed to sell wire cloth without it.

Write us to-day for prices on the various sizes.

A User's Verdict

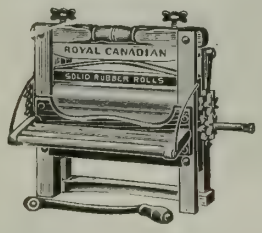
Pembroke, Ont., Aug. 26, 1912.
Messrs. R. M. Bowser & Son,
Renfrew, Pa.

Gentlemen—We appreciate the Bowser Wire Cloth Display Rack. The space this occupies, and the convenience of having the different sizes of cloth in so little space, makes it a much-needed article in the hardware store to-day.

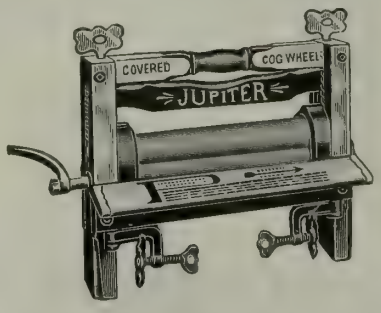
The rack has earned its wages every day since we got it, and we try to only have things on our floor that **earn their wages.**

With best wishes, we remain,
Yours respectfully,
DEWAR & RYAN.

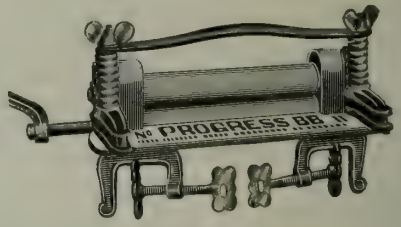
R. M. Bowser & Son



Dept. A. **RENFREW, PA.**



HOW TO SELL MORE CLOTHES WRINGERS



Just pull out a machine, point out to your customer its strong Construction, Superior Finish, the Excellent Quality of its Rubber Rolls and the Guarantee Tag that backs them. Also a few other points like Rust Proof Electro-galvanized Fittings, even to the threads on the screw bolts, etc.

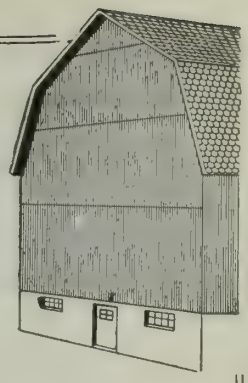
Humpty Dumpty Folding Egg Crates

for the farmers, for the poultry dealers, for a dozen and one people who enter your store every day.



Have some "Humpty-Dumpty" crates handy, where they can be seen and make a bid for all the large custom that will go elsewhere, if it doesn't come to you.

The "Humpty-Dumpty" gives splendid service, it protects eggs, preventing their getting broken—saving its users the cost many times over.

And it pays you who handle it a very nice profit, besides the good-will we've already told you about. **Write for prices.**

WALTER WOODS & CO.
HAMILTON and WINNIPEG

Read these Facts about "Metallic" Building Materials

"Eastlake" Steel Shingles.
A "Metallic" line that has held the lead for 29 years because the quality was there when the first "Eastlakes" were made and because in spite of competition this quality has been maintained.

"Metallic" Corrugated Iron.
The Iron that is different. Not only made of the best metal we can import, but each corrugation is made separately, ensuring straight and true corrugations of greater depth than usual, also greater rigidity.

"Metallic" Steel Ceilings and Walls.
The smartest patterns and the most durable materials are in the "Metallic" line. Your own store and home should have these beautiful "Metallic" interiors. No fuss or muss. "Metallic" ceilings and walls go on over wood or paper or plaster.

"Metallic" Skylights.
The perfection of simplicity and strength. Not too heavy for any roof and strong enough for the severest service.

"Halitus" Ventilators.
For barns, warehouses, garages, theatres, etc., "Metallic" quality is in the "Halitus." Bad air is expelled, but no rain or snow can get in.

"Hayes" Patent Steel Lath.
A "Metallic" lathing which ensures fireproof plaster or mortar walls, ceilings, beams, etc., etc., that last indefinitely without cracking or distortion.

We also make Cornices, Ventilator Piping, Eave Trough and Water Piping, Roof Ornaments, Weather Vanes, Roof Tile, Valleys, Ridge Material, and Corrugated Steel Granaries.

These "Metallic" lines mean money to you—

Dealers who handle "Metallic" materials make every customer "A friend for Life" because any and every article made by the Metallic Roofing Company is good for a lifetime.

Write to-day telling us what lines you are particularly interested in—We will send you catalogues gladly.

HARDWARE AND METAL

VOL. XXVI No. 3

The Problem of Rising Costs

The greatest problem facing the retailer to-day is that of keeping the percentage of cost from creeping up.

ONE of the most important problems confronting the retail hardware merchant to-day is that of keeping down the percentage cost of doing business.

It is well known that during the past few years, overhead charges, such as salaries, rents, expenses of delivery, taxes, etc., have been on the upgrade.

Ten years ago, a Grade 2 hardware salesman commanded a salary of about $8.00 per week. A clerk with the same qualifications, to-day, commands a salary of $15.00 per week.

The junior clerk of ten years ago received from $2.50 to $3.00 per week and was perfectly satisfied with such a salary. To-day he receives from $5 to $6 per week.

Costs of delivery have also increased rapidly, (except in the case of some firms who report that this has been prevented by the introduction of auto delivery) salaries of drivers are higher, wagons, harness, feed, etc., have also advanced in price, while first class delivery houses also command a very high figure.

Rents have advanced rapidly, and in some cases, there are merchants who are paying double the rent they were called upon to pay a few years ago.

The rapid increase in overhead expenses has, in many cases, encroached upon the margin of profit to such an extent, that the hardwareman has found his profits dwindling, and the returns on his investment, and for his services, have been small.

It is a serious matter for a merchant, when he finds his overhead expenses increasing, his gross turnover showing little or no increase, and his net profit growing smaller.

When a merchant reaches this stage, he must get down to business and find a remedy, or sooner or later go out of business.

The Solution.

One prominent hardware retailer when interviewed by Hardware and Metal gave his views on the subject.

This dealer, who has a large business, reports that his average cost of doing business runs between 19% and 20%.

He has found that during recent years the cost of help, rent, etc., has increased rapidly, but he has managed to keep his percentage cost of doing business around the same figure year after year.

He has succeeded in doing this by "Plugging up the Leaks and Increasing Sales" which forms a slogan that could and should be taken up by all retail hardware merchants.

By introducing an efficient system, he has eliminated all leaks. He has also paid strict attention to the selling end of the business, and has succeeded in showing an increased turnover each year.

By plugging all leaks and increasing sales this dealer has kept his average cost of doing business from going up.

By increasing his advertising, making better use of show windows, and employing a first class mailing list which he uses to good advantage, together with efficient store service, and close attention to all details of his business, he has shown a wonderful increase in sales.

It is true that his help, rent, advertising, etc., is costing more each year, but nevertheless, he has so far been able to keep his percentage cost of doing business down to a fair figure.

The dealer in question has not been slow in taking advantage of the opportunities afforded him to increase sales by adding new lines.

When a new line, which he considers a good one, is offered to him, he is not slow to take up the line and push its sale aggressively.

One or two of the new lines which have helped him out are dustless mops and dusters, electrical appliances, vacuum cleaners; also many other lines for which there has been a ready sale during the past few years.

He studies the needs of his customers and is always on the look-out for new lines of goods. It might be a good idea to mention right here that the merchant referred to is a constant reader of trade papers, and receives many valuable suggestions through this source.

On the other hand, there are dealers who have not been so fortunate, and in some cases they alone are to blame.

With the cost of doing business advancing rapidly they have been running along in the same rut, doing very little to secure new business, or push new lines and allowing what should be net profit, to be eaten up in overhead cost of doing business.

There are also retailers who are afraid to add a reasonable profit to their goods. This should not be the case. Dealers should always remember that 20% of the turnover means 25% of the cost, a fact which is often overlooked.

The location of a store has a great deal to do with the cost of doing business. Merchants in the larger towns and cities very often have to pay heavy rents. The districts into which goods have to be delivered are much more scattered in some towns than in others. There is often a great variation in the valuation of properties in towns of corresponding sizes.

Conditions and expenses vary to a great extent, but it is generally conceded by retail hardwaremen that the average cost of doing business should not (except in a few cases) exceed 20 per cent.

Hardwaremen have been exceedingly fortunate in having many new opportunities during recent years to increase their turnovers by selling many new and profitable lines which have been introduced, and also new business created by the many new conditions arising in a rapidly growing country like Canada.

Hardware and Metal has devoted considerable time in gathering data from merchants engaged in other lines of business as well as in hardware.

Department stores have also been visited and some of the information secured will no doubt prove interesting to hardware merchants and perhaps bring out matters with which the hardwaremen are confronted.

GOING INTO IT AT ONCE.

A Canadian manufacturer who lately has acquired a big interest in a departmental store when asked for particulars as to rising costs, said:

"I cannot tell you now, but the moment we get over our Christmas rush I am going into it along the lines you were asking me, to get at the exact cost and percentages of everything. I have found that comparatively few stores go into the question of 'selling costs' in anything like the detail that a manufacturer does into 'making costs.' Hereafter we shall do it in this business."

Costs Going Up.

Selling costs going up?

The owner of a large dry goods store in one of the leading Canadian cities stated that his books showed he was paying $1.90 in salary where he paid $1.00 in 1907, an increase of 90 per cent. in 6 years!

Another, head of a departmental store, named 50 per cent. in the past 5 years for the same type of clerk. Another made it 40 per cent. in five years, and nearly 90 per cent. in the last 10 years.

In a smaller city the manager of the firm submitted the following figures—

Year.	1. Wages.	2. Wages.	3. Wages.
1906 ..	$7-$8	$10	$14
1913 ..	$12	$15	$18-$20

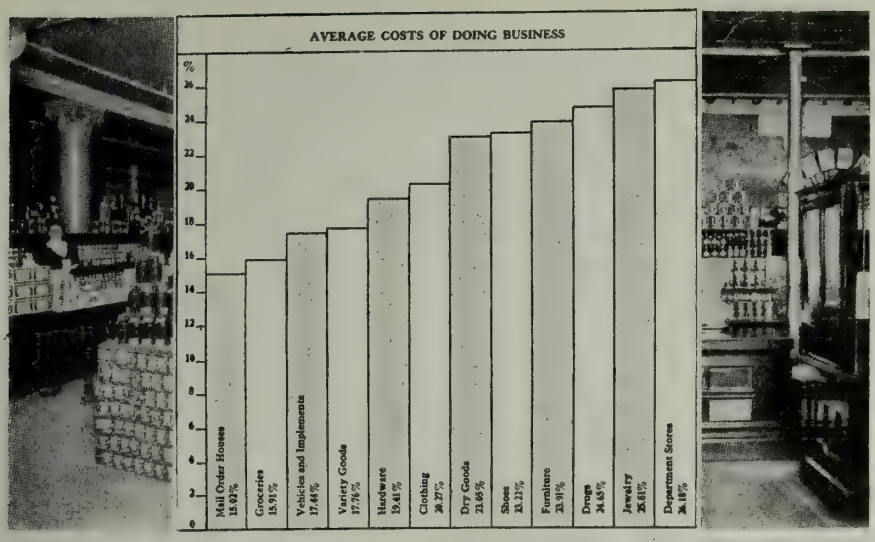
The three classes represent three grades of salesmen.

This manager declared that in spite of a constantly increasing turnover, his cost of doing business was advancing more relatively, and was now between 20 and 25 per cent. of the turnover, and his salary list at present represented 12½ per cent of this.

Another firm gave $12 as the figure for the salesman of 1893 who would command $25 to-day,—an advance of over 108 per cent!

The question of rents was not so obvious a one as was the salaries of employes, when discussing rising costs. Hardware and Metal found many merchants, some of them in very large stores doing several hundred thousand dollars a year, perhaps up to one million dollars turnover, where the "rising costs" situation was not aggravated by thrusting in the rent upon "rising" salaries, delivery, advertising, taxes, etc. "Let well enough alone," seemed to be the guiding motto. In one case an annual rental of $1,500 had been paid 10 years ago. Shortly after the firm had bought the property and still kept the rent fixed to itself at $1,500, although admitting that $5,000 was the real figure to-day! What any new owner would have charged. Selling costs were reduced $3,500 on paper, but it surely was robbing the real estate end of the business to make the merchandise end show up better on paper,—not intentionally, for the same man owned both, but it was a reversal of bookkeeping that failed to get down to rock bottom in fairly adjusting the expenditures and net profits of the whole undertaking. Had the maximum rental been allowed, the "selling costs" would have had to be increased from 2 to 3 per cent.—of the turnover.

In a smaller store, in a large city also, an inquiry as to costs of doing business showed that the rent was being neglected absolutely, for the head of the firm, owned his quarters.



Costs of Delivery.

The rising costs of delivery, although in the majority of cases not known accurately, are not being minimized in many stores.

"Twenty-five per cent. advance in five years," is a common reply. This does not mean "actual" advance, for the total cost may have doubled, and often has, and more; but for the same amount of business done in 1907-1908 the cost of delivery now is 25 per cent. more in these stores.

And this is probably a low estimate. One merchant who does business well into six figures, says that where less than 15 years ago he did all his deliveries with three boys and wheels, now he has four men and wagons. And the boys used to get about $2.50 and the men now get $12 as a minimum.

"The whole fashion of delivering parcels, — for it has come to that, — has changed," was one statement. "Women simply won't take the smallest things home now; they want even a package of pins sent, and often as not C.O.D. This has made costs of delivery go up far more than the extension of the territories in so many of our cities, which, itself, is one of the chief causes of expense. Even vanity, whose real extent it is impossible to trace, adds to the total. One evening I was on the outskirts, several miles away from this store, when I passed a house and saw two of our rivals' delivery wagons drawn up outside the gate. A few minutes later one of our own deliveries arrived. Three wagons, going miles, to divide up one dollar's worth of goods, which was about the capacity of this woman. I mention this simply because curiosity prompted me to inquire a little, and I found she did this to make her neighbors think she was a big shopper. That's

A chart which appeared in a recent number of "System" and which bears on the subject of Rising Costs.

part of the uncontrollable expenditure a merchant is up against to-day, and he has to watch more keenly than ever to make up by saving in every other possible direction."

Comparison of Costs.

A Canadian departmental store manager submitted the following as the main items of selling costs compared with the turnover:—

Salaries	5½ %
Rent	2½ %
Advertising	3 4-10%
Delivery	1 6-10%
Insurance	3-10%
Taxes and Legal	4-10%

Current, 3-10; Coal, 1-10; engineer, 1-10; etc.

The salaries ran from 4 per cent. and under for departments where sales covered large orders such as carpets and furniture, to small articles where they were 6 and even over, the average running 5½ per cent. This average has been easily maintained during 1913 until the last two months, when business fell a little slack (below 1912) and the manager was facing the question of restoring the balance,—either by cutting down some of the sales staff, or increasing individual sales.

"Had our turnover not tripled in the last three years we would never have been able to keep our percentage of expense anywhere near where they are now. As it is. the percentage is going up, 20.2 for 1912, and 21.5 for the first half of 1913."

The owner of a store doing a smaller volume of business, but large at that, who figured out that his salaries had increased 90 per cent. since 1907, for the same service, pointed out one case where early closing on Saturday evenings except during December had greatly increased salaries. That is 47 or 48 Saturday nights taken off, with 4 hours of service, or 3 hours actual selling (allowing one hour for tea), meant 144 hours, or about 16 days of 9 hours each in a year.

In this store the total selling expense is 21 per cent. of sales, and of this wages reach close to 12 per cent. Advertising is fairly high, 3 per cent., although at this a shade lower than in the store quoted before which is a very large advertiser, and spends nearly 3½ per cent.

In another store the owner, who has nearly 100 clerks, did business 20 years ago on a 15-16 per cent. cost; 10 years ago this had reached nearly 20 per cent. and this past year he estimated it would be between 23 and 25 per cent. The range in the last-mentioned figures was due to a slight falling off in business in December which would raise the selling percentage, although to what extent was then uncertain. Thus the advance in 20 years had been from under 16 to over 23 per cent. of the total sales. To come out only even, without any profits, this store must mark-up its goods on an average, 30 per cent.

The owner's estimate of salary increases in 15 years was as follows:—

	1913.	15 Years Ago.	Increase %
Girls	$6-$10	$3	100-233 1-3
Men	$15-$20	$8	87-150
Boys	$5-$7.50	$2.50	100-200

Departmental Store Costs.

Still another departmental store chief said his selling expenses in the last seven years had increased from 15 to 17.50 per cent. of the turnover. Of this, salaries averaged slightly more than 6 per cent., and advertising 1¾ per cent. In this period salaries had increased 50 per cent.

"I could not make anything like this

CLIMAX OF RENT QUESTION.

A retail merchant in a large city who had a turnover of over $65,000 last year, when interviewed, just before the close of 1913, said he was facing a problem of rising rent that meant either giving up business or finding a new stand,—a serious matter for one who has familiarized the public to his own location during nearly twenty years. Early this year his rent will be raised 50 per cent if he stays on, from $24.00 to $36.00, and will represent at the higher figure over 5½ per cent. of his turnover. With rents averaging rather under 3 per cent. he considers this exorbitant, and too risky when other selling costs are on the upgrade as well. So he has decided to move or give up business.

His situation as he summarized it was as follows:—

Rent up to 10 years ago	$ 900
Rent last 10 years	2,400
Rent for future	3,600
Salaries 10 years ago	5 p.c.
Salaries now,, nearly	8 p.c.
Advertising 10 years ago	2 per cent.
Advertising now	4.25 per cent.
Selling costs 10 years ago	16 per cent.
Selling costs 4 years ago	under 19 per cent.
Selling costs to-day	22 per cent.
Advance in salaries in 15 years	100 per cent.

The advertising as well as the rent in this store is exceptionally large, as while it is in a large city, it is situated away from the downtown district, and must depend for business on the district around say for ½ miles, instead of the whole city. The cost of newspaper advertising and circularizing this district is very heavy, and the annual turnover advances slowly, as the district has been settled a number of years.

showing (17½ per cent.) if it were not that I have brought our stock and business up to a point where we have a turnover five times a year.

"The year 1912 was a hard one on salaries," he went on. "Help was very scarce as stores and factories were running at full limit, and we were compelled to make a large advance, and will have to do some more of it early in 1914."

"And the remedy for it all?"

"Avoid overstocking; buy carefully; so that your turnover will be as large as possible; but whatever you do, see to it that the mark-up is not less for the whole stock than 50 per cent. of the cost price."

And the Remedy.

Still another merchant was inclined to a policy of retrenchment. This he thought he would try along two lines. He would gradually let go the least efficient of his help and take on others at lower salaries; and he would curtail his advertising on the ground that the field of 1914 would not be as fertile as those of 1912 and 1913.

But there are few who will follow this policy.

"My theory is the very opposite," said a man who had in a comparatively small city built up a very large business, which had extended rapidly the last two or three years.

"My policy will be to put forth even greater efforts to increase my sales and thus keep ahead of these costs as I have, pretty well, these last few years. If I thought business was to be dull, that is the very time I would work the harder, advertise more extensively, play the game for all it is worth. A man who looks for something small is likely to get it. I would not think of cutting down salaries, nor of reducing my staff. That would be a last resort. I would pull more business in, and have the salespeople work harder and handle a greater volume."

The second point of this message was: "Be more careful in buying; study coming styles more; study your customers more. Analyze your costs of selling; consult with other people to see whether you are running too high in any phase of it. To-day, most of us will be forced to adopt an almost entirely new attitude towards the question of buying in order to best keep control of our costs of selling.

"But let me repeat: do not pull in your horns, or your business will recede, too. We are planning to go full steam ahead in 1914. We are buying the same as we did a year ago, and our advertising will be even larger."

This, in substance, was the position taken by a number of retailers.

Tables of Cost.

In a table of comparisons of the selling costs of a number of stores given in this article, a grocery, stationery and hardware are included. This is done for purposes of reference. The stationery store in question increased its business from $12,000 to $15,000 in each of the past two years. Only thus, declared the manager, was it enabled to keep up to rising costs. Even as it was, salaries went up 1 per cent. in the last two years. They ran as follows:

	% of turnover.
1908	7.8
1909	8.0
1910	6.5
1911	7.0
1912	7.5

Among the items of expenditure tabulated are rent, insurance, salaries, taxes, traveling expenses, postage, light and heat, power, advertising, stock and capital, reserve fund.

"The latter amounts to one per cent. of all our credit sales; this is carefully set aside to make up for 'bad debts,' but so far it has always run ahead of them and now we have $7,000 to the good.

"Ten years ago it cost us 22 per cent. to do business but we have gradually reduced that to 15.25 per cent. This last amount does not cover rent, as we own the store, and 2 per cent. or so, will need to be added for this."

This would bring the total to about 18 per cent.

In this store salaries rose 12 per cent. in 1912 over the year before, and this year of 1914 will see another, although not nearly so large an advance.

The grocery business is one that does something like $150,000 a year in the two or three stores. The expenses at the head store averaged 14.7 of the total sales for 1912, and will be about the same for 1913. At one branch store it cost 13.92 and at the other 12.71 per cent. The expenditure is set down under one of four heads: merchandise purchases, store expenses, barn expenses, advertising. The last mentioned is 1 per cent. lower than most dry goods stores, and salaries slightly under 9 per cent. Ten per cent. of the value is allowed for depreciation of fixtures each year, and all repairs are charged against barn expenses without lessening the 10 per cent. reduction for depreciation.

SELLING COSTS IN SOME STORES.

A.—Hardware in large city, 19.50%	Selling cost kept down by annual increase in sales.
B.—Dry goods in large city, 17.50%	Salaries doubled in 12 years—4 wagon deliveries in place of boys.
C.—Grocery in small city, 14.70%	Salaries doubled in 12 years. Delivery costs 1½%; adv. 1%.
D.—Stationery in large city, 17.25%	Kept down by increasing turnovers. Salaries range from 7 to 7½%.
E.—Hardware in small city,	

NEW PLANT IN ST. JOHN.

One of the most important industrial announcements made in St. John, N.B., for some time is that to the effect that T. McAvity & Sons, Limited, will call for tenders early this year for the erection of the largest part of a great plant on a site comprising twenty-two acres located beyond the Marsh Bridge. Here the firm propose to assemble their whole iron and brass manufacturing plant, and steadily enlarge their operations until there will be, as shown in the plans that have just been prepared, a group of sixteen different buildings, and an industry affording employment to between twelve and fifteen hundred people. The contract for the whole sixteen buildings will not be awarded this year, but it is proposed to erect a very large part of the entire plant within the next two years, beginning of course in the present year. A spur will connect the plant with the Intercolonial Railway, and the St. John Valley Railway and Grand Trunk Pacific will also be connected when they come in to their St. John terminals at Courtenay Bay.

FIRE IN MONTREAL.

During the cold spell in Montreal last week the Canadian Tube and Iron Co. suffered a loss. The fire destroyed the roof of the boiler-room, and the bolt and nut department will be out of commission for a few days. The Canadian Tube and Iron Co. have, however, issued a circular to the effect that they have on hand a large stock of both nuts and rivets, and can take care of all orders. It is expected that they will have the plant running again in a very short time. The wrought pipe department was not injured.

The Books That a Merchant Needs

In Order to Operate a Retail Store Efficiently the Merchant Must Know Every Detail of His Business—He Must Have a Close Check on All Matters of Detail—The Links in the Efficient Business Chain.

By William Cambell.

The accompanying article is the first of a series that William Cambell has prepared. Mr. Cambell is a cost accountant whose daily work is to study the problems of expense and maintenance in one of those enormous retail stores which grow up in all large cities. He has put in the better part of his life-time studying the problems of retail costs, and the benefit of his experience will be given to the readers of this paper in the course of the series that he is preparing.—Editor.

WHY is it, that a man who has been a good Salesman, or a good Traveller, so often fails to make the success he expects, when he starts in business on his own account? In nine cases out of ten it is because he neglects to make his business efficient in the full sense of the word, and it is only those who realize all this, that make successful business men. How many men keep a record of every purchase and sale, and can tell exactly how much they were per day, per week or per month, and for the same period how much their Gross Profit was, their Expenses, and what their Net Profit was? Also, how many know how much stock they are carrying, and how many times they are turning it over in the year? Those who do this, will also be careful to compare the actual gross profits made on their turnover, as shown by the books, compared with what they expected it to be. Very often the result will prove a rude awakening.

The chief trouble is that when a man starts in business he has often so many different things to do, that he fails to do the main thing, viz., Make Money.

The Manager of one of Toronto's largest Banking Institutions, told the writer that in most cases it was because of bad bookkeeping, that firms got into difficulties. What is the reason of this slackness? It is because merchants fail to fully understand what it is costing them not to keep a proper Accounting System, that will give all essential particulars at a glance. If the books kept don't tell this, they are lacking in what is necessary for the success of a business.

The writer well remembers a case of this kind, when he was called in by a storekeeper to prepare a balance sheet and trading account for a partner, whom he wished to secure. The books that he had kept himself were a hopeless jungle of figures, but in handing them to me, he said: "I have been going over them, and don't seem able to get the particulars, but of course it will be easy for you." The books were in a chaotic condition. I don't know that I ever remember a more difficult task than that which confronted me in them. It was only after a long and arduous struggle that I was able to find approximately where he stood. It was a wonder that he had ever managed to keep his business running.

I would strongly advise that an experienced bookkeeper or accountant should always be called in to prepare a suitable set of books, but for the benefit of those who wish to keep their own accounts, I will give a description of the books needed in order that full details of a business can be ascertained at any time.

The Books Needed.

First.—Purchase Journal, 2 columns. In this you enter all invoices as you receive them, putting the name and total, in first column if merchandise, or in second column if expense. By adding this book up every week, you will get the total of your purchases. Insist on having an invoice or voucher for everything bought, file these away first on an unpaid file, then when paid transfer to a paid file, first marking on invoice date when paid. Your unpaid file should represent what you owe.

Second.—Sales Record. Enter up here the daily record of your sales. Where the cash sales consist of very small items the total of these entered at end of day is sufficient, but when the cash sale is of any size a separate record should be entered. In fact, a duplicate slip should be made for every sale. The importance of this is recognized by all large stores. The goods sold on credit will be entered in Day Book and the total of this ascertained every day or week.

Third.—Cash Book. This should give an account of all incoming and outgoing Cash. There should be several columns, according to the requirements of the business, viz., Accounts Receivable, Cash Sales, To Bank, From Bank, Accounts Payable, Expenses, etc.

Fourth.—Ledger. Open up accounts in this of the Total of your weekly sales, purchases and expenses, as well as all other accounts. At the end of six months when you take stock, you will then be able to ascertain the amount of your Total Sales, Total Purchases, Stock on Hand, from which you get your gross profits by adding together your sales and present stock and deducting from them the amount of your previous stock (if any) and the amount of your purchases. From this you deduct all your expenses, and the balance left is your net profit. If you have added one-third to your cost for your profit, your gross profit on turnover should come out at 25%, but as there will be cuts and losses on some goods sold, it would probably come out at 22%, and if your expenses were 17%, it would leave you 5% Nett Profit on your turnover.

If, when you take stock you find that your profit is not what you expect, it would be wise to call in a Business Expert to go over things. If this article has the effect of making you keep a full record of your business, and take stock every six months, it will probably be the means of saving you a lot of money.

HARDWARE AND METAL

VOL. XXVI. No. 3 Toronto, Canada, January 17, 1914 Two Dollars per Year

Plug up the Leaks

IN THIS terse and decidedly distinctive way a hardwareman of high standing sums up the situation with respect to the rising cost of carrying on a retail business. He has, we believe, succeeded in "hitting the nail on the head." The merchant who can keep his business costs down to a basis of economic efficiency and at the same time keep his turnover growing, will not find any difficulty in financing his business.

There is no disguising the fact, however, that the situation is a serious one. Perhaps the hardwareman has not felt it as keenly as merchants in some other lines, but he has undoubtedly had his share of worry and loss. Summed up in a nutshell the situation is this: The cost of doing business has been increasing very rapidly while it has been found difficult, nay, even impossible, to increase the turnover in proportion; this being due to a great degree to the fact that there are many lines on which prices have become fixed and which retailers are loath to advance. The result is that the percentage for overhead expenses has been increasing. This means, of course, that the percentage of profit based on the turnover has been smaller.

There has been an advance in the hardware trade of recent years, but just what the percentage has been is impossible to say. In other trades the percentage which is required to carry on business has crept up from 19.02 to 20.7 per cent., and there are signs that the advance will continue.

The solution found by some of the large departmental stores has been to advertise more and depend upon this publicity to increase the turnover. In one case the turnover has been doubled in three years, while the percentage for salaries has gone down a little. The percentage for advertising has been materially increased. The remedy in this case has been to do more business without increasing the sales staff to any extent and making the business come by a liberal use of printers' ink. This solution is doubtless one that will apply to the departmental store. It will apply to a less extent to the merchant doing an exclusive business with a turnover not exceeding $75,000.

With the retail merchant, however, the chief solution is in carefully watching costs and effecting economies wherever possible without hurting the efficiency of the business. It is surprising the number of small leaks that will develop when the watchful eye of the proprietor is removed from the cost sheets!

Plug up the leaks!

Are Provincial Zones Contemplated?

THE DISQUIETING information is being spread around that the Post-office Department contemplate a change in the Parcels Post regulations from the programme first announced. When the announcement was made last year that the system would be inaugurated at the first of the present year, it was outlined that two zones would be established. The first would be a local zone, extending over a certain radius from each post-office. In other words, matter shipped from any post-office to points within this radius would go at the local zone rate. Beyond that radius a flat rate would apply. Thus all territory outside of the radius would be in the general zone.

It is now hinted that this idea is to be discarded and a system of provincial zones instituted instead. This would mean that a parcel could be mailed from Toronto to North Bay for the same rate that would apply on a shipment to Oakville. Whether this change has really been decided upon, Hardware and Metal is not in a position to state, but the information has been accepted as reliable by the London Board of Trade, and a most emphatic protest has been registered. The business men of London recognize the dangers of the proposed system, and are agitating for a Western Ontario zone.

A protest was registered at Ottawa and, so the daily press state, the reply was wired by Deputy Postmaster-General, R. M. Coulter, to the effect that "one zone for the province has been decided upon, and will remain unchanged."

If we are to take this as literally true, then what about the 20-mile zone we were promised by the Postmaster-General himself? No doubt if Mr. Coulter had his way, there would be but one zone for the whole of Canada, a flat-rate system throughout, and a C.O.D. tacked on to that again. But if Parcel Post should finally descend upon us without the 20-mile zone, then retailers and boards of trade all over the country should "make it hot" for the party responsible.

If the idea of provincial zones is seriously contemplated, the retail merchants of Canada should register an emphatic and unconditional protest. It is not necessary to point out the dangers lurking in the new idea. Every merchant will realize at once the enormous impetus that would thus be given to buying by mail. Parcels Post, regulated by the local zone system, had elements of good in it. Under the provincial zone idea, it would become nothing more nor less than an aid to the mail-order houses.

The protest of the retail merchants should be made without delay.

The Business Outlook

BUSINESS, as far as hardware lines are concerned, appears to be very fair for this season of the year.

Hardware jobbers state that orders are coming in freely, and that booking for spring is heavy.

Continued improvement is exhibited in the metal markets, and although the movement is rather slow at present, those engaged in the trade are very optimistic. Orders for small goods in iron and steel products are coming in more freely.

The recent cold snap has stimulated business in the stove trade, although sales during the past two months have in many cases fallen behind. The outlook for spring business is good, especially in the gas stove line. In the paint trade a very optimistic tone prevails, and manufacturers are looking forward to a good year's business.

The volume of trade passing at the present time is not heavy, but this is a condition which usually prevails at this season of the year.

Conditions in the West are showing improvement, and with the opening of spring, a number of large undertakings will be under way.

There is a general feeling that business is improving all around, and that 1914 will be a good year for business.

Too much should not be expected during the next two or three months, but after that time there will no doubt be a decided improvement in business conditions.

The Convention at Ottawa

IT CERTAINLY does not seem a year ago that the hardwaremen of Ontario gathered at Hamilton for their annual convention; and yet the 1914 convention is now less than a month away. The close approach of "Hardware week" makes it incumbent that each hardwareman should give the matter his immediate attention. It is important, highly important, that there should be a record-breaking attendance of retailers.

In the first place, important questions are to come up, and an effort will be made to interest the Government in certain measures very essential to the welfare of the mercantile classes. One of the questions to be taken up is the fairer adjustment of the cost of weights and measures inspection. This is a burning question, one that vitally interests the retailer in the most vital place, his pocket book. If there is a large attendance of retailers at the convention, demonstrating their earnestness in this and in other matters, the representatives of the deputation to appear before the cabinet will be backed up in a forcible way.

In addition, it should be borne in mind that the hardwareman who visits Ottawa during the week stands to improve his knowledge of business conditions and methods. The exhibition of the C.H.M.E.A. will in itself be well worth the visit alone. The manufacturers have arranged to give a mammoth exhibition, showing the best and the latest in all lines handled in the hardware store. The manufacturers are spending an enormous sum to make the exhibition the most practical that has ever been seen in Canada, perhaps, even in America; and the retail hardwareman who visits it will find that the information to be acquired there will be well worth the trip.

The programme for the convention will be one of unusual, practical interest. Papers are being prepared by leading members and their presentation will open up discussion on live topics of every-day interest.

It is gratifying to learn from the officers of the two associations that a lively degree of interest is being shown in the approaching event, and that the attendance promises to be unusually large.

Make up your mind NOW to be at Ottawa for Hardware Week.

Summed up in Brief

Plug up the leaks, otherwise shut down on shortcomings and minimize mismanagement.

* * *

So far, the new year has started out pretty well. There is every sign of improvement in business conditions.

* * *

The retail merchant who has not built his business on the high and dry foundation of Good Service with Efficient Management will soon be swamped by the tide of rising costs.

* * *

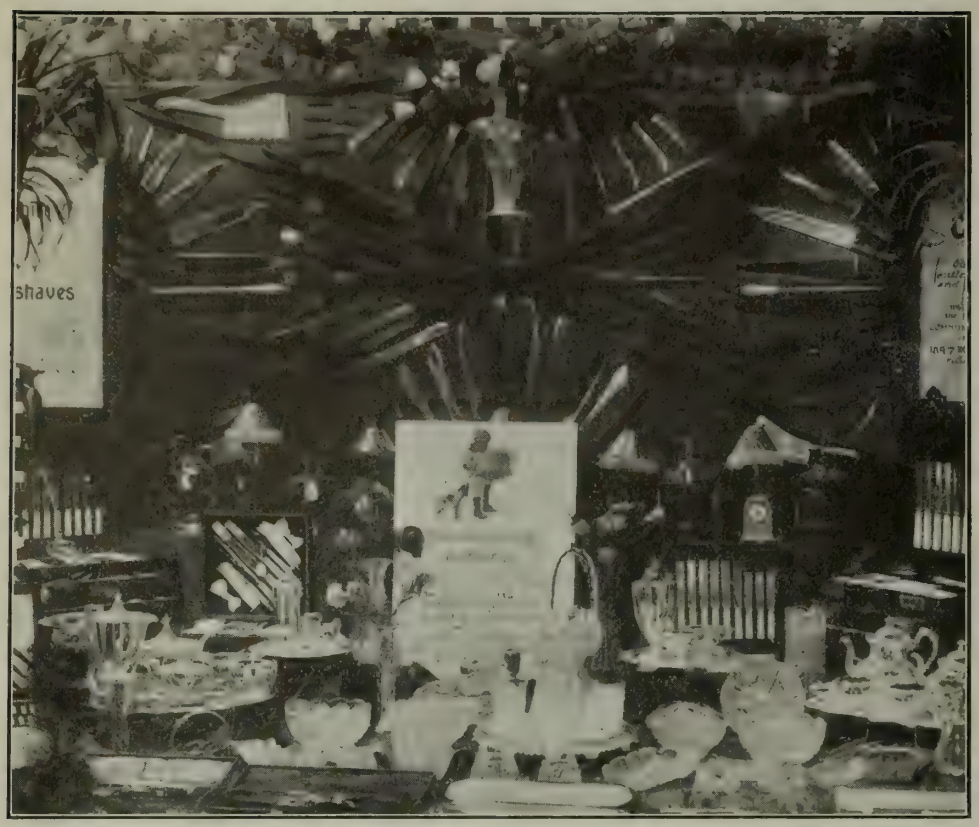
What is the value of your store front? If the use they make of it is any indication, some hardwaremen value theirs at about thirty cents. A pretty good rule to follow is to act on the assumption that you pay half your rent for the store front.

Good-will should always be behind competition.

* * *

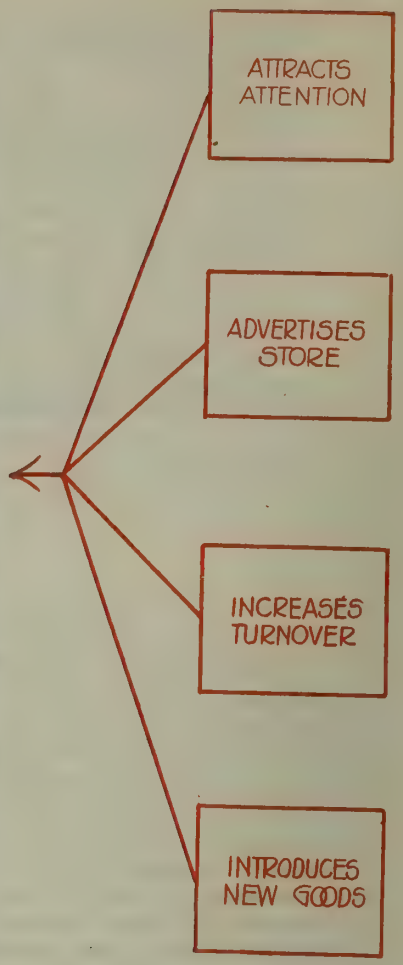
Indications would point to a material improvement in building operations this year.

* * *



To relax your efforts is a poor prelude to an attempt to win out during dull times.

* * *



A healthier tone to business is noted in the West. The hustling, rushing West has the recovering powers of an Antalus.

* * *

A Toronto hardwareman dressed a paint window the other day when the thermometer hovered somewhere around twenty-five below zero. And, what is more, he made sales. Truly, one never knows when, how, or where business is coming from. There's a moral in this. Feature paint the whole year round.

A splendid display of cutlery, silverware and cut glass, by Chas. H. Smith. This window represents the high standard that advanced hardware stores are setting for the use of their fronts. Displays of this nature go a long way toward paying the rent.

What is the Worth of My Store Front?

A Question Which Every Merchant Must Ask Himself—The Proportion of Rent to Turnovers Depends Upon a Merchant's Realization of the Value of His Store Front—Utilizing Fronts to Advantage.

THERE is a store on Yonge street, Toronto, with a depth of 100 feet. The entrance to this store is 45 feet deep and the windows run back the full depth. The store itself is 55 feet deep.

This arrangement of space may seem strange to some; in fact, giving up nearly half of the total space to mere purposes of display will undoubtedly appear to many as heretical, ridiculously and unprofitably original. One can conceive the cackle of merriment that the general storekeeper at Waupoos would indulge in at the idea of giving up half his space for this purpose.

And yet this Yonge street merchant is well satisfied with the arrangement that he has thus carried out. He finds that his turnover has grown largely. He can carry as much stock as is needed in the store; and the big windows do the rest. People flock into the store in droves. He turns the stock that he carries in the store probably once a week.

It must here be stated that this merchant does not handle hardware. He sells men's hats. Nothing else is carried but hats; and thus the arrangement is quite possible for him when it would be frankly impossible for a merchant in almost any other line. It would be absurd for the aforementioned merchant at Waupoos to emulate the metropolitan handler of hats.

The case, however, brings to the front a most important question. What is the value of the store front? It is a question which every merchant must ask himself, having in view the kind of business he is in and the nature of the locality.

To the cross roads merchant, the store front is chiefly valuable as a means of getting in and out of the store and as the chief means of admitting light into the interior. Where there is no opposition, the people must trade at that store anyway, and they can see the goods when they get in. From a display standpoint, therefore, the store front does not figure as a weighty asset.

The merchant occupying a stand on a busy corner of a large city caters almost entirely to transient trade. People who drop in there to buy are strangers for the most part. Many of them will never visit the store again. The percentage of customers, who enter one of these downtown metropolitan stores, who can be depended upon to come back with any degree of regularity, is very small indeed. It follows that the merchant carrying on a business of this kind must depend upon catching the eye of the passerby. He must have some means of making his store look attractive and of impressing on the throng the value of the goods he carries. In other words, he must have windows that are attractive in the fullest degree. To this merchant the store front is an asset of incalculable value. If he were to figure it out in dollars and cents he would probably find that he was paying a larger share of his rent for the store front than for the store itself.

These are extreme cases, the two poles of store front valuation. Every store occupies a position somewhere between these two extremes. It is highly important that each merchant should endeavor

to find out just where he does stand; in other words, to find out the value of his store front.

Charged Rent on Front.

A hardwareman in an Ontario city was paying a large rental for a store on the main business street of the town. He found at the close of the year that his expenses had increased in proportion to the turnover, and that his profits accordingly had decreased. He went over the figures pretty fully and found that the growth of expense was represented largely by the fact that his percentage for rent was very high. It totaled 4.5 per cent. of the turnover.

By enquiring among the other merchants on the street he learned that none of them were figuring more than 3.5 per cent. for rent, but that at the same time they were paying fully as much rent in proportion to the size of their stores as he was. He knew that the figure he was paying to the owner of the property was a fair one, judging from its location.

The conclusion was obvious. His turnover was not as large as the location of the store warranted. There must be something wrong with his methods.

He found out what was wrong one day when talking to his next-door neighbor, a jeweler. The store of the jeweler was small but it had a modern front and the windows were always trimmed with a splendid assortment of stock. It was impossible to pass the store at any time of the day or evening and not find a sprinkling of people inspecting the wares in the jewelry store. Compared with the hardware store beside it, the jewelry establishment presented a brilliant and attractive appearance; the hardware store loomed large, gloomy and lugubrious.

"How have you found business?" asked the hardwareman. Suppose we call him Smith.

"Fine," said Martin, the jeweler. "It has certainly improved wonderfully since I put the new store front in. I feel confident that I now have the largest and most exclusive jewelry business in town."

"Did the new front make all that difference?" queried Smith.

"I think so," replied Martin. "I have not changed my methods in any other respect. I carry about the same stock as before, my staff is exactly the same. By the way, Smith, why don't you do something about yours?"

"No use," said Smith. "The hardware trade does not call for fancy displays the ways the jewelry business does."

"Granted," said Martin. "But, you can't get away from this, Smith. We are paying large rents down here, and we're not getting better or larger stores than merchants on Sixth street who pay less than half what we do for rent. We are paying for location down here. More people pass our stores. In other words, we are paying double the rent because our stores front on the busiest part of the busiest street in town. It is logically clear to me that I am paying half my rent for the store front, and the other half for my store. Well, it appeals to me that I ought to get the most I can get out of the half which I pay for my store front. I realized over a year ago that I couldn't afford to pay $100 a month for a weather-beaten antiquated old front, even if it did face on a place where hundreds of people passed every day. They passed. That was the trouble; they didn't come in. My store looked dingy compared with the fine modern stores around here; just as dingy as yours does now. I concluded that I wasn't getting anything out of half the rent I was paying and that I might as well be back on Sixth street where I would save the half of my rent. The other alternative was to realize on the rent I paid for the store front and I decided to take this. I put in the new front, with the result that my turnover has increased very rapidly this past year."

Smith ultimately came to the conclusion that his neighbor was right. Having a long-term lease on the property, he put in a modern front. This led to the arrangement of attractive displays and in time the store was absolutely transformed. The business increased. At the present time, this hardwareman reckons that his rent is 3.25 per cent. on his turnover.

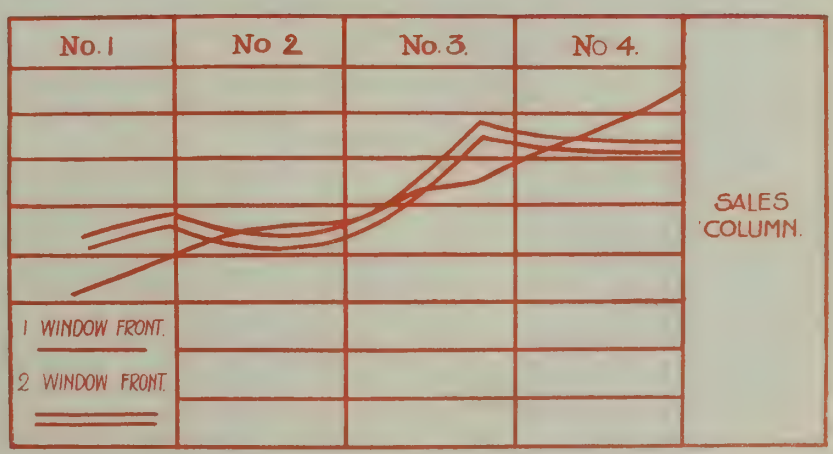
The change can be attributed to the fact that he found the real value of his store front and took steps to realize upon it.

How Much is Paid?

The first question to be decided, therefore, is how much am I paying for my store front?

This can be decided largely by comparing the rent paid with the amounts

(Continued on page 60.)



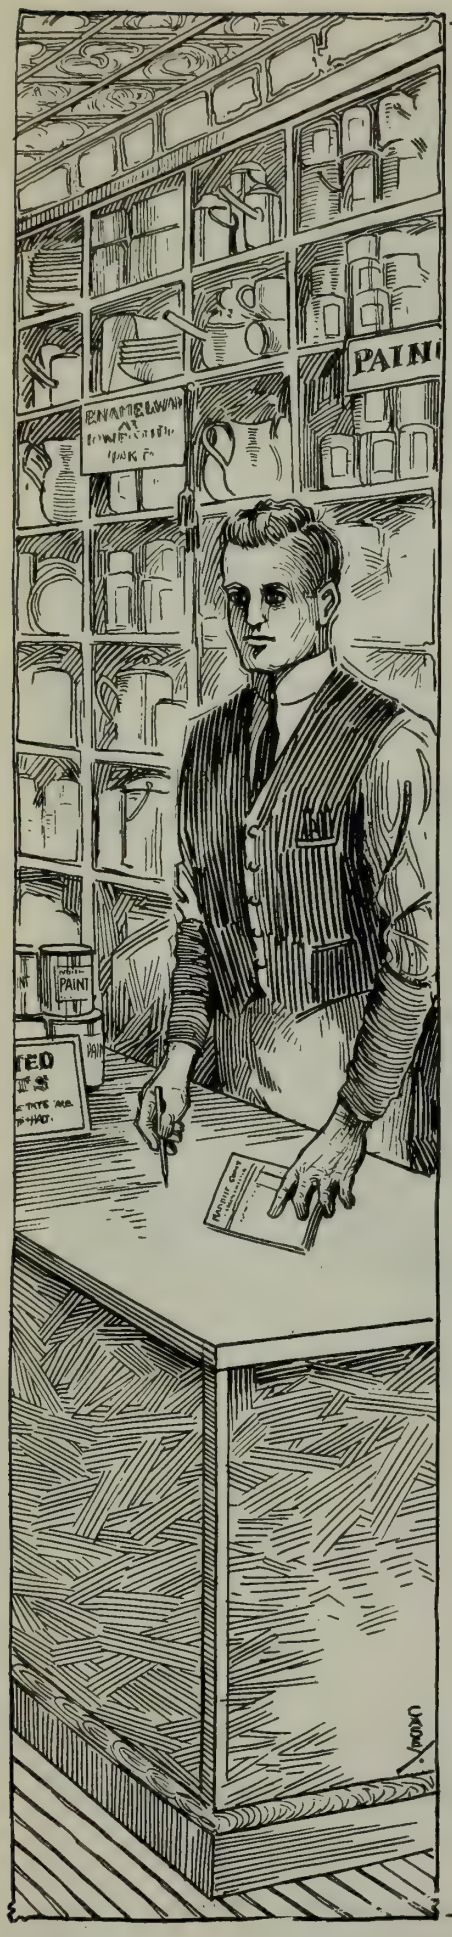


Chart showing the increase of sales in proportion to the display space in the store front. See accompanying article.

A Message to Hardwaremen

Letter from John Hall, Veteran Sales-Manager, Simmons Hardware Co.

THE following letter was read at the recent convention of the sales staff of Lewis Bros., Limited, Montreal by C. M. Strange, the sales-manager. It was written by John Hall, of the Simmons Hardware Co., St. Louis.

Hardware and Metal is glad of the opportunity to present this letter to its readers as it contains one of the strongest and most virile inspirational talks that could be presented. Its message strikes to the very heart of things and teaches the value of efficiency, co-operation and loyalty.

"The beautiful shop windows, the crowds of happy-faced people seeking tokens for friends and loved ones, remind me of the coming of another Christmas, and your letter of the 15th emphasizes the closing of another year's work and the coming of the new year—let us hope a happy, prosperous year for all of us hardware folks on both sides of the imaginary line, maintained as a political semblance by two governments.

"A boundary line which does not separate two people with so much in common, speaking the same language, one in everything worth living for or worth hoping for, living under two flags, it is true, but emblematical of a common interest, each year becoming stronger as a tie that binds, never to be sundered.

"Very recently one of your Canada hardware boys married one of our most beautiful St. Louis girls. Tell me, please, if you can, what difference it will make to these two people or the child born of their union, whether they salute with love and reverence the Union Jack or the Stars and Stripes? Sufficient to them is the fact both flags tell of a people free in thought and free in speech, each a guarantee of the great privilege of personal liberty, a sign of civic righteousness, a reminder that justice is not for the few, or for the many, but for all.

"Certainly I will write a letter to be read at your annual gathering; never mind if I have, as you say, written before. That belongs to the "gone by" time—we have to do with the NOW, and to me it is a privilege to talk on paper to Hardware Brothers wherever gathered. I salute you all as comrades, worthy of the happiest message I can send—Greeting—You are all able men, manly men, big in thought, big in effort, and clean in life. How do I know all that? The answer is simple—listen. You would not be a part of the great business of Lewis Bros., Limited — unless the measure I have given was other than just the size of the men.

"You tell me that one of your oldest in service and ablest men is at this time ill, and speak of the anxiety of his friends. I take the liberty of asking you to do me the favor, when Christmas morning comes, to buy just a few flowers (and mail me the bill)—I would prefer one or two roses (not more, because it is a sentiment, not a gift I want to convey) my favorite flower, send to this sick hardware salesman with my Christmas greeting, ask him to receive in the spirit of good fellowship, as conveying my earnest wish that he may soon be well again.

"This is the advent season — I am never ashamed to speak of the Church in its universal sense. I ask the privilege of telling of a sermon I heard Sunday before last, one that made a profound impression on me. It was about John the Baptist, who worked in the wilderness and the desert, surrounded by stones and sand and obnoxious reptiles and crawling things. Within a limited time and certainly in restricted environments, he made a great success of his life, doing his duty in the largest sense and then more, for the Christ whose birthday we celebrate each Christmas Day, gave witness that this John the Baptist man, who worked under anything but happy conditions, was entitled to be called the greatest man born of woman.

"This story came to me when it seemed I most needed it, and pointed out that greatness worth while did not rest upon what a man has, but the power of accomplishment with less than other men around us had to accomplish with; that worth while folks rise above adverse conditions, smile and try again and again and win in spite of obstacles and discouraging surroundings, when others give up and say it can't be done. This reminds me of the frog story I once heard the founder of our business tell, about two frogs deciding to take a chance in what appeared to them a pool of beautiful water, but in reality a ten-gallon jar of fresh milk resting in the running water of what we call in this "neck of the woods" the spring house. Once in, of course, the frogs could not get out—with the seeming impossible

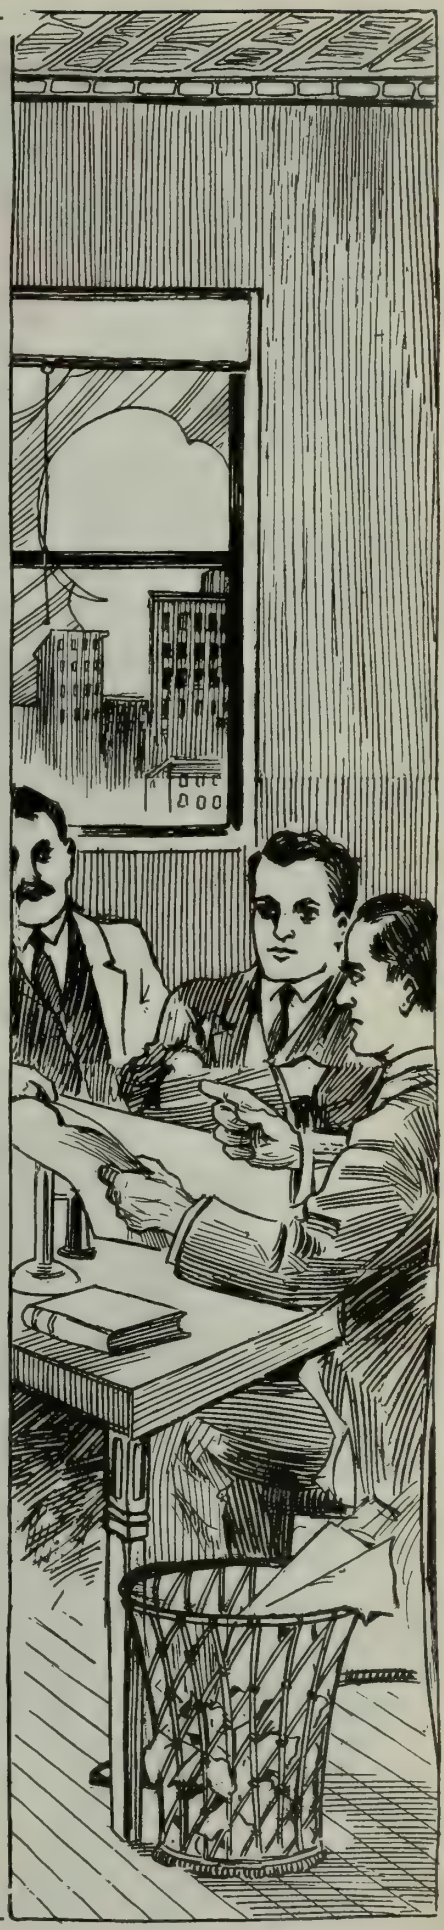
barrier of the slick wall they could not climb, they swam and kicked for hours; finally, one frog, discouraged and weary, decided he could not kick any more, folded his kickers and sank to the bottom, but the other frog kicked more and finally the renewed effort churned the milk into butter, and he crawled up on this and hopped out of the jar.

"This is the season when it is usual to take stock of our material assets and figure the losses and the gains. Permit me to put this question individually to each of your men—What does your balance sheet show as a result of your 1913 work? Is your bank account bigger than it was on January 1, 1913? The greatest asset to us all is time—we have spent another year of it out of life. It is gone—we cannot live it over again—young men are usually prodigal with what seems inexhaustible in the morning of life, but when the shadows commence to fall towards them because they are facing the setting sun and the probable years of labor are fewer than those that have gone into the never returning past, they appreciate more fully the wisdom of using wisely the great to-day — the now—not yesterday which is no more, or to-morrow which is to each of us only a promise.

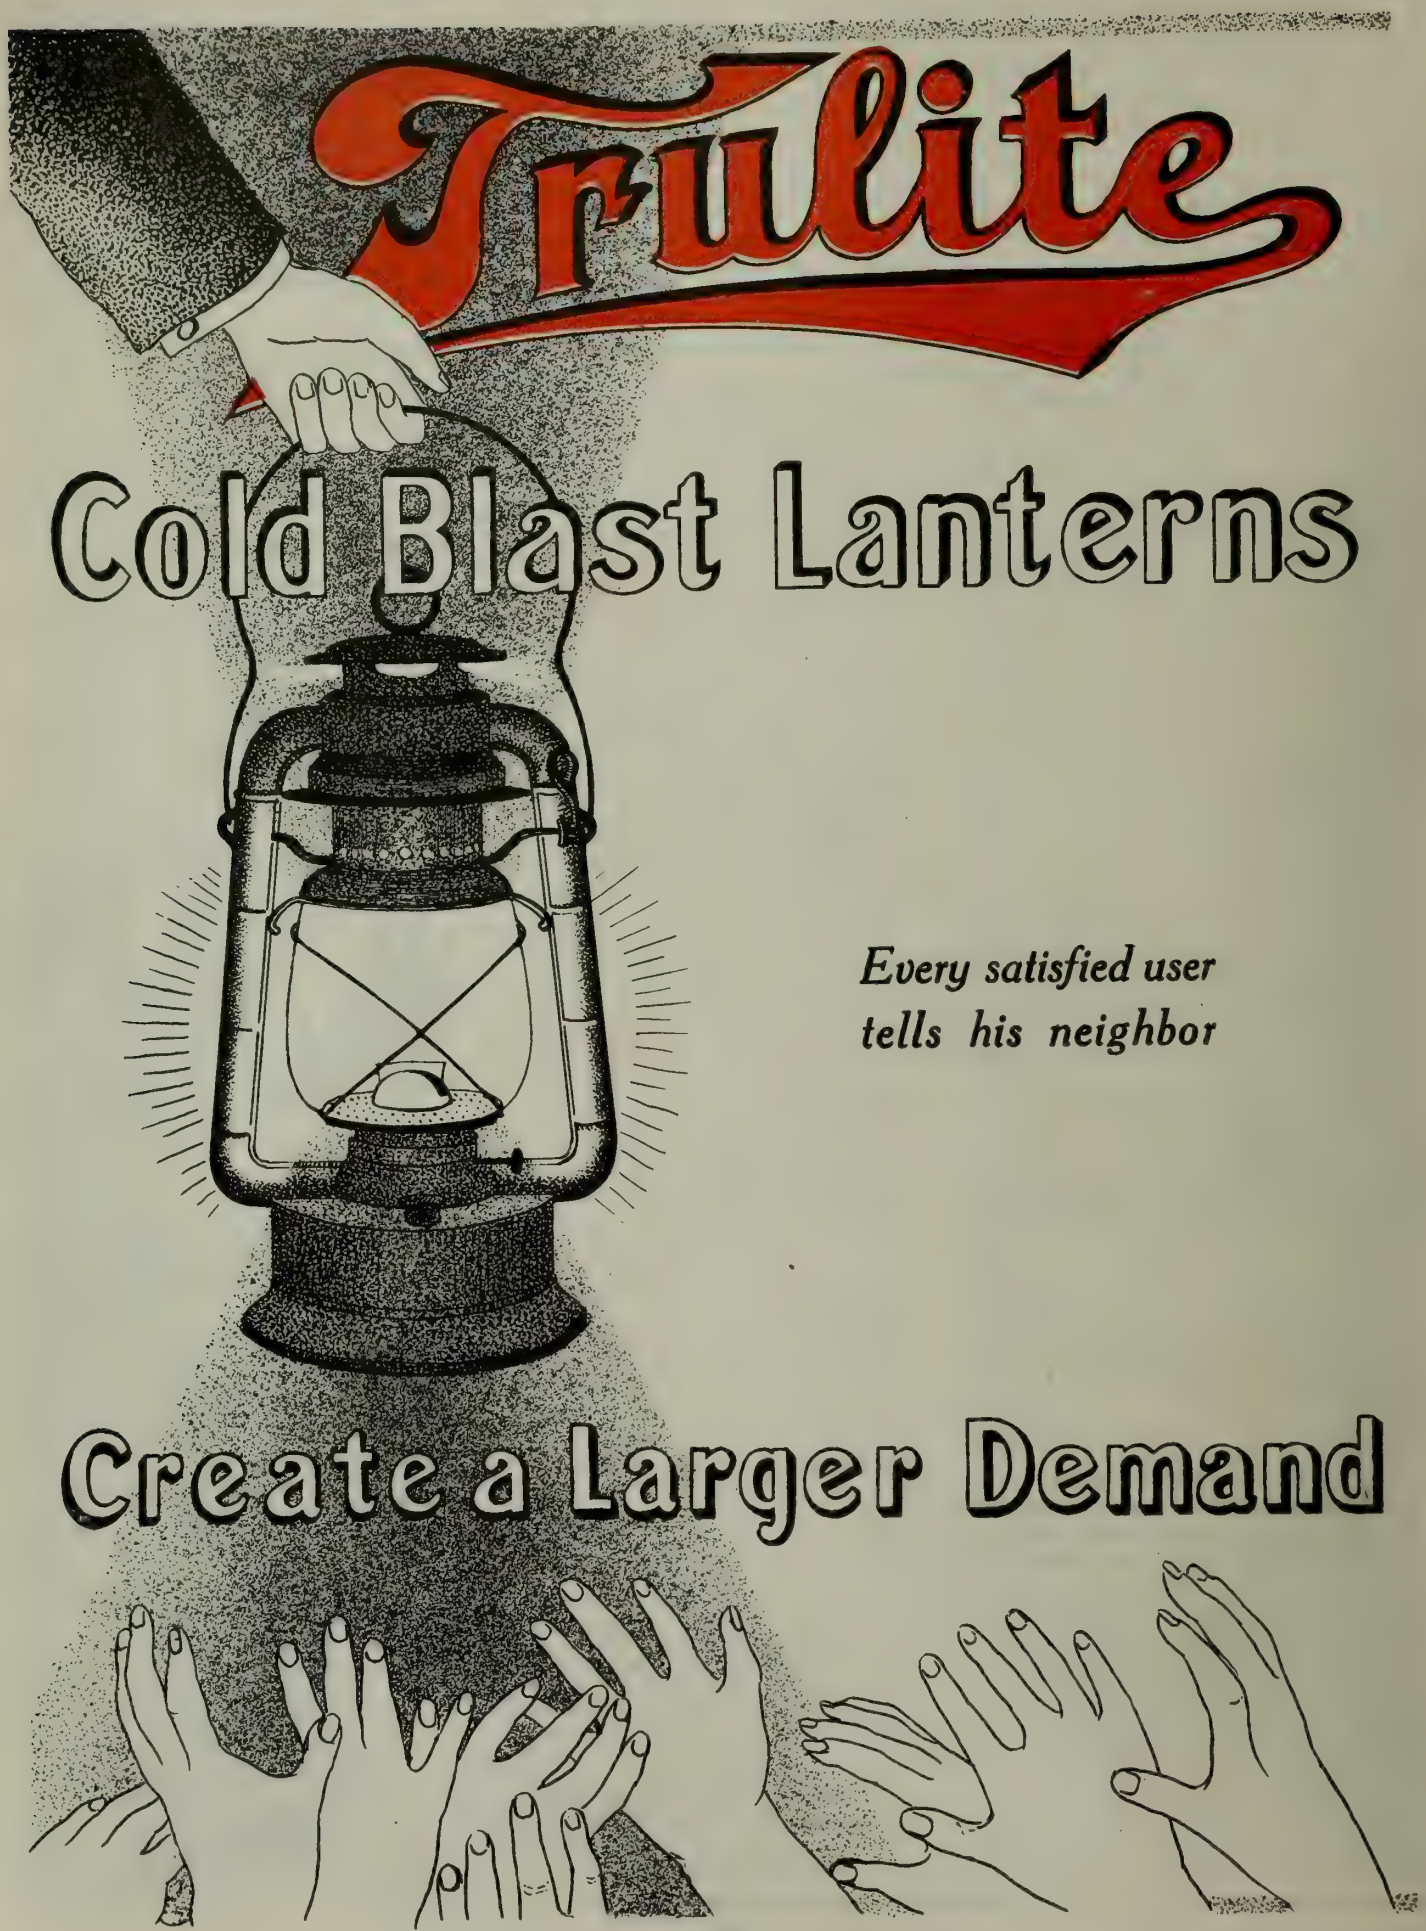
"No doubt, you have worked hard—early and late in 1913—for such is the lot of the hardware man, perhaps at times under conditions that seemed almost unbearable. What have you to show for it? If the showing is not satisfactory, whose fault is it? Have you fooled yourself waiting for the big opportunity to come? That will not do. Big opportunities come as a result of availing ourselves of the ever present little ones. Do you remember that the falling of an apple gave the world the profound knowledge of the law of gravity—the rattling of the cover of a kettle brought to man the blessing of steam—that some insignificant driftwood told Columbus that land was near? Have you waited for the real big business problem that you might suddenly shine out as a doer of big things? That is a mirage—the big problems of the hardware business are simply aggregations of a multiplicity of little ones, and the doers of big things succeed because of doing the work daily entrusted to their care a wee bit better and cleaner than it was ever done before?

"A man's mental attitude towards his work is a great factor in his success or failure. Do you love the game? Do you get up in the morning, eager to begin the day's work, because of appetite for accomplishment? Do you see in your vocation opportunities for the use of brains? Is your work to you a man's work, meeting each hour the things to be done with courage and patience and, no matter how annoying, always with a smile?

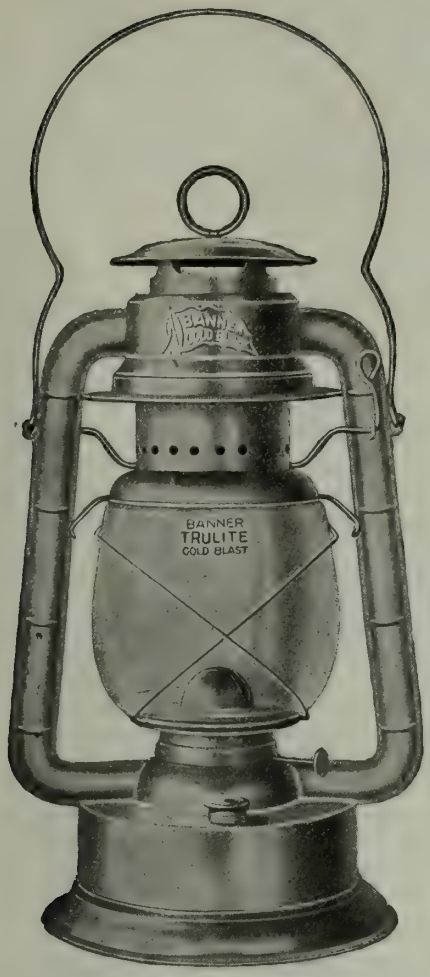
"Have you conserved your health and your strength from a sense of loyalty to your job? Have you, as salesmen, realized every minute of the time that you are the ambassadors of your house, and as you do so are they liable to be judged? Answer this to yourselves, and be sure you do not bear false witness in doing it. Can you, with a clear conscience, put the seal of approval on your own work and your own life as lived in 1913?



"Great salesmen are not made in a day, but being one is the heritage of each man that carries a grip. We can only reach the goal through the means of devotion to a purpose—self-denial. The sacrifice of personal comfort, personal feelings, personal convenience, personal appetite, that we may give perfect service to the glory of our work. The cream of my life's work was done on the road and sweet memories come to me, as I write this letter, of fellow travelers, many of them dead, some now big in the affairs of the world's work, some utter failures because of strong drink, but all gracious men, lovable, helpful men, and that is the kind I know I am talking to on paper now.



"How earnestly I wish that I might sit with you at this banquet and take each man by the hand and pass the grip of real comradeship — to walk arm in arm and counsel one with the other what we are to make of this new year of 1914 standing out before us, not what it is to bring but what by our own efforts we are to make it bring.



"Let us have a high sense of the traditions and the dignity of our work as salesmen. Let us be courageous and strong in doing right because it is right and remember that the highest class salesmanship is giving a man value received for his money and practising old time honesty in doing it. Because of our limitations—and it is a wise man that knows when he has reached that point—we cannot all be leaders, but each of us—every single one of us—can be cooperators one with the other, and particularly with the house from whom we draw our pay. Let us sow the seed, wherever we go, of confidence and respect for those having on their shoulders—and don't forget it is a burden, often heavy to bear—the work that is done in the house. Speak kindly, speak graciously of all, from the president down.

"Just a moment, Mr. Sales Manager. In these closing days of 1913 examine

Annual Convention of Winnipeg Paint and Glass Co. Sales Staff

Many Interesting Subjects Discussed—Representatives of Manufacturers Present to Deal With Various Subjects — Quality Business Desirable.

KNOW your goods and yourself. Believe in your goods and in yourself. These were the great points made at the Winnipeg Paint and Glass Company's annual convention of salesmen and travoffice all this week. Experts were present to deal with the various hardware and paint lines handled, and more perhaps than ever before the salesmen were themselves sold. They were by picture, by demonstration, by explanation, led to see the full merit of the various lines.

Friday saw the social side of the convention coming prominently to the fore. There was held the great curling match, as a result of which the salesmen donated two barrels of flour to the Children's Hospital, they having been overcome by the four rinks skipped by the directors. Then on Friday evening came the directors' banquet, when with song, story and serious speeches, an even greater spirit of enthusiasm was shown, and when the directors were led to see, in tangible form, how close they are to all the company's representatives, and how the company's representatives appreciate this personal relationship.

Representatives were present from the Edmonton Paint & Glass Co., from the Calgary Paint & Glass Co., and from Saskatoon, when the sales manager, E. L. Sander, called the first meeting to order. From then on, the days were fully occupied, with addresses, and with questions and answers, for the salesmen had many inquiries to make.

W. C. Schunk, sales manager of the Martin-Senour Company, Chicago, spoke of the Martin-Senour paint — dealing with its covering qualities, its preserving power—against sun, rain, and from the internal action of the thing painted itself. Then he dealt with the opening of new accounts, outlining ways in which objections could be met. His great idea was that the salesman should himself be sure of his line—then his enthusiasm, his belief, would enable him to infuse the same enthusiasm and belief into others.

J. H. Scharley came from Buffalo to speak on Pratt & Lambert's varnishes. He dealt with these at the convention, and after a luncheon which he tendered the selling staff, gave an address, illustrated with lantern slides, in which he showed how the constituent parts of the varnish were secured; how the gums were dug out of the earth, being taken from the roots of certain trees; how the china wood oil was abstracted; how the linseed was crushed; and how the turpentine was tapped from the trees. Every step was shown, down to the finished product in the well-known cans.

Builders' Hardware.

H. B. Dale, speaking on Russwin builders' hardware, referred to the necessity of educating the public, in certain communities, to a point where they would instal a better line of locks, latches, window fasteners, etc. The traveler, he urged, can do a great deal in this connection, finding out from the dealer what new buildings are going up, and with the dealer and the builder going over these buildings, and taking the order right from them. Mr. Dale, in this connection, illustrated how an order might best be drawn up from a plan, or from a building in course of construction.

John Drewe, dealt with burlaps, bringing out the quality of the goods, and, like the other speakers, urging the salesmen to think principally of this quality in going after business.

The Banquet.

The keynote of the banquet, held in the Grange Hotel's private dining room, Friday night, was struck in the very first address, when the president, E. Cass, in proposing the toast to the King, said: "We can render our best service

Banquet of Winnipeg Paint and Glass Co.'s Sales Staff.

to the King, and to the Empire, by doing our best, as pioneers, to develop the resources of this new country." This idea of development, of subordinating individual benefit, if necessary, to the benefit of the company, and to make the company benefit by giving real service, was brought out by practically every speaker.

R. W. Paterson, the managing director, referred briefly to the unusual conditions which had existed in 1913, and to what might be expected in 1914. "If we do our best, and proceed wisely," he said, "I believe the coming year can be our best. We must not only get new business, but we must always continue to treat those who deal with us well. Then the business comes back. We keep our friends, and gain new ones. This is our test year. There is a point in every competitive sport when a contestant feel he wants ot go away and die. That is the point where the real man makes an extra effort and wins out. Let us buckle to it, and win out also."

Messrs. John Carr, and James McDiarmid, the vice-presidents, and founders of the company, spoke of the start eleven years ago. Then two men had been employed. Now sixty or more attend the annual banquet, representing a pay roll of more than three hundred.

Enthusiasm and Advertising.

Enthusiasm, E. L. Sander, pointed out, is one of the great things in salesmanship. It is based largely upon knowledge and confidence. A salesman must know himself, must know his weaknesses and his strong points. This gives confidence, and supplemented by a knowledge of the goods, and a thorough belief in them, means success.

"Another speaker," said Mr. Sander, has stated that there is no advertisement like the wagging tongue of a satisfied customer. That is true. We can purchase advertisements in Hardware and Metal, and in other papers. These are good, but we can't purchase satisfied customers. We make them by our own efforts through the years.

Before Auld Lang Syne was sung, J. S. McDiarmid, in warm terms, expressed the appreciation all in the company, felt for the directors, and on behalf of the salesmen, and office staff, presented Messrs. E. Cass, John Carr and R. W. Paterson with humidors, and Jas. McDiarmid with a beautiful set of military hair brushes. All expressed their thanks briefly, speaking of the pleasure it was to them to feel, and see, the spirit of loyalty to the company, and the faith in it which existed.

Songs, by Messrs. Woodworth, Hartley, Mitchell and H. W. Smith, rendered during the evening, added to the enjoyment, as did good anecdotes related by Messrs. Mytton, Drew, Watson, Anderson and other speakers.

Takes Over General Management of Old Established Firm

G. T. Pepall Appointed General Manager of the Canadian Interests of M. and L. Samuel, Benjamin & Co.

S. Samuel, resident partner of M. & L. Samuel, Benjamin & Co., leaves next week on an extended tour of Europe, and will remain abroad for a number of years.

Mr. Benjamin, of the same firm, is a resident of London, England.

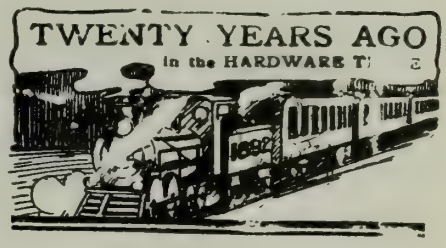
The firm have large interests in Canada, and in future these will be under the management of G. T. Pepall, who has been associated with the firm for the past twenty-two years.

M. and L. Samuel, Benjamin & Co. are among Canada's oldest established and best known firms, having commenced business in this country in 1855.

Next year will see the sixtieth anniversary of the firm's establishment in Canada.

Mr. Pepall, who has taken over the general management of the company's Canadian interests, is well known to the hardware and metal trades of the Dominion, and is considered one of the best Canadian authorities on matters pertaining to metal markets and conditions.

DISASTROUS FIRE IN MONTREAL.



With the temperature at 25 degrees below zero, a disastrous fire visited the warehouse of Frothingham & Workman, Ltd., wholesale hardware merchants of this city. This resulted in an almost total loss, although the offices were not damaged except by water. The loss will amount to about $250,000, fully covered by insurance, and the adjusters are now at work.

In the meanwhile Frothingham & Workman are keeping all their travelers on the road, and state that temporary arrangements will be made in a few days, and that all orders will be promptly filled.

RETAIL FIRM ISSUES CALENDAR.

T. J. Trapp & Co., New Westminster, B.C., dealers in general hardware, have issued an attractive calendar, the title of the illustration being "Homeward When the Day is Done." As a calendar for distribution to retail firms' customers it is above the average.

Derby Line, Que.—The Union Twist Drill Co., Derby Line, Vt., are preparing plans for the erection of a factory in the Quebec portion of the town of Derby Line.

The following items were taken from the issue of Hardware and Metal of January 20, 1894:

"The factory of the Halifax Mfg. Co., manufacturers of shovels, Halifax, has been burned out."

Editor's Note.—The plant was rebuilt, and the business is now carried on by the Halifax Shovel Co.

* *

"Mr. and Mrs. M. Frankel have returned from their wedding trip in the Southern States."

Editor's Note.—M. Frankel is still associated with Frankel Bros., metal merchants in Toronto.

* * *

"A new hardware journal has made its appearance in the United States. It is named the 'Hardware Dealer,' and is published by D. T. Mallett, of New York. It is to appear monthly, and is issued in the ordinary magazine form."

Editor's Note.—The journal is now known as the "Hardware Dealers' Magazine," and is still being published by Daniel T. Mallett, New York.

* * *

"Ecclestone & Ramsay are opening up a hardware store at Bracebridge, with a general line of hardware and tinware. Mr. Ecclestone was formerly with H. S. May, of Huntsville, and is an experienced hardware man."

Editor's Note.—George Ecclestone is still in the hardware business in Bracebridge, and has worked up an exceedingly large business during the past twenty years.

He is also a member of the executive of the Ontario Retail Hardware and Stove Dealers' Association.

* * *

"John Thorpe, Montreal, Que., Canadian manager for Pilkingtons, the glass people, expects to have the Toronto branch open in a fortnight or so."

Editor's Note.—A new Canadian plant for the Pilkington Glass Co. is in course of erection at Thorold, Ont.

Canada Metal Co.'s Sales Staff in Annual Convention

Trade Conditions Discussed—Papers Read by Various Salesmen—Theatre Party on First Day of Convention.

THE annual convention of the managers and sales staff of the Canada Metal Co. was held at the head office, Toronto, during the week, beginning January 5.

Managers were present from the Montreal and Winnipeg offices, and the salesmen were gathered from all parts of the Dominion.

The convention opened on Monday, January 5, with W. G. Harris, Jr., vice-president of the company, in the chair. His opening address was a welcome to all. He stated what a pleasure it was once more to meet them in Toronto. In a concise manner he dealt with the objects of the convention.

Amongst others was the exchange of ideas on trade conditions throughout the Dominion, which would prove rich in information, also the great benefit derived by the discussions on metals and plumbing lines, the general knowledge gained would prove of infinite benefit to all concerned, for no man can know too thoroughly the lines he has to offer.

W. G. HARRIS, Sr.

W. G. HARRIS, Jr.

The president, W. G. Harris, Sr., also had a word of welcome and spoke of the strenuous year just past. He stated that it was a year of which every one in connection with the Canada Metal Co. had just reason to be proud, for it was the best and most progressive year in the history of the company. It was a source of gratification to stand up and say "1913 was the best year to date and our salpesmen are to be congratulated, for upon reviewing the records of the past year we find that every one without exception has increased his sales."

Many interesting papers were read by the various salesmen upon such diversified subjects as:—

No. 1. How to judge credits.

No. 2. Business morality.

No. 3. What I purpose doing in 1914 to increase my sales.

No. 4. How I made such a success with my sales of Imperial Soldering Paste to the electricians.

No. 5. How I beat all records for the sale of Harris Heavy Pressure in 1913.

This convention brought men together from all parts of the Dominion and was certainly devoid of one slow moment from the opening to the close, the only break in the procedings being to partake of lunch which was prepared on the premises and was done justice to by the good fellows around the festive board.

The first day concluded with the entire sales staff attending the Princess Theatre to see F. R. Benson's company in Henry V., and to say it was thoroughly enjoyed is to put it mildly. Many were more familiar with metals than Shakespeare, though they readily recognized the quotation:—

'If it be a sin to covet honor I am the most offending soul alive."

for as one exclaimed, "That is in our Babbitt Book."

On Tuesday morning the convention opened promptly at 9.30 and during the day many important phases of the firm's business were discussed.

When the convention closed it was aptly described as a convention beneficial to both salesmen and their customers, and the salesmen dispersed with the conviction that the factory, and the men behind the factory would, by giving service and quality, enable them at their next convention to again say our sales are once more ahead, and we are proud to represent an organization such as the Canada Metal Company.

A MESSAGE TO HARDWAREMEN.

(Continued from page 47.)

yourself carefully — be sure you are worthy of these big men comprising your sales force. Let it be your personality and your work and not the position that commands their respect. The salesmen gathered around you now are the life blood of the business. They are the ones that will hear the complaints, stand in the front and have shot at them the shortcomings and the mistakes. They are called upon day after day to fight an active, tireless intelligent competition; be sure they don't also have to fight the management at home, for there is a limit even to what a hardware salesman can stand.

"Into your keeping, my friend, is committed a great responsibility. I know you are worthy of it, that you are living up to it. Because I am older, longer in service than yourself, it is entirely appropriate for me to remind you that business is nine-tenths selling and the other tenth the balance left. You have charge of this selling end. The human factor is the essence of successfully handling men, be ever tactful, ever patient and always helpful. Give your men what they ask for and don't always wait to be asked. As a proposition they usually know best what is necessary and needful.

"I ask your indulgence for having written at such length—it was not my intention to do it. I leave this thought with you—when this year reaches its end as the hands of the clock point to twelve on the night of December 31st, and the bells ring out the glad tidings of the birth of a new year, let's one and all, big and little, whatever our tasks and duties in this great hardware game, remember and keep the remembrances with us each hour of 1914, that Divine Service is not going to church, saying devout prayers, singing sweet songs or listening to great sermons, but the consecration of our lives to the work that falls to the lot of each of us to do, doing our duty as we see it, day by day, without complaining and at whatever cost to our comfort or convenience and to be always fair in our dealings with other men. This is not orthodox — I question if many preachers would subscribe to it—but it is easily understood, simple and possible to live up to if we want to do it, well suited to us hardware folks, whose greatest virtue is in being simple and simply men.

"The sentiments of my kindest regards to each of you, and best wishes for good health and prosperity during the coming year."

Sincerely yours,

JOHN HALL.

Making Stove Sales After the Rush Season

Methods Adopted by Stove Dealers—Advertising is Essential to a Successful Clearing Sale—Make Business During Dull Seasons.

THERE are many lines which the hardware merchant handles that are sometimes neglected after the rush season has passed. These lines are practically carried all through the balance of the year without receiving any attention from the merchant, but could be moved out quite freely if they were given some attention.

Let us take for example, the question of winter stove sales. It is generally admitted that the majority of dealers stop pushing their sales as soon as the fall rush has dropped off. The business in this particular line will, of course, drop off to a certain extent but, it does not follow that the sales of most dealers could not be increased at this season of the year if the articles were pushed in some way.

There is always, at any season of the year, a chance to sell goods of all descriptions, whether in season or not, and the stove business is no exception.

People will buy a needed article at any time if it is brought to their attention. In this line it is interesting to note the different methods adopted by some merchants to bring the articles before the public during an off season.

Quite frequently a sale is advertised and the window is dressed accordingly. Too much publicity cannot be given such a sale as there are always quite a number of people who are waiting for just such an opportunity. Of course the dealer's profit will suffer to a certain extent from a sale but it is generally figured that by running a sale of this nature for a certain number of days that the number of sales which should take place if the sale is handled properly will be well worth while. The profit of course on each stove sold would be less and on top of that again the expenses would have to be figured but if the sale is run on a good basis and advertised thoroughly it should pay the dealer well for his time. This would not only create a demand for this article, but it would also pave the way for other sales and move out a line which would be practically stagnant under ordinary conditions. The turnover would not net the dealer as much as the same number of sales under ordinary conditions, but it would liven things up during a dull season. It is also likely that it would bring other business to his store besides giving him good advertising. In view of these facts, the return for his trouble would repay him indirectly, if not directly, for the amount of profit sacrificed.

Another method adopted by some dealers is to give any article or articles up to a certain value, with the purchase of a stove during a certain period. This is practically the same as reducing the price of a stove by the figure set. Say $5 is the amount specified, although the dealer is not really paying that amount for the article or articles given away, if they were left in stock to be sold they would bring him that figure.

To carry out a successful sale of any description it is absolutely necessary to advertise it extensively. This would probably run into what would look like a big figure, most likely the dealer would think it too big for the purpose, but it must be remembered that he would be bringing his store before the public and although he might not get the return he would like, or the return that he thought he should get, he must bear in mind that in all probability, he is making other sales on the strength of this advertisement which he cannot trace to it.

There are various other ways in which stove sales can be increased during what is termed the off season, and although it might be necessary for the dealer to sacrifice a portion of his profit in so doing it seems that it would be better for him to take a smaller profit and handle much more business than to stock the stoves and wait for another rush season to come along.

PARCELS POST REDUCED.

Ottawa, Jan. 12.—Hon. L. P. Pelletier, Postmaster-General of Canada, has entered into a new agreement with the Government of the Commonwealth of Australia for the direct exchange of parcels under which the present rate of 24 cents a pound up to 11 pounds either way is reduced after the first pound to 12 cents a pound. The reduced rates take effect from the 1st of January, 1914. It will be a decided improvement on the previous rate, and will no doubt lead to an increased volume of parcel post business between the two countries.

TWO CANADIAN WINNERS.

In the recent window display contest conducted by "Philadelphia Made Hardware," two Canadian firms are among the prize winners.

The Fawcett Hardware Co., Saskatoon, and the Mills, Hardware Co., Hamilton, secured prizes, while the display of the Bond Hardware Co., Guelph, received honorable mention.

HARDWARE LETTER BOX

Sap Pail Covers.

Jas. Flett, Wiarton, Ont.—"Could you inform me who manufactures Sap Pail Covers or any firm manufacturing both.

Thos. Davidson Mfg. Co., Montreal; Grimm Mfg. Co., Montreal, make the covers especially for this use. McClary's, London; Sheet Metal Products Co., Toronto; E. T. Wright, Co., Ltd., Hamilton, all manufacture the Sap Buckets.—Ed.

Laundry Machine.

The Lougheed Hardware Co., Lougheed, Alta.—"Will you kindly oblige us by giving address of firm manufacturing Rotary Laundry Washing Machine, suitable for 1½ h.p. gasoline engine, costing about $75.00."

American Laundry Machine Co., Sterling Rd., Toronto.—Ed.

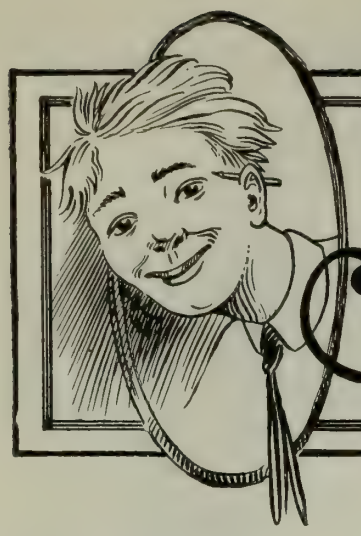
Souvenir Stoves.

W. G. Robinson, Royce Ave., Toronto. —"Please advise me who makes the Souvenir Brand Stoves and Ranges."

Hamilton Stove & Heater Co., Hamilton, Ont.—Ed.

Oil Companies.

F. A. Courtemanche, Penetang, Ont.— "Please advise me of the different oil companies in Canada."



Canadian Oil Co.; Imperial Oil Co., Toronto; Dominion Linseed Oil Co., Montreal; Canadian Linseed Oil Co., Toronto.—Ed.

Croquet Sets.

Revillon Wholesale, Ltd., Edmonton, Alta.—"Could you advise us if there are any Canadian firms manufacturing Croquet Sets?"

We understand most of them have gone out of business, but Taylor, Scott & Co., Palmerston, Ont., are still manufacturing this line.—Ed.

The Eureka Fence Brace Co., Ltd., incorporated at Toronto, capital $20,000, to manufacture fence braces, steel and iron fence posts, etc., at Essex, Ont. Incorporators: William Church, Hugh F. Wigle, etc., Essex.

THE JUNIOR CLERK'S PAGE

ANOTHER CASE.

There was a man in our town
Who was so wondrous wise,
He thought that he could get rich
And never advertise.

And when he took his ad out
His custom grew so thin,
He hastened to the sanctum
And put it in agin.'

* * *

THE RIGHT MAN.

When employed in the capacity of salesman, one is up against a problem. If he is desirous of making good and going ahead he must study the problem thoroughly in order to get results.

When employed in the above-mentioned capacity, a person is dealing with the public, or in other words, with human nature. This then should be the study of every one in this work. To sell goods to the public one has to know the public because they are depending upon them to attain success. It is, of course, absolutely essential for such a person to know his goods from the ground up but often times a salesman stops after he has familiarized himself with them. This is wrong. Human nature demands attention. The successful salesman is one who can give this to his customers. Did you ever go into a store to buy an article, strike a real salesman and get perfect satisfaction? If you ever have occasion to go back to the same store, who will you look for when you enter? This is human nature all through and everyone delights in having a little fuss made over them at such times.

Take your own case for example. When you enter a store, don't you feel a whole lot better when you receive attention, and also feel that the salesman, not only wants to sell his goods but seems to be doing his level best to satisfy your wants?

The man who can handle human nature and send customers away well pleased is one of the biggest assets a firm can have. People are bound to come back to him again because he is right and treats them right. They can, most always, secure the same goods in a number of stores, perhaps much more convenient, but it is worth the inconvenience to get the right man.

* * *

PREPARING THEMSELVES.

"Pelton seems to be rather unpopular with his fellow clerks."

"Yes. There's nobody here who likes him."

"What's the trouble?"

"Oh, he always manages to be the first one here in the morning, and he always sticks around and keeps working until they get ready to lock the doors at night."

"I see. The rest of you are practicing so you will be able to cordially hate him when he gets to be your boss."

* * *

THE DIFFERENCE.

The booster is the party
Who is hauling down the dough.
The folks are glad to grasp his mitt
Wherever he may go.
He's the little ray of sunshine.
He is Johnny-on-the-spot,
And his talk is mighty welcome
Though it strains the truth a lot.
There's a sort of benediction
In his cheerful "Howdy-do,"
And he makes your life worth living
While he's 'round a-joshing' you.

The knocker is the person
Who's the sorriest of chumps,
He is blue and melancholy
And he goes 'round in the dumps.

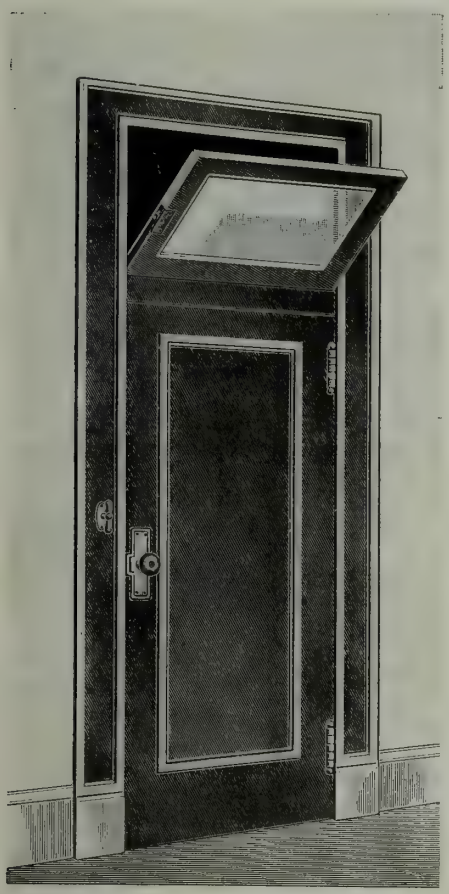
When the people see him coming,
They walk 'round a city block
So they needn't stand and listen
To this stone-age fossil knock.
He's a burden to his country,
He is no good to himself,
And his victims shout thanksgiving
When he's laid upon the shelf.

OFFICERS BANQUET WORKS MANAGER.

Welland, Jan. 10. — Officers of the Page Hersey Company, on Saturday evening, at the Welland Club, banqueted A. M. Mosley, works-manager of the Welland plant for the past three years, and presented him with a fine club bag. Mr. Mosley has been transferred to Fort William, where he will have charge of a new plant being opened by the company in that city. Those who were present at the function were: W. W. Near, of Toronto, the president; H. Rook, Toronto, secretary-treasurer; H. F. Lloyd, Toronto, cashier and general manager of sales; Geo. Sauber, Toronto, chief salesman; I. V. Mansell, Toronto, assistant to the president; Jos. Mosley, manager of the Guelph plant; and C. J. Loughlin of Welland, vice-president of the Niagara, Welland & Lake Erie Railway. The president, Mr. Near, was chairman, and Mr. Sauber acted as toastmaster.

The high esteem in which Mr. Mosley is held by the company, and the appreciation of his ability among the officers was quite manifest from the outspoken manner in which his good qualities and his executive ability were eulogized by those present. Mr. Mosley was works-manager of the Guelph plant of the Page Hersey Company until the Welland factories were opened, and now that the Fort William plant is opened he is to have charge of that.

Welland's regret at losing so desirable and progressive a citizen was told by C. J. Laughlin, who stated that Mr. Mosley's host of friends sincerely regretted his departure.



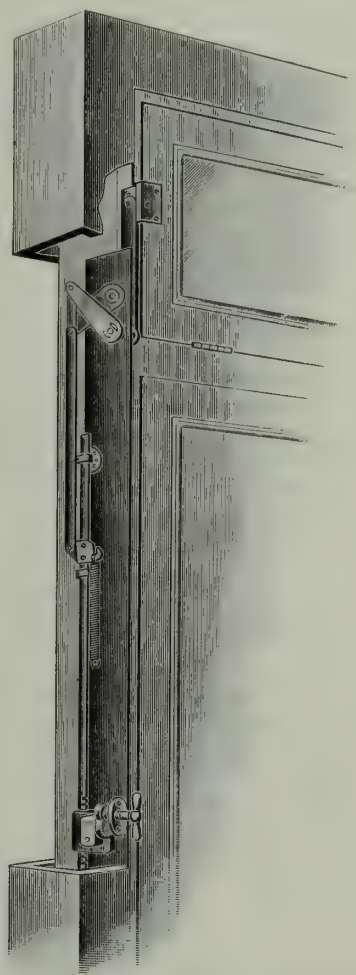
Mr. Mosley was also presented with a silver decanter and tray and a dozen cut glass dishes by members of the Welland Club, and with a valuable diamond ring by his employes.

E. S. Field, of Henry Rogers, Sons & Company, Montreal, was in St. John, N.B., last week.

New Goods Offered Canadian Hardwaremen

THE CORBIN CONCEALED TRANSOM LIFTER.

P. & F. Corbin, New Britain, Conn., are putting on the market a new concealed transom lifter, particularly suited to office buildings and other structures. In use, the T handle and plate attached to the sash are the only parts visible. By an ingenious arrangement of levers, the power is multiplied so that the lifter is operated with very little effort. It is firmly locked in any position from closed to wide open, the transom moving only when the handle is turned. The parts are few, simple and strong. It is claimed that any style, size or weight of transom can be handled with ease, and can be installed without change in ordinary construction of door frames in partitions as thin as two inches. Instructions for applying will be supplied to purchasers.



Corbin concealed transom lifter.

The lifter is equally applicable to steel or wood trim. The bronze metal T. handle and plate which are the only parts visible can be finished to correspond with the other hardware.

It is claimed that the lifter will operate any transom whether bottom, centre or top hung, right or left hand, swinging in or out.

Turning the T. handle operates the concealed transom lifter. The handle turns easily, only one hand being required to open or close a transom. The leverage, it is said, gives a powerful and positive action, and the mechanism is so arranged that the transom is firmly held in any position, obviating the use of catches or other locking devices.

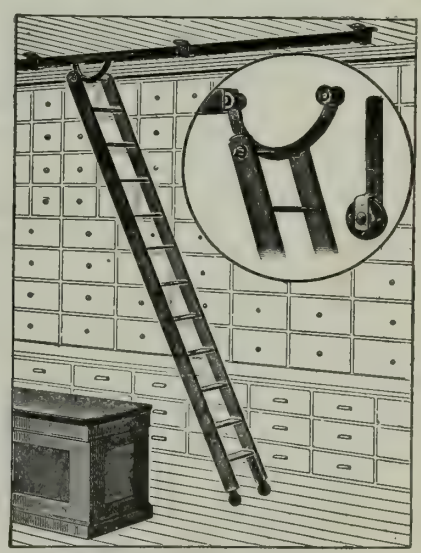
Showing mechanism of concealed lifter.

CUTLERY MARKING INK.

Malcom A. Shipley, manufacturer of cutlery, fishing tackle, etc., 131 South 11th street, Philadelphia, Pa., is offering the trade a new cutlery ink for marking prices on cutlery, fine tools, etc.

It is claimed that the new ink will not rust any kind of metal, and can be removed instantly with alcohol or whiting, plus a small amount of rubbing.

The fluid is done up in 1-ounce bottles, but can be purchased in larger quantities, or in bulk if desired.



Shipley's Cutlery Ink.

STORE LADDERS.

Richards-Wilcox Canadian Co., Ltd., London, Ont., are offering the trade a new line of store ladders, which they are now making in Canada.

The accompanying illustration shows the No. 209 ceiling ladder, which is equipped with a ball bearing hanger, rubber tired wheels and hanger, and runs in a trolley track lined with maple, making a quiet operation.

Richards-Wilcox store ladders.

The firm now makes all styles of store ladders, both side and ceiling, bent and straight. Ladders are made of hard pine or oak.

STEEL SHEETS.

The United States Steel Products Co. are offering the Canadian hardware trade through B. & S. H. Thompson &

(Continued on page 59.)

Current News of the Hardware Trade

Business Changes.

Windsor, Ont.—W. J. Douglass & Co. have dissolved, W. J. Douglass continuing.

New Electrical Firm.

Strassburg, Sask:—G. T. Smith and E. J. Azevedo in partnership have started the Strassburg Electrical Supply Company.

New Firms.

Edmonton, Alta.—The Ross Hardware Co. has started business.

Pontoix, Sask.— F. H. Claypole has started a hardware business.

Manor, Sask. — M. F. Thornton has started a hardware business.

Melville, Sask.—E. and Goldie Smith started a hardware business here recently.

Woodrow, Sask.—Harper Bros. have started a hardware and furniture business.

Toronto, Ont.—Woodward Hardware Co. has commenced business at 1378 Queen St. E.

Winnipeg, Man.—Chas. A. Hed, of Minneapolis, has been in the city arranging with jobbers and wholesalers before leaving for Young, Sask., where he is going to locate as manager for the Manitou Service Co. The firm will carry on a heating, lighting and plumbing business.

Fire Losses.

Toronto, Ont.—Fire did about $1,500 damage on the premises of the British American Oil Co.

Vancouver, B.C.—Fire recently did damage to the extent of $1,000 in the warehouse of Wood, Vallance & Leggatt.

Coaticook, Que.—The entire Canadian plant of A. O. Norton, Inc., was destroyed by fire on Dec. 28 with a total loss of $50,000, and with $10,000 insurance.

A carload of finished jacks was saved which will enable the firm to fill orders promptly. A new concrete factory 200 x 60 ft., has just been completed and new machinery is being installed.

Ontario Incorporations.

The Eureka Fence Brace Co., Essex, Ont., capitalized at $20,000, to manufacture and deal in fence braces, steel and iron fence posts, etc.

Canadian Copper and Armour Plate Co., Ltd., Toronto, capitalized at $1,000,000, to carry on the business of foundrymen and metal manufacturers, etc.

Canadian Kennedy Manufacturing and Engineering Co., capitalized at $40,000, to make and deal in rock and ore crushers, mining machinery, hardware accessories, rock and ore crushers, etc., with head office in Niagara Falls, Ont.

Companies Registered.

Carignan & Herbert, tinsmiths, Victoriaville, Que., have registered, J. E. Carignan and Arthur Herbert.

Dorken Bros. & Co., importers hardware, Montreal, Que.; Herman Watler Dorken and Ernest Rudolf Dorken, general partners, and Henrich Boker, special partner, for $40,000 registered.

Moving Quarters.

Lethbridge, Alta.—The Western Tinsmithing Co. will move to 321 Sixth Street on February 1.

Burglars in St. Henri.

Montreal, Que.—The hardware store of Edouard Gougeon, 1876 West Notre Dame Street, was visited by burglars, who secured a small amount of cash, some guns, cutlery, etc.

Yale & Towne Club's Dance.

St. Catharines, Ont. — The Yale & Towne baseball club held another informal dance in Masonic Hall, on Wednesday evening, Jan. 8, when one of the largest crowds of the season was present and spent a most enjoyable time.

Correction.

On page 54, January 10th issue, a paragraph relating to the presentation of a club bag to Thos. A. Treen, was incorrectly placed beneath an item referring to a recent business trip to Quebec, by W. H. Gerke, general manager Martin-Senour Co., Montreal. The items should have read as follows:

W. H. Gerke, general manager, Martin-Senour Company, Montreal and Secretary of the Paint Dealers' Association is at present on a business trip to Quebec.

Thomas A Treen, who for the past fifteen months has been associated with the D. Moore Stove Co., Hamilton, has left for Montreal, where he will in future be identified with the Detroit Stove Works, with headquarters in Montreal. On the eve of his departure for Montreal he was the recipient of a handsome present from the office staff and heads of departments of the D. Moore Company.

Personals.

F. D. Hatch, of the Martin Mfg. Company, Whitby, Ont., was in Montreal last week.

J. E. Brown, of Revillon, Wholesale, Limited, Edmonton, was in Montreal last week.

Adolph A. Seligman, of L. B. Wasserstrom, New York, is spending some time in Montreal.

Mr. Robert Starke, of Starke-Seybold, Limited, is spending a few days at Caledonia Springs.

C. H. Euchler, of the Slaymaker Company, Lancaster, Pa., spent a few days in Montreal last week.

Geo. D. Rite, of the National Brass Company, Walworth, New York, is spending some time in Montreal.

Mr. Leck of the Nelson Hardware Company, Windsor, Ont., is among the visitors to Montreal this week.

T. A. Wugerich, of Charles Parker Company, Meriden, Conn., was calling on the trade in Montreal last week.

John J. Teeple, of Fayette R. Plumb, Incorporated, Philadelphia, was calling on the trade in Montreal last week.

H. L. Brainerd, of the firm of Brainerd Mfg. Company, Rochester, New York, is calling on the Montreal hardware trade.

A. E. Jenckes, head of the Jenckes Machine Co., St. Catharines, Ont., was elected an alderman at the recent municipal elections.

Mr. McRae, representing O. W. Bullock Associates, of Springfield, Mass., was in Montreal this week after a trip through Western Canada.

Edward Lee, of the rail inspection staff of the Dominion Iron & Steel Co., Sydney, N.S., has gone to England for a trip, after which he will move to Pittsburg.

R. M. Watson, manager of the Dominion Cartridge Company, Montreal, left on Wednesday last for a six weeks' trip to Jamaica, accompanied by Mrs. Watson.

G. B. Green, general manager of the General Supply Co., Ltd., Ottawa, and C. R. Medland, manager of the Winnipeg branch, were in Toronto last week conferring with G. B. Harlock relative to business for 1914.

W. H. Brainerd, of the Dominion Cartridge Co., Limited, Montreal, has just returned from a trip through Western Canada and speaks in an optimistic tone of the business outlook both for the middle and far West.

William St. Clair, manager of the St. Clair Bros.' foundry, Galt, Ont., was presented with an engraved gold-headed umbrella on Friday, Jan. 2 by the employes. William Davies on behalf of his fellow-workmen read an address in which he referred to the good feeling existing between the manager and men. William Vrooman made the presentation.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

The feature of the market this week has been the large number of price changes. Reductions are noted in many lines. Malleable fittings, rope, lathe yarn, nails, rivets and other lines have been reduced in price.

Linseed oil has advanced and painting materials are firm. The cold snap helped business in some lines. Quite a number of retailers are still taking stock. Orders for spring delivery are being placed freely. There is an improvement in the metal markets. The outlook for a good spring trade is growing brighter.

MONTREAL.

Montreal, Jan. 15, 1914.—Business has been more or less quiet during the past week in the hardware trade. The majority of retailers are still in the midst of stock-taking, and are not ordering to any very large extent, except where absolutely necessary. As a matter of fact, it is stated that orders are not quite up to last year's average, but it seems to be generally agreed that business is improving all around.

It is an ill wind that does not blow somebody good, and hardware dealers in the city of Montreal report that during the week of the water famine the demand for pails and buckets showed a great increase.

Cans were also used to quite an extent as water containers during the period when the water delivery by wagon was not to be depended upon. The colder weather and snow fall in this section of the country has increased the sales of some lines. A larger volume of orders have been received for snowshoes, sleigh bells and hockey sticks. The colder weather has also had the effect of sending in quite a number of orders of a sporting nature for skates. At the beginning of the season there was a lot of talk about a mild winter, and it was thought that a great many retailers bought lightly in this line. At the time of writing it is the coldest day Montreal has seen for fifty years, and is 27 below zero. So the prognostications of the prophets have not materialized, and it is thought that the sales of goods, such as skates and so forth, will be just as heavy, if not heavier, this year than has been during the past seasons. The demand is now commencing for boot calks for lumbermen's use. Of course, it is early yet, and the demand is not exceedingly large, but it has started. In spite of the extremely cold weather, some one or two spring orders have been received, and sap spouts are among these. It will not be long before spring ordering commences in earnest. A very satisfactory trade has been done during the past month by the hardware dealers in the dustless mop line. This is quieting down a little now, and will remain so until spring. The retailers' stocks in this line are said to be light, and others expect big things with the opening of spring. It is gratifying to note the optimistic feeling that everyone has for spring business, and conditions are such that it is not thought that there will be any disappointment.

There has been one change this week, this being in malleable fittings, the discounts on which have been advanced, making the price slightly lower. The following list gives the present prices in comparison with the former schedule:

	New discount.	Old discount.
Elbows, tees & couplings	45%	40%
Bushings	65%	62½%
Plugs	65%	64%
Nipples	80%	77½%
Malleable Unions up to 2-inch	65%	62½%

Flanged unions have advanced slightly in price, the discount now being 60%, against the former discount of 65%.

There has been some reductions in the prices of cordage this week, sisal rope being reduced half a cent to 10½ cent basis. Manila is down to 15c from 16c. Lath yarn is now 9¾c basis, against former price of 10¼c prices. This is for single, the double being half a cent more. There has also been a reduction in the price of iron pipe, as will be seen in the current market quotations.

In the primary metal market things are more or less quiet. Some metals seem to be on the upward grade, while others have the tendency towards the reverse. This, of course, is not a very active time for the metal market, but nevertheless business is being done. There has been one or two changes in prices, and further changes look probable. Lead seems to be going upwards in a very determined manner, while copper seems to be doing just the opposite.

Tin.—Although the London market has been as high as £168 5s., which is 15s. above last week's quotation, at the time of writing, it is now £167 5s. It is up and down almost every day, and really there is not very much change; if anything, the condition seems to be slightly weaker. Business is quiet, and not very many orders are noticed. The Banca sale takes place on the 28th of January, and it is usually found that prices are a little bit lower preceding this sale. It cannot, therefore, be said that any higher price is looked for, while a reduction would not be much of a surprise. The London price for futures is £169 (three months).

Spelter.—There is practically no change in the spelter market from last week. The London quotation is £21 10s., against last week's quotation of £21 7s. 6d; the St. Louis price is $5.10, which is the same as last week. There is a fair amount of business being done, but some jobbers state that there is a certain amount of difficulty in obtaining prices. The market seems to be steadier at the present figure.

Lead.—Lead continues on the upward grade, and this week shows a further advance, both locally and in the London market. Lead seems to be acting very peculiarly at the present time. The American and English lead market do not seem to be working together in a manner which would be expected, while one is going up the other may go down, and they seem to be acting independently of the other. Of course, the markets must come together eventually, but it is rather a peculiar condition at the present time. The London price of lead this week is £19 10s., which is up 10s. from last week's price. This seems

LOWER PRICES ON ROPE.

Pure Manila	15 c. lb. base.
British Manila	11 c. lb. base.
African Hemp	11 c. lb. base.
Sisal	10½c. lb. base.
Lath Yarn, Single	9¾c. lb.
Lath Yarn, Double	10¼c. lb.

to be on account of the scarcity of spot lead in England. Locally the demand is good, and general conditions have had the effect of advance in prices 10c above last week's figure. Lead is quoted locally now at $5.75. It is expected that business will continue good here. People have been putting off buying now for so long that they have to buy now, and, of course, it is well known that everybody buys on a rising market.

Copper.—Copper is still on the down grade, the London price being £62 15s., against last week's quotationn of £63 17s. 6d. It is said that the consumption of this commodity has fallen off to quite an extent, and it is thought possible that prices will go still lower. Last week the local price was reduced 25c. This week again it has been reduced the same amount, and is now $16.50. New York price is now $14.12½.

Antimony.—There is no change in the price of antimony from last week, and there is not very much business reported. The demand appears to be quite limited in this market.

Iron.—There seems to be an improved demand for iron, although things cannot be said to be booming in this market. London now quotes £2 10s. 6d., which is practically the same figure which has ruled for some time. Locally things are about the same, with possibly a little increase in demand.

In the stove and heating business things are not much changed. There is not very much business in the way of installation going on just now, as January is probably the quietest month for this class of business. The sale of stoves still continues in a satisfying manner. The majority of this class of trade is over for the season, although, of course, many sales will yet be made. The cold snap has increased the demand for the smaller lines of heaters, and some nice business has been done here.

TORONTO.

Toronto, Jan. 15.—Quite a number of important price changes have occurred during the past week, the lines affected being rope, nails and poultry-netting.

New prices on paris green have been issued.

Toronto hardware jobbers report that business for the New Year has started off very well indeed, and present indications point to a heavy spring trade.

The cold snap has helped the sale of stoves to a considerable extent and retailers are busy. The long spell of mild weather which continued until a few days ago had a bad effect on the stove business.

The Metal Markets.

The general situation in the metal market remains unchanged. Business appears to be improving and the trade generally are optimistic regarding the future of the metal market.

The only price change during the past week has been in lead quotations.

Lead has advanced 15 cents per 100 lbs. and quotations appear to be firm although the price considered is high.

There is a better tone in pig iron and a slightly better demand. Quotations are unchanged.

There is a fair demand for tin at last week's quotations.

Copper remains quiet, spelter is in fair demand at unchanged quotations. Toronto quotations appear in the accompanying panel.

Change in Netting Quotations.

Poultry netting 2 inch mesh is now being quoted at 60 per cent discount. Prices on one-inch and half-inch mesh appear in current market quotations.

Booking of netting for spring delivery has been very heavy.

Decline in Nails.

Toronto quotations on wire nails are ten cents per keg lower than last week, the ruling price being $2.15 base.

CHANGE IN RIVET QUOTATIONS.

The discount on black iron rivets which was formerly 60—10—10%, is now 75%. The change in price affects such lines as round, flat, countersunk head rivets, etc.

New Prices on Paris Green.

New prices for spring delivery of paris green have been issued and appear in one of the accompanying panels. The prices are slightly higher than those quoted last season.

Decline in Rope.

Quotations on rope have declined one cent per lb. and pure Manila is quoted at 15 cents base; British Manila 11 cents base; African Hemp 11 cents base; Sisal 10½ cents; lath yarn single 9¾c lb.; lath yarn double 10¼c lb.

DECLINE IN PRICE OF NAILS.

Toronto quotations on wire nails have declined 10 cents per keg and the price now being quoted is 2.15 base. Wholesalers report that the nail market does not warrant such a reduction and that the lower quotation will in all probability be short-lived.

Quotations for 1914 on binder twine will not be issued until next month.

The Stove Trade.

The severe weather of the past few days has created considerable activity in the stove trade and retailers report that business has been greatly stimulated.

Manufacturers have received a number of rush orders from outside points. The orders have included ranges, heaters, and furnaces.

There will be a heavy demand for gas ranges before long, and manufacturers are running this department of their business, to full capacity in order to cope with the heavy demand which is sure to follow.

Soil Pipe, Fittings, Etc.

The market for soil pipe was somewhat quiet the latter portion of 1913 and up to date and foundries were closed for a short period. It is, however, encouraging to know that all foundries are expected to be running full blast in the course of a few days.

Indications point to this year, 1914, being a good one for all kinds and sizes of soil pipe and fittings. During the quiet time, equipments have been either over-

hauled or renewed so as to enable manufacturers to hold their own and fill all demands made upon them, the outlook is indeed very bright.

Soil pipe and fittings up to 6 inch are quoted at 65-10 per cent., Other sizes unchanged.

WINNIPEG.

Winnipeg, Jan. 13.—Travelers are once more on the road, and some satisfactory orders for spring goods are to hand; but on the whole trade can only be characterized as quiet. Business, however, is on a healthy basis, and most people speak with confidence of the future.

Although the most of the West's crop has been marketed, there is considerable grain in farmers' hands, and it is held very firmly, the concensus of opinion being that higher prices will prevail towards spring.

Collections during December were about up to expectations, and are looked to improve during January, and there seems to be no lack of money in farmers' hands. Industrially in the cities and towns there is much lack of employment, particularly of those engaged in the different branches of the building trade.

Building in Winnipeg is for the present practically at a standstill, and business in builders' supplies very quiet.

It is now late in the season for much business being done in stoves and heaters, although since the advent of the present cold snap retailers have worked off quite a few lines that looked like dead stock two weeks ago.

Wholesale paint and glass houses are occupied with inventories just now, and their business is quiet, as is usual at this time of the year. The situation in flax is very strong, and the prospects are that present prices on linseed oils will not hold for any length of time. Turpentine is steady at the advance recently reported.

In metals there is nothing of interest in local gossip. Foundries and structural steel concerns are comparatively quiescent, but there is already some figuring being done on some important structures. Rumor is rife in the city of some big blocks planned for next year, but no definite announcements have been made.

The official announcement of immense expenditure in development of the C.P.R. was welcome news to the West, and foreshadows brisk trade in contractors' tools and in many heavy lines. The immense development of Hydro-Electrical power that is bound to take place during the next few years is also of much interest to the hardware trade. It is certain that electrical appliances will soon have to be a big feature in all hardware stocks, while the demand for copper wire and insulating material is going to enormously increase.

The construction of the Greater Winnipeg water system should not be lost sight of, as it will lead to an enormous outlay in iron and lead pipe and in plumbers' supplies of various kinds.

It will be seen from the above that there is nothing of the nature of a halt in the West's march of progress, and 1914 is likely to be a busy year.

SHIPPING FREIGHT TO FLAG STATIONS.

Ottawa, Jan. 9.—Railway companies are justified in refusing to accept shipments of freights, whether in car lots or less than car lots, consigned to flag stations, according to a judgment just issued by the Railway Commission.

"As a railway company has no agent at a flag station to guard the property pending proof of ownership by the production and surrender of the endorsed bill of lading, it is quite justified in refusing to accept shipments to flag stations," says the judgment. It adds:

'It would be convenient in many cases, to both shippers and consignees, if some arrangements could be made to provide for shipments consigned 'to order' being sent to flag stations."

NEW GOODS.

(Continued from page 55.)

Co., Montreal and Toronto, a copper-bearing sheet which is being offered under the brand of "Keystone." It is said to have been demonstrated that a limited quantity of copper introduced into the steel while in a molten condition, produces a steel sheet with good rust resisting qualities.

The copper bearing steel sheets in black and galvanized are claimed to be especially adaptable for roofing and other outside work.

DANCE AT NEW FACTORY.

Brampton, Jan. 10. — There was a house-warming last night at the new factory of the Pease Foundry Company, which recently was removed from Toronto to Brampton and now constitutes one of the largest industries in the latter place. The first annual dance was held, with nearly 300 persons present, of whom 110 were conveyed by special train from the city. The visitors were met at the Brampton station by a brass band and escorted to the new warehouse of the company, which had been converted into a ballroom and artistically decorated for the occasion. The Mayor of Brampton was one of the guests of the evening.

CURRENT NEWS CONTINUED.

Industrial Notes.

Wapella, Sask.—Jas. Franks has removed his hardware stock to new premises in the Bisbin Block.

Toronto, Ont.—J. Owen has recently purchased the hardware business of W. T. Campbell, 1414 Gerrard St. E., Toronto.

Hardware Firm Incorporated.

The hardware firm of Hewitt & Black, Medicine Hat, Alta., which has hitherto been composed of Messrs, J. J. Hewitt and R. C. Black, has just been incorporated into a limited company which will be known as Hewitt & Black, Limited. The new corporation will comprise J. J. Hewitt, R. C. Black, H. S. Doan, Howard Hill, M. Grumaz and Jas. Kellas. All of these gentlemen have been connected with the old firm with the exception of Mr. Kellas. The latter, who will act in the capacity of credit manager, has had a lengthy business experience. J. J. Hewitt originally purchased the business in the fall of 1908 from the R. E. Walton Co., and the business was conducted by him for three years following, when Mr. Black entered the firm, which has since been known as Hewitt & Black, and conducted under the management of Mr. Black.

Methods of Retailing Paints and Varnishes

Making the Spring Paint Purchases

Merchants Are Now Placing Spring Orders—Changes in Linseed Oil Prices — Turpentine Market Firmer—The Situation in White Lead.

DURING the next few weeks a large number of orders for spring delivery will be placed.

With the completion of stock-taking, the hardware dealer turns his attention towards his requirements for the future.

Despite the fact that the outlook in some lines of trade is not as bright as might be desired, there is every reason to expect a large volume of business in the paint line during the remaining months of the present year.

Among the lines to be purchased in advance are ready-mixed paints, white lead, linseed oil, turpentine, varnishes, etc.

The paint market during the past week has shown a decidedly upward trend.

White lead has for some time shown steadiness, but during the past week firmness has been noted.

Pig lead has advanced, and linseed oil has advanced twice during the past two weeks. It is true that pig lead is selling at a high figure, but nevertheless there appears to be a steady demand.

With firmness thus exhibited there is a rumor among some of the larger dealers in white lead that higher prices may be expected.

It is, of course, hard to predict the future of the lead market, but from present indications the market is going to be firm.

Linseed oil has advanced 6 cents per gallon during the past two weeks.

In the Nov. 15th issue of Hardware and Metal, oil was quoted in single barrels at 55c per gallon. In our market reports of that issue we stated that it was the general feeling among those connected with the trade that linseed oil was a good buy.

To-day the same oil is being quoted at 65 cents per gallon in single barrels, an advance of 10 cents per gallon. Manufacturers are now threatening even further advances.

The turpentine market in the South has been exhibiting firmness during the past few weeks, and slight advances have taken place. There will no doubt be further advances here before long.

A short time ago a number of reductions were made in the price of ready-mixed paints.

The question now bothering some dealers is whether or not the lower prices will continue to prevail.

With linseed oil advancing, turpentine and white lead showing firmness, there appears to be only a small chance of any better prices on ready-mixed paints. It is true that if the prices of raw materials continue to advance, there will also be an advance in the finished product.

Retail hardwaremen should study the markets carefully.

From present indications hardwaremen should not be backward in placing their spring orders for a good many of the lines they will require for the paint department.

There is more firmness being exhibited in the paint market at present than there has been for some time past.

11

WHAT IS THE WORTH OF MY STORE FRONT?

(Continued from page 45.)

that are paid on other stores and in other localities. Two stores of exactly the same size, located in different sections, will draw different rents. The higher priced one will be the store located on the busier street. The difference in the rent is due to the fact that this store faces on a street where more people pass. Therefore, the larger rent can be put down to the fact that the store has a more advantageous frontage.

If a merchant on this basis is paying $75 a month more for a well-located store, he can figure that he is paying this premium to have his store front on the main street. Is he getting the full benefit of that increased expenditure?

This question is one which every merchant must consider. If a merchant feels that he is not getting the amount of business that his location warrants it is essential that he should find out at once how this can be remedied. Many considerations will come into play — service, quality of stock, advertising, interior store arrangements and the utilization of the store front. It is with the last consideration only that this article deals.

Using the Store Front.

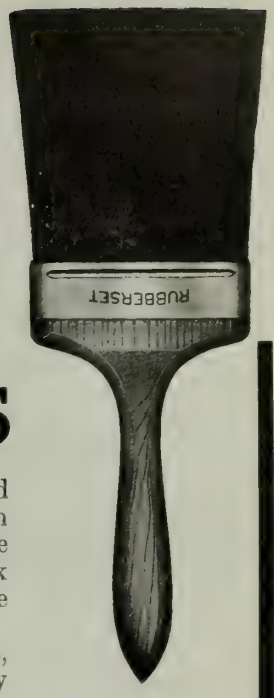
Tests have demonstrated that best results are obtained by utilizing the store front to the fullest extent. If it can be so devised that every square inch of the front will have selling power, the rent percentage will never be too high.

The trouble with the average hardware front is that too much space is wasted. The old-fashioned window allows only limited space for display purposes. What is the first impression that one gets on looking at an old-style store front, with its heavy frame-work and its solidly cased-in door? Undoubtedly one sees the front first, takes in some of the details and, perhaps, turns away. It is only on second impression that the displays are taken in.

With the modern store, the front does not subordinate the display. The open and uninterrupted expanse of plate glass brings the display right out into clear view. And yet the front, though not obtrusive, gives a favorable impression at once. The metal framework, the leaded panes of glass above, combine to make an admirable and attractive setting for the displays.

A modern store front is a standing invitation to enter. It bespeaks efficiency, it seems to tell of the high grade of service offered within. And, more important still, it makes it possible to use every square inch of the front for selling purposes.

An Important Test.



A manufacturer interested in the problems of retail sales efficiency recently made a test of the selling power of certain varieties of store windows. He had measurements of twenty different store fronts made and divided them into four classes according to the number of cubic feet of display space in proportion to the frontage. He then obtained confidential figures with reference to the rents and the sales totals in all the stores. The data thus obtained demonstrated one fact most conclusively; that the larger the area of display space, the larger was the turnover in proportion to rent.

The accompanying chart shows the proportion in which the sales crept up. The advance is marked for both one-window and two-window fronts. Although the scale is different on the styles of store fronts, the information obtained was not complete enough to warrant any comparison of the two styles.

BRUSHES

That are Brushes

And that are not a collection of cut strands that incite wrath and bad temper by the painters who use them. Selling poor brushes might be described as the All Red Route for losing customers most rapidly. It pays to handle brushes that are

MADE BY EXPERTS

Naturally the best brushes on the market are those that have gained their reputation on their merits. No make of brush is better known on the American continent than the *ADAMS*. Your customers will be disappointed if you are unable to supply them. See that your stock is in good shape for the early spring business. Our brush catalogue will be of great assistance to you. Write for it.
Our salesmen are now on the road with our full line of sample brushes, and will be pleased to assist you in sorting up your stock preparatory to placing your spring order.

Weekly Market Report---Paints

MONTREAL.

Montreal, January 15.—While it is true that a very optimistic tone prevails among the paint manufacturers at this time, and it cannot be said that the volume of business is very large, this, of course, is only natural at the present time of year. There is very little painting being done in the month of January, and this is probably the slackest month to the retailer in this line. Of course, the very busy time for the manufacturer is now approaching, they are taking orders for spring trade, and the factories will be working to capacity getting ready for spring shipments. The majority of paint concerns, in spite of the talk of hard times, state that in 1913 they did a bigger business than in the year previous. 1914 has started well with advance booking and the feeling is that business will continue to be good. The general opinion seems to be that the first three months of the year will be moderately quiet, but at the end of that time things will have vastly improved and business will be on a very sound basis and that there will be lots of it. During the past two months retailers had not been ordering in very large quantities, and the result will be that when the time comes to place the spring orders that these will be heavier than would otherwise have been the case.

White Lead.

While there is no change in the price of lead, this market is very firm at the present time. Pig lead in England has been going up, and is very firm and this, of course, has the effect of strengthening the white lead market. It would not be a surprise in the near future, if the present trend of prices in pig lead should continue, for an advance in white lead to occur. Dry white lead is now selling at 6¾c per pound, while lead in oil for less than one-ton lots is selling at $8.25, for one-ton lots $8.05 and for five-ton lots $7.55.

Prepared Paints.

Spring booking appears to be as large in volume as it was a year ago, and this is very satisfactory according to the manufacturers. Western business is said to be improving, dealers are placing their orders with a little more confidence, and buying a little more freely than has been the case up to the present. Shipments for present requirements are, of course, very small, but judging from reports received, 1914 promises to be a big paint year.

Putty.

There is not a very large demand for putty in this below zero weather, and while some orders have been filled, the demand is naturally small at this time of year. At the present time building operations are more or less suspended owing to the extreme cold which prevails at the present time, and as a result, the demand for putty is not very great. The prices remain unchanged as follows. Bulk in casks, $2.30 per 100 lbs.; Bulk in drums $2.50 per 100 lbs.; Bladder in barrels $2.80 per 100 lbs. There is, of course, the usual advance of 70c per hundred for pure putty.

Linseed Oil.

The market for linseed oil is very strong at the present time. The demand appears to be good, and while, as a rule, it is possible to obtain two or three and sometimes four prices on this commodity at the present time every quotation is the same at 60c for raw, and 63c for boiled in single barrel lots. The demand has increased during the past few weeks, and an advance in the near future is not by any means out of the question, in fact, it looks quite possible under present conditions.

Glass.

There has been a certain amount of business done in glass, but it has not amounted to anything very great. Prices remain unchanged.

Turpentine.

The demand here has improved, and the price is very firm at 64c per gallon in single barrel lots. While no word of an impending advance has been heard here, at the same time an advance is far more likely than the reverse.

Gasoline.

The amount of business being done here is just about the same, and the market shows no outstanding features. The prices remain unchanged and firm.

TORONTO.

Toronto, Jan. 15.—Linseed oil has taken another advance in price. Last week's issue stated that members of the trade were of the opinion that oil would go still higher, and their opinions were well founded.

Another jump of 3 cents per gallon has taken place. This makes an advance of six cents per gallon during the past two weeks.

Turpentine remains unchanged at present but it is almost safe to predict an advance of 2 cents per gallon by the end of this week.

The lead market is showing firmness.

Prospects for spring business are very bright and a good year's business is expected during 1914.

Stock-taking among the retailers is drawing to a close and a good number of spring paint orders will be booked during the next few weeks.

Linseed Oil.

An advance of 3 cents per gallon is recorded in the price of linseed oil. This is the second big advance during the past two weeks and manufacturers are threatening even higher prices.

The flax market has been on an upward trend and is very firm.

Toronto quotations now are:—

Raw Linseed Oil, 1-2 barrels....	65c gal.
Raw Linseed Oil, 3-5 barrels....	64c gal.
Raw Linseed Oil, 6-9 barrels....	63c gal.
Boiled Linseed Oil, 1-2 barrels..	68c gal.
Boiled Linseed Oil, 3-5 barrels..	67c gal.
Boiled Linseed Oil, 6-9 barrels..	66c gal.

Turpentine.

Toronto quotations on turpentine are unchanged, but an advance of 2 cents per gallon is expected during the next few days. Present prices are as follows:—

Turpentine, single barrels.....	66c gal.
Turpentine 2 to 4 barrls.....	65c gal.
Turpentine, 5 gal. lots.....	73c gal.

White Lead.

Firmness is exhibited in the lead market and there are hints of the possibility of higher quotations. Orders are still being booked for delivery up to May 15 at the following prices:—

5 ton lots, $7.90 per 100 lbs.

1 ton lots, $8.20 per 100 lbs.

Less than ton lots, $8.40 per 100 lbs.

Glass and Putty.

No change has taken place in glass or putty quotations. There is a seasonable demand for both lines. Quotations on putty appear firm at present.

Prices are shown in current market quotations.

Calgary, Atla.—Comer Hardware Co. are reported having sold out.

Bradford, Ont.—Watson, Limited, Toronto, makers of wire screening, etc., have built a plant here, and are now moving the old machinery in. No new machinery has been purchased yet. Operations on present lines are to be extended. The Company was known in Toronto as the Watson-Smith Co.

BACK of EVERY CAN YOU SELL

IS the house of Brandram-Henderson, Limited, known throughout the Dominion for the making of paints conspicuous for beauty and durability—the qualities that give selling force and make it worth while for the Dealer to handle

B-H "ENGLISH" PAINT

It is an admitted fact that the surest and safest way to build up a paying business is by handling only products of real and **known** merit. Now and then you may have to deal with a customer who considers first cost solely, but most people know that when they pay less they get less, and do not hesitate to pay a fair price for a good article, knowing they will get their money back, with interest, in the long run.

In selecting your stock, never forget that B-H "English" Paint has an established reputation. It is not a new thing, but a paint that has proved its value time and again, hence it affords a sure basis for developing a lasting trade. You may sell a cheap, doubtful paint to a man once, but you are not likely to sell the same thing to the same man again, whereas with B-H "English" Paint the first sale always leads up to a second, based on the demonstrated value of the paint when the buyer puts it to the test of actual service.

This is the logical reason why it would pay you to handle B-H "English" Paint, and as a preliminary step, write us for details of our agency proposition and our dealer's selling helps.

Minerva Co-operation Is Real

How is your paint stock? Does it hang fire and stick on your shelves?
The full margin of profit in your paint department can only be realized by handling a good clean-cut quality stock, of known reputation and backed by common-sense help in direct support of your business, **the kind of co-operation that counts.**
Feature—**MINERVA PAINTS**—the famous British Brand, and watch your paint sales grow.
Ask any Minerva agent for his opinion.
We will be pleased to supply their names on request. There are hundreds with daily increasing sales.
You should know about our 1914 campaign. Write for details.

PINCHIN, JOHNSON & CO.
(CANADA), LIMITED.
MINERVA HOUSE 377 Carlaw Ave., TORONTO
Established in England in 1834

It's Re-Orders That Pay

The profit that comes from repeat orders — the profit that comes from satisfied customers is the cumulative profit that builds business. The Martin-Senour Full Line of Paints and Varnishes include a consistent and complete assortment of worthy products, which produce the kind of satisfaction that wins good-will and brings repeat orders.

Back of this quality and service is a selling force everlastingly creating a demand for the goods—our big **nation-wide** advertising campaign for 1914 is built on original, modern, progressive, business-getting principles, and includes all the various good methods for impressing consumers with the merits of Martin-Senour Paints and Varnishes, and leading them to the stores of our dealer-agents.

If you are interested in quicker and easier sales—sales that leave you a generous profit and the assurance of more future business, make the first step toward becoming the leading paint dealer of your community by writing us for particulars of our Agency Proposition.

Good Profits and Complete Satisfaction

assured every dealer who recommends and sells our high grade.

Black Diamond TARRED FELT

In fact, we guarantee it to last as long as the building on which it is used.
A strong selling point aside from its durability is that it keeps the house cool in summer and warm in Winter. Investigate at once. Get our Prices.
We also manufacture a full line of wrapping papers.

DON ROADWAY TORONTO

Heinisch Tinner Snips

"The Tinner's Favorites"

The Vulcan Snip is of exceptional quality. It is designed especially for cutting curves, all irregular shapes, cornice work and small circles down to 3 inches in diameter.
The high quality is the result of the great care exercised in selecting materials, and the tempering which is done by experts.
Our line of Trimmers, Tailor's Shears, Tinner's Snips, etc., are of the same good quality.
Our firm name is found on all our tools — it is a guarantee of complete satisfaction.
There is a good margin for profit.

The "Vulcan"

R. HEINISCH'S SONS CO., NEWARK, N.J., U.S.A.

BENJAMIN MOORE & COMPANY, Limited

MAKE TORONTO, CANADA

MURESCO, The best Wall Finish.
SANI-FLAT, The best Flat Oil Paint, washable and non-poisonous.
MIXED PAINT, Moore's House Colors, second to none.

YOU Should know our proposition. It's worth while.
Should write us to-day for full particulars.
Should sell the MOORE Line and make more money with less investment

The F. R. Murray Co., Ltd., Vancouver — Distributors for British Columbia

Stephens

READY MIXED PAINT

is so steady a seller that you owe it to yourself to stock it.

Made from the purest of ingredients by experts, it brushes out so well that it is very economical in use and it gives such a splendid service that it becomes a recommendation of you to your customers.

And then there's the profit side as well. Let us tell you about our agency proposition.

G. F. Stephens & Co., Limited, WINNIPEG, CANADA
Branch at Calgary, Alta.

Over half a hundred years of paint production

has brought us to the point where we can unhesitatingly recommend Jamieson's various Paints to be unsurpassed for the particular work for which they are manufactured.

The dealer is protected

because this recommendation amounts to a guarantee on every drop of paint that goes out of our factories.

We want to talk over the paint proposition with you. How about it?

POULTRY NETTING.

52½ per cent.

Do You Know—We Told You

I.C. RED LEAD IN LINSEED OIL

IS BETTER

Than other Red Leads or Red Lead substitutes.

BECAUSE

It is always ready for use—Remains suspended in oil indefinitely—Dries quickly without the use of driers—Is more economical.

IT DOES NOT

Contain any adulterants—Disintegrate or chalk off—Harden or Solidify—Turn white after applying—Cost proportionately as much

AND WE PROVED IT

By having Canada's Most Noted Chemists, Milton Hersey, Limited, Montreal, make not only a chemical but a PRACTICAL WORKING TEST of it.

That report has been published several times recently in HARDWARE and METAL. We shall be glad to send you a copy of it.

NOW WE ARE GOING TO PROVE

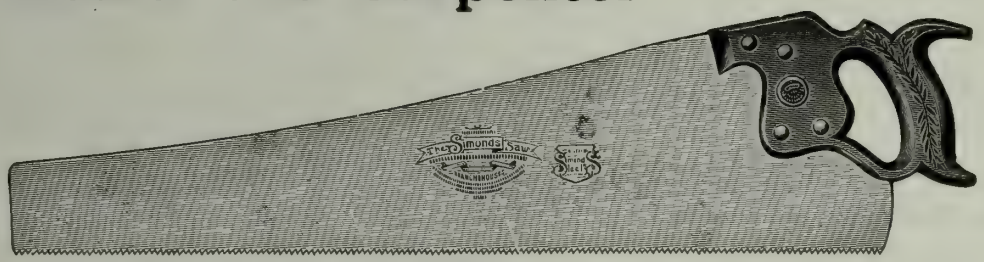
I.C. Everlasting Paint

Is BETTER than other paints you are now buying or are able to secure

BECAUSE

It has greater covering power—It will not blister—It will not disintegrate or chalk off—It will hold its color—It works more smoothly under the brush—It contains pure linseed oil only—It sheds water like a duck's back.

YOU CAN TRY IT OUT YOURSELF—MAKE YOUR OWN TESTS—AND PROVE IT.



Write us for samples and particulars.

Watch this space for report of tests which are now being made.

PROTECTION

Here are represented two guardians, well known for the protection they give to property owners.

We want to interest you particularly in the Canada Paint Proposition, for it has to do with Property Owners as well as Paints and Varnishes. Our plan is to co-operate with you in making your paint department a success, and by bringing people, who use paint, to your store, your entire business will bring you increased returns.

Canada Paint embodies all the advances in paint manufacturing during the many years that Ready Mixed Paints have been on the market. All the raw materials in Canada Paint are of tested purity. In order to control the quality of our linseed oil, we press, filter and age this most important ingredient ourselves. Canada Paint is made according to scientific formulae, which have been tested by practical paint men, and which, we believe, produce the most durable paint it is possible to make. Our reputation for satisfactory finishes extends throughout our entire line of paints, varnishes, stains, enamels, colors, linseed oils, etc.

There is a CP finish for every use the painter, decorator, property owner, manufacturer and industrial corporation can have, to protect and beautify the thousand surfaces which depend for their finish on such products.

We have the right quality goods, and are out for larger business this year than ever before. By co-operating with aggressive paint dealers, we know we can do more business and help you increase yours as well.

Before placing your stock order for the spring, allow our Representative to go over the Canada Paint proposition with you. It will be a courtesy we appreciate very much, and will put you under no obligations.

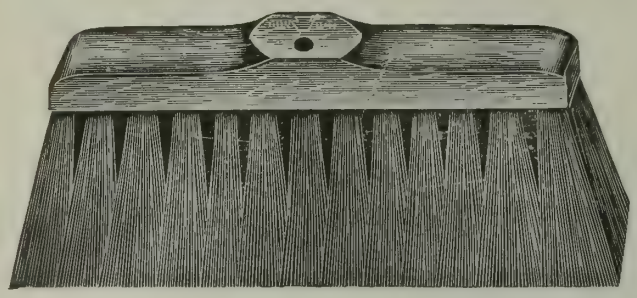
PAINT AND VARNISH REMOVERS OF QUALITY

When you buy remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance.



Our Licensees are the only authorized manufacturers of the SLOW-DRYING, QUICK-ACTING, NEUTRAL REMOVERS.

	Name of Brand:
SHERWIN-WILLIAMS CO. OF CANADA, LTD., Montreal.	"Taxite"
INTERNATIONAL VARNISH CO., LTD., Toronto.	"Klensa"
PRATT & LAMBERT, INC., Bridgeburg, Ontario.	"Expedite"
BRITISH AMERICAN PAINT CO., Victoria, B.C.	"Bapco"
MOUNT ROYAL COLOR AND VARNISH CO., LTD., Montreal.	"Scrape-off"
ROBERTSON CO., LTD., JAMES, Toronto.	"Robertson's"
PEARCY & CO., LTD., SANDERSON, Toronto.	"Devolite"
STEWART & WOOD, Toronto.	"Solvo"
MARTIN-SENOUR COMPANY, LTD., Montreal.	"Martin-Senour"
ADAMS & ELTING CO., Toronto.	"Adelite."

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT NO. 78,586."

Chadeloid Chemical Company
100 William Street, New York, N.Y.

STABLE BROOMS

are in constant demand at this season of the year. We offer you genuine steel fastened Stable Brooms of which we are the originators. They cost less than pitch fastened Brooms and are guaranteed to stand the hardest usage.

Supplied in Bass, Cane, or Split Bamboo in sizes from 12 to 16 inches. Special sizes made to order.

FINISHES THAT ENDURE
M L
QUALITY

Our Maple Leaf Decorative Aid Department has a nice co-operative advertising proposition awaiting your enquiry. Drop us a line about it to-day.

We Want the "Brightest-"

-even if he isn't the "Biggest"-

Here and there an impression prevails that Lowe Bros. "are only after the big fellows."

That's a fact—but there's more than one way to measure bigness. The man who has built up a big business and now wants to rest on his oars, doesn't want to hear anything new, doesn't want to build for to-morrow—that man is *not* the man for us, be his business ever so big.

The man we want to do business with may do a comparatively small business NOW, but he must be the type that wants to grow big and grow right. Lowe Bros.' "High Standard" proposition will honestly do more to help him realize his ambition than any paint offer he ever heard of.

Are *you* the man? To-day is the day to write us.

PERSISTENCY IN ADVERTISING

One stroke of a bell in a thick fog does not give any lasting impression of its location, but when followed by repeated strokes at regular intervals the densest fog or the darkest night can not long conceal its whereabouts. Likewise a single insertion of an advertisement—as compared with regular and systematic advertising—is in its effect not unlike a sound which, heard but faintly once, is lost in space and soon forgot.—*Printing Art.*

The Ideas That Create.

Why Business Men Are Big

The series of family sketches, running in MacLean's Magazine, are constructive timbers for the aspiring man to-day. If you have read the charming stories of the Oslers, the Denisons, the Bordens, the Allans, the Molsons, the Merediths, or the Prices, you will want to see in the February Number how the Gooderham qualities, laid by the Canadian founder of the family, have made and influenced the course of their subsequent business growth.

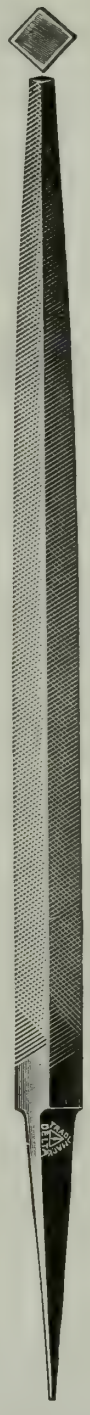
These descriptions are entertainingly written. The facts are obtained by a close personal study by the writers. The descriptions are not a fulsome screed on family virtues. They dip into and examine, commend or condemn as the point in question best appeals to good judgment. They take the reader for a pleasant biographical jaunt with the bypaths and lanes of personal endeavor and struggle, and point out to him the forces that contribute powerfully to the uplift of various members of the business or professional world.

The character sketches of Canadian people are masterpieces. You read in the January issue the meteoric rise of McCurdy, M.P., of Nova Scotia; The Poise of a Fraser,—Canada's Auditor General, a Conservative Liberal, in Blackadar of Halifax; or Culture in Professional Life—a sketch of J. Murray Clark, K.C.

In February, the enthusiasm that has made Wm. McMaster the latest addition to the directorate of the Bank of Montreal will attract and hold.

This series by Frederic W. Wile, Berlin correspondent of the London Daily Mail, on the great business and professional men of Germany, is alone worth any business man's attention. Von Tirpitz—the builder of the German Navy, in the January issue is followed by Von Bieberstein, the man who inspired the famous Kruger telegram in the February number.

The REVIEW OF REVIEWS section of the magazine culls gold from the literary wash of every country and interest. This alone is invaluable.



From four to six short stories. A humorous serial by Canon Hannay, and plenty of illustrations, conclude the attractions of an excellent magazine for busy Canadian men and women.

If you are not already a reader of MacLean's Magazine, we can commence your subscription with this issue. Send your name and address on a post card and have your copy sent at once.

Single copies 20c. *For one year $2.00.*

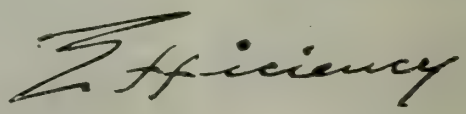
Impressions from Counterfeit Places and Things

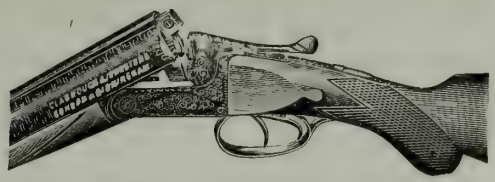
¶ In our great cities—and in smaller towns as well—we find a form of sickly anti-naturalism which seems to overtake at least 80% of the race, and which is manifested everywhere in arrested development. While arrested development is most conspicuous in the country and in small country towns—the glamor of life—the artificial side—is pursued in greater degree in larger towns and cities, because of the conditions which make this glamor and artificiality possible.

¶ After we permit ourselves to drift into an unhealthy physical and mental state, we find that it is easier to follow the sickly imitations and follies of life, than it is to adhere to the higher laws and principles that govern our nobler instincts. The physical and mental change which makes this attitude possible is similar in every sense to the organic change that takes place after the formation of a drug habit. It requires, perhaps, a period of two years to trade our healthy instincts for the deadly drug of pretense and glamor—for the poison of the superficial and artificial.



¶ In cheap theatres, cafes and dance halls our natural appreciation of the beautiful is appeased by gaudy colors and tawdry decorations, and these sickly imitations are accepted for the reality which they imitate. The Path of Folly which leaves its trail of dried and faded cheeks, blurred and milky eyes, coarse and guttural speech, leads from us in all directions toward these gilded and painted nothings. We are quickly impressed by the surface of things—by the effete, and unless we are alert and active, our healthy instincts become diseased and die one by one. It is then that we become the charred stump of the magnificent tree that we might have been.

¶ The reason that any perverted desire, that any injurious or pernicious habit continues at all is that perverted desires are founded upon a natural instinct, which instinct is a natural desire for recreation and change. Every man, woman and child possesses a natural desire for recreation, for change of environment, for new surroundings, and this natural desire in the majority of people is satisfied with the bizarre, the gaudy and the gilded.



¶ Many of us live out our entire existence without ever having seen anything but the alleys and ashcans of life, without ever travelling high enough to discover the relationship between ourselves and nature. Most of us never explore the sky and clouds at day-time—never look up to enjoy the stars at night; yet there is at Sea of Beauty that bathes the entire universe, and which is always there for all of us to set sail upon as we will. But we are too busy chanting and singing and rehearsing the little insignificant things of our everyday life.

¶ Once we forget the out-of-doors, once we forget the value of fresh air, once we fail to remember the utility of exercise, we are on the down grade. Our perspective of life and of people is becoming narrow and one-sided, and we are degenerating just as surely as the healthy, natural dance of the mountaineer of the time of Robin Hood has degenerated into the stupid dance of our modern ball-rooms and cafes—where the air and the atmosphere are pervaded with cigarette smoke and the fumes of stupid drinks and poorly prepared food.

¶ Unless each day we possess a desire to ascend to heights to which we have not climbed, and descend to depths of understanding which we have not yet explored, we cease to grow, and finish the Race of Life with our mentality developed just a little more than that of the child, yet stripped of the child's activity, interest and imagination.

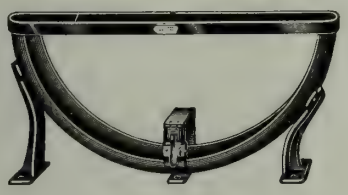
LAMP BLACK INSURANCE

Eagle, Old Standard, Pyramid and Globe Germantown



Sixty-four years' reputation behind each package INSURES THE DEALER.

Lampblacks in bulk that are positively unmatchable in strength and delicacy of tone INSURES THE USER.

THE L. MARTIN COMPANY

Headquarters Since 1849

New York, Philadelphia, Cincinnati, London, England

Our best sales in the United States are made by Hardware Dealers who find the

AUTO TIRE HOLDER

to be a very profitable line to carry.

The Sly Perfect Tire Holder goes on the running board, **compact, neat** and **strong.** Secure and cannot become an easy mark for theft.

We have a good proposition for reliable Canadian dealers. Let us give you particulars.

The W. W. Sly Mfg. Co., - Cleveland, Ohio, U.S.A.

Good Pumps with Good Profits

We are looking for the pump dealer who knows that selling good pumps pays in good-will.

McDougall Pumps are well made, properly fitted, good through and through "Aremacdee" Brand.

Every pump sold stays sold and stays in good order.

Metal Hand or Motor Pumps—for Force or Lift use—every size, style, kind, in our big catalogue.

Write

The

R. McDougall Co., LIMITED

GALT, CANADA

—it's all rusty!"

exclaims your customer. "Haven't you got a better-looking one than this?"

You dive in amongst the stock and shake your head, "I'm afraid they're all about the same, sir; just came in and we haven't had time to clean them up yet."

But your customer's desire to buy that tool is gone. He shakes his head, murmurs something about calling back, and——you've lost another sale.

All of which could be avoided, if you had insisted that bright things be wrapped in **British American Wax Paper**, and had made it plain to your jobber and manufacturer that you wanted them to ship goods that way.

Get after them now—before that particular customer comes along—before you have the chance to lose sales through rusty tools.

They'll see how it works to **their** interests too, when they realize that you'll be pleased.

So now's the time to write—**do so**

The

British-American Wax Paper Company, Limited

Darling Bldg., Toronto

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.50 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business, Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

MEN WHO SELL THINGS. BY WALTER D. Moody, Business Manager of the Chicago Association of Commerce. An indispensable book for merchants, manufacturers, employers, salesmen and all who have goods of any kind to sell. The author forcibly sets forth such themes as how to approach men; how to create and develop the compelling personality, the genial address, the engaging presence of the energetic business-getter; how to attract, convince and sell a prospective customer under adverse conditions; how enmity may be turned into friendship, interest into desire, curiosity into sales, and sales into permanent custom. A few of the subjects discussed are: Right Kind of Salesmen; Specializing Efforts; Letters to the Trade; Getting the Price; Retail Salesmen; Sales Manager, etc. 205 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

Hated by Sneak Thieves

This Stanley No. 915 is a bona-fide Safety Hasp

It keeps sneak thieves on the right side of the door. It baffles the skill of intending intruders, who find no means for getting at the screws and balk at its great strength and resistance to a prying leverage

TRADE S.W. MARK

This Trade-Mark guarantees its genuineness and protects our patent on this 915 Hasp. You can supply yourself with four sizes: 3½, 4, 6 and 7 inch—The 7 inch being extra heavy, and strong. Plain Steel, Japan, Brass, Bronze or Antique Copper Plate, Galvanized or "Stanley" Sherardized. Stock them generously.

All Stanley Goods are ready for immediate Shipment.

"FROST" FENCE FIRST

Doesn't this give you immediate confidence in FROST FENCE as a trade-winner? Your customers will demand this kind of fence as soon as they see it on your display floor. Every roll from stock is just as even and neat as those shown in the picture. Every farmer knows that the laterals must be of even length and the stays evenly spaced, otherwise it would be impossible to have uniform rolls with stays all standing upright.

There has been no noticeable change or improvement in most of the fences offered for sale to-day. These fences and the machines on which they are produced are just the same as they were when introduced years ago. Without modern and improved weaving machinery you see bundles unevenly wound and stays criss-crossed.

FROST FENCE really has in its make-up those necessary features which stand for durability, such as wire which is full size No. 9 to stand strain, well galvanized to prevent rust and springy and tough to have that "come-back" which keeps the fence always taut and upright. You'll never see a FROST FENCE sag or slack, providing the end posts do not give. We can guarantee all these features because WE MAKE OUR OWN WIRE and not only that, we go farther and manufacture our own fence looms, and we employ an expert who is continually on the look-out to make any improvement, no matter how slight, that will mean an improvement in our fence. This accounts for FROST FENCE being well woven.

There are many districts in which we can help a good live dealer develop a larger and more profitable fence business.

Write us for catalogue and price list of our complete lines, which include coiled, oiled and annealed and telephone wire, bale ties, as well as gates and iron fence.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

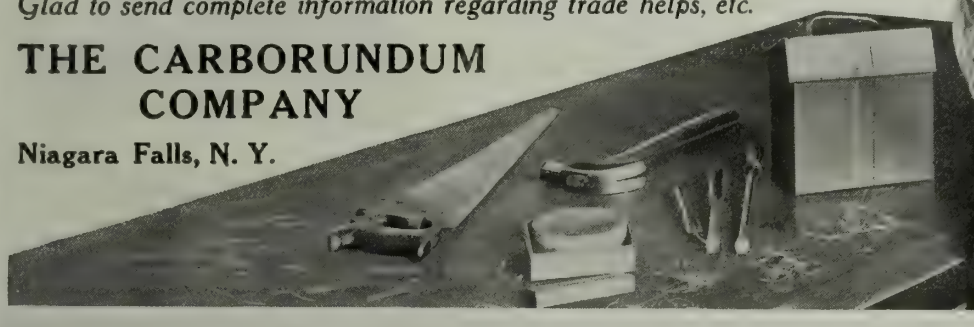
The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

In case lots of 24, $1.95 each. In broken lots, $2.05 each. Less 2%.

PETE SAYS: "When you take that inventory you will find a lot of gaps in your stock of Carborundum Products. Fill 'em up. See that you always have a complete stock of the hardest and sharpest.

"There is scarcely a customer that comes into your store but has use for

CARBORUNDUM



Go to it. Put ginger into your sales by being a Carborundum dealer. Use our window display material—take advantage of our advertising—and count the profits."

The Carborundum line includes sharpening stones, razor hones, knife sharpeners, scythe stones, razor strops, grinders, etc.

Glad to send complete information regarding trade helps, etc.

THE CARBORUNDUM COMPANY

Niagara Falls, N. Y.

There are many hardware merchants who can make cement one of their most profitable lines.

Do you realize how much cement is being used in the construction of modern dwellings right in your vicinity?

Practically all the cement that those builders are using is bought from large dealers simply because it cannot be procured near by.

START HANDLING

ROGERS' Portland Cement

now. You'll get the most particular of cement buyers for your customers because Rogers' is universally recognized as the Cement possessing exceptional strength, durability and uniformity of set.

You need not carry a large stock to be our representative. In case your stock is not sufficient to meet demands write us and we will ship immediately.

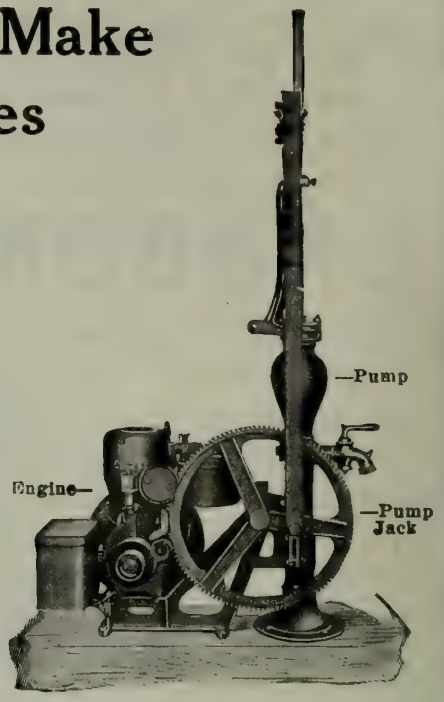
How the Hardware Man Can Make Money Selling Farm Engines



Every farmer is a prospect for a farm engine. Thousands of engines are being sold annually throughout Canada. The agricultural papers are full of farm engine advertising and long articles on the many uses and economy of the farm engine. Farmers read these papers very closely and are buying engines as rapidly as they can afford to. Farmers must come to the hardware dealer for supplies, and while there will look at a farm engine if you have one in stock.

You can add to your profits by securing the agency for a reliable farm engine.

FAIRBANKS-MORSE FARM ENGINES

Have an international reputation for reliability and long service. Farmers like them and speak well of them. Fairbanks-Morse engines are made in Canada, and are backed by a strong organization. We relieve you of all responsibility. Our engines are made in all the common sizes for farm use. By representing us you can supply any size or type of engine the farmer may need. The Eclipse engine shown here is in universal use and would be a safe engine to carry in stock, as there would never be a chance of your having it left on your hands. It is easy to sell. We are selling them all the time direct to farmers.

Write us in regard to handling our farm engines.

Gentlemen:-

Please find enclosed receipt for catalogue received.

We have been looking forward for some time to receiving this catalogue, and have heard so much about its merits, from time to time, that like a great many other things we were afraid you had been over-estimated, but on carefully looking over this book we have come to the conclusion, that it is the finest catalogue we have ever seen, and cannot suggest a single improvement. We therefore have to thank you for it, and assure you that it will be the only catalogue used in our business, and have no doubt, that it will mutually increase our sales over the counter, and your business with us.

Yours very truly,

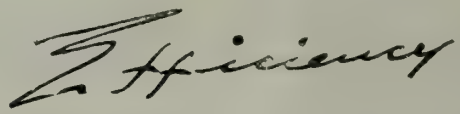
"The Phantom of Fear"

The imagination when seized with Fear will create things more terrible than either sickness or hunger.

A few days ago a young man was selected to present a business proposition to a number of manufacturing firms located in a large industrial centre. He had just completed a "college education," came of a "good family,"—his father had made a success in business, and as far as we can judge raw human material, he measured up, in mentality and in character, above the average.

But in the Scheme of Life, the value of a man's ambitions is determined, the quality of his character is tested, and the fibre of the moral and mental courage that runs through his being is developed and strengthened, by coming in contact with the realities of life. No man can predict, with any degree of certainty, this thing or that of any other man until his sincerity has been called up for judgment before the Court of Experience.

After a preliminary training in New York City, this young man started on his first business trip; with all necessary information, money, opportunity, an unusual business proposition to place before his prospects and a fine position awaiting him as Assistant Manager of a Magazine, if he proved to be made of the right substance.



When the train pulled out from the Grand Central Station, facts, realities, verities and uncertainties came thudding through his brain. For the first time the threads of safety, certainty and security were severed. Day-dreams tottered and fell clattering one by one. College illusions and fancies were turned to for assistance, but these castles had crumbled to white ashes. Bubbles of conceit bursted and vanished,—the mirage had disappeared, and everywhere stood silhouetted the great black shadows of Reality—the necessity of dealing with life on the strength of his own courage.

WORK, a strange monster, with shapeless hands and stalking feet, confronted him at every turn. He planned to return home at the first station stop but did not have the courage—his entire being was frozen in a block of life's cold and rigid uncertainties. When he stepped from the train strangers were everywhere—humanity looked different than it ever had. He went to his room and retired at three o'clock in the afternoon. In a little while he arose and with trembling hands fumbled through his lists of business prospects, and each of these manufacturing firms had been transformed into a "phantom."

The next day he passed by the door of a few business houses but returned to the hotel without making a single call. In a little while he wired for money and when this came the fear of being forced to meet life on his own individual strength was temporarily relieved, but still the Night of Work hung about him like a dismal fog.

For twenty-two days he sat in the lobby of his hotel or turned restlessly in his bed, his mind constantly filled with the Phantom of Fear. Around every place of business he built, with his imagination, a wall filled with dark crevices in which lived the Ruminants, Owls, Bats and Dragons of Fear. On the evening of the twenty-second day he returned to New York City, pursued and beaten by a phantom—a thing that does not exist.

And the Phantom of Fear has forced the imagination to create all the ghosts and ghouls that ever haunted either the "grave-yard" or the courage of man.

The Rope Was Plymouth

TUFTS BOYS FLEE FLAMES

Slide Down Ropes When Blaze Cuts off Escape.

Seventy-five Tufts College students of East Hall executed thrilling slides for life down rope fire escapes last night when a fire damaged the dormitory to the extent of $2000. The fire came near being marred by tragedy.

When the cry of fire was raised the students thought it a joke and declined to flee. By the time they came to a realization their escape was cut off.

Instantly all was confusion. Seizing hand extinguishers two instructors and a squad of students attempted to subdue the flames. The other students shook their ropes out of their windows and started to slide. Personal effects showered the ground around the burning dormitory as the frantic owners attempted to save their knick-knacks

Lives were saved in this case because somebody had taken pains to install dependable fire-escapes.

The escapes were equipped with Plymouth Rope which is strong, pliable and free from splinters—they did their work well.

Here's the statement of the man who made them:

Lowell, Mass., Dec. 15, 1913.

"Your Plymouth Rope has always given the best of satisfaction."

DAVID D. SMALL.

You are in the same situation as this man—to satisfy your customers you must give them dependable rope.

See to it that *your* rope is Plymouth—the kind that is equal to emergencies.

Business Development

¶ Do you ever feel that your present occupation prevents the development of your business talent?

¶ Many a young man is engaged in office or store clerking. Owing to the nature of the business, he has but a narrow range in which to exercise his talent. He cannot relinquish his position to seek one giving better opportunities and paying a larger salary. To do so would be to give up his only source of revenue, and someone may need his support. Yet it is imperative that he increase not only his business, but also his salary.

¶ We will solve the problem for you. We have need of part time salesmen. Men who can devote spare hours to our work and make as much, and in many cases, more money than they can from their regular occupation. Many of these men we develop into regular road men with a high salary. Do you feel that there are latent forces in you, waiting for an opportunity to assert themselves? If so, we want you to let us show you how to discover them. Write at once for the particulars.

EDMONTON ST. JOHN, N.B.
VANCOUVER SASKATOON

The Tub is made of clear white pine treated with a solution that makes it waterproof, brine-proof and water-tight.

The three flat hoops are heavily galvanized to prevent rusting.

The can is constructed of heavy charcoal tin plate, the one metal that is absolutely safe to use as a retainer of milk and cream—is perfectly sanitary.

The "White Mountain" has two beaters, both made of malleable iron, which guarantees them unbreakable.

But it's the Triple Motion that places the "White Mountain" in a class by itself. The beaters and the Can all move in opposition to each other, thereby guaranteeing that the Ice Cream freezes both thoroughly and evenly.

Each freezer neatly covered, attractively labeled, and shipped immediately on receipt of order.

Secure your stock in good time to catch the early trade.

A supply of advertising literature sent on application to our nearest Branch.

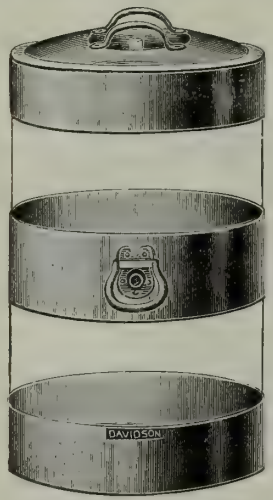
Far-reaching effects follow the wise policy of buying early, but when the demand comes, it is of paramount importance that the article you have for sale is of recognized first-class quality.

Patent applied for

McClary's

Railroad or Delivery Cans, with the "Samson" one-piece bottom and the *new improved* method of joining the breast to the body, makes them the strongest cans ever made.

Note in the illustration how the body overlap comes outside the breast —this prevents possibility of the can separating at this point. To ensure absolute rigidity, a half-circle piece of cast iron is placed between the breast and body.



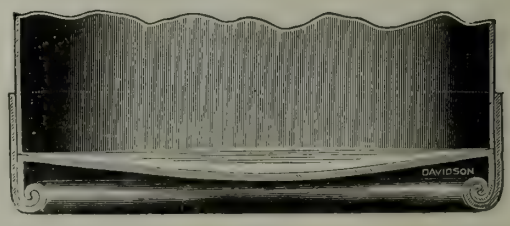
The "Samson" bottom is made from one-piece heavy sheet steel and pressed by the most powerful machine of its kind in Canada. There are no rivets to hammer in, no screws to tighten up, no hoops to adjust, everything smooth and sanitary.

Our new booklet explains everything—write our nearest branch for a supply.

McClary's

MONTREAL HAMILTON LONDON TORONTO CALGARY
WINNIPEG VANCOUVER SASKATOON EDMONTON ST. JOHN, N.B.

Davidson's Broad Hoop, Roll Rim Bottom Milk Can Trimmings.



Cheese Factory sizes, from 10 to 40 gallons.

In Complete Sets.

Comprising 1 broad hoop bottom, 1 cover, 1 centre hoop, 6 in. wide, 20 gauge; 1 broad top hoop, 1 pair cover handles, 1 pair side handles.

See how the outer and inner rims are rolled in and then riveted to bottom hoop.

The heavy rolled edge makes this bottom perfect and doubly durable, because it saves all strain on the can by allowing it to slide easily—and also saves wear and tear to factory floors and waggons.

Our bottoms are made concave, and drain to the centre, and are easy to wash out. They do not corrode like those that drain to the side.

Davidson's Trimmings are unexcelled for ease of making up, and our Patent Roll Rim Bottom makes a strong, neat and fitting completion to any milk can.

We also carry in stock Tinned Iron, cut to size, for Milk Can bodies, which we can supply promptly.

The Thos. Davidson Manufacturing Co., Limited

March 21 Will Be An Important Date in the Hardware Calendar

One of the most successful hardware merchants in Canada—a subscriber to Hardware and Metal of 18 years' standing—wrote us the other day, saying that he considered every issue of Hardware and Metal worth many dollars to him.

But, on March 21, he will receive an issue which will dwarf all the previous efforts of Hardware and Metal's editors.

This will be the 26th Annual Spring Number of Hardware and Metal, and it will be so attractively gotten up, and so brimful of profit-making suggestions, that every subscriber should make it a point to study this number with greater care than he has ever before put on a single copy of any trade paper.

Just try out this scheme: Charge yourself at the rate of $1 per hour, for every minute that you spend studying Hardware and Metal's Annual Spring Number, and see if you do not come out many dollars to the good, as a result of the splendid business ideas you will derive from it.

HARDWARE AND METAL

Published Every Saturday Since 1889 by

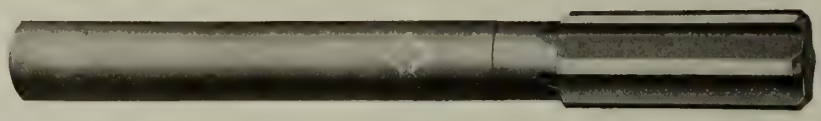
The MacLean Publishing Company, Limited

Montreal, Toronto, Winnipeg, New York, Chicago, Boston, London, Eng.

To Manufacturers and Jobbers of Hardware!

There is no need to tell you, that retail hardwaremen place their heaviest orders of the year in the Spring. Shipments are so timed as to take advantage of the inauguration of Summer freight rates, following the opening of navigation. It is just at the critical time when hardware merchants are compiling these heavy specifications, that they receive Hardware and Metal's Annual Spring Number, with its 275 pages of buying and selling suggestions.

This number is studied with unusual care by the wide-awake hardware retailers of Canada—the very men whom you are anxious to have for your customers. Don't you want them to find your advertisement in this number,—in space which will impress them with the importance of your firm?



Write us for rates, and for sample copy of last year's Spring Number.

"W&B" Reamers Are Ready for Those Getting Less than the Best Reamer Service

Wouldn't a reamer that will hold to size on two or three more jobs, than other reamers, interest you? "W & B" Reamers are made from highest grade steels, properly designed and tempered to give longest life and absolute accuracy.

Take the best reamer in your shop and put it to the service-test with a "W & B" Reamer. Note the quality of work done by each reamer.

When the test is complete buy the grade of reamers that show up the best. This is the kind of proof that sells "W & B" Reamers.

1883 WRIGHTLIGHT 1913

Short Globe Lanterns have behind them the guarantee and backing of the oldest established firm of Lantern manufacturers in Canada.

It was in 1883 that E. T. Wright & Co. turned out the first Canadian Tubular Lantern, and to-day (30 years afterwards) the same firm under the same management, are still the pioneers of the Lantern world.

Our **WRIGHTLIGHT** Lantern is the latest product of thirty years of Lantern experience. Let us tell you at least a few of the **WRIGHTLIGHT** exclusive features, which are not found on any of the Canadian imitations of our Lantern—

NON-DETACHABLE WIRE EARS AND BAIL—This patented idea of ours makes it impossible for the handle to work loose or drop off. The Lantern must be torn to pieces before the handle will break away.

RISING CONE—The burner cone is attached to the globe disc, and rises with the globe when you are ready to light the Lantern. This leaves the wick exposed ready for the match, and insures a perfect fit when the globe descends.

And then there is

THE SHORT GLOBE, which allows the hand to be easily inserted for cleaning purposes.

TO CORRECT A FALSE IMPRESSION that is being circulated among some of our Lantern friends, let us assure them that all patent rights in connection with our No. 3 **WRIGHTLIGHT** Short Globe Lantern are vested solely in ourselves, and are nobody's concern but our own—and our lantern friends, who benefit by them.

Buyers who prefer a full-length globe will find that our No. 4 Cold Blast Pattern will answer their requirements perfectly.

A large stock of both patterns on hand always, and prompt shipments a certainty.

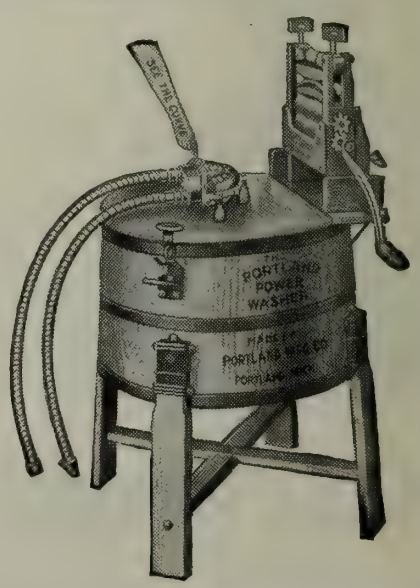
The Portland Power Washer

is manufactured in one of the largest factories in the world, owning and operating its own brass foundry, where all motor parts are made of the best material that can be procured.

All castings on our motors are brass and will not rust.

The motor is gearless and needs no oiling, thereby saving grease spots on the clothes.

The tub is large and fully corrugated, and finished in the best possible manner, with oil filler and varnish.



Will operate on less pressure than any other water motor machine on the market.

The agitator travels farther at each stroke than any other machine; therefore does the washing in much less time.

Is thoroughly tested by our skilled expert before leaving the factory.

This machine is made by men who have "grown up" in the business; men who have studied whys of every washer's success and the reason for every washer's failure. That's why the **Portland Power Washer** is such **a perfect piece of mechanism** success everywhere.

It will be a splendid washer for you to handle. Guaranteed for 3 years.

HARDWARE AND METAL

Vol. XXVI. JANUARY 24, 1914 No. 4

Does Your Turnover Warrant Your Rental?

The Question of Rents Discussed—Average Percentage in Hardware Stores is 3.25—The Experience of a Hardwareman Who Moved to a High Rent Locality—Rapid Turnover is the Great Essential.

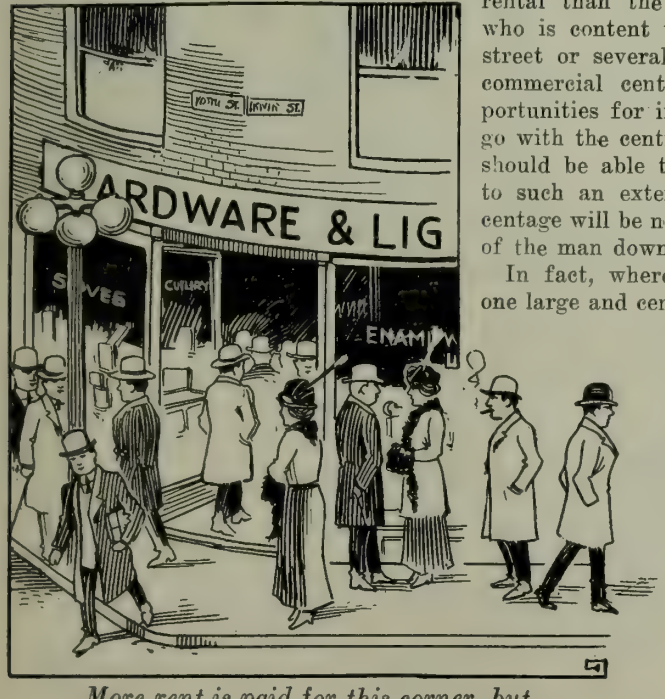
Written for Hardware and Metal by Byron J. Morrow

WHAT are you paying for rent? Is your rent too high in proportion to your turnover?

These questions are vital ones. The problem of rent is one which affects every retailer whether he owns his store or not. If the percentage paid out in rent is higher than general experience decrees it should be, the merchant can take it for granted that there is something wrong with his methods, that he is not handling his business as efficiently and progressively as is necessary.

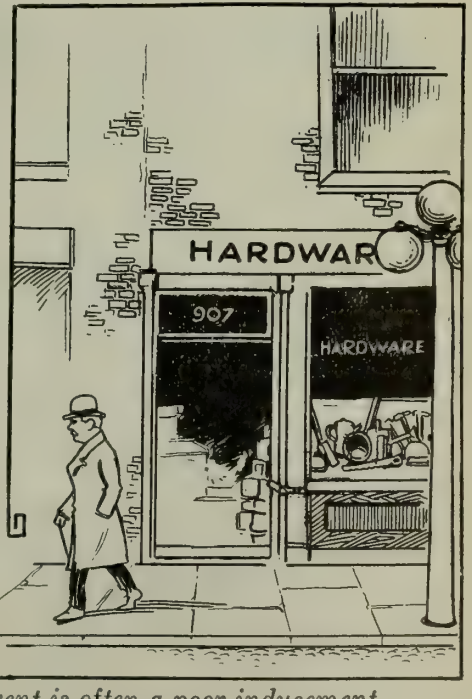
Hardware and Metal has made investigations into the question of rent extending over several weeks, with the object of establishing the average percentage for rent in the hardware trade. The figures for a representative number of hardware stores have been obtained, together with considerable matter relative to the methods of these stores in so far as they affect the proportion that rent bears to turnover.

Estimating on the figures thus obtained, it is found that the average is 3.25 per cent. In other words a store with a turnover of $100,000, can pay $3,250 per year for rent without getting above the average rental. The highest percentage paid in the list was 4.33 and the lowest was 2.5. The high percentage was charged in the case of a large store in a city of medium size; the smallest percentage was found in the case of a store doing business in a small town.



It would be well for each reader before proceeding any farther to figure out just exactly what percentage he is paying himself.

There is perhaps no real reason why the percentage should vary to any extent. The hardwareman who locates his business on the busiest corner of the town will have to pay a much larger rental than the conservative merchant who is content with a stand on a side street or several blocks away from the commercial centre. But with the opportunities for increased business which go with the central stand, this merchant should be able to increase his turnover to such an extent that the rental percentage will be no higher than in the case of the man down the street.



In fact, where there are two stores, one large and centrally located, the other smaller and less favorably situated, the percentage on turnover should be the same is equally aggressive use is made of the merchandising facilities of the two stands.

Made Good in Large Stand.

A case comes to mind of a hardwareman doing business in an Ontario city of about 18,000 population. He was old established, had about the best business in town, in fact and had worked his yearly turnover up to $60,000. He had a store on the main street three blocks away from the the commercial centre. For this he paid $150 a month. People went out of their road to trade at his store—some people, that is. He had a large number of old customers who would never deal anywhere else. Nevertheless his business was not increasing very rapidly and the reason for this was not hard to find, after all. On a Saturday evening, the main street would be thronged with busy crowds at the corner which had become the hub of the retail life of the city. This activity extended for a couple of blocks each way, gradu-

More rent is paid for this corner, but isn't it worth while?

Low rent is often a poor inducement to locate.

ally becoming less marked as the crowds thinned out. When one reached the part where Judson had his hardware store, there was no difficulty in getting along rapidly for the sidewalks were nearly deserted. It summed up this way. Judson was too far away from the hub of the town to get much share of the transient trade.

He figured over the question for quite a time and finally came to the conclusion that it would pay him to get in the central block. As luck would have it, a chance presented itself to secure a store very close to the central corner. This store was narrower than the one he occupied and rented for $225.00 a month.

The proposition frightened him a little at first. To pay nine hundred dollars more a year for a smaller store on the chance of securing a bigger share of the transient trade seemed like taking a big chance. He finally took the plunge and moved.

At the end of the first year, his books showed that he had increased his turnover by $8,000 and as the advance in the rental was only $900, it appeared on the surface that the move had been a profitable one. And yet, strangely enough, his profits for the year were smaller. He figured it over for a week, working it this way and that and squinting at the problem from every possible angle. Nothing served to alter the totals, however. Why this condition should exist, Judson could not see.

Finally, he called in a cost accountant and the latter went into the books. It did not take the latter long to place his finger on the trouble.

"You haven't made this move worth while," he informed the hardwareman. "It has added to your expenses without materially increasing your turnover."

"I sold $8,000 more goods than last year," interjected Judson, "at an increase of $900 on the rent. That looks like good business."

"Not when you have taken these figures to pieces and examined them closely," said the accountant. "This is what you have done. You have increased the percentage for rental without lowering the percentage on other counts and thus your profit has been on a lower basis. Even figuring it on the larger turnover does not bring the profit to the same figure as last year.

"You formerly paid $1,800 a year rent on a turnover of $60,000, or exactly 3 per cent. Now you pay $2,700 on a turnover of $68,000, or about 3.96 per cent. This would be alright if you had kept your other expenses down to the old level. But you haven't done so. In fact, I don't think it would be possible for you to do that. Your expenses seem to be on a basis of economy. By moving here you have found it necessary to hire more help to look after the transient business; you have carried a larger stock and your insurance has been higher; you have advertised more; you have spent more money on window trimming. I find on going into the books that the percentage on these items has mounted with the increased turnover and figures out the same as last year. You have, however, paid out practically one per cent. for rent on a turnover which has not increased sufficiently to make good that item. You figure out a smaller profit by $238 than you had last year."

"To sum it up," went on the accountant, "you have not increased your turnover as much as the change of location warrants. If you had a business of $60,000 down the street, you should have a very much larger one here. You should turn your stock more frequently."

As a result of the facts thus placed before him, the hardwareman proceeded to dissect his business methods to find where it was possible to make better use of his expensive stand. He decided that the solution lay in enlarging his stock by carrying lines which would give him a more direct appeal to the thousands who passed his store each day. To effect this he had the interior of his store entirely rearranged. New fixtures were put in. The slower moving lines were in some cases removed from the main store to a storeroom at the back where they would be readily obtainable whenever called for. In many lines, samples only were kept in the store, the reserve stock being conveniently placed in the storeroom. In these lines, the salesmen replaced the sample article as soon as it had been sold.

A mezzanine floor was put in at the rear for the office and the stove department.

All in all, the rearrangement practically doubled the capacity of the store so far as the displaying of goods was concerned. In this way the addition of new lines was made possible. The turnover increased very markedly and at present writing is between $90,000 and $100,000. The rental has not been increased and the profits of the business are very much larger.

This incident illustrates how a change in location, which ultimately proved a brilliant success, might easily have been a failure. The success or failure depended upon one point; making full use of the merchandising possibilities of the new stand. It was too expensive a stand for a business conducted along the lines followed in the old store.

Rents become fixed in relation to the merchandising possibilities of the location. Experience has proven, for instance, that some corners are worth $10,000 a year. But these expensive locations are worth that much only to those who are able to utilize the site to its fullest value, to make every dollar spent in rent bring back $35 in business.

Are You Paying Too Much?

As stated before, the hardwareman who finds that his rental expense is totaling more than 4 per cent. of his turnover can take it for granted that he is paying more in this department than he should. If the store he occupies is worth the rent charged, he should be able to do a large enough business there to keep the rental percentage smaller. In such cass, he is either paying too high a rent for the store or he is failing to get the most out of the location.

Exceptions are not needed to prove this rule.

Downtown stores in large cities are forced to adopt measures extraordinary in many cases to get the most out of their expensive location. Mezzanine floors are becoming a common feature as it is possible thereby to increase the floor space. Striking store fronts, electric signs, novel advertising stunts are adopted. The problem facing the downtown retailer is to keep his stock turning over rapidly on a small margin so that the total turnover will be large enough to carry the heavy expense involved. And they are doing this, despite the payment of rentals which would stagger the conservative retailer. At least all who attain any degree of permanency are doing so.

Estimating the Rental.

With a great many hardwaremen the rental question is not one of much moment. At least they do not regard it as such. They own their own stores. In some cases they charge a rental against the business, but often estimate it on a nominal basis. In many cases, no rent is charged against the business whatever, taxes alone being charged.

This is an entirely erroneous basis to go upon. If a merchant expects to do business on a basis which will yield him a profit, he must reckon on all the expenses which must be met in business, including rental; if he does not include rent in his figuring he is bound to sacrifice either the profit on his goods or the profit on his property investment.

Where a merchant owns his own store, he should charge a rent against the business estimated on what he would expect if he were renting the store to an outsider. He will then make a separate profit on his investment as he should; and, if he conducts the store aggressively, will make a profit on his investment there as well.

Exhibition and Convention at Ottawa

Recent Disaster Will Not Prevent the Holding of Exhibition and Convention—Messages From Officers of the Association.

HARDWARE AND METAL has been informed by officers of the Canadian Hardware Manufacturers Exhibitors' Association, and the Ontario Retail Hardware and Stove Dealers' Association that the exhibition and convention will be held in Ottawa, Feb 16 to 21, as previously arranged.

The recent disaster in Howick pavilion resulting in the loss of three lives, injuries to several others, and the destruction of the heating plant and a section of the building, it is claimed, will not prevent the use of the main building for the exhibition.

Messages From the Presidents.

President Griffiths of the C.H.M.E.A. informed Hardware and Metal that notwithstanding the recent disaster, arrangements were being made whereby the disaster at Howick Hall will in no way interfere with the exhibition of the Canadian Hardware Exhibitors' Association and the programme will be carried out as previously arranged.

Just before going to press the following letter was received by Hardware and Metal from President Occomore of the Ontario Retail Hardware and Stove Dealers' Association:—

The following telegram was received by Hardware and Metal from L. J. Levy who is in Ottawa at present, and who for a number of years has been in charge of the exhibits of Boech Bros., brush manufacturers, at the Annual Exhibition and Convention:—

Ottawa, Jan. 21, 1914.—*Hardware and Metal, Toronto, Ont.*

Doubtful if Howick Hall can be used for hardware exhibition, building badly wrecked, also heating plant. Suggest that Ross building be secured, more centrally located, has three floors for exhibits and for general meetings.

L. J. LEVY,
9.50 P.M.

"In reply to your telegram, re Howick Hall disaster, may say that if the Exhibitors' Association feel that they can run their exhibition, you may depend upon it that the Retail Hardware Association will be right with them and carry our programme through to the finish.

As soon as I heard of the accident this a.m. I took the matter up with Secretary Wrigley and we are making our arrangements accordingly."

The officers of both associations are in Ottawa making arrangements for the exhibition and convention.

Will Not Wait on Government.

The Secretary of the Ontario Retail Hardware and Stove Dealers' Association has informed Hardware and Metal, that it has been decided not to have a deputation wait on the Government, on account of the subjects which were to have been discussed, having been previously presented by the Retail Merchants' Association.

TELEGRAM RECEIVED JUST BEFORE GOING TO PRESS.

"Ottawa, Ont.,
22nd January, 1914.
"Hardware and Metal,
Toronto, Ont.
"On the job new building; secured better quarters; exhibition goes on per schedule.
"F. M. TOBIN,
"Sec'y-Treas. C.H.M.E.A."

PROGRAMME FOR OTTAWA CONVENTION.

Monday, February 16.

1.30 P.M.—Special train leaves Toronto.
5.30 P.M.—Special train leaves Montreal.
9.00 P.M.—Informal reception at Chateau Laurier.

Tuesday, February 17.

9.00 A.M.—Official opening. Exhibition open to hardware men only.
10.00 A.M.—Committee meeting in Howick Hall.
12.00 P.M.—Luncheon and address in Howick Hall.
2.00 P.M.—Joint meeting of Ontario, Quebec and Exhibitors' Associations.
4.00 P.M.—Adjourn to Exhibition Hall.
5.00 P.M.—Moving pictures and lecture.
7.30 P.M.—Exhibition open to public.
8.30 P.M.—Visit to House of Commons—all galleries reserved.
10.30 P.M.—Collation at Chateau Laurier.

Wednesday, February 18.

9.00 A.M.—Hardware Exhibition open to hardwaremen only.
12.00 P.M.—Luncheon and address at Howick Hall.
2.00 P.M.—Retail Convention in Howick Hall.
3.30 P.M.—Adjourn to Hardware Exhibition.
5.00 P.M.—Moving pictures and lecture.
7.30 P.M.—Exhibition open to public.
8.00 P.M.—Theatre party for ladies.
8.00 P.M.—Retailers meet in banquet hall, Chateau Laurier.
8.00 P.M.—Exhibitors meet in room, Chateau Laurier.
10.30 P.M.—Moving picture show, Chateau Laurier.

Thursday, February 19.

9.00 to 10.00 A.M.—Retail Convention at Howick Hall.
10.00.—Hardware Exhibition open to Hardwaermen only.
12.00 P.M.—Luncheon and address at Howick Hall.
5.00 P.M.—Moving pictures and lecture.
7.30 P.M.—Exhibition open to public.
8.00 P.M.—Theatre party as guests of Exhibitors.

Friday, February 20.

9.00 to 10.00 A.M.—Retail Convention at Howick Hall.
10.00 A.M.—Hardware Exhibition open to Hardwaremen.
12.00 P.M.—Luncheon and address at Howick Hall.
2.00 P.M.—Joint meeting of Ontario, Quebec and Exhibitors' Associations.
8.00 P.M.—To be announced later.

Saturday, February 21.

8.00 A.M.—Special trains to Toronto and Montreal.

HARDWARE AND METAL

VOL. XXVI. No. 4 Toronto, Canada, January 24, 1914 Two Dollars per Year

The Problem of Rents

THE LEADING article in this issue deals with a problem of widest importance: the rent question. Rents have been going up rapidly of late years. Turnovers also have been on the increase. Has the turnover increased sufficiently to keep the advanced rent on the same percentage? If not, the result is a smaller profit.

The question which each merchant must decide when he decides to move to another location is whether the change will increase his turnover sufficiently to keep the rent down to a percentage which will allow profits without increasing the margin put on the goods. If the move is to a downtown store, it may be necessary to count on a smaller margin and a quicker turnover and withal to increase the total sufficiently to cover the advance in expenses.

The same problem faces the merchant who is permanently located. He must keep his turnover up to the maximum that the location allows. To do this he must make use of every square inch of the space at his disposal to the best possible advantage.

A point which the merchant who owns his store should never overlook is the necessity of changing a rental against the business. And, what is more, this rental should be based on the value of the store if rented to an outsider. In the capacity of property owner the merchant should be just as strict on himself as he would on a tenant.

The Business Situation

DURING the past week a considerable improvement has been noted in all lines pertaining to the hardware trade.

In the metal markets a much better feeling has developed, and during the week a number of price changes have taken place, nearly all in an upward direction. The metal market is exhibiting a much firmer tone than has existed for some time past. Manufacturers of iron and steel products report an improvement in the number of orders coming in. Stove manufacturers report an improvement in business since the advent of colder weather and the demand for other lines is holding up well. Paint manufacturers are quite optimistic regarding the outlook for spring business. Hardware jobbers state that business is fair for this season of the year. Booking for spring delivery is heavy, indicating that retailers are showing confidence in the future. It is expected that with the completion of stocktaking (which in many places is still under way), there will be more activity in purchasing. Stocks generally are low and with the opening of spring business there should be considerable heavy buying on the part of the retail trade. Reports from the West indicate a better feeling, and the concensus of opinion is that with the advent of spring there will be a general all-round improvement in business, and that business transactions will be conducted on a sound basis.

A number of very large undertakings will be commenced early in the spring, and the optimism expressed by those in charge of the undertakings is having a good effect in all classes of trade. As far as the hardware trade is concerned, the business outlook is very satisfactory at the present time.

Sales Records for the Clerks

A BRANTFORD merchant has instituted a system whereby clerks are furnished in advance with a record of the sales made by them one year before, and an intimation that they are expected to equal or surpass these during the coming week. Associated with such a system is naturally one by which a clerk is kept informed of the relation in sales of his work by the month and by the year, with a comparative statement for the corresponding month or twelve months preceding. From the point of view of employer and clerk alike the method is an admirable one in furnishing a definite incentive to strain towards a goal that is the natural indication of progress, increased sales. Competition is a life-giver in business, and self-competition in the case of all whom ambition moves, is a potent stimulant. But from the standpoint of justice to the clerk financially, knowledge of his sales record is no less advisable. In a large store where individuals are more or less merged in numbers, this is often the controlling factor in granting increases where personal observation and a close study of each is out of the question. Where, however, the manager of a department receives no such returns or treats them, coming in monthly or weekly, as of no moment, this equitable mode of judging claims to higher salaries is nullified and a superficial impression or personal favor may become the arbiter. Nor does the clerk in urging his own merits, hold evidence of his growing skill and value to the store that of right belongs to him. When he asks for an increase and proof is demanded, what chance has he to vindicate himself?

The Exceptional Salesman

SALESMANSHIP has become one of the most potent forces of the age. Business to-day is focussed on the selling end more strongly than on any other branch of industry. To market his product: that is the problem that the manufacturer is bending his energies upon. The best product that the ingenuity of man could conceive and engineering skill produce would be offered on an unresponsive market if the selling campaign were not aggressively handled.

Salesmanship has become the dominant factor in the retail store. Perhaps it would be better to define this phase of merchandising in a more general and compresensive way by making use of the word "service." After all, salesmanship is service just as surely as service is salesmanship in the broadest sense. It is incumbent on the merchant who would succeed to offer the public the best possible service—the best stock, the fairest prices, the most attractive store, the most courteous of attention, the most compelling advertising. All these points are summed up under the word service and are, as a result, salesmanship in the fullest sense.

The efficient man will, therefore, be an Exceptional Salesman. To be exceptional he must possess more than the mere ability to make the sale of a specific article. He must be capable of establishing friendly relations with the customer. He must interest customers in goods other than what is asked for. In addition, he must understand the goods thoroughly and be in a position to explain how to use them; he must understand the value of proper arrangement and display; he must appreciate the importance of prompt delivery and courteous attention to complaints. In brief, he must understand service in its every phase and be prepared to follow out the idea of service in every particular.

Are YOU an Exceptional Salesman?

Try a Double Inventory

THE INVESTIGATION that is being conducted by Hardware and Metal along the line of methods for gaining control of the rapid growth in selling costs indicate a general agreement among leading merchants that a better knowledge of actual costs and profits is becoming more and more essential to future security and reasonable success. A haphazard system, or an utter lack of system that trusted to an almost blind instinct for keeping above water, was all very well in its way when profits were on a much higher level than they have been for the last two or three years. Where the turnover has been piling up beyond the proportionate increase of the local population the race against rising costs fared on, with the victory resting upon the merchant. Where the population rested as it was, or the resources for pulling outside trade were temporarily at least exhausted, the pinch of the close approaching elements, cost and selling price, began to be felt and many an anxious hour struck for the puzzled proprietor. But whatever the advice that is to be proffered by men who are solving this problem, the very condition necessary for applying the remedy will be lacking without definite information on the part of everyone that would lead him to set his finger upon the weakness in his own operations. A merchant in a Canadian city of under 20,000 population told Hardware and Metal this year that in order to learn exactly what was the profit in each department and the percentage relation between the buying and selling price, he was taking a double inventory, recording on his sheets both the cost and the selling price. Adding up the goods in each department this enabled him to see at a glance the percentage of profit in each, and he was thus in a position to strengthen the weak spots in his mercantile armor. This double system is employed in many institutions even where the information is available through other sources of bookkeeping, but in stores where the latter is absent, it would appear to be a vital necessity. Learn where you are at and thus equipped you can intelligently seek for and apply the remedy.

Editorial Briefs

Meet you at Ottawa.

* * *

Make yourself an Exceptional Salesman.

* * *

Business continues to improve slowly, but surely.

* * *

When in doubt, proceed cautiously. But proceed — don't hang back and let the doubt spoil action.

* * *

If you are paying more than 4 per cent. on turnover for rent, you are either paying too much or your turnover is smaller than the importance of your location warrants.

* * *

In these days of keen competition the hardwareman finds it necessary to watch the market closely and take advantage of any good opportunities which present themselves.

* * *

Salesmen are not hard to find, but how often does one run across the Exceptional Salesman, the dynamic, 100 per cent. efficient man? And yet to be successful in the fullest sense of the word, a salesman must be exceptional.

No hardwareman should miss the Ottawa Exhibition and Convention.

* * *

The Hardware Specials to Ottawa will carry the live wires of the trade. Are you going to be along?

* * *

Follow up stock-taking with a thorough clearing sale. This will make it possible to start the spring season with a clean stock.

* * *

In view of the fact that a large number of price changes are taking place, the retailers should keep closely in touch with market conditions and endeavor to protect themselves by ordering or booking at the most favorable opportunity.

* * *

The adage "When in doubt, don't do it," should be stricken from the records of wise sayings. It teaches the treason of inactivity, it instills the poison of let-well-enough-alone. It is better to do things even if we go wrong sometimes than to do nothing for fear of going wrong.

Using Cement During Winter Months

Cement Can be Used During Winter Months—Striking Example of the Fire-Resisting Qualities of Concrete—Preventive Methods for Winter Uses.

"CAN cement be used during the winter months?" This is a question which is often asked of the retail hardware merchant.

The answer can safely be in the affirmative, providing the user of the cement takes certain precautions which will be dealt with later on in this article.

Cement should be an all-year-round seller with the hardware merchant. It is, in many places, where the merchants have educated the public regarding the proper methods of using cement.

It is well known that concrete, which is made of cement, sand, stone, etc., is rapidly replacing many of the old-time materials for building purposes. It has many advantages in its favor.

Concrete enters largely in to the construction of many of our largest buildings and other constructive undertakings.

The large builder, contractor and those steadily engaged in the building trade realize the value of cement, but there still remains a great deal of missionary work for the hardware dealer to do, among the farmers.

One point in particular which should always be pointed out and kept before the farmer, is the protection he is afforded by having buildings, silos, etc., constructed of concrete.

Striking example of the fire-resisting qualities of concrete.

A Striking Example.

When a large city is without an adequate water supply for only a few days the danger from fire is brought home very forcibly. Conditions are considered intolerable, and they should be, for there is small consolation in watching a fire burn itself out.

In rural districts this danger is always present and the only relief lies in constructing buildings of fire-resisting materials. The accompanying illustration of the silo and barn foundations of the Boys' Farm and Training School at Shawbridge, Que., strikingly shows the advantage in concrete construction. The silo has now gone through three fires without any injury that prevents its being used for the purpose for which it was intended. The first fire occurred before the silo was entirely finished. The heat was so intense that the walls became red-hot and were visible for miles. When the walls cooled the silo was completed and was filled at once with that year's crop.

The photo shown was taken after the second fire, which took place in 1912. On the long side of the foundation walls can be seen the entrance to a root cellar. The root cellar is of concrete and is located under the stable floor. It was filled with roots when the fire occurred and they were taken out in good condition after it was over.

In 1913 the wooden portion of the barn, which had been rebuilt on the concrete walls shown in the picture, again caught fire and was once more entirely consumed. Although the silo is practically in contact with the barn it went through its third fire without damage and is once more filled with silage. The foundation walls are carrying the new barn which has been erected.

This example is one that can be used successfully in getting the farmer interested in the use of cement for building purposes.

There are no doubt many farmers in your locality who are considering the erection of silos, foundations, etc., but who are holding back until the arrival of spring weather. Would it not be a good plan to try and get them interested now?

Even though they do not go ahead with the work at once, they will in all probability be customers for cement in the spring.

In answer to the query as to whether cement can be used during the winter the following information from a paper read recently before Boston Society of Engineers, Leonard C. Wason, president of the Aborthan Construction Co., Boston, Mass., stated that the aggregate must be free from frost when mixed. "A live steam pipe can be shoved into the sand pile, the escaping steam heating it and removing all frost. The same may be done with the stone, but a canvas should be thrown over the top of the pile to retain the heat, which more readily escapes. Where a considerable amount of heating is provided for in advance, steam pipes are laid on the ground, and stone as received is dumped upon them. Then there is a canvas thrown over to prevent storms getting into the pile, and to retain heat. The frost is thus easily and economically removed.

"Salt is frequently used in the water to lower its freezing point, and it is seldom worth while to heat the water itself. Little care need be used to prevent mass concrete from freezing, as the frost will usually only strike to a depth of about one inch. Buildings are enclosed with tarpaulin tied onto an outside staging, and the enclosed space is heated with salamanders burning coke. Sometimes it is possible to use steam.

"Frost is removed from work done by the use of salt and steam, and if the concrete surface is left rough it is common to sprinkle the top surface with salt to prevent freezing. In winter it is very common to put the finish on as a separate operation, after the building is enclosed, and not as an integral part of the construction, on account of the danger of freezing. After it is put on, it must be kept from freezing for the first forty-eight hours.

"The expense of protection against the weather is not very great, and good results can be so surely guaranteed that it is not usual for the writer ever to discontinue work on account of cold weather.

"Occasionally, however, it is necessary to make some provision for the protection of the men. Shelters or windshields are built in front of the benches

(Continued on Page 47.)

Bennett's Big Idea--Retail Specialization

How Conditions in a Small Town Where the People Had Mail-Orderitis in an Acute Form Were Improved by the Merchants Getting Together to Prevent Overlapping and Unnecessary Competition.

THIS is the story of how a number of merchants in a small town—a very small town—managed to reduce the mail order trading in their locality.

When H. P. Bennett bought out the hardware business of Sales & Sons in the town of B———, there were four other stores doing a more or less general trade. Harding, the grocer, handled quite an assortment of hardware and nibbled at the clothing trade a little. Sanderson, the dry goods man, had groceries, hardware and drugs in stock as well. The stock that Bennett took over included an assortment of canned goods, candies, general staple groceries and a heterogeneous collection of dry goods, as well as the hardware stock. He even discovered a few odd lines of boots at the back of the store.

In other words, the stores of B——— were general stores in the first stages of specialization. It followed that the trade was pretty well split up and buying was done in small quantities. Bennett realized that he was not getting a very good price on the orders he placed; but he was confident that the other merchants in town were not buying any closer. The smallness of their orders precluded all possibility of this. He would not have had any cause for complaint, therefore, if it had not been for the fact that the mail order houses were selling almost as much in the district as all the retail stores combined.

He discovered this alarming fact as soon as he took over the new stores. It was not necessary for him to see the large consignments of express matter which came in every day to realize this. He heard the matter discussed on every hand. People very frankly talked about what they were buying by mail, and compared the catalogue prices with the figures of the local merchants. Bennett had customers say to him: "We buy most of our stuff from Toronto. Get the prices right that way. But we'll give you the rest of our business."

Sometimes the "rest" was very small, as Bennett learned to his sorrow. He realized that the mail order houses were given the nut while about all that was left for him was the shell. The secret of success in the retail business in B———, judging from the experiences of the other merchants, was to work hard, live economically and watch every cent. By doing this, they were able to pay their bills and eke out a living.

But Bennett was not satisfied with this kind of success. He had put twenty-two hundred dollars into the business in hard cash. At the outset he had figured that in time he could double the turnover and win an ample competency from the business. The dispiriting lessons of his first three months in business did not entirely demolish these ideas; although they came through the ordeal badly battered.

Bennett first tried to "beat the game" by handling his goods along more progressive lines. He cleaned up the store, rearranged the goods, painted the place inside and out. Occasionally he would run down to the store of an evening and put in a fresh window trim. On several occasions he put half page ads in the weekly paper, something his predecessors had never done.

The result of all this was felt in an improvement in trade. A few people who had bought necessities and filled rush needs at the stores of competitors, came to him instead. He got quite a number of new names on his books. But the prices he was forced to quote in order to bring his prices close enough to catalogue quotations allowed the merest shadow of a margin of profit. The turnover increased more or less rapidly, but the growth of the profits was sluggish to say the least.

The only way to get over the difficulty came to him one day when a grocery traveler was in getting his regular order. He had been specifying a few items, a dozen cans here, a few pounds of this and a gross of that. When he got through, the size of the order, he knew, would be ridiculously small.

"Look here, Mr. Bennett," said Cavers, the traveler. "I can't give you much of a price when the quantities are so small. Why not plunge, for once? If you will double up your order, I can quote you a lower price, and you shouldn't have trouble in selling the goods out."

"No, thanks," said Bennett, curtly. "I'm finding difficulty in selling what I buy now. There are too many of us in the business in this place, that is, too many when you count in the mail order houses. I don't see why these whole-hog corporations don't open stores here and take all of the business instead of just ninety per cent."

"Things must be bad here," said the traveler, regretfully, as he put away his order pad. "I've tried to get every dealer in town on this bigger quantity argument but couldn't budge one of them."

"They all buy in small quantity, don't they?" asked Bennett. It was a superfluous question, really. He knew they did.

"Small! I should say so: I'm not kidding, Mr. Bennett, when I tell you that I don't make my expenses in this town."

And then the idea came to Bennett. It swept over him all of a sudden and he was amazed that it had never occurred to him before.

"Cavers," he said, "cancel that order."

"What!" exclaimed the startled traveler. "Look here, Mr. Bennett, you're joking, aren't you? If I leave this place with my orders any smaller than they have been, why, it will be a case of a fond adieu to this job of mine. It ain't much of a job but it's the only one I got."

"I am going to fix things so that you can triple your business in this town, my boy," said Bennett, reassuringly, "and do it in half the time. But, in the meantime you'll have to take your medicine. Just tear that page out of your order book, please."

And he stuck to his guns, despite the strenuous objections of Cavers, who put up the argument that a small order in the hand is worth bright promises in the bush. He finally had to escort the downcast traveling man to the door and politely but forcibly hand him over the curb.

Late that afternoon, Bennett hurried over to Harding, the grocer. He found the latter in his office getting out his monthly accounts. He was fairly buried in envelopes.

"There's hardly a man in B——— that would dare to look me in the eyes," grumbled Harding, "if they had any decency about them. I was just reckoning up that 90 per cent. of the families owe me money, and at least 89 per cent. are sending ready cash off to the mail order houses each week."

"I'm going out of the grocery business, Harding," announced Bennett. "Will you take over the stock I have on hand?"

"Oh, I don't know," said Harding. "I'm loaded up to the eyes as it is."

"Well, if you don't," said Bennett, decisively, "I'll dump the stuff on the public at any old price. I'm going out

of groceries. Hardware, the whole of hardware and nothing but hardware from now on for me."

"Hold on now. Don't get excited," said Harding. "I'll buy your stock if we can reach an agreement on the price."

"Before we talk price," suggested Bennett, "why not arrange to sell me all the hardware you've got?"

"What's the scheme anyway?" demanded Harding, suspiciously. "I've handled hardware for years, ever since I've been in business, in fact. I don't intend to cut down my profits this way. It's hard enough to stay in business as it is without cutting down on our chances for trade."

"It's because we haven't been specializing more that we've found it hard to stay in business," asserted Bennett.

He got out a pencil and taking the back of an envelope started to figure.

"If you add the orders I've been putting in for groceries on to your own orders, you would get a much finer price. If I go out of groceries, you'll be able to do that. If we can get the rest of the stores in town to stick to their own lines and leave groceries to the grocer, you will get all the business and be able to order in double the quantities. Do you realize what that will mean? Closer prices, better profits, a better chance to meet mail order prices, better days ahead, no more grubbing. Why, man, it would mean emancipation from the slavery you've been laboring under for the last ten years."

Henry Harding was a slow-thinking man, but when an idea once worked its way into his cranium he had it for keeps. When he had mastered Bennett's suggestion, he nearly tumbled off his stool in his eagerness.

"By Heck, you're right, Bennett," he declared, staring fascinated at the figures that the latter was working on the back of the envelope.

"It would work out the same in hardware," went on Bennett. "If you and the rest of them would quit buying hardware, I would double my turnover in straight hardware, and get the advantage of closer prices. If the both of us would throw dry goods out, Sanderson would have a chance to fight the mail order houses and make a profit as well. See the idea?"

"I do," said Harding. "And I'm for it. Why haven't we got together on this thing before?"

"Why didn't somebody discover evolution until that apple planked old Newton on the head?" asked Bennett. "Well, now we've got to get after the rest of them on this, Harding. Let's get right down to work."

It was found to be harder work convincing the other merchants of the value of specialization. Finally, however, Bennett prevailed. There was a general exchange of goods and inside of six months B——— no longer had general stores. An era of trade specialization had begun.

And the results? Condition improved immediately and noticeably. There has been a continuous improvement since.

It has not been found possible to eliminate the mail order habit. The people of B——— still send their ready money to the big cities and run bills with the obliging local merchant; but the practice is on the wane. A better condition all around is developing.

OBJECT TO TWO CARTAGE CHARGES.

The cartage question among others was discussed at a recent meeting of the Retail Merchants' Association of Orillia, Ont, The merchants felt that it is unfair that they should be called upon to pay cartage in the city as well as at this end. They instructed the Secretary to write the Central Association, asking that the movement be strongly opposed before the Railway Commission, and that, if necessary, legislation preventing the collection of cartage with the freight be asked for.

The Government will also be asked to place a tax on all mail order houses doing business outside their own city. The merchants think it unfair that they should have to compete with houses which pay no taxes to the communities from which they draw their trade.

Geo. H. Saywell, of Geo. H. Saywell & Co., Winnipeg, Man., has just returned from a business trip to England and the United States. Mr. Saywell is quite optimistic regarding the outlook for future business in the West.

Splendid Display of Tools by the Mills Hardware Co., Hamilton, in Their Barton Street Store.

Auto Accessories as a Hardware Line.

Department Store Features Auto Supplies—Hardware Merchants Taking up the Line and Find it Profitable.

The wonderful growth in the auto industry, and the large annual increase in the number of auto owners has opened a large field for the sale of auto accessories and supplies. The demand for these lines is constantly increasing, and hardware dealers who have added auto accessory departments to their business, have in many cases found them among the most profitable departments in the store. The patronage of the auto owner is very desirable.

DURING the past week one of Toronto's largest departmental stores arranged a window display of auto accessories.

This firm has show windows facing on four streets, one street in particular is used to a large extent by autoists, and the firm had the foresight to use a window on the street where it would in all probability be noticed by the largest number of auto owners or drivers.

In looking over the display, a person acquainted with hardware goods, is impressed by the large number of tools classed at auto accessories, which in reality form part of the stock in the average hardware store.

Added to these lines were spark plugs, grease guns, horns, lamps, oils, polishes, tools in kits and other lines which work in splendidly with goods carried in the hardware store.

Enquiries among auto owners and dealers elicit the information that auto parts and accessories are becoming standardized and that it is now possible to purchase many lines of accessories which are suitable for a large number of various makes of autos.

This standardization of parts is helping to overcome the prejudice which was exhibited by some hardware merchants when they were asked to stock auto accessories.

The chief objection for some time appeared to be the necessity of having to carry a too varied assortment of parts.

There are, however, a large number of hardware merchants who have been keeping closely in touch with this class of business. Auto accessories are now being stocked by many hardware merchants in various parts of Canada, and the number is rapidly increasing.

Agencies for automobiles have also been taken up by hardware merchants.

The line is a profitable one to handle, and where a merchant can work up a nice trade in this line he gets a very desirable class of trade.

Auto owners are also purchasers of many other lines of goods and if you can draw them to your store through the medium of your auto accessory department, you will also secure their patronage for other lines.

In the majority of cases the auto owner will deal with the hardware merchant in preference to the garage owner, especially when the latter have been in the habit of charging exorbitant prices for accessories, which was often the case before the hardware trade began to specialize in needs for the autoist.

Firms Selling Auto Supplies.

The George Taylor Hardware Co. of Cochrane, Cobalt and New Liskeard, have gone into the auto accessory line extensively and are making a splendid success in this department of their business.

The firm also sell automobiles and their trade in the two lines has grown to such an extent that it is their intention, within the next four weeks to commence the erection of a garage in a central location in Cobalt, to work in conjunction with the automobile end of their business.

The Taylor firm believe the show windows to be one of the best mediums for displaying goods at their command and they have shown some very creditable displays devoted entirely to auto accessories.

L. F. Heartwell, of Rosetown, Sask., although located in a small town, sells automobiles and auto accessories, and has done a good volume of business in these lines.

There are many other hardware firms making a success of the sale of auto accessories and in many cases automobiles as well.

The trade of the autoist is very desirable, and the cost of putting in a small stock of auto accessories is not very large. The stock can be added to from time to time as the needs of the autoists become known to the dealer.

The large annual increase in the number of auto owners in Canada is opening an exceedingly large field for the sale of auto accessories, and the department stores have not been slow to recognize this fact.

USING CEMENT DURING WINTER MONTHS.

(Continued from page 44.)

where carpenters are making up forms, as well as around the men at the concrete mixer, whose work does not necessarily keep them warm. Where excavation is going on in the open, it is expedient to have a building with a good fire where the men can warm themselves when necessary; and on a few jobs it has proved to be wise to furnish hot coffee free in these shelters."

A CORRECTION.

In Jan. 10th issue of Hardware and Metal an item appeared stating that W. S. Smith of the Smith Hardware Co., Belleville, Ont., had been elected as alderman. W. S. Smith is not connected with the Smith Hardware Co., but is engaged in another line of business.

Fred B. Smith of the Smith Hardware Co. was nominated for alderman, but did not run.

Fighting Mail Order Houses at Their Own Prices

What Has Been and is Being Accomplished by a Western Ontario General Merchant in This Regard — How the Wants of His Farmer Customers Are Looked After — The Importance of Personal Service and of Knowing Thoroughly Characteristics of Every Customer.

SIXTY years ago in the spring, the general store business now operated in Lambeth, Ont., by James A. Kelley, was established. Lambeth is a little hamlet nestling in the centre of a fine farming district a few miles from London. Here, back in 1854, Mr. Kelley's father founded a small store which, under his and his son's direction, has prospered throughout the intervening years.

The general reason for this prosperity is the fact that the Kelleys have been able to keep the farmer's trade at home. Had their business methods been of such a character that farmers found it more convenient to go to London or send to distant mail order houses for their goods, there might have been a different story to tell. But more about that presently.

Jas. A. Kelley has been a general merchant ever since he was big enough to look over the top of the counter. For 33 years the present store has been occupied, the first having long since been razed to the ground. For the past 12 years the present proprietor has been at the helm.

Raises Standard of Goods.

Shortly after Mr. Kelley assumed control of the business 12 years ago, he decided on an important policy which he claims has been one of the chief factors in carrying him through all competition, outside or otherwise—he decided on raising the standard of the goods to his customers.

JAS. A. KELLEY, Lambeth, Ont.

This was not accomplished all in a day. Step by step, gradually but surely, his trade was taught to appreciate high quality goods in every line.

"For instance," remarked Mr. Kelley to the writer, "when a customer asks me for a pair of boots, I always show the higher priced ones first. In most cases I sell them. If they are too high, then I show cheaper lines and even at that it is, in a majority of cases, easy by contrast to sell the better boots.

"Besides making some 80 cents margin on the superior goods as compared with about 40 on the others, we give better satisfaction and have more pleased customers."

This method of Mr. Kelley's has done much to keep the trade of his neighborhood at home. His customers have learned that they cannot do any better than adopt his suggestions in the matter of quality comparisons, and as he is careful not to charge prices higher than distant mail order houses or London merchants, the difficulties in the way of holding the money at home are not so great.

Studies Mail Order Catalogues.

"The mail order houses? Oh they do not give me any bother," said Mr. Kelley in answer to a question. "There are a few catalogues coming into the district and I get one of them myself. This I study carefully to find out just where are the catch prices. In wall-paper, for instance, I long ago discovered that the catalogue houses sold the wall-paper itself rather low, but they made up on the border what was lost on the paper. I adopted the same policy and my customers know that wall-paper is just as cheap and as good here as any place else."

Has Department Store Himself.

In the opinion of this general merchant, many dealers lose trade by not having the goods the farmer wants and not making any effort to get them.

"I always get a farmer what he asks for if it is not in stock," he declared. "It makes no difference what it is (from a needle up to a piano) I get it for him."

This is surely one of the chief obstacles preventing the mail order houses from getting a footing in country districts. When a man asks for a certain article he usually wants it and is going to get it somewhere. It is up to the merchant to make his best endeavor to supply it.

A trip through Mr. Kelley's general store reveals a wide range of goods.

THE TRIUMPH OF PERSONAL SERVICE.

This article runs along the line of "Keeping the Home Trade at Home." It illustrates the methods of a progressive country general merchant who has to deal principally with farmers. But what is of more importance, it shows that the man who succeeds in holding the trade of his community against the mail order and nearby city trade currents, must give a service which has no competition. Where there exists a live, aggressive dealer—one who gives thought to the problem of modern service — there is little chance for the mail order houses to get a footing in his community. The flesh and blood power of proper personal service always triumphs.

PERSONALITY IN THE CALENDAR.

The 1914 calendar issued by Mr. Kelley this season is one in which is contained his own personality. As referred to in the accompanying article he is this year celebrating the completion of 60 years in business of his father and himself. Symbolical of the past and present, the illustration of the calendar shows a hesitating maid attempting to choose between two appealing swains, one with the horse and buggy and the other with the modern automobile. The subject of the sketch is "The Old and the New." Below is reproduced a cut of the Kelley store as it appears to-day, and the wording: "1854—1914; Compliments of the season on the occasion of the 60th Anniversary of our Business."

There are dry goods of many kinds, hardware, boots and shoes, harness, whips, wallpaper, robes, paints, garden tools, screen doors and all kinds of other hardware. A vacuum cleaner was also observed in stock. But if the farmer does not find what he wants among such a veried list, Mr. Kelley takes his order on the spot and gets it. He finds he can in the majority of cases sell such goods cheaper than the larger stores in any of the surrounding towns. In other cases prices are usually the same.

Rural Phones a Help.

The rural phone has been quite an acquisition to business in the vicinity of Lambeth. Some 300 rural phones are distributed throughout the district and the owners of probably half of these are customers of the Kelley store. "Often after the husband leaves for the village," explained Mr. Kelley, "his wife thinks of something she has forgotten to order. If she has the phone she uses it. Sometimes, too, when certain goods come in which I think will be appreciated by certain customers, I call them up on the phone and suggest that they be sent along with Mr. So-and-so who happens to be in the village."

Asked if he thought Parcel Post would be a help to a merchant situated as he is, he replied that it would depend considerably on the rate. If the rate for the first 20-mile zone were low enough, small goods might frequently be sent. In country districts, of course, such goods as sugar and flour are bought generally by the sack.

Little Lost in Bad Debts.

The fact that Mr. Kelley finds very few, if any, losses, during the year from bad debts, emphasises the advisability of the merchant knowing personally the character, likes and dislikes of each individual credit customer. During the past twelve years particularly, he has educated many of his customers to either paying cash or to pay accounts more promptly. Twelve years ago when he assumed the proprietorship, due bills circulated freely in Lambeth. Whenever farmers brought in some produce, the merchants gave them due-bills for any balance there happened to be. The result, in Mr. Kelley's experience, was that so many of these were in circulation that they became somewhat of a nuisance. Farmers didn't have the money to pay the blacksmith or the barber. There was no "ready" money on tap.

On taking over the business, Jas. A. Kelley immediately discontinued the due-bill system. If there was a balance due a farmer, he paid him cash. The blacksmith and the barber then often secured cash and in turn they paid more cash for their goods. But the greatest benefit to Mr. Kelley in this move was the fact that it increased his trade. The news quickly spread around that he was paying cash for all produce that wasn't taken out in trade.

"Trade began to pick up," he stated to the writer, "and in three months' time I had a good many new customers many of whom are with me yet."

This policy together with the tendencies towards more mixed farming, have helped payments in the Lambeth district. It taught many of the farmers promptness and although there are cases where some settle up but once a year yet the percentage of cash and short-term credit has greatly increased.

Mr. Kelley, as aforementioned, knows his customers, having lived among them close to half a century. That probably explains why he loses so little in bad accounts. He has no difficulty in getting his money in. For some accounts he has to wait a year. When October comes around he sends out the account in full not itemized. If a customer would like to see the items he has them in a loose-leaf book and just as soon as the account is paid, he tears out the leaf and gives it to him. If any are a little tardy about paying accounts, he suggests to them that he "would like a little money," etc., etc., and has no trouble in getting it.

To only one farmer does he refrain from sending out an invoice. "I did it once," he said, "and he was insulted. I know he is good so I wait and I get my money once a year and lose nothing."

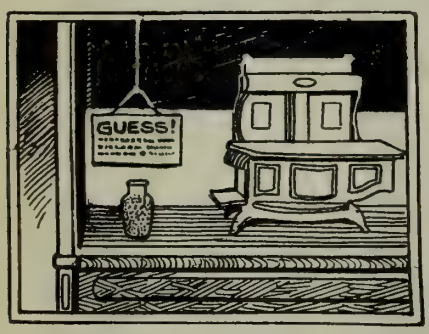
Saves Much In Discounts.

A strict policy is pursued in buying. Cash is paid for everything and all discounts are taken. "While I could not say definitely I think I save probably $500 a year by taking all discounts." In twelve years that would amount to a tidy sum.

While this store has considerable warehouse room, Mr. Kelley feels that there should be more display space. Wall-papers, boots and shoes and other goods now have to be kept upstairs. In the spring he intends expanding. The front of the store will be remodelled to make way for more windows. So this year will be Expansion Year as well as the 60th anniversary of the founding of the business.

Stock is turned over in the Kelley store an average of three times a year. Expenses are about 12 per cent. of turnover.

The store of Jas. A. Kelley, Lambeth, Ont., typical of many of the general stores throughout old Ontario. It will be remodelled in the spring to permit of greater display space in the front. The business has been conducted for 60 years by Mr. Kelley and his father before him.



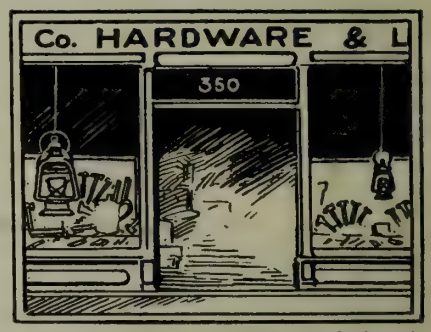
What Other Hardwaremen Do

HARDWARE FIRM HOLDS STORE CONFERENCE

That store conferences pay has been demonstrated to the satisfaction of one Western Canada hardware merchant, who has conducted them for some time. These conferences are held every two weeks and the employees are gathered together to discuss problems of interest to all associated with the firm. Among the subjects which have been discussed are: Arrangement of stock, methods of advertising and results obtained, the value of window displays, best methods to create new business, manners in which to approach customers, etc. Another subject which has been taken up and which is much appreciated by the clerks, especially junior clerks, is lists and discounts, and short methods of figuring discounts. In a great many stores there are clerks who have never had a chance of learning much about the standard lists issued by Canadian manufacturers. In selling nails they are often given only net prices by the dealer, and they know very little about the base price of nails, and the regular advances over base. The Western merchant claims, and rightly so, that this information should be in the possession of clerks in order to help them in becoming efficient hardwaremen

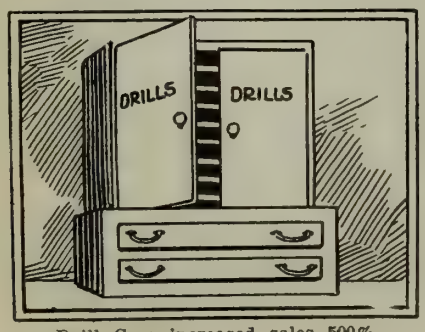
Store conferences held in store of Western Canada merchant.

Hardware firm in Battleford conducting guessing contest.



CONDUCTING GUESSING CONTEST.

The Battleford Hardware Co., Battleford, Sask., are conducting a guessing contest, the prize in which is a $65.00 kitchen range, which is on display in the store windows. A jar of beans is also displayed and each customer making a cash purchase of one dollar is entitled to a guess as to the number of beans contained in the jar. Customers are allowed one guess for each dollar's worth of goods purchased. At the close of the contest, the person guessing nearest to the number of beans contained in the jar will be awarded the stove. Guessing contests of this nature have been quite frequent in Canada during the past year. Some of the contests have been conducted along such lines as guessing the length of a string, quantity of water contained in a large sealed can, length of time a clock would run, weight of a pail of shot, number of beans contained in the globe of a coffee percolator, etc. In some instances considerable interest has been manifested by the public in these contests.



UNIQUE METHOD TO ATTRACT ATTENTION.

Novel methods are often necessary to attract attention. A Western dealer recently tried out a scheme that proved effective in attracting attention. Both show windows were used to feature an assortment of goods that were placed on sale, all at one price. Both windows were filled with goods and all articles were marked down to the same price. In one window he hung a lighted lantern, equipped with a ruby globe and a show card bearing the following: "You do not need much light to see the big values in this window."

In the other window he hung a "Little Bobs" lantern which, as all hardwaremen are aware, is very small. With the small lantern, which was also lighted, he had a show card bearing the following: "You can see big bargains in this window by the light of a very small lantern." Price cards giving the price at which the goods were on sale, were also distributed freely throughout the window. The innovation attracted a great deal of attention, and many sales were made from the displays.

Lanterns used by hardware dealer to attract attention.

Drill Case increased sales 500%.

INCREASED DRILL SALES 500 PER CENT.

May Brothers, of West Toronto, state that they have increased their drill sales about 500 per cent. by installing a drill cabinet.

In the upper drawers of the cabinet S. S. drills from No. 0 to 60 are stocked, each size in a separate compartment. In the two large drawers at the bottom of the cabinet larger sizes are kept.

May Brothers' store is located in a section of the city where a large number of mechanics are employed, many of whom use part of the noon hour to do their purchasing. It is therefore necessary that they should be waited on promptly and that no time should be lost in filling their orders. Under the old system of stocking drills, the salesman lost considerable time in hunting out the various sizes of drills asked for by the mechanics. The mechanics also lost time in waiting. These objections have been overcome by installing the drill cabinet

Problems For Sheet Metal Workers

HOW TO DEVELOP A 5-PIECE ELBOW.

Editor, Hardware and Metal.—"Will you please publish at an early date a simple method, showing how to develop a five piece (5) elbow."

Yours, etc.,

Enquirer.

As requested by enquirer, we take pleasure in showing how a 5-piece elbow may be developed. We may state that an offset can be made of different positions by leaving the joints a little loose until the desired offset has been obtained. The joints should be backed with a little solder.—Editor.

For Pattern Plate, See Page 28.

FIG. 1.—We will suppose a 10-in. elbow is to be developed. Take the compasses and make circle 10 inches in diameter; then erect a vertical line with J as centre. Then erect another line as shown, A. B. C. making the line solid from B to C. Then determine what length of throat is desired, making from A to be the length. Place compasses at A and draw a quarter circle from C to H. thus giving the outside circle of elbow. Complete profile by again placing compasses at A and B and drawing the inner portion from B to I.

We will now measure off the quarter circle into 5 sections, which should be done as follows. Take compasses and divide off outer portion of elbow into 8 sections as shown a. b. c. d. e. f. g. between C. and H. Having done this, place the straight edge and mark off as shown A G, A F, A E, and A D.

Having completed the profile we will now develop the pattern by marking off in equal portions the circle J as shown, viz.: 1, 2, 3, 4, 5, 6, 7. Then stretch out these to section line D and A.

This being done, we will turn to Fig. 2. Draw line I. I. and take the stretch out developed at J in Fig. 1 and mark off thirteen points, from these erect thirteen vertical lines as shown. Having done this, proceed by marking off the amount of material required by measuring points at inner and outer circle in Fig. 1, with the compass and transferring same on vertical lines I B, I B. Then proceed to develop the curve 5 by placing the compasses first at 7 h 6 x.5 x .4 x .3 x.2 x.1 D and transferring same to line I I on Fig. 2.

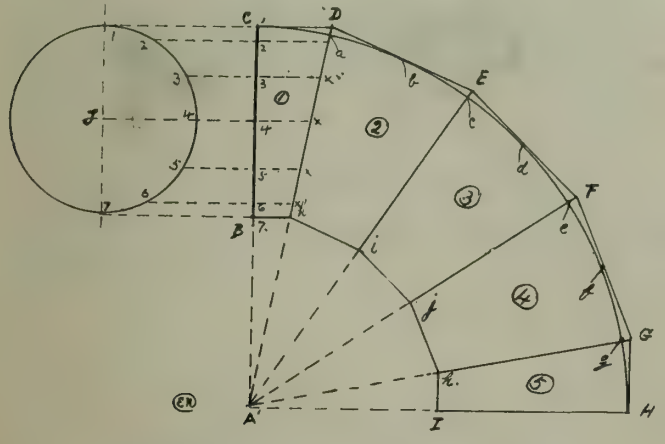
When this has been done mark off as shown and cut first piece, then by turning this section No. 5 over and allowing material for throat section, No. 4 will be complete following same rule until No. 3, 2, and 1 are cut out. It is desired to make section 1 a shade smaller to allow entering the big end of another elbow or length of pipe. All that is necessary is to cut about ⅛ inch from each edge to nothing at first joint marked h. Any length or size of elbow may be made by following this rule throughout. Not only may a five-piece elbow be developed in this way but almost any number of sections, by simply marking off a profile as shown in Fig. 1, and dividing the outer arc into the required number always taking care to make the sections at each end of the elbow exactly half the size of the other sections, but counting them as full sections. For instance, it will be seen that Fig. 1 from C to H is divided into 8 sections, viz.: a b c d e f g, then re-divided into 3 larger sections, 2, 3, 4, and 2, small sections 1 and 5. Thus by studying this method any piece elbow may be developed in the same way.

IMPORTANT REDUCTIONS IN EXPRESS RATES.

The Railway Commission, in an order issued Jan. 9, made some important reductions in express rates, to become effective February 1.

In cases where the rates per 100 pounds are 90 cents, the reductions in the present minimum charges are: 2 pound parcels, 5 cents; 3 pounds, 15 cents; 4 pounds, 20 cents; 5 pounds, 15 cents; 6 and 7 pounds, 25 cents.

Where the rate per 100 is a dollar, the reductions in the minimum are: 2 pounds, 5 cents; 4 pounds, 15 cents; 5 pounds, 10 cents; 6 and 7 pounds, 20 cents.



Where the rate is $1.25 per 100 the reductions in the minimum are: 2 pounds, 5 cents; 3 pounds, 10 cents; 4 pounds, 15 cents; 5 pounds, 10 cents; 6 and 7 pounds, 15 cents.

In cases where the rates are $1.50 per 100 the reductions are: 2 pounds, 5 cents; 3 and 4 pounds, 10 cents; 5 pounds, 5 cents; 6 and 7 pounds, 10 cents.

Where the through rate is $1.75 per 100 there is in the case of 2, 3, 4, 6, and 7 pound shipments a reduction of 5 cents in the minimum charge.

STUDY PATTERN DEVELOPING IN SPARE TIME.

Many a bright lad has been spoiled in our tinshops because of the spare time which seemed to hang on his hands. He becomes careless in a thousand and one ways, when if some little encouragement had been given him this same boy might have been a boon to the shop. There are thousands of smart fellows in and around our sheet metal and tinsmith shops who only partially learned the trade.

PROFILE OF FIVE PIECE ELBOW

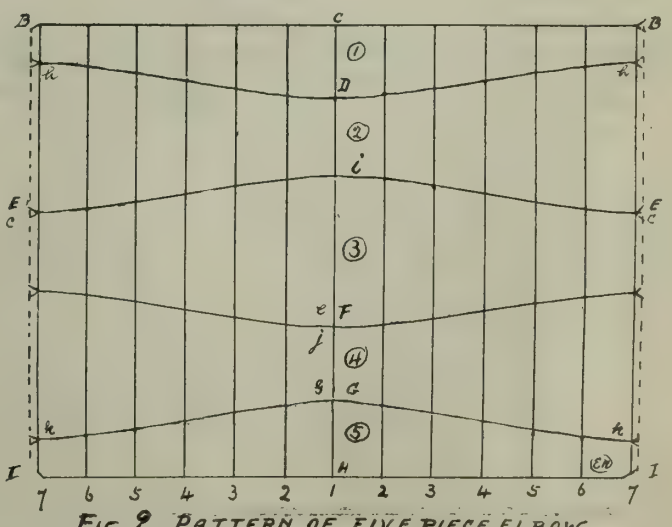


FIG 2. PATTERN OF FIVE PIECE ELBOW.

Hockey and Pleasure Skates

Skating is the most healthy of all winter sports, and should be encouraged. Old and young alike should take advantage of the opportunities afforded them for out-door pleasure during the winter months.

Our stock of hockey and pleasure skates, and hockey supplies, is complete. Special attention is given to skating or hockey club orders.

A few of the lines in stock are:—

Boys' Spring Skates	60c. pair	Hockey Pucks	15c to 35c. each
Hockey Skates	60c. to $5.00 pair	Ankle Supports	25c. pair
Figure Skates	$3.00 to $8.00 pair	Shin Guards	25c. to $2.00 pair
Snow Skates	45c. pair	Skate Straps	10c. to 30c. pair
	Hockey Sticks	20c. to 75c. each	

THE CITY HARDWARE COMPANY

Phone Main 200 **120 Main Street**

BIG VALUE IN LANTERNS

The 0000 Cold Blast Lantern will not blow out in any wind. It is indispensable to the farmer, liveryman, deliveryman, or anyone who has occasion to use a lantern. The oil fount is large, and is guaranteed not to leak. The globe is roomy, permitting the hand to be inserted with ease for cleaning purposes. The handle cannot work loose or drop off. The lantern is fitted with a globe-lifting attachment that holds the globe up for lighting or trimming. Has large wick, throws an exceedingly bright light, and holds enough oil for 000 hours continuous burning.

A Lantern with the above qualifications is indeed big value at 75 cents

Come in and let us show you

THE CITY HARDWARE CO.

Phone 200 120 Main Street

This cut shows an exterior view of the new Edmonton store of the Hudson Bay Co., where not so many years ago there was nothing but unbroken prairie soil. The building contains 130,000 square feet of floor space and represents an expenditure of some $350,000. It will be completed about the end of January.

A Great Transformation on Canada's Prairie

In Cities, Where Just a Few Years Ago Was Unbroken Land, Are to be Found Large Department Stores Taking the Place of the Old Time Trading Posts—The New Hudson Bay Co.'s Store at Edmonton Typifies the Change.

"THE old order giveth way to a new."

That is a rather trite proverb, but when applied to the history of certain of our modern industrial enterprises, it throbs with new life and meaning. Nowhere is the saying more applicable than to the way in which the big department stores in the cities of Western Canada have taken the place of the country general stores and trading posts that dotted the prairie lands where these cities now stand, just a few years ago. Special reference is made to the new Hudson Bay Co. store in Edmonton, Alta.

If our grandmothers could come back, imagine their emotions as they are whizzed breathlessly up an elevator or slid without exertion up a moving stairway.

It is a far call to those dashing cavaliers of Prince Rupert's time with their flowing lovelocks, their exquisite laces and ruffles, their thirst for adventure and daring the unknown, to that wilderness of prairie for which they set out, the Indians and little handfuls of white men, from the humming, throbbing life of the West whose industrial roar they would in this day encounter, could they come back. The trading post with its old store and palisades is now "The Bay." Why, only ten or twelve years ago might have been seen the dog teams from the distant north drawn up in front and the red-blanketed Indians clustered about the gates to which, for generations, they had looked for all the comforts and councils of the white man. Within those gates a primitive general store organization ministered to their primitive wants. It was the day of goods in bulk. Inside long counters were piled high with warm clothing and heavy footwear for rough travelling. Groceries by the wholesale order were there in stocks ready for loading on wagons or sleighs for the northern trails.

The Old Order Changeth.

To-day, in 1914, what a difference. Clanging street cars and luxurious autos carry fashionably dressed men and women by the hundreds along a well paved city thoroughfare to do their shopping. How could that store of a generation ago have served these modern city folk? With a characteristic combination of progressiveness and caution the descendants of the "Gentlemen Adventurers of Merry England" have risen to meet the occasion.

The accompanying cut shows the new Hudson's Bay Co. retail establishment at Edmonton. The fifty thousand feet of floor space which once sufficed for the business of the company, has been increased to 130,000 square feet. This gives ample accommodation to all departments of which the grocery is not the least important. The estimated cost is $350,000. This expenditure has, in the opinion of the company, secured everything required in a departmental store, while in addition to the ordinary conveniences of lunch rooms, reading rooms and rest rooms even massage, manicuring and hairdressing parlors are to be found. The work which has been carried out during the past year, includes the erection of a five storey warehouse, a considerable extension to the floor space six storeys in height and the addition of a fourth floor on the main building. These additions and a practical re-arrangement of the whole interior form a part of the program completed the past year.

Stained Glass Windows.

The finishing and fixtures throughout are of handsome oak, while a most unique and beautiful touch is furnished

(Continued on page 61.)

HARDWARE LETTER BOX

Metal Name Plates.

Sussex Motor Co., Ltd., Sussex, N.B.—"Will you kindly advise us name of any manufacturer of metal or brass name plates?"

Patterson & Heward, 319 King Street W., Toronto.—Ed.

Rolling Pins, Bread Boards, Etc.

Lyons & Marks, Toronto.—"We shall be glad if you can give us the name of firms making rolling pins, common bread boards, etc."

Stratford Manufacturing Co., Stratford, Ont.; Wm. Cane & Sons Co., Newmarket, Ont.; Millette & Bro., Lawrenceville, Que.; B. J. Hayes, Craig St., Montreal; Lyster Wood Box and Turning Co., Lyster, Que.; the Woodenware Manufacturing Co., St. Romuald, Que.—Ed.

Bevel Mirrors.

Classic Sanitary and Heating Co., Stratford, Ont.—"Kindly give us name of manufacturer of bevel mirrors."

Toronto Plate Glass Importing Co., Toronto; Consolidated Plate Glass Co., Toronto.—Ed.

Ice Machines.

J. L. Demers, Thetford Mines, Que.—"Will you please advise me of any firm manufacturing ice-cutting machines more powerful than the ordinary plow?"

R. Donaldson & Son, Montreal, Que.—Ed.

Clarke Jewel Oil Stoves.

Taylor Bros., Ltd., Almonte, Ont.—"Can you tell us name of maker of Clarke Jewel oil stove?"

Geo. M. Clarke, Chicago,—Ed.

Tungsten Lamps.

B. F. Ahrens, Hanover, Ont.—"Will you kindly let me know through your valuable paper where to get the best, or who manufactures the best Tungsten lamps?"

Any of the following firms are good reliable houses:—Canadian Tungsten Lamp Co., Hamilton, Ont.; Canadian Sunbeam Lamp Co., Toronto; Austrian Import Co., Montreal; P. H. Klein, Dowd Street, Montreal.—Ed.

Lindsay Packing.

Sumner Co., Moncton, N.B.—"Can you tell us who manufactures Lindsay packing?"

R. B. Lindsay Co., Glasgow, Scotland; the Wm. C. Wilson Co., 21 Camden Street, Toronto, Canadian agents.—Ed.

Electric Floor Scrapers.

S. & G. Penfold, Guelph, Ont.—"We shall be pleased if you can give us information of manufacturers of electric floor scrapers."

Simplex Floor Finishing and Appliance Co., 332 Notre Dame Street W., Montreal; the American Floor Surfacing Co., Toledo, O.—Ed.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal of January 27, 1894:—

"Henry & Hambly, hardware merchants, Drayton, have dissolved, J. R. Hambly continuing."

Editor's Note.—J. R. Hambly left Drayton (his old home town) twenty years ago and went to Thamesville in January, 1895, buying out E. S. Hubbell. He resold the business to Mr. Hubbell in 1900, after which he moved to Barrie, Ont., and took possession of the J. Henderson hardware business. Mr. Hambly is a past president of the Ontario Hardware and Stove Dealers' Association.

"A hardware hockey team has been organized at Kingston. A. Strachan is manager, and the team that challenges any seven in the city is composed of C. M. Strange, A. Dalton, W. Taylor, M. Thompson, E. Sears, F. Calvert, W. B. Dalton."

Editor's Note.—A. Strachan is now Customs Inspector at Kingston, Ont.; W. B. Dalton is president of W. B. Dalton & Sons, hardware merchants, Kingston, Ont.; W. Taylor is now residing in Kingston; C. M. Strange is director and general manager of Lewis Bros., Ltd., Montreal, Que.; A. Dalton is associated with W. B. Dalton & Son, Kingston, Ont.

"A partnership has been formed in Quebec, Que., by Victor & Jos. F. Lemieux, under the style of N. Lemieux & Fils, hardware merchants."

Editor's Note.—The firm is still in business in Quebec. The death of Victor Lemieux, of the above firm, occurred a few weeks ago.

"John Thorpe, Montreal, Que., Canadian manager of Pilkington Bros., is in New York on a business trip."

Editor's Note.—Mr. Thorpe is still with Pilkington Bros., and represents them in New York.

Catalogues and Booklets

John Rabone & Sons' Catalogue.

John Rabone & Sons, Birmingham, England, are distributing through their Canadian representative a new catalogue and price list, which has been specially prepared for the Canadian trade. The catalogue is fully illustrated with excellent reproductions of the goods manufactured by the firm. A copy is being sent to each retail merchant.

Desk Calendar.

The Geo. H. Saywell Co., Winnipeg, Man., have issued a very neat 1914 folding desk calendar. On the reverse side of the calendar a list is shown of the various specialties carried by the firm.

Abbey & Imbrie Catalogue.

The new catalogue of the above named firm is written and illustrated from the point-of-view of the man who fishes for the fun of fishing—with tackle that's fit for fishing! The "Sign of the Leaping Dolphin"—the sign of a century's intelligent tackle making—swims in and out of the 224 pages of the new 1914 fishing tackle book published by Abbey & Imbrie of New York.

The catalogue contains a chapter of friendly advice on "Choosing the Right Rod," and "What to Consider in Reels." There's a page or two about "Fishing Lines and Their Uses;" and others giving "Some points about Hooks," and "The Choice of a Bait." A list of "Typical outfits for fresh and salt water fishing," offers suggestions to the angler who is in doubt; and twenty pages of directions and equipment for the amateur rod maker are also very instructive and interesting.

Abbey & Imbrie's new book includes eight pages that are exquisite examples of the color-printer's art. Trout and bass flies; the sizes, colors and textures of more than seventy braided lines; typical examples of snelled hooks for fresh and salt water fishing; and more than a dozen varieties of artificial baits and minnows — all brilliant in their true colors.

Ontario Lantern & Lamp Co., Calendar.

The Ontario Lantern & Lamp Co., Hamilton, have issued an exceptionally attractive 1914 calendar lithographed in colors. The title of the illustration "Love's Gift Divine," is reproduced from the original painting by Miss Lula Kenyon.

Staff Conventions and Reunions

Pratt & Lambert Inc. District Salesmen's Convention

Conventions Held in New York, Buffalo and Chicago—Outlook for 1914 Business Good.

Twice every year a dynamo of enthusiasm springs into existence at the three Pratt & Lambert plants at New York, Buffalo and Chicago. These dynamos are the semi-annual Pratt & Lambert district salesmen's conventions. They serve a multiplicity of purposes—bring the salesmen together in relations of good fellowship and optimism, enthuse the salesmen with their work, educate them on new goods, policies of the house, advertising and sales methods, broaden them by an interchange of ideas with their fellow salesmen. In brief, these sales conventions generate and charge each man with enthusiasm and knowledge that sends him back on his territory a more efficient man.

This year, these conventions were held at New York, Jan. 5, Buffalo, Jan. 6 and 7, and at Chicago, Jan. 8. The officers and some of the managers of Pratt & Lambert, Inc., acted at a flying squadron, working all day at one convention, then jumping on the train for another branch hundreds of miles away.

Much time was devoted to a thorough discussion and demonstration of the products made by the firm, particularly the more recent additions to the line.

The discussion of the advertising for the spring 1914 was also very interesting. Mr. Werheim, advertising manager, by means of charts, maps, etc., outlined the work of the advertising department.

Dinners were given at the Waldorf-Astoria, Buffalo Club and Chicago Athletic Club, at which W. H. Andrews, president of Pratt & Lambert, Inc., acted as toastmaster. At the various dinners J. H. McNulty, general manager of the company, gave one of his sincere, straight from the shoulder, inspiring talks.

At the dinners, the key-note of the salesmen's speeches referred to their friendly relation with the firm, and the square treatment which was accorded them.

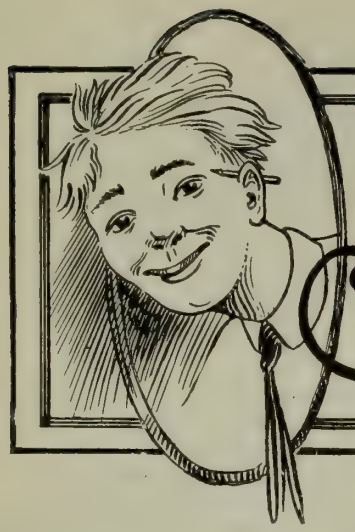
The dinners were concluded by a fitting address by W. H. Andrews, in which he stated that the year 1913 had been the most prosperous in the history of Pratt & Lambert, Ins., exceeding 1912, which was a banner year, by a large margin. He congratulated and thanked the sales force on its good work. Mr. Andrews expressed great optimism for 1914, now that many important issues in national politics, which were hanging fire and affected business in 1913, have been settled and dealers' stock are at low ebb.

WOVALEG EFFICIENCY CLUB BANQUET.

The initial banquet of the Wovaleg Efficiency Club was held at the Woods Hotel, Vancouver, on Monday evening, December 22.

The Wovaleg Club is composed of employees of Wood, Vallance & Leggatt, Ltd., Vancouver, B.C. The name "Wovaleg" is derived from the leading letters of the firm name, and is now being used as the firm's brand. The new brand or trade mark represents "The Seal of Service and Satisfaction," and the members of the firm and also the employees realized that in order to give service and satisfaction it is necessary to have efficient help.

The club was formed with a view of increasing the efficiency of the employees and making them better hardwaremen.



The meetings take place at the warehouse every Monday evening, and ways and means of improving the service are discussed. Interesting debates also take place and other innovations are employed to create a feeling of goodfellowship among the employees.

At the initial banquet the utmost good feeling prevailed. The music was supplied by the Wovaleg Orchestra, and the menu, including such dishes as, Consomme Imperial, coal oil Imperial; Small Patties a la Finaniere, Shaving Soap well lathered; roast stuffed young turkey,

(Continued on page 61.)

Pratt & Lambert, Inc., Sales-Staff in Convention.

THE JUNIOR CLERK'S PAGE

PLATE GLASS is made from a mixture of sand, saltcake, and limestone of special purity. Most of the sand is imported from Belgium or France. The saltcake is specially purified in a chemical works. The limestone comes from the great quarries in Derbyshire.

The mixture of these ingredients is placed in large pots made of the most refractory fireclay, and heated in gas-fired furnaces to a temperature of some 2,800 deg. Fah. A furnace contains 20 pots, each weighing with its contents about 2 tons. The heating is continued for about 16 hours. At first a pasty mass full of bubbles is produced, but as the temperature rises, the glass becomes almost as liquid as water, and the bubbles rise to the surface and burst, leaving the pure, clear glass below. When this point is reached, the "founder" who is in charge of the furnace, turns off the gas, and for a period of 4 hours the liquid glass gradually cools down.

Then follows the casting of the plate. Each pot in turn is taken from the furnace with a large pair of tongs, and carried to the casting table. This table is made of cast iron, and a very thin layer of sand is spread on it, while it is cooled by water circulating inside it.

The operation of casting is one requiring considerable care and skill. The liquid glass is cooling all the time, and it is important to have it just sufficiently liquid to pour, and not so liquid as to flow readily. The "teamer" has to judge the temperature of the liquid glass, and see that no time is lost between getting the pot out of the furnace and pouring it out, or "teaming" it on the table.

After it has been rolled out on the table, the slab remains a few seconds to "set" before it can be pushed off into the "annealing kiln." Unless glass is cooled very evenly, it is liable to break, either in the process of cooling or afterwards—even without any mechanical shock. Such glass is said to be "badly annealed." This even cooling was previously effected by pushing the plate of glass into a red-hot oven, and allowing oven and all to cool down for three or four days.

Within recent years a considerable change has been made in the annealing and cooling of plate glass, and this process is now accomplished in a mechanically-operated "lehr" in about four hours, instead of four days.

Hardware and Metal recently received a letter from a hardware clerk in an Alberta town, asking for information regarding the process of manufacture in making glass. Through the courtesy of Pilkington Bros., we are enabled to give the desired information which will doubtless prove interesting to all those engaged in the trade. — Editor.

The rapid method of annealing consists in passing the plates through a series of gas-heated ovens or "kilns," each succeeding kiln being a little cooler, and then finally down a long tunnel called a "lehr." The temperatures of the kilns and of the different positions in the "lehr" are indicated by electrical pyrometers, and are very carefully controlled.

Grinding and Polishing Process.

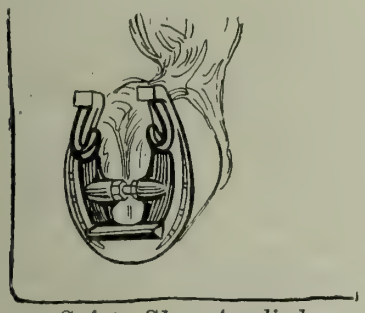
The Rough Cast Glass, as it comes from the annealing "lehr," has an irregular surface on both sides—on the lower side from contact with the sanded surfaces of the casting table and annealing kilns, and on the upper side from ridges and furrows due to the more rapid contraction of the lower side, which is in contact with the water-cooled iron casting table. To make the glass transparent, the irregularities on both sides have to be ground away, and the level surface then polished.

For this purpose the slabs of glass are laid flat on circular iron discs, which are then rotated, first in grinding machines in contact with abrasives of decreasing coarseness, and then in polishing machines in contact with rouge. The grinding and polishing machines are driven by large electric motors underground, and there is as much of their mechanism below ground level as is visible above.

In the first instance, the sandy side of the glass plates is cemented to the iron tables by Plaster of Paris, care being taken to completely cover the whole surface of the discs with glass. The glass-covered table is then moved by electric motor into the grinding machine, where it is hydraulically raised off the rails on which it runs, and is rapidly rotated whilst sand and water are thrown on to the glass, and heavy grooved iron "runners" are carefully lowered into contact. When these "runners" touch the sanded surface of the glass the friction starts them spinning. The coarseness of the sand is gradually reduced, and after washing off the last grains of sand, the smoothing of the glass is completed by substituting emery powder for the sand. The disc is then lowered hydraulically on to the rails again, and is transferred by electric motor to a polishing machine, where it is rotated in contact with felt pads fed with rouge and water, until a highly-polished surface is obtained.

The process of grinding and polishing one side of the glass occupies between three and four hours, and the plates have then to be lifted off the plaster and relaid with the other surface or "second side" uppermost. To prevent the polished surface of the "first side" being scratched, the discs are covered with soft lambskin cloths, the suction of which holds the glass in position. The disc then passes again successively through the grinding and polishing machines, and after a further three or four hours, the plates are stripped from the discs, cleaned in the "staining room," and passed into the warehouse.

There each plate is critically exam-



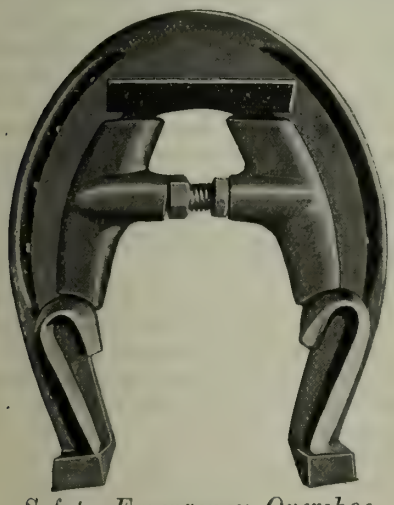
(Continued on Page 61.)

New Goods Offered Canadian Hardwaremen

THE GENGNER EMERGENCY OVERSHOE.

The accompanying illustrations show the Gengner safety emergency overshoe, which is being offered to the Canadian hardware trade by the Marquardt Mfg. Co., Tolelo, Ohio.

It is claimed that this shoe meets the demand for a dependable, highly efficient, detachable, anti-slipping device for horses and that it can be clamped to any shoe in a few minutes' time. It is said that the shoe will not slip or slide under the most trying conditions of icy weather. All that is necessary is to place the calk carrier or inner shoe inside the regular shoe and tighten up the clamps.



Safety Shoe Applied.

When not needed the safety shoe can be taken off and put in the wagon where they will be ready for any emergency.

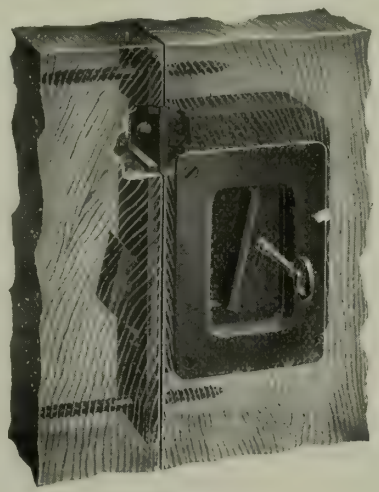
The following claims are made for the Gengner safety overshoe:—

On account of the wedge-shaped inner shoe or calk carrier, they are quickly applied, easily removed and cannot drop off.

Safety Emergency Overshoe.

The calks are made in such a manner that they give the horse a perfect bearing, consequently they will not wear lopsided and cause lameness.

On account of the scientifically shaped calks, they prevent the horse from getting corns.



After the overshoe is in place, the calks are in such a position that they absolutely prevent stumbling or sideslipping.

When the shoe is in position, the outer edges are never overflush with the hoof and there are no projecting points that can injure the horse.

Impossible to contract or injure the horse's hoof by clamping too tight.

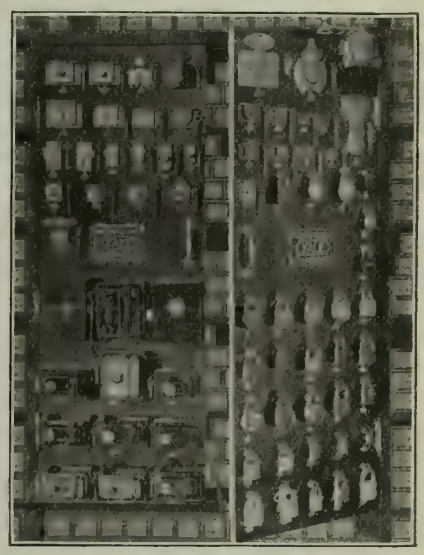
RICHARDS-WILCOX NEW GOODS.

Among the new lines recently placed on the market by the Richards-Wilcox Canadian Co., London, Ont., are the No. 525 sliding door lock, and the R-W Star Drills here illustrated.

Sliding Door Lock.

The new No. 525 sliding door lock is of the mortise type and is a lock, latch and flush-pull combined, operated from either side of the door. The lock can be used on single or double doors. The latch is released and pulled open by the same movement. The finish is black.

The Richards-Wilcox Star Drill for cutting concrete is said to be made of the highest grade crucible steel, and has a self-centering cutting edge. It is forged to allow proper clearance on the blades to prevent choking.



R. W. Star Drill.

SAMPLE DOORS.

Canadian Yale & Towne, Ltd., St. Catharines, Ont., is sending out "A Silent Salesman" to aid the hardware dealer in selling Yale Products. It consists of the pair of doors shown in the accompanying illustration.

They are built to screw on to the uprights of the hardware man's shelving and display, in compact, attractive style the different articles carried in stock on the shelves.

Yale & Towne Sample Doors.

On the doors themselves can be shown samples of the entire line of Yale Products carried in stock. There is no pulling out of boxes, no unwrapping of locks, no scattering around of loose articles on the counter with the accompanying loss of parts. All the dealer has to do is to lead his customer to the sample door and help him to make his selection. When this is done, he can either take the lock in its original package out of stock, or remove it from the sample board, replacing it later from stock on the shelves. The doors are furnished with heavy brass hooks on which the locks are hung, each hook numbered with a brass tag, and any assortment to correspond with stock on the shelves may be placed on them at the option of the dealer. These doors are furnished in light or dark oak or mahogany and made to fit the space between any set of shelves.

Remember you may be an employer some day; and try to perform your duties as you would have them performed by clerks under you.

Current News of the Hardware Trade

Business Changes.

Mitchell, Ont.—J. & H. Field, hardware, are reported having sold out.

Calgary, Alta.—Comer Hardware Co. have sold out to Marshall Hardware Co.

Owen Sound, Ont.—Ross McKeen, plumbing business is now McKeen & Johns.

Sovereign, Sask.—W. A. Goodwin has disposed of his hardware business to Mr. Roberts.

Montreal, Que.—Columbia Rubber Co. has been succeeded by Columbia Waterproofing Co.

Toronto, Ont.—Winch & Barrett, hardware merchants, have dissolved partnership, Alfred Barrett continuing.

Listowell, Ont.—White & Howes, hardware merchants, have dissolved partnership, R. B. White continuing.

Toronto, Ont.—A. Winch & Co., jobbers of paints, oils, etc., have been succeeded by the Colonial Varnish & Color Co.

Marquis, Sask.—W. & J. Pritchard, general storekeepers, have disposed of their stock of hardware to Mrs. Kate Holmes.

Kamsack, Sask. — Theodore Miles, dealer in hardware, lumber, etc., has disposed of the harness department of his business to Myers Bros.

New Firms.

Montreal Showcase Co. have registered.

Montreal, Que.—Wm. Melott Weather Strips Co., of Quebec, have registered.

Edmonton, Alta.—C. W. Leggatt has opened a store for the sale of auto accessories.

Edmonton, Alta.—The Edmonton Gasoline Lighting Co. has commenced business.

Montreal, Que.—A. G. Kidston & Co, iron, steel, etc., W. H. Kidston, W. H. C. Kidston, John Campbell Blair and Harry Brownly Kidston have registered.

Fire Losses.

Montreal, Que.—The Gurney-Massey Co., stove dealers, have suffered a fire loss.

Montreal, Que.—La Compagnie Ceramo Vitrail, manufacturers of mirrors, etc., have suffered a fire loss.

Toronto, Ont. — Canadian Seamless Wire Co. and the Automatic Electric Stove Co. have suffered loss by fire.

Midland, Ont.—Fire did considerable damage to the premises of Armstrong Bros. & Frank, dealers in plumbing and electrical goods. Several other firms suffered by the same fire.

Toronto, Ont.—The following firms have suffered fire losses:—E. R. Burns Saw Co.; Parker Bros., woodworkers; J. W. Woolnough, show cases; Rankin & Co., excelsior manufacturers.

Ontario Incorporations.

Auto Supplies, Ltd., capitalized at $150,000, head office Toronto.

Taylor Portable Steel Derrick, Ltd., Toronto, capitalized at $40,000.

Woodworkers, Ltd., capitalized at $40,000, head office, Toronto, Ont. To carry on a business as lumberer and manufacturer of woodenware, etc.

Muskoka Lakes Supply Co., to engage in boat building, plumbing and furnishing boat supplies, etc. Head office Pt. Sanfield, Ont.; capitalized at $40,000.

Dominion Incorporations.

Northern Electric Co., Montreal, Que., capitalized at $10,000,000, to manufacture and deal in every kind of metal, machinery, etc.

Canadian Hotpoint Electric Heating Co., capitalized at $100,000, with head office in Toronto, to manufacture and deal in electric heating and lighting devices, etc.

Modern Foundry and Soil Pipe Co., capitalized at $250,000, with head office at Cap de la Magdeleine, Que., to acquire the business now carried on by "Modern Joint of Montreal, Ltd." and to carry on the business of general foundrymen, manufacturers of pipes, etc.

Will Erect Garage.

Cobalt, Ont.—The George Taylor Hardware Co. will erect a garage to take care of the automobile end of their business.

Increased Capital.

The capital stock of the Roxton Tool and Mill Co., Roxton Pond, Que., has been increased from the sum of $100,000 to $300,000.

Adding New Department.

The Borton Plumbing and Heating Co., Summerland, B.C., have added to their stock, a full line of cooking and heating utensils.

Opens Manufacturers' Agency.

R. I. McLaren, Ottawa, Ont., who for the past 7 years has represented the Taylor-Forbes Co., and prior to that time represented the Dominion Radiator Co. for fifteen years, is opening a manufacturers' agency business with headquarters in Ottawa.

Personal Notes.

H. C. Hay has taken over the management of The Manitoba Hardware and Lumber Co.

Mr. Bowman of Russell & Irwin, New Britain, Conn., called on the trade in Montreal last week.

H. Lovell, representing Horrax Ibbotson, of New York, was calling on the trade in Montreal this week.

Mr. Parridge, representing the Ox Fibre Co., of Frederick, Maryland, was calling on the Montreal hardware trade this week.

John Cameron, representing Winchester Repeating Arms Co., of New Britain, Conn., called on Montreal dealers this week.

George Spence, of the Steel Company of Canada, Hamilton, has left for New York, and sails to-day for a holiday on the Mediterranean.

A. W. Peck, Jr., representing Stanley Rule & Level Co., as well as The Atlea Tool Co., of Newark, N.J., was in Montreal, this week calling on the trade.

H. M. Morrow, of the motor truck department of the Canadian Fairbanks-Morse Co., Toronto, has been transferred to the Vancouver branch.

Lester Brooks, who had charge of the night gang at the blast furnace of the Canadian Furnace Co., Port Colborne, Ont., lost his life on January 13 in an effort to rescue Joseph Postica, an Hungarian, who had fallen into the furnace.

G. S. Dingle, vice-president Tees & Persse, of Alberta, Ltd., Calgary, Alta., was a visitor last week at the office of G. A. Marshall, 70 Lombard St., Toronto.

R. B. Biggar, Vancouver, B.C., representative of the Copp Stove Co., is at present visiting in Toronto and Hamilton and was a recent visitor at the Toronto office of Hardware and Metal.

Ishi Priest has been appointed sales manager of Wm. Stairs, Son & Morrow, Ltd., Halifax, N.S.

Mr. Priest is well known among hardware dealers in the Maritime Provinces. He has been associated with Wm. Stairs, Son & Morrow, Ltd., for the past twenty-three years, twenty of which he spent on the road.

W. W. Hutton, who has been manager of the retail department, has been appointed assistant sales manager.

Toronto, Ont.—A. Muirhead & Co. are preparing plans for the erection of a four-storey building on the corner of Frederick and King Streets.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

The chief feature of the past week has been the upward trend in the metal markets. Considerable firmness has been exhibited and there is a better all-round feeling. Tin, lead, copper and pig iron have advanced in price. An improvement is noted in the stove business, and the demand for tinners' trimmings is heavier than usual for this season of the year.

Paint manufacturers are busy and booking for spring delivery is heavy. Turpentine has advanced in Toronto. Lower quotations are given on Paris green. Hardware jobbers report a good seasonable demand for all hardware lines.

MONTREAL.

MONTREAL, Jan. 22.—The conditions on the local market are much the same as last week although some dealers report that the amount of business done has increased some. Quite a number of orders have been received lately especially from local retailers who seem to be stocking up after the inventory has been taken. The travelers have also sent in a number of orders from outside points and it appears that practically all retailers are getting their stock back into shape again.

The conditions so far as they concern the financial end of the retail business, are reported to be improving daily and local jobbers seem to be of the opinion that after a quiet three months in which business will perhaps fall away from last year they look for a marked improvement after that. The West is becoming quite optimistic and orders are coming in from that part of the country a little more freely.

One local firm shipped two cars of hardware to the West last week.

It is interesting to notice how snow shovels move with every snowstorm. One local firm to-day were completely sold out and could not possibly have supplied half a dozen shovels unless they used their samples.

Skates still continue to move quite freely and supplies used for lumber camps are also receiving some attention.

The conditions in the metal market are much the same as last week with a few increases in different kinds. Of course we do not expect much in this market at this season although there is always something interesting to note.

Tin.

The London quotation this week shows an advance of £5 10s. over last for spot shipments while futures are also up proportionately. The prices quoted for both spot and future are £172 15s. and £174 15s. respectively. There appears to be considerable interest shown in the primary markets for futures especially and inquiries are reported for shipments anywhere from March to June. There seems to be a good enquiry from buyers for spots also but holders seem to be rather shy and not much business is reported.

Spelter.

The price of spelter as quoted in London shows no change from last week although present demand is very steady and quotation of £21 10s. is maintained. The American prices are unchanged and it would appear that it was simply a question of endurance there as buyers are looking for cheaper prices while holders are confident that present quotations will hold.

Lead.

This market still keeps advancing in price and the London quotation to-day shows an advance over last week of 17s. 6d. and is given as £20 7s. 6d. Local dealers are very optimistic as to the future of lead and seem to be quite confident that it will show a further advance. Although the American centres report that there is no buying going on at present they would lead one to believe that the market is very firm. If people keep from buying much longer there is bound to be great activity in the market a little later on.

Copper.

There has been an advance of £2 in the London quotation this week and although there does not appear to be a great deal of buying the market is firm at this figure, or £64 15s. American centres report a better feeling existing and although business is limited the prices are firm. However there is no actual increase in activity in the operations of consuming circles to report.

Antimony.

The market is still about the same without change in price. The demand is quiet on the local market, yet seasonable.

Iron.

The London quotation to-day is practically unchanged from last week at £2 10s. 7d. There does not appear to be any features to report, the demand being practically the same in all centres. The local situation has shown no change and business is quiet.

In the stove and heating lines it is interesting to note that during the extremely cold weather last week quite a number of small oil and gas stoves were sold. Quite a number of ranges also exchanged hands and the manufacturers were called upon for quite a few rush orders. Business however seems to rest entirely with the retailer at present as the manufacturers are rather quiet.

TORONTO.

TORONTO, Jan. 22.—There is a better all-round feeling in the markets this week.

The metal market has rallied and merchants in this line are displaying more optimism than has existed for some time.

1914 SPRING QUOTATIONS ON PURE PARIS GREEN.

	C.P.C. Green.	Paris Green. Berger's
600 lb. casks	16¼c lb.	17¾c lb.
250 lb. casks	16½c "	18c "
100 lb. drums	17½c "	19c "
50 lb. drums	17½c "	19c "
25 lb. drums	17¾c "	19¼c "
1 lb. packages	19¾c "	21¼c "
½ lb. packages	21¾c "	23¼c "
1 lb. tins	20¾c "	22¼c "
½ lb. tins		24¼c "

High prices are being quoted on a number of lines.

The recent cold snap has been a boon to the stove trade and some very fair shipments are being sent out. Retailers also report an improvement in business.

Hardware jobbers state that a very fair amount of business is passing and that spring booking is coming in a very fair manner. Outside of the metal markets very few price changes have occurred. Paris green is being sold at lower quotations than those quoted last week and the new prices appear in the accompanying panel.

Metals.

Quite a number of price changes have occurred, all in an upward direction.

Tin has advanced 1 cent per pound. Copper is firmer and has advanced ¼ cent per pound. Lead which has been showing continued strength for some time has again advanced ¼ cent per pound. The price on lead is at present very high; despite the high prices the demand appears to be steady.

Pig iron has advanced 50 cents per ton. Spelter, although unchanged in price is very firm. Toronto quotations appear in the accompanying panel.

Nails, Screws, Rivets, Etc.

Wire nails are still being quoted at 2.15 base. Black iron rivets are quoted at 75 per cent. discount. Wood screws are quoted as follows:—

Flat head bright.....85-10-7½-10%
Round head bright 80-10-7½-10%
Flat head brass 75-10-7½-10%
Round head brass 70-10-7½-10%

Rope, Twine, Etc.

Business in rope shows an improvement and some buying has been done as a result of the lower prices quoted last week. Following are present quotations:

Pure Manila rope .....15c base
British Manila rope .....11c base
African hemp .....11c base
Sisal .....10½c base
Lath yarn, single ..... 9¾c lb.
Lath yarn, double .....10¼c lb.

The Stove Trade.

The recent cold weather has had a good effect on the stove business, and manufacturers report the receipt of a number of very fair orders.

Retailers also find a much better demand than existed before the advent of the cold snap.

Heavy Demand for Trimmings.

There is a heavy demand for all kinds of tinners' trimmings. The demand for this line set in earlier than last year, and the orders are heavier.

This would indicate that dealers are endeavoring to hold their men, and keep them busy manufacturing during a quiet period.

The scarcity of first-class tinsmiths during the past few years has had a tendency to make the dealers endeavor to hold their men the year round.

Paris Green.

Lower quotations on paris green are being quoted in Toronto this week, and prices appear in the accompanying panel.

Wire Netting, etc.

Poultry netting, two-inch mesh, is being quoted at 60 per cent. discount. Prices on ½-inch mesh and 1-inch mesh are quoted net in current market quotations.

WINNIPEG.

Winnipeg, Jan. 21.—The only news of importance in hardware circles here is a reduction of 1 cent per lb. on Manila rope, and ½ cent on sisal and lath yarn.

Travelers are now back on the road, and generally report outlook favorable; but with a good deal of winter ahead of us, it is a little premature to be making predictions.

Collections are fairly good, and there are plenty of indications that money is getting a little easier. The long spell of liquidating sales has ceased, and there are some ready to try the buying side.

Inventory taking is pretty well over, and, though the business of 1913 generally was a little less than that of 1912, no one can call 1913 a bad year. In some lines there was a considerable expansion. In builders' supplies there was a falling off. That is not news, as the building permits in the West told the story. It is noteworthy that Winnipeg showed less percentage of decline than any western town of importance.

Theer will be a big influx of western business men here in February to attend the Bonspiel and take in the fine season of grand opera on the boards.

TORONTO QUOTATIONS ON METALS.

Prices are gauged according to quantity purchased.

Electrotypers' Solder	30c	lb.
Brazing Metal	26c	lb.
Ingot Brass, red	14 to 16c	lb.
Ingot Brass, yellow	13 to 15c	lb.
Wire Solder	26½ to 28c	lb.
Wiping Solder	23½ to 26c	lb.
½ and ½ Solder	24 to 26c	lb.
Pattern Aluminum	23 to 24c	lb.
Ingot Aluminum 99% pure	19½ to 20½c	lb.
Spelter	$5.35 to $5.65	per 100 lbs.
Copper	15¾ to 17c	lb.
Tin	39½ to 44c	lb.
Lead	5.65 to 5.85	
Tinkers' Bar Solder	28. to 29c	lb.

IMPROVEMENT THE KEYNOTE.

The American Metal Market states as follows:—The "brightening in the East," to which we called attention last week, continues. Wall Street is reflecting the better feeling. There is also a distinct improvement in the financial situation abroad, and another reduction in the Bank of England rate is expected next Thursday. The New York bank statement issued Saturday showed the largest surplus reserve reported in the middle of January since 1895, being more remarkable because it occurs in a week of $2,000,000 gold export and $25,000,000 expansion in loans. The foreign metal trade continues its recent improvement. The reports of one million idle men in the steel and metal industry have not only been proved a roorbach, but is now being followed by exaggerated reports of an opposite character. The present keynote in business is improvement, how rapidly it will make ground will depend on the administration's attitude to business which will be revealed in President Wilson's message to-morrow. There is a decided feeling among the big interests to go slow, and not be precipitate in taking any forward steps that would have to be retraced.

BUSINESS EXPANDING.

Cleveland, Ohio, Jan. 22.—The Iron Trade Review to-day says:—

Slowly the volume of iron and steel business is expanding and mill activities are increasing in a moderate way. The pig iron buying of the past few days has included 40,000 tons at Chicago, 30,000 tons at Cleveland, 20,000 tons at Buffalo and a considerable tonnage scattered through eastern territory. Pig iron prices are still very low, especially in southern territory.

In finished materials, mills are contracting very conservatively.

The old material market is showing signs of improvement in important centres and a pretty general advance in prices.

TRANSFORMATION ON CANADA'S PRAIRIE.

(Continued from page 53.)

by a series of colored, stained glass windows in the north wall depicting the exterior of old Fort Edmonton, Fort Garry, Winnipeg, and the interior of old Fort Garry as seen in the early days of the last century, when picturesque bartering over the counter was the rule.

To Feature Window Dressing.

Following their usual policy, the company will make a specialty more than ever of artistic window-dressing, and through the magnificent windows will give the public an attractive glimpse of the goods inside. The interior arrangements will be as follows:—On the main floor, men's furnishings, boots and shoes, dress goods, linens, drugs, stationery,the ribbon and notion counters and a corner devoted to the soda water fountains and sweets. There will also be that great convenience, a Dark Room arranged to show the effect on colors of artificial light; also the express and postal departments, and the transfer and adjustment bureau.

Groceries on Third Floor.

The third floor will be equipped to satisfy household wants. Here groceries and provisions, fruits and vegetables of the best grade will be arranged in tempting display, no attempts being spared to catch the eye of the customer and to satisfy his desires. China, glassware, furnishings, draperies and curtains and a well appointed library will also be found here. On the fourth floor are contained all those extra accommodations which make shopping a favorite pastime for the gentler sex. Dining rooms, check rooms, rest rooms are to be found there. A cafeteria further adds to the arrangements. The refrigerator plant, costing $18,000, is conceded to be one of the best equipped in the West.

The fifth floor will be given over to bedding, stoves and sewing machines, while the sixth is sacred for the use of the executive and employees. One commendable feature of the whole establishment is the attention paid to the health and comfort of the employees in the way of ventilation, stools for the sales girls at their counters and rest rooms for their sole use. On the very top will be a roof garden giving a splendid view over the metropolis of the north.

WOVALEG EFFICIENCY CLUB BANQUET.

(Continued from page 55.)

feather dusters and turkey red in oil; fruits, baseballs, was enjoyed by all.

The menu card was attractively gotten up. Following is the programme at the banquet:—

Toast, The King; President's Remarks; Song—Selected, H. J. Applegate; Musical Monologue, J. H. Gowland; Toast, The Empire; (Proposer) C. Anyon; (Reply) L. M. White; Song—Selected, A. Bath; Instrumental Solo, E. H. Allison; Toast, The Firm; (Proposer) C. S. Rollston; (Reply) W. G. MacKenzie; Song—Selected, E. Peel; Mandolin Solo, J. J. O'Brien; Toast, The Club; (Proposer) F. Parsons; (Reply) J. Dunsmuir; Song, R. Gummer, E. Winder, W. Sayers.

GLASS MANUFACTURING.

(Continued from Clerk's Page.)

ined, to determine its quality and the best sizes into which it can be cut. After cutting to size, the plates are put into racks for storage, or direct into packing cases.

Plate Glass is the most expensive form of glass for windows, being about six times as costly as ordinary "sheet glass." It is made in all thicknesses, from one-eighth of an inch for railway carriage windows, to a couple of inches for ships' portlights.

DO YOU RECEIVE PROMPT DELIVERY?

Subscribers to Hardware and Metal who do not receive prompt and regular delivery, each week, will confer a favor by reporting the matter to us. Hardware and Metal is mailed regularly in Toronto Friday afternoon, and should reach every town within 12 hours run of Toronto, on Saturday morning.

Supplementary Processes.

For special purposes, the polished plates of glass are put through various supplementary processes, such as "bevelling," "brilliant cutting," "embossing," and "silvering" for mirrors.

Sheet Glass, or common window glass, differs from Plate Glass in being "blown" and not "cast." Originally, the lump of molten glass was blown into a flat circle called "crown glass," out of which small squares were cut, leaving what was called the "bull's-eye" in the centre as waste, though sometimes used for glazing stables.

In the middle of last century, the method of making common window glass from the flat circle of "crown glass" was gradually superseded by the system of blowing a cylinder, which, when split and flattened out, forms a large square of sheet glass, which can readily be cut up into the sizes required without the inevitable waste of the old process.

The thickness of sheet glass, which is still made by the cylinder process, varies from three-sixteenths of an inch to one thirty-second of an inch for photographic plates.

Rolled plate, or rough roofing glass, is cast and rolled out on iron tables in much the same way as plate glass, but is not ground and polished. In one form it has wire netting embedded in it to give it fire-resisting properties and extra strength.

Cathedral Glass is practically rolled plate with a pattern impressed on it whilst hot.

INDUSTRIAL NOTES.

Vancouver, B.C.—The Vancouver Iron and Metal Co. will prepare plans for a new foundry, costing about $25,000.

Southampton, Ont.—The ratepayers have passed a by-law granting the Steel Furniture and Fittings, Ltd., a free site for a new plant and exemption from taxation for ten years.

Berlin, Ont.—The Berlin Plate Glass and Mirror Co. has purchased a lot on Victoria and Edward Streets, on which a new factory building will be erected. The structure will be of two storeys, with cement foundation, and provide 13.000 feet floor space.

SUDDEN DEATH OF HERBERT HESCH.

Herbert Hesch, president and manager of the Imperial Manufacturing Company, died on Sunday afternoon, Jan. 18, at his home on Ross Street, from acute dilitation of the heart, brought on by exertion while convalescing from an attack of typhoid fever.

Mr. Hesch had been ill for five weeks with typhoid fever, and on Sunday felt well enough to sit up in bed. The exertion brought on dilitation of the heart, and, despite all that medical aid could do, death ensued.

Hardware Merchant Wins Prize.

Hampton, N.B.—The annual meet under the auspices of the Hampton Driving Club consisting of business men in different lines in Hampton took place on "The Canal," Friday afternoon 16th, and was enjoyed by hundreds of visitors from the surrounding country. Walter Fairwether, general hardware merchant of Sussex, won the gentleman's driving class in a close contest.

Methods of Retailing Paints and Varnishes

The Possibilities in the Paint Line

Broaden the Scope of Your Future Sales—Salesmen Should be Able to Furnish Customers With Ideas—Study and Become an Expert.

With the opening of the spring paint season only a couple of months away, the attention of hardware merchants and their salesmen should be turned, partly at least, to the studying of the possibilities of making paint sales.

The following advice by a sales manager with a large paint firm could appropriately be given at the present time:

"There are possibilities for you in selling paint, which will rapidly raise you from the position of mere clerk to that of real salesman.

Never limit your salesmanship to the transaction of the moment, but broaden the scope of your future sales, by posting yourself with suggestions which you can readily offer to your customers and which will lead to future sales.

Besides showing the good qualities of the paint you sell your customer, you can furnish him with ideas as to color schemes, best methods of application and can present new possibilities for the use of finishes which will be of material benefit to him.

Study and become an expert in the decorative possibilities of the lines you sell. With each paint sale do not be afraid to impart a little of such knowledge to your customer and thus awaken new desires along these lines which will always bring future sales.

The salesman who has attached to himself the record of an expert and upon whose counsel customers may rely is readily sought for by customers not only to his own benefit and profit, but to that of his store.

By such methods extend your salesmanship, extend your influence, extend your benefit to your store and you will be surprised to see how rapidly the long green will extend itself your way.

Now that the off season in paint sales is here, you have ample opportunity for studying this question up.

Don't forget to scatter your ideas good and plenty amongst the women. Women receive new ideas concerning the application of paint more readily than anyone else especially if you can show them how easy it is to fix up the home. A little time and counsel spent with them will boost paint sales immensely."

The advice given by the sales manager is very timely. Indeed, there are great possibilities in selling paint. There are some merchants and salesmen who work these possibilities to the limit, and profit accordingly. There are other merchants and salesmen who do not take advantage of the opportunities afforded them for making paint sales.

One hardware merchant who has made an exceptional success of his paint department stated to a representative of Hardware and Metal that there is no department of his store more interesting to him than the paint department. He says there is no limit to paint sales, and there is something new to learn every day. He is always interesting his customers in paint specialties.

For instance, if a customer wishes to purchase a can of floor paint, the merchant after selling the paint and telling the customer how to apply it, goes on to explain how the interior walls of the home may be decorated by a special wall finish which he has in stock. Customers are generally interested and although sales are not always made at the time, there are often enquiries made later on.

A Specialty Each Week.

Another plan worked last season by this dealer and his salesmen, was to concentrate on one specialty each week. For instance, the first week the merchant and his staff would feature varnish stains, and a good supply of color cards sample boards, and literature were kept close at hand so that the salesmen could show the line to customers without taking up too much time.

The second week enamels would be featured. Enamels such as bath enamels, bed and furniture enamel, bicycle enamel, etc., would be shown and during the week a large number of prospective customers would become interested. The merchant stated that one week he sold a large quantity of bath enamel by this method and that later on in the season he had many enquiries for enamels for other purposes.

Another important and valuable asset to the salesman is having a knowledge of the decorative possibilities of the line he is selling.

Hardware clerks are constantly being asked for suggestions. A lady customer wishes to paint the walls of a room, she has no difficulty in picking out the color for the side walls, but when she wishes to pick out a color for the ceiling or border, she often looks to the salesmen for a suggestion.

The salesman who can offer suggestions, and give the customer sound advice regarding color schemes, etc., is a valuable asset to any hardware firm.

Customers will place confidence in him and he will experience no difficulty in making sales.

CONVENTION OF B.C. RETAIL MERCHANTS.

The Retail Merchants of British Columbia will hold a big convention in the concert hall of the Empress Hotel, Victoria, B.C., on February 9 and 10. All retail merchants in the province are invited to attend this annual meeting where questions of vital importance to the trade will be discussed.

Current News

ANNUAL CONVENTION IN CHICAGO

The annual salesmen's convention of the Adams & Elting Co., Chicago, New York and Toronto, manufacturers of Adelite paint and varnish products, was held in the home office at Chicago, during the week beginning Jan. 5.

The salesmen were in from all parts of the country, and the convention was opened Monday morning with appropriate addresses of welcome by President Adams and Secretary Howard Elting.

The convention closed with a banquet at the Hamilton Club, at which Howard Elting acted as toastmaster, and talks were given by Messrs. Adam Gale, Philip Elting, and F. A. Arnold, the advertising manager.

LONDON FIRM CHANGES HANDS.

London, Ont.—J. E. Young & Co., hardware merchants, have sold their business to Love Brothers, who will take possession on Feb. 1. The new firm will be called "The Love Hardware Co." Love Brothers have been on the road for the Page Wire Fence Co. for a number of years, John Love having been with the latter firm for seventeen years.

Jno. E. Young will remain with the new proprietors for a month or two in order to assist in the spring purchasing for the new firm.

THE PAINT
THAT EVERY PAINTER KNOWS

Half the art of making sales is in giving your goods a favorable introduction to your customer. This accomplished—the rest is easy. With paints, as in everything else, popularity is a big asset. Seldom indeed does any particular merchandise gain this popularity unworthily.

MARTIN-SENOUR 100% PURE

Are paints with a reputation. They need no introduction to painters anywhere. Their reputation has been gained on the quality that has been put into them—thoroughly prepared—non-adulterated—containing no cheapening ingredients. They will cover more surface, wear longer and look better than any other paint. Selling such a paint will make satisfied customers for your store.

One merchant in each town—will it be you in your locality? Write us to-day.

The reputation and standing of Berry Brothers' Varnishes is the result of fifty-six years' honest manufacturing and aggressive publicity.

Wherever varnishes are used or sold, the name Berry Brothers stands for sterling quality and worth.

Dealers who handle Berry Brothers' Varnishes are getting the benefits of our national advertising of these four well known products:

Liquid Granite — A floor varnish whose name suggests its wonderful durability.

Luxeberry Wood Finish — For the finest rubbed (dull) or polished finish on interior woodwork.

Luxeberry White Enamel—Unequalled for white interior finishing. A white enamel that stays white.

Luxeberry Spar —(It's waterproof)—widely employed for all kinds of outdoor finishing, exposed to the weather. Will not turn white or check.

Weekly Market Report---Paints

MONTREAL, Jan. 22.—Although the orders, which are numerous at present, that are now being received by local dealers do not call for immediate shipment, when paint starts to move out and shipments go forward to retailers this spring there is little doubt in the minds of most local dealers that the spring business of 1914 will surpass that of 1913 by quite a wide margin. Orders are quite plentiful and all manufacturers are busy preparing their stock in order to fill these without delay. If the present conditions remain consistent it would not be at all surprising if stocks in first hands will be light.

Conditions throughout Canada seem to be improving daily and it is undoubtedly due to the confidence which the retail trade is placing in the future as the orders this year are quite as large if not larger than those of one year ago.

Dealers, that is to say retailers, all through the small towns of Canada, are preparing for the spring rush and are sending in their orders early. Judging by the size of these they certainly seem to feel that building operations are going to return to their former standing.

White Lead.

Although there is no change in price recorded this week, it seems to be the general opinion of all that present prices will not hold for long. As stated last week, the pig lead market in England has been steadily advancing and the present price quoted for pig warrants an increase in both dry white and lead in oil. Six weeks ago pig was quoted on London market as £17 10s. but this price has steadily increased until at the present time it is £20 7s. 6d. This increase of approximately £3 has not as yet affected local prices and as the market for linseed oil is very firm at present figures quite a number of local dealers predict a jump in lead in the near future.

Linseed Oil.

Although prices quoted this week are not showing any change over those quoted one week ago the market is very firm at these figures. Most local dealers are of the opinion that oil is now at a very reasonable figure and express the opinion that an advance would not be surprising as the conditions in the flax market would warrant it. The demand is very good and shows quite an advance during the past month.

Prepared Paints.

The demand at present for immediate deliveries is practically nil, but orders for future shipments are plentiful, in fact, most manufacturers are of the opinion that the amount of paint passing from first hands this spring will show a marked increase over last year's business. All local plants are running to capacity and the year 1914 looks to be one that will hang up a record.

Glass.

The demand is only seasonable with a fair volume of business passing and prices remaining unchanged.

Putty.

The demand is much the same as that for glass and the business passing is just considered seasonable with the same prices in effect.

Turpentine.

Local dealers are of the opinion that the present prices which are now quoted for turpentine are low as conditions in the south at the present time are bound to boost the price up if there is no improvement in the near future. As it is, local dealers are split so far as quotations are concerned and the range given to-day was from 63c to 65c for single barrel lots with a reduction of 5 cents for lots of 5 barrels and over. One of the manufacturers stated to-day that 67 cents per gallon would not be at all unreasonable under present conditions so that it would not be at all surprising to see an advance during the coming week.

MONTREAL PAINT MARKETS.

One of the leading local paint manufacturers stated to-day that the orders received and being received for spring delivery were far in excess of last year and present indications point to one of the best years on record. His statement is borne out by practically all manufacturers of paints.

Gasoline.

The present demand is very good when the conditions are taken into consideration. Prices quoted are 25½c gallon in wood, 22½c per gallon in steel and drums, while local tank wagon price is 21 cents per gallon for 100 gallons and over.

Benzine.

The demand is seasonable. For barrel lots in wood 23c per gallon is quoted while 20 cents is asked for the same quantity in steel and drums. The local tank wagon quotation for 100 gallons and over is 19 cents.

TORONTO.

TORONTO, Jan. 22.—While trade in the paint line is rather quiet at present, a considerable amount of booking for future shipment is being done.

The expected advance in the price of turpentine has taken place and Toronto quotations are 2 cents per gallon higher than last week.

Linseed oil quotations remain unchanged. Firmness is still exhibited in lead quotations. The trade in general are very optimistic regarding the outlook for spring business.

Turpentine.

As predicted last week an advance of two cents per gallon has taken place in turpentine quotations and the ruling prices are as follows:—

Turpentine, single barrels, 68c per Imperial gallon; 2 to 4 barrels, 67c per Imperial gallon; 5 gallon lot, 75c per Imperial gallon.

Naval stores are exhibiting firmness in the south and resin has advanced about 50 cents per barrel.

Linseed Oil.

There is no change in the linseed oil situation and quotations are as follows:
Raw linseed oil, 1-2 barrels....65c gal.
Raw linseed oil, 3-5 barrels.....64c gal.
Raw linseed oil, 6-9 barrels....63c gal.
Boiled linseed oil, 1-2 barrels——68c gal.
Boiled linseed oil, 3-5 barrels....67c gal.
Boiled linseed oil, 6-9 barrels....66c gal.

White Lead.

Firmness is still exhibited in white lead and the market at present is strong. The following prices are still being quoted for delivery up to May 15.

5 ton lots, $7.90 per 100 lbs.
1 ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

Glass and Putty.

There is a seasonable demand for glass in small lots. Putty is in fair demand at unchanged prices.

Prepared Paints.

Spring booking compares favorably with booking during the corresponding period of last year. The annual increase in the demand for ready-mixed paint keeps trade in this line at a high level.

Anchor Pure Red Lead, Ground in Pure Linseed Oil, When Mixed for use Remains in Suspension—It Marks a Step Forward and Supplies a Long Felt Requirement.

Anchor Pure Red Lead in Oil makes a smoothly-working paint that dries in eight hours, forming a hard, but elastic, smooth film. It is manufactured by a special process, and has no tendency to harden in the package; it mixes up easily and remains in suspension.

Anchor Red Lead in Oil meets a wide demand. Railway Companies, Contractors, Builders and Painters have long wanted a Red Lead in Oil that would not harden when in paste form, and when mixed for use would remain in suspension. This Specially Prepared Red Lead Paint is as convenient to use as any other oil paint, and overcomes the necessity of mixing the unground and quick-settling Dry Red Lead with oil as formerly.

Red Lead is very largely used as a protective paint for bridges, steamships, structural steel of all kinds, metal roofs, cornices, iron fences, etc.

Anchor Red Lead in Oil is put up in paste form in 12½, 25, 50 and 100-lb. irons and larger packages.

If interested, write our nearest office for a sample, with full information about this new, convenient, all-the-year-round selling product.

BRINGS BIGGER BUSINESS BETTER PROFITS

MARTIN-SENOUR PAINTS & VARNISHES

It Only Seems Cheaper

It **seems** cheaper to buy a two-dollar pair of shoes than it does to buy a five-dollar pair; yet not many of us wear $2.00 shoes.

It **seems** cheaper to do without modern conveniences—telephone, telegraph, typewriters, cash-registers, adding machines, etc.; yet money is saved every day by their use.

It **seems** cheaper for consumers to pay $2.00 per gallon for paint instead of $2.50; yet there is a carload of Martin-Senour Paint made every day for people, who are saving money by using the best.

All this, simply because people in this enlightened age are looking for value—not cheapness. They realize that economy is governed by value, and not by **price.**

The true worth of Martin-Senour 100% Pure Paint is known by its service value, even at a higher cost per gallon; it is the cheapest paint on the market—cheapest because it **absolutely** covers more surface, hides and wears longer per dollar spent than any other paint made.

Make us prove this. Then, decide which paint is best for you to sell—which one will win continued good-will and bring continuous profits to you—Investigate.

BENJAMIN MOORE & COMPANY, Limited

MAKE TORONTO, CANADA

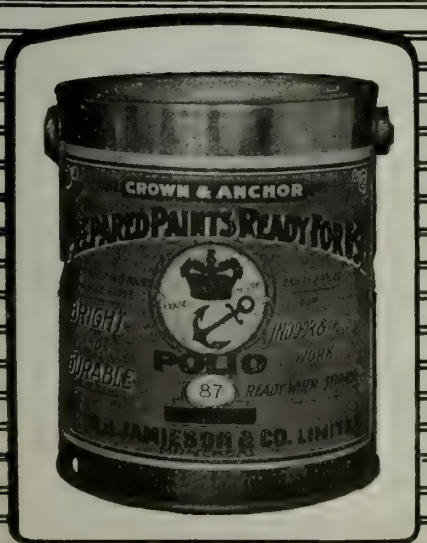
MURESCO, The best Wall Finish.
SANI-FLAT, The best Flat Oil Paint, washable and non-poisonous.
MIXED PAINT, Moore's House Colors, second to none.

YOU Should know our proposition. It's worth while.
Should write us to-day for full particulars.
Should sell the MOORE Line and make more money with less investment

The F. R. Murray Co., Ltd., Vancouver — Distributors for British Columbia

Stephens **Ready-mixed Paints**

The practical as well as the amateur painter is equally enthusiastic as to the merits of "Stephens."



Be sure you are prepared for the demand. You can't expect to prosper when you don't keep the paint quality that everybody wants.

Write for color cards and agency proposition.

G. F. STEPHENS & COMPANY LIMITED
WINNIPEG and CALGARY

JAMIESON'S Pure Prepared Paints

are the result of over half a century of concentrated effort along one line,—the production of a high-quality paint.

Every can is a witness to our success.

POULTRY NETTING.

52½ per cent.

Do You Know—We Told You

I.C. RED LEAD IN LINSEED OIL

IS BETTER

Than other Red Leads or Red Lead substitutes.

BECAUSE

It is always ready for use—Remains suspended in oil indefinitely—Dries quickly without the use of driers—Is more economical.

IT DOES NOT

Contain any adulterants—Disintegrate or chalk off—Harden or Solidify—Turn white after applying—Cost proportionately as much

AND WE PROVED IT

By having Canada's Most Noted Chemists, Milton Hersey, Limited, Montreal, make not only a chemical but a PRACTICAL WORKING TEST of it.

That report has been published several times recently in HARDWARE and METAL. We shall be glad to send you a copy of it.

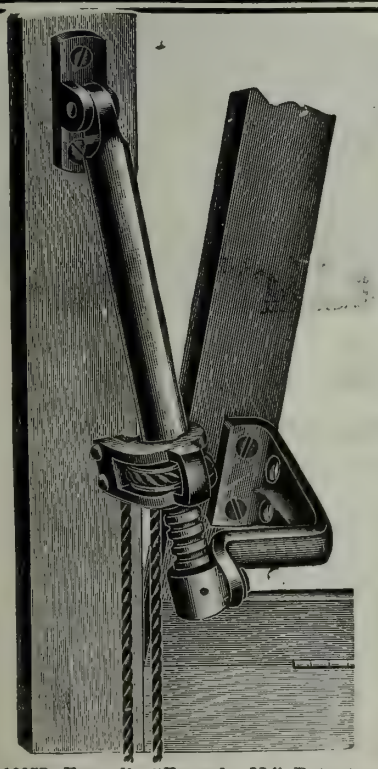
NOW WE ARE GOING TO PROVE

I.C. Everlasting Paint

Is BETTER than other paints you are now buying or are able to secure

BECAUSE

It has greater covering power—It will not blister—It will not disintegrate or chalk off—It will hold its color—It works more smoothly under the brush—It contains pure linseed oil only—It sheds water like a duck's back.



YOU CAN TRY IT OUT YOURSELF—MAKE YOUR OWN TESTS—AND PROVE IT.

Write us for samples and particulars.

Watch this space for report of tests which are now being made.

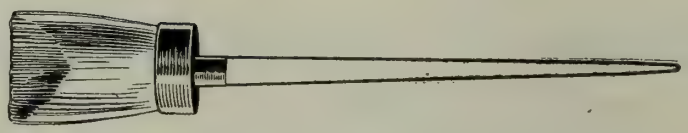
RAMSAY'S PAINTS & VARNISHES— SATISFIED CUSTOMERS APLENTY— YOUR PERFECTLY GOOD PROFIT—

That's a pretty good line up, and you can't do any separating —those three always stick together.



More than 70 years ago Ramsay's started to make **good** paint, they kept it up, and now the Canadian public **know** it.

Any man who comes into your store for paint and gets Ramsay's will come again when he wants more, because every brush of paint out of the can helps to write a good advertisement for Ramsay and for you.

A. Ramsay & Son Company
MONTREAL

Paint Makers Since '42

PAINT AND VARNISH REMOVERS OF QUALITY

When you buy remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance.

Our Licensees are the only authorized manufacturers of the SLOW-DRYING, QUICK-ACTING, NEUTRAL REMOVERS.

	Name of Brand:
SHERWIN-WILLIAMS CO. OF CANADA, LTD., Montreal.	"Taxite"
INTERNATIONAL VARNISH CO., LTD., Toronto.	"Klensa"
PRATT & LAMBERT, INC., Bridgeburg, Ontario.	"Expedite"
BRITISH AMERICAN PAINT CO., Victoria, B.C.	"Bapco"
MOUNT ROYAL COLOR AND VARNISH CO., LTD., Montreal.	"Scrape-off"
ROBERTSON CO., LTD., JAMES, Toronto.	"Robertson's"
PEARCY & CO., LTD., SANDERSON, Toronto.	"Devolite"
STEWART & WOOD, Toronto.	"Solvo"
MARTIN-SENOUR COMPANY, LTD., Montreal.	"Martin-Senour"
ADAMS & ELTING CO., Toronto.	"Adelite."

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT NO. 278,586."

Chadeloid Chemical Company

THE LAIDLAW BALE-TIE COMPANY, LIMITED
HAMILTON - ONTARIO

HARRY F. MOULDEN, Winnipeg, Man.
GEO. W. LAIDLAW, Vancouver, B.C.

One of the best known and most successful Hardware and Paint Businesses in Ontario—Cowan Hardware Co., London, Ont.

"A large number of our best customers had been going to our opposition for Sherwin-Williams Paints, while purchasing their other Hardware requirements from us."

Read the letter from the Cowan Hardware Co. below.

"FIFTEEN years ago we crossed the Rubicon from "No Man's Land"—where benzine, whiting and other dope were thrown together haphazard and handed out to a trusting public under the generic nomenclature of Mixed Paint—to God's Country — where pure lead, zinc and genuine linseed oil are thoroughly incorporated by experts and branded with that magic name, "Sherwin-Williams Paint."

"It must be confessed that it was with a good deal of fear and trembling that we first took up the Sherwin-Williams line, as previous to that time we had been handling a line of Paint which retailed at $1.20 per gallon, and to raise from that to $1.80 per gallon, which was the retail price of Sherwin-Williams Paint at that period, was some jump. I can well remember placing our first Sherwin-Williams Spring order, which amounted to about fifty gallons, and wondering if we were going to dispose of it. To-day our Spring order amounts to from five to seven hundred gallons, with specialties in proportion.

"We found shortly after putting in the line that a large number of our best customers had been going to our opposition for Sherwin-Williams Paint while purchasing their other hardware requirements from us, and also that as soon as the public knew we had the Sherwin-Williams line they started coming in larger numbers to our store, thus helping us to dispose of other lines and building up our business all round. Outside of the strong advertising which The Sherwin-Williams Co. does to help all their agents, there are several facts which impress us particularly about their goods, and the one which strikes me most forcibly is the uniform goodness of their products, for if the goods are not right no amount of advertising will hold them up forever; also the fact of there being a special preparation for each different purpose is one of the strongest helps an agent can have. In our case, we have made a special study of the Sherwin-Williams lines and are in a position to assist customers to choose the paint or varnish which is best suited to the purpose for which it is required.

"In concluding, we might just state that for honest and straightforward dealing and business courtesy we have found The Sherwin-Williams Co. in the front rank of manufacturers."

T. A. JONES, Manager
Cowan Hardware Co.

CALGARY **WINNIPEG** **SASKATOON**

—with a direct appeal to her

That's what **"Climax"** is to you—a proposition with a direct appeal to your best customer—the housewife.

The splendid results it gives, the way it will clean her wallpaper, her kalsomine; the way it removes dirt from her window shades and brightens up her home—all these make an irresistible appeal to her.

Stock "Climax" and have it on your counter—where it is easily seen. Explain to your customers that "Climax" has been in successful use in millions of homes for many years now.

And the profit and goodwill that it brings, will amply repay you.

Write to-day for prices.

Nearly Every Man Is Willing To Do His Duty—As He Sees It!

It may not be what he *should* do—may not be what he *could* do—either by himself, or his customers.

For instance it is actually costing many a dealer large sums of his own real hard cash to push the paint he is now selling.

Such dealers will never know how to stop the expense and make more money and do a finer business until they look round and get a new viewpoint on their business duty.

And we can't tell how Lowe Bros.' "High Standard" Paint proposition will lead you to "Big Business," as it surely will, until you ask us to.

To-day is the day to write us.

PERSISTENCY IN ADVERTISING

One stroke of a bell in a thick fog does not give any lasting impression of its location, but when followed by repeated strokes at regular intervals the densest fog or the darkest night can not long conceal its whereabouts. Likewise a single insertion of an advertisement—as compared with regular and systematic advertising—is in its effect not unlike a sound which, heard but faintly once, is lost in space and soon forgot.—*Printing Art.*

Cameron and Campbell, - Toronto

An old Windmill often marks the Beginning of Things

The old windmill that stood on the mouth of the River Don (since beautified and straightened), marked the beginning of a Queen City and the

Fortunes of the Gooderham Family

There may be such a thing as luck, but most of the modern successes in Business can be traced to quality of mind and muscle. Thrift always follows certain characteristic qualities. The business instinct of the man is often noted in the youth. The way the Gooderham business grew from a small beginning to its large proportions makes an interesting study to the business man.

This family sketch appears in the February issue of MacLean's, and the reading of these successes in business life carries real information. This series are well illustrated, and can be kept on the book shelves of every business man for future reference.

In this number you will learn of the reason of Wm. McMaster's rise to the directorate of the Bank of Montreal. Also your query as to the reason why the Mexican people are constantly in political ferment will be answered in an article entitled, "Why Mexico Boils Over." Other features, including Review of Reviews, combine to make this magazine an intellectual feast for the busy business man.

Every Canadian should be a subscriber to this national magazine. Send a postcard to Dept. "M" and have your name added to our subscription list.

Write to-day and commence with this number.

Subscription price $2.00 a year. **Single copies 20 cents.**

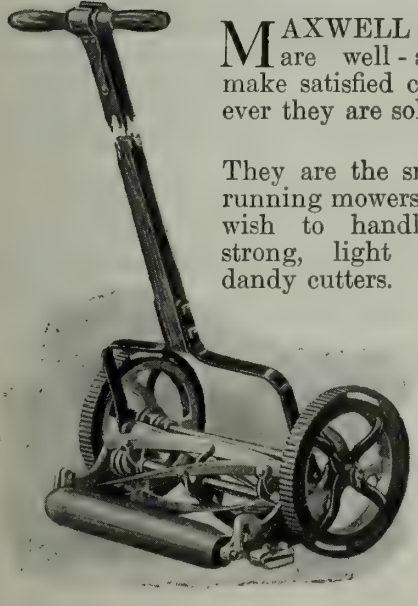
A "Sweeping" Announcement

We are now in a position to make shipments on our latest improved model "Cadillac" Sweeper. This is a hand-power combination carpet sweeper and vacuum cleaner. It will win instant favor among housekeepers who have not electric power in their homes. The

Cadillac Combination Carpet Sweeper and Vacuum Cleaner



is built lower, so that it will reach under beds, etc., and places where low obstructions would prevent ordinary sweepers from going. The top of the sweeper is constructed of the best 3-ply veneer wood, and the dust bag is also vastly improved over previous models and other makes. There is no duty included in the price of the "Cadillac" models, and consequently they sell at a lower figure than other makes which are imported into Canada. Write for full particulars of this new "business-getter" from the makers in CANADA.

WRITE TO-DAY FOR CATALOGUE

DAVID MAXWELL & SONS, St. Mary's, Ont.

"Finish" and Sales

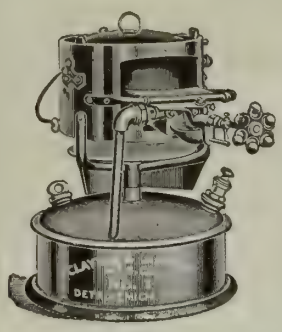
You know that bright, highly-polished finish—one of the hall-marks of the best-made tools? And that gentle blending of temper from palest straw to deepest blue, which bespeaks a hardness to take the keenest edge and a resiliency to resist the severest shock?

Do you appreciate that in this finish and these temper marks lies over 50% of the sales-possibilities of these tools? That, it is its appearance that decides most of your customers to take the better and more expensive article?

Insist on

British-American Wax Paper

wrappings on all the bright tools that your jobber and manufacturer ship you, and make sure of being able to fill your shelves with stock that has not had its greatest sales-argument blotted out by unsightly patches of rust.



Tell them about it to-day—explain it to them as we've explained it to you. They'll understand because, if they didn't appreciate the selling power that lies in brightness, they'd not bother to finish their products at all. And they'll concede when they know your wishes in the matter, for to keep you satisfied means —orders.

So get after them right now.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.50 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business, Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

There's a place for Everything

So goes the old proverb and it certainly was never so true as when applied to wire cloth. Awkward to cut, awkward to unroll, wire cloth can never be efficiently handled except on a **Bowser Wire Cloth Display Rack.**

The "Bowser" gives you a neat, convenient place to keep your wire cloth, where it is out of the way, yet easy to see and easy to get at.

Inaugurate a new period of store efficiency by writing for prices now.

Ross Rifle Luck

Users of "Ross" Rifles invariably comment on their good luck, because the power is such that judging of distance is scarcely necessary, so if game is **seen**, it can be **hit** and **bagged**. Dealers are wise to order early, as, despite increased facilities, it is difficult to keep up with orders.

Special Notice

The Barr Register is a bona fide Canadian invention, fully protected by valid patents. There is not and never has been any legal proceedings against above patents, notwithstanding all competitors' talk to the contrary. We make this announcement as we understand that some merchants have been imposed upon and induced to buy other account registers through such talk.

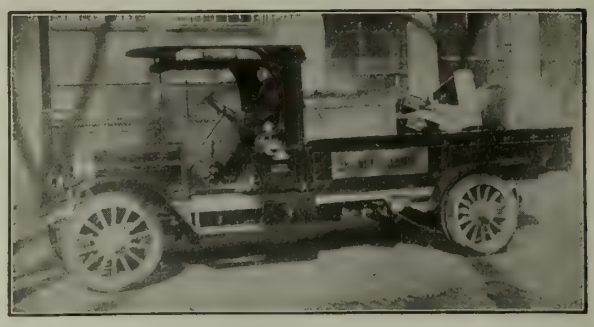
You Ought to Know at a Glance Just When Every Customer of Yours Has Reached the Limit in Credit

Introduce the Barr Account Register System into your Credit Business and you will have every purchase of every customer—Charged—"Posted" and the account totalled right to the minute.

And more than that, with every purchase a customer makes he receives his "bill" showing the full amount of his account—he knows and you know what he owes you—and just for that very reason the Barr Account Register System makes collections easier and proves the old commercial axiom: "Short Accounts Make Long Friends."

The Barr Account Register System

has proved by comparison of its many exclusive features with other account systems to be the best on the market; requires less space than others; most convenient and quicker to operate; saves bookkeeping; saves time and labor; increases the net profits; a success itself and means greater success to any merchant; built in two styles, the floor cabinet and the counter cabinet, and for any number of accounts from 100 to 1,000.
Instal the Barr System and make "1914" your best year.



Write to-day—ask for Demonstration and get more information without obligating yourself in any way.

What Motor Trucks Can Do For The Hardware Dealer

Mack Truck used by The James Walker Hdw. Co. Hardware Dealers, Montreal.

The motor truck will enable you to deliver goods over a much larger area than is possible with horse and wagon. Expanding your area expands your business.

A large number of your orders are received over the telephone. With the motor truck these orders can be given prompt attention and sent out C.O.D. Your customers will appreciate this ready service.

The motor truck will enable you to send to the wholesale house for goods that are wanted in a hurry and which are needed before the wholesaler can make delivery.

The motor truck will not require your attention on Sundays or holidays.

We are sales agents for the leading gasoline motor truck of the world—MACK.

Let us make a study of your business and recommend the kind of truck you should have, type of body, capacity, etc. If, after an investigation, we find it would not be profitable for you to operate a truck, we will not attempt to sell you one. Give us a chance to tell you about the Mack.

Ask us for Facts and Figures.

Our New No. 50
GENERAL HARDWARE CATALOGUE

was built with the intention of making it of the greatest assistance possible to hardware dealers in making up their

MAIL ORDERS

In this new book we have illustrated every article, and every illustration is exactly true to the goods it represents.

We have given our own list price on nearly all items, so you can at a glance figure the approximate cost to you without waiting to write us for a quotation.—This is of particular advantage when you want to close a sale for some item not carried in your stock.

When you have received this book

put it in a conspicuous place and encourage your customers to look through it.—This will sell goods for you that probably your customer would otherwise never inquire about.

We have the goods and we give the service

We supply Mail Order Blanks and Addressed Envelopes, and by the use of our new catalogue, it is our hope that you will favor us with an increased number of Mail Orders.

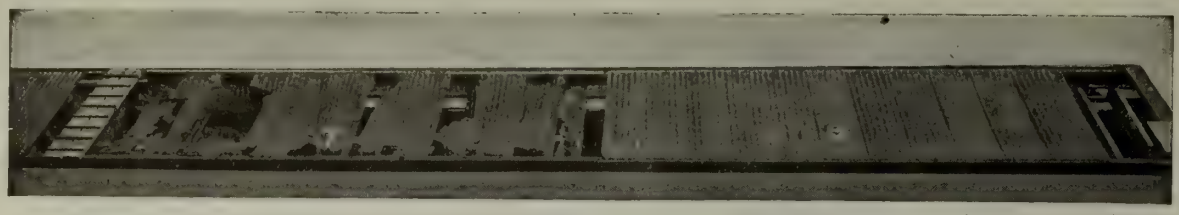
Every Man Is a Possible Starrett Customer

No matter what a man's occupation—machinist, clerk, draftsman, carpenter, or engineer there is some one of the line of Starrett tools that will interest him. Here is a good example of a tool that interests the carpenter, pattern maker, and amateur wood worker. It is the



Starrett Scraper

It will put a smooth, satiny finish on work that the plane leaves rough. It is useful on furniture or any fine wood work. The ball and socket joint permits working in cramped corners. Any of the eight cutting edges may be brought instantly into use by a turn of the joint and by changing the slip-on handle.

This tool retails for $1.00. Send for our big, new free catalog No. 20MA which shows our full line of mechanics' tools and gives prices and descriptions of them all.

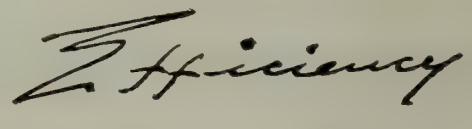
The "Demi-Tasse" of Life

The things of least importance are the things to which we give most concern. Things of least consequence are the ones about which we become most excited and most perturbed. About ninety per cent. of the average conversation of the average man and woman is devoted to the color of ties, the advisability of ending the meal with a demi-tasse, and as to whether ice cream is a better dessert than plum-pudding.

On the reading table of the average individual you find the "demi-tasse," the trash which has emanated from the mind of some idle dreamer who has never produced anything of importance and who has accomplished nothing useful. These books and their trivialities are discussed at great length and with great seriousness.

To the average man and woman the purpose of time is to discuss or repeat "what he said" and "what she said" at the card game or at the pink tea the day before. It seems to me that the most important part of the day is from six o'clock in the morning until ten, as these are the hours during which we who intend to do anything must find our balance and get our stride,—and these are the hours during which we not only accomplish our best work, but during which we prepare ourselves for the rest of the day.

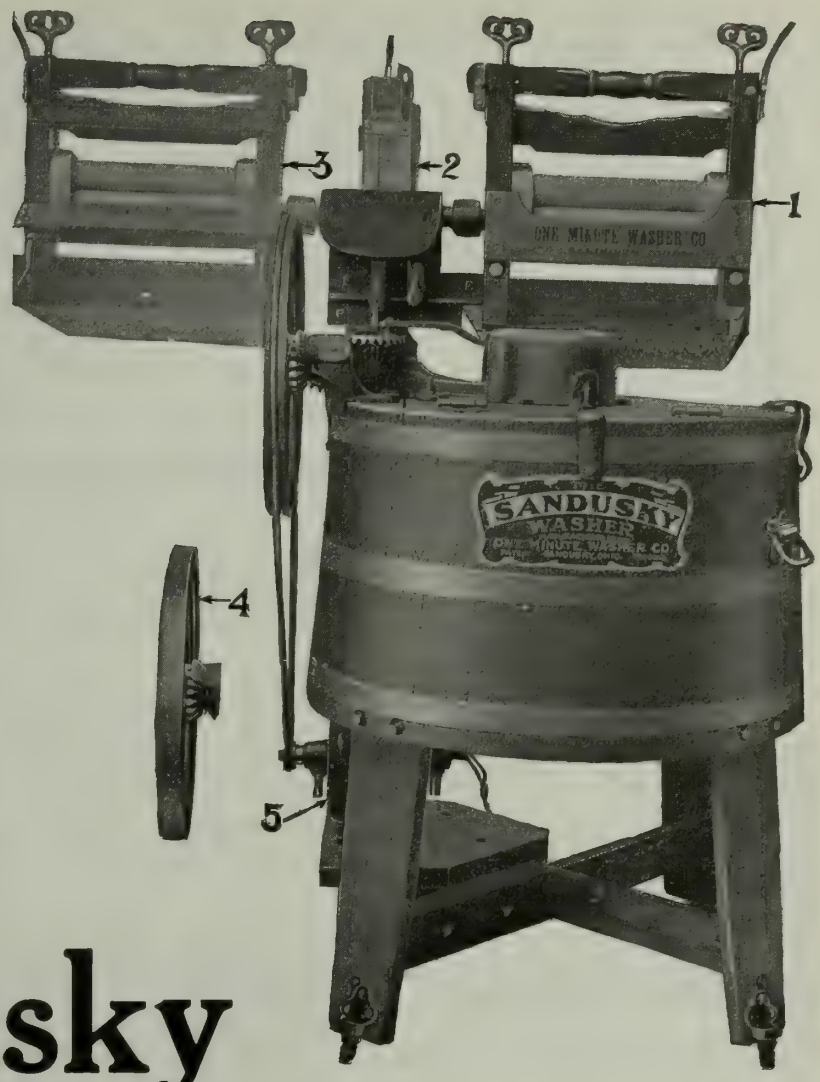
We are too much inclined to worry and vex ourselves about the little things, too much inclined to devote long and extended discussions to matters which do not really differ, to subjects which are of no concern. In doing this, we, of necessity, leave un-discussed and unstudied the important truths, the fundamental facts that are really worth while.



If someone makes a mistake or breaks a dish, that is not any reason why we should expend a hundred dollars' worth of energy in becoming angry. Yet it is such things as these that use up our power of production, that destroy our dispositions and that make the biggest and heaviest demands on our energies.

In looking over material among men—in searching for those who measure up to higher and better standards,—in attempting to secure the services of men who are alert, men with initiative, enthusiasm and originality, we are driven more and more to the conviction that most of us have wasted our lives in discussing the demi-tasse and wiggle-tail affairs of life.

There is nothing in the world so prevalent and so contagious as "the microbe of gossip," which is constantly at work cultivating the "malady of meddling," the "disease of delving into the personal business of our friends and our neighbors."



Nature has worked a million years, and possibly much longer, to produce a race of INDIVIDUALS, and during this process Nature has abandoned many of her schemes and has left many forms of animal and plant life to perish—and we will never produce the ideal race of men and women until we have produced a race of individuals who have a religion that consists of performing SERVICE instead of meddling and making trouble.

My heart goes out to the man who is lost in the work he is paid to do—who is conscious of nothing except that for which he has sold his services. Whether that man is welding a rivet in the structure of a sky-scraper, whether he is painting a tower, or working in tile, whether he stands at a saw in the mill or at a wheel in the shop, whether he is writing a book, or painting a picture—my heart goes out to that man whose mind, whose soul and whose religion are riveted through and to the thing he has selected as his part in the Scheme of Life.

These articles are copyrighted, and must not be reproduced in part or whole without the permission of The MacLean Publishing Company.

One Minute Please

"Time is money" — here's the Washer that saves it—saves the average family from $1.00 to $3.00 each week.

Saves time because it starts automatically—saves money because it saves labor — saves clothes also.

That's why the

Sandusky Power or Electric Washer

is getting into so many homes. It does the best work of any Washer made—bar none. A novel device permits wringer to be started, stopped, reversed, or swung to any position. Fig. 1 shows wringer in position to wring clothes from washer to rinse tub. Fig. 2 shows wringer swung 45 degrees to wring clothes from rinse tub to bluing tub. Fig. 3 shows wringer swung 90 degrees to wring clothes from bluing tub to basket. Fig. 4 shows flat pulley to be used for gasoline engine drive. Fig. 5 shows electric motor adjusted underneath tub.

In fact, this Washer offers every convenience. It is simple—has few parts and is perfectly safe because it has covered gear drive. Fully guaranteed.

We've got a mighty interesting proposition to make you. Send for full particulars.

The One Minute Washer Co.

SANDUSKY, OHIO, U.S.A.

From the Rough Stock to the Finished Drill in One Chucking

Wilt Twist Drills are made by a process that accomplishes at a single chucking the work that under ordinary conditions requires five or six separate operations.

It is a revolutionary process and marks a noteworthy advance in twist drill manufacture.

It is a process by which accuracy to a remarkable degree is assured.

A process by which a clean-cut, well-defined clearance is obtained.

A process which, coupled with hardening of scientific accuracy, makes Wilt Twist Drills the most efficient drills manufactured to-day.

Wilt Twist Drills are already in demand among manufacturers who appreciate Economy and Efficiency in shop practice.

They are the kind of tool that every wide-awake dealer ought to handle. The kind that makes both money and reputation for the dealer.

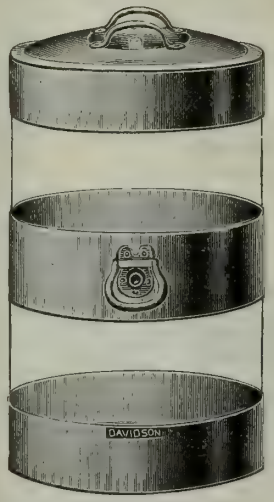
Far-reaching effects follow the wise policy of buying early, but when the demand comes, it is of paramount importance that the article you have for sale is of recognized first-class quality.

Patent applied for

McClary's

Railroad or Delivery Cans, with the "Samson" one-piece bottom and the *new improved* method of joining the breast to the body, makes them the strongest cans ever made.

Note in the illustration how the body overlap comes outside the breast —this prevents possibility of the can separating at this point. To ensure absolute rigidity, a half-circle piece of cast iron is placed between the breast and body.



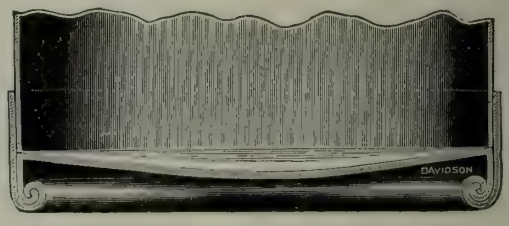
The "Samson" bottom is made from one-piece heavy sheet steel and pressed by the most powerful machine of its kind in Canada. There are no rivets to hammer in, no screws to tighten up, no hoops to adjust, everything smooth and sanitary.

Our new booklet explains everything—write our nearest branch for a supply.

McClary's

MONTREAL HAMILTON LONDON TORONTO CALGARY
WINNIPEG VANCOUVER SASKATOON EDMONTON ST. JOHN, N.B.

Davidson's Broad Hoop, Roll Rim Bottom Milk Can Trimmings.



Cheese Factory sizes, from 10 to 40 gallons.

In Complete Sets.

Comprising 1 broad hoop bottom, 1 cover, 1 centre hoop, 6 in. wide, 20 gauge; 1 broad top hoop, 1 pair cover handles, 1 pair side handles.

See how the outer and inner rims are rolled in and then riveted to bottom hoop.

The heavy rolled edge makes this bottom perfect and doubly durable, because it saves all strain on the can by allowing it to slide easily—and also saves wear and tear to factory floors and waggons.

Our bottoms are made concave, and drain to the centre, and are easy to wash out. They do not corrode like those that drain to the side.

Davidson's Trimmings are unexcelled for ease of making up, and our Patent Roll Rim Bottom makes a strong, neat and fitting completion to any milk can.

We also carry in stock Tinned Iron, cut to size, for Milk Can bodies, which we can supply promptly.

The Thos. Davidson Manufacturing Co., Limited

GURNEY-OXFORD

An Open Letter To The Hardware Men of Canada

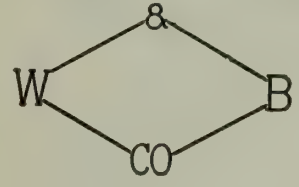
Gentlemen:—

That Convention week in Ottawa will mean much that is new—both in ideas and goods.

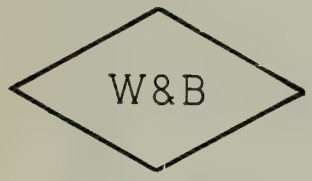
Our selling force have just seen our new products for 1914 and they all unite in saying that we have never shown so many betterments in one year. We all look forward to your visit to our booth in Ottawa.

We know that you will see in these new goods the centre of the entire stove situation and possibilities for the biggest season ever for your stove department.

Apart altogether from business we will be mighty glad to have the chance of meeting old friends and new. Make a point of getting to the Gurney-Oxford exhibit early in the Convention.



Yours faithfully,



The Gurney Foundry Co., Limited

"W & B" Machinist's Knife Handle Wrenches

Tools of Quality

Bear These Marks.

The Bite That Holds

The essential feature of a good wrench is the ability to bite and hold the bite.

There's nothing to "give" in a "W & B" Machinist's Knife Handle Wrench, therefore the bite is always sure.

The ever increasing sales of "W & B" Wrenches prove a change of selection of wrench buyers who have not been using "W & B" Wrenches.

Our new Catalogue, fully illustrated, mailed free on Application to wholesale Hardware Merchants.

North Bros.' Freezers

Comprise the largest line built in any one plant—Hand Freezers, Machine Freezers, Confectioner's Freezers, etc.

Whether you stock the LIGHTNING, GEM or BLIZZARD, you get a freezer that has made good more than a quarter century—one that has won its way into the hearts of the housekeepers by service that satisfies, backed by quality that creates confidence in both merchant and manufacturer.

The BLIZZARD, being a low-priced freezer, makes a good running mate with either the GEM or LIGHTNING.

Now is the time to place your order for shipment later.

Your jobber will supply you.

PHILADELPHIA, PA.

Out for the Dollars?

TRADE MARK J.M.T. REGISTERED A GUARANTEE OF QUALITY

Then you should certainly handle our line of Plumbers' and Engineers' supplies, for they are money-makers, every one of them. The quality and workmanship are above reproach. The prices are right and the service such as to insure deliveries in a manner satisfactory to suit your requirements.

We want your enquiries about any line you are interested in. A postal from you, will bring the fullest information from us.

The James Morrison Brass Mfg. Co., Limited

93-97 Adelaide Street West, TORONTO

Hamilton, Ont.

To Convince you of the High Quality of our Whips

we would like to take you through our factory so that you could see the material that goes into our whips and how it is put in—the care and pains we take to make every whip give the utmost satisfaction. But if you can't come, let us do the next best thing—send you our $15 **Special Sample Assortment** (F.O.B., Hamilton), made up exclusively of the best selling low and medium-priced lines, every whip of which is guaranteed to give absolute satisfaction to you and your customers.

Remember, this is sent on the definite understanding if they do not open up to your satisfaction, or better still, completely to your liking, they can be returned at our expense.

To those who send us an order NOW for SAMPLE ASSORTMENT we will send, no charge as a special premium, an imported hand-carved Malacca, a whip that retails at $3.50

Paint Time Is Coming!

SCARCELY two months from now we will be in Spring. Nature will awake and put on her new dress, and Man — simulating her example — will brighten up his home, will repair the ravages of winter on his property.

Paint time will have arrived!

And with it will come a big demand on the hardware merchant for materials—for paint and for *Brushes.*

Are you going to be prepared to make the maximum of profit, from this big demand, to gain the utmost good-will, from the busy paint-brush season?

To do so you must handle a line that not only pays you a good profit, but that gives your customers absolute satisfaction — 100% paint brush value in fact!

And that is the reason why you should sell the *Meakins Line of Paint and Varnish Brushes.*

Meakins Brushes are made of the best of materials by men who know how. Their proven quality and their capacity for giving satisfaction makes every sale an investment on which you will be able to draw interest in the form of repeat orders.

Have them in stock when the Spring rush comes along, and make sure of all the profit and all the good-will that's going around.

But get after us now for prices—there's not too much time.

Hamilton, Ontario

GENASCO
THE STANDARD OF EXCELLENCE
TRADE MARK REG. U.S. PAT. OFF.

The good-will creator and profit-maker

Genasco is a clean-cut roofing proposition for dealers to handle.

There is nothing about it to cause a "come-back" from your customers.

You can tell them plainly what Genasco is made of, for **we** tell **you**; and there's no secret about our making it of Trinidad Lake asphalt. It is nature's everlasting waterproofer.

Genasco

THE TRINIDAD-LAKE-ASPHALT
Ready Roofing

stands the test of time.

It backs up the arguments you present for it by giving long, dependable service.

The Kant-leak Kleet, which does away with cement and prevents nail-leaks, is another point that emphasizes this lasting service.

Genasco commands the customers' confidence and brings them back to you with re-orders.

It is a good-will creator and a profit-maker that you can't afford to let go by.

Order Genasco from your jobber. Write us for samples and full information.

ELEY

CARTRIDGES

We Load for the World!

¶ No Ammunition Manufacturer or **Loader** handles or loads a greater variety of shot gun powders than ourselves, consequently our experience of the styles of powders and the specification of loads which give the greatest satisfaction to sportsmen is second to none.

Eley Smokeless Shot Gun Powder (33 gr. class) is inferior to no other powder. 33 grains is the Eley Standard load, and that this will do the work more satisfactorily than heavier loads of other powders is one of its merits. This load gives results equal to 3¼ drs. of other bulk smokeless powders.

ELEY CARTRIDGES are shot in the snows of Canada, the heat of Central Africa and India, and elsewhere throughout the world.
SOLD BY ALL GUNMAKERS AND AMMUNITION DEALERS.

ELEY BROS. (CANADA), LIMITED, NORTH TRANSCONA, MAN.

Put Your Accounting Troubles Up To Us

You can learn, without cost or obligation on your part, just where and how your profits may be increased and what leaks and losses are draining your business of net earnings. Unless we find you need

With Only One Writing **THE McCASKEY SYSTEM** **The End of Drudgery**

in your business, we shall not ask you to buy. If you do need the McCaskey System, we'll tell you so and show where and why. There are a few businesses that cannot use The McCaskey System with profit. If yours is one of these, we shall be very frank and tell you so.

Make use of this opportunity to learn something more about handling accounts. We have collected information from thousands of sources that you will find extremely profitable to you. Put your accounting troubles up to us. Let us show you in figures, based on your own business, how you can add to your profits.

If we recommend the use of The McCaskey System to you it will be for one or all of the following purposes:

Saving time in handling accounts.
Keeping every account posted up to the minute.
Making it impossible to forget to charge.
Preventing misunderstandings with customers over their accounts.
Preventing errors in accounts.
Improving your collections.
Protecting you against loss of insurance in case of fire.
Placing an automatic credit limit on each customer.

Remember, unless we are convinced that you really need The McCaskey System we shall not urge you to buy. We'll put the proposition up to you.

The advice we give is free.
Write to-day—and for your convenience use the coupon.

ROGERS' Portland Cement

is an attractive proposition to all hardware dealers.

Concrete has become a building material as widely used as brick, stone and wood—its use no longer restricted to large buildings and foundation work. And in the future concrete will be **the** building material for everything from cottage to great office building.

The men who build concrete structures close to your store will buy their cement from you, if you're a **Rogers dealer.** First because they'll appreciate the convenience of getting fresh, dry stocks from you, instead of having to haul cement from the other side of the town—secondly because Rogers' Cement meets their architect's and engineer's specifications in all particulars — because **Rogers' Cement is standard.**

We will ship to meet your largest demand—promptly on your say so.

As long as you're not handling Rogers' Cement you're turning away good money.

So write us for particulars to-day.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Construction of a 15-inch Hydraulic Self-Propelling Steel Suction Dredge," will be received at this office until 4.00 P.M., on Tuesday, March 3, 1914, for the construction of a 15-inch Hydraulic Self-Propelling Steel Suction Dredge.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of T. H. Schwitzer, Esq., Mech. Superintendent, Birks Building, Ottawa, Ont.; J. L. Nelson, Esq., Supt. of Dredges, Vancouver, B.C.; J. S. MacLachlan, Esq., District Engineer, Victoria, B.C.; C. C. Worsfold, Esq., District Engineer, New Westminster, B.C.; J. G. Sing, Esq., District Engineer, Toronto, Ont.; Collectors of Customs at Kingston and Collingwood, Ont., and A. E. Dubuc, Esq., District Engineer, Montreal, Que.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, January 20, 1914.

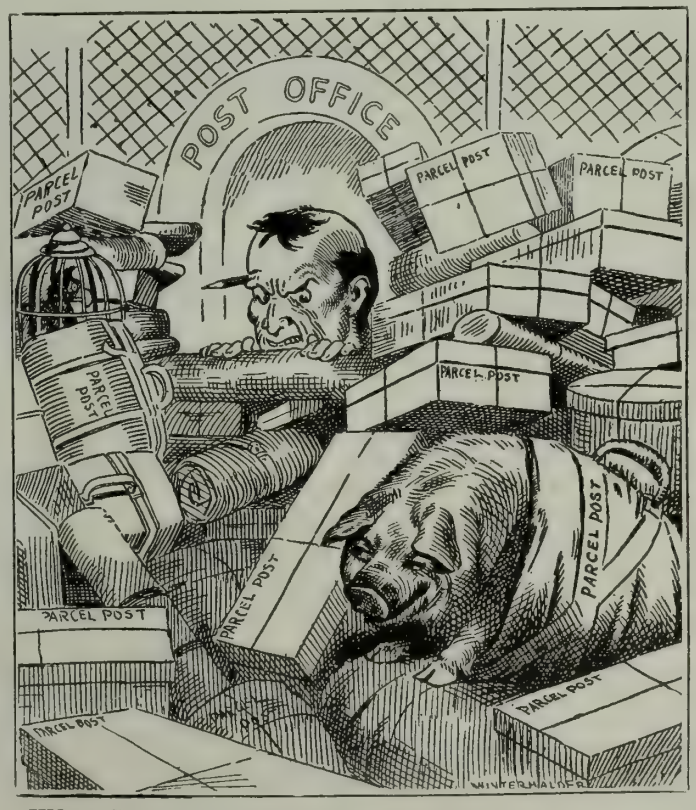
Vol. XXVI. JANUARY 31, 1914 No. 5

Announcement of Rates For Parcels Post

A Local Zone Within a Radius of 20 Miles—Eleven-pound Weight Limit—Six-pound Limit for the First Three Months—Rates for Provincial Zones.



ON February 10 the long-promised Parcels Post system will be inaugurated in Canada, according to the announcement just made by the Postmaster-General.

The service was promised for January 1st, but was held up by the inability of the Department to make a satisfactory arrangement with the railways to carry the service. The railways demanded a total of six millions. It is understood that an agreement was finally reached whereby the railways will be paid three millions a year for carrying all the mails, including those by parcels post.

A memo. issued by the Postmaster-General states as follows:—

"After considering carefully every phase of the parcel post question, the Postmaster-General has decided to adopt the zone system in fixing parcel post rates on account of the great area over which distribution has to be made in Canada and the comparatively sparse population of the Dominion.

"If a flat rate were fixed that would not entail too great a loss to the Department in carrying parcels from one end of the Dominion to the other, or even from the centre provinces to the extreme east to west, the rate would be too high for comparatively short distances or even between points within the same province, and the only practical plan appeared to be the zone system, under which the rates are graduated according to the distance a parcel will have to be carried.

What Canadian Postmasters expect from now on.

Provincial Boundaries.

"On account of the geographical position of the provinces of Canada, and their being approximately the same size when the three Maritime provinces are considered as one, it was found that the provincial boundaries would be the most convenient to adopt as the limits of the zones, and consequently the rates were fixed by provinces. This makes the system a very simple one, much easier to follow than the zone system based upon mileage alone.

"The first or local rate is 5 cents for the first pound, and 1 cent for each additional pound or fraction thereof up to four pounds, and 2 cents for each subsequent pound up to eleven pounds within a radius of twenty miles from the place of mailing, irrespective of provincial boundaries. This is to give local merchants an advantage within their own neighborhood, and also farmers and gardeners who can use the mails for sending produce to their local market at a low rate.

"A parcel of eleven pounds can be sent twenty miles for 2 cents a pound, and this should give the farmers a decided advantage in marketing eggs and other perishable matter. It will also give a decided advantage to the country merchant over the departmental stores. The farmer can send out goods in parcels up to eleven pounds to his customers at 2 cents a pound, while if the same goods were ordered from a departmental store or any other business concern more than twenty miles distant, it would cost about 5 cents a pound for postage.

"The next rate is fixed for the province in which an article is posted. For the first pound the rate is 10 cents, and each additional pound 4 cents. The cost of handling a one-pound parcel is approximately the same as that of two or three pounds, and consequently it was necessary to fix a minimum rate for the first pound considerably higher than the average rate for the additional pounds included in the weight of a parcel.

Method is Simple.

"For an adjacent province the rate of 10 cents for the first pound will apply, but for each additional pound an extra charge of 2 cents will be imposed, making the rate 10 cents for the first pound and 6 cents for each subsequent pound. Beyond the province adjoining the one in which a parcel is mailed, an additional 2 cents a pound will be imposed for each province that has to be crossed to the destination of the parcel up to a maximum charge of 12 cents a pound.

"The method of finding the rate on any parcel is extremely simple. Rate cards will be furnished to all postmasters and for distribution to the public, there being a separate card for each

province. On this card is given the amount of postage chargeable on any parcel up to a weight of eleven pounds within the province in which a parcel is posted and to all other provinces of the Dominion.

"When a parcel is mailed, the postmaster sees from the address the province to which it has to be carried, and a glance at this card shows him, without making any calculation, what the postage will be."

Basis of Rates.

The first rate is 5 cents for the first pound and 1 cent for each additional pound or fraction thereof up to four pounds, and 2 cents for each subsequent pound up to eleven pounds, within a radius of twenty miles from the place of mailing, irrespective of provincial boundaries.

The next rate is fixed for the province to where the article is posted. The first pound is to be 10 cents and each additional pound 4 cents.

For an adjacent province the rate of 10 cents for the first pound will apply, but for each additional pound an extra charge of 2 cents will be imposed, making the rate 10 cents for the first pound and 6 cents for each subsequent pound. Beyond the province adjoining the one in which a parcel is mailed, an additional 2 cents a pound will be imposed for each province that has to be crossed to the destination of the parcel, up to a maximum of 12 cents a pound.

Rates for Ontario.

The Ontario rates are as follows:—

To any post office within 20 miles—One pound, 5 cents; two pounds, 6 cents; three pounds, 7 cents; four pounds, 8 cents, and 2 cents for each additional pound up to the maximum of eleven pounds.

To any post office beyond 20 miles, but within the province—One pound, 10 cents; two pounds, 14 cents; three pounds, 18 cents; four pounds, 22 cents; five pounds, 26 cents; six pounds, 30 cents; seven pounds, 34 cents; eight pounds, 38 cents; nine pounds, 42 cents; ten pounds, 46 cents; and eleven pounds, 50 cents.

To any post office in Quebec or Manitoba—One pound, 10 cents; two pounds, 16 cents; three pounds, 22 cents; four pounds, 28 cents; five pounds, 34 cents; six pounds, 40 cents; seven pounds, 46 cents; eight pounds, 52 cents; nine pounds, 58 cents; ten pounds, 64 cents; eleven pounds, 70 cents.

To any post office in Saskatchewan or the Maritime Provinces—One pound, 12 cents; two pounds, 20 cents; three pounds, 28 cents, and 8 cents extra per pound up to the eleven-pound limit.

To any post office in Alberta—One pound, 12 cents; two pounds, 24 cents; and 10 cents for each extra pound.

To any post office in British Columbia—One pound, 12 cents; two pounds, 24 cents, and 12 cents for each extra pound.

During the organization period of three months an additional fee of 5 cents is to be charged on parcels mailed for local delivery by the carriers.

One of the important features of the new legislation is the zone system adopted, which provides for a special rate lower than the provincial rate when a parcel is sent to a point within a radius of 20 miles from the office it is sent from. The purpose of this is to afford some protection to the small merchant against his competitor in the cities. It also takes into account the "short haul" question.

LOCAL ZONE SYSTEM.

The territory around every postoffice within a 20-mile radius will constitute a local zone, within which local rates will prevail. These local zones will overrun Provincial boundaries wherever the postoffice is located within 20 miles of such boundaries.

The local zone rate is expected to be of considerable benefit to merchants in small centres, who will thus have the advantage of posting at a lower rate than that paid by the large stores of the big cities beyond the 20-mile zone. The local zone rates will be:

	Cents.
One pound	5
Two pounds	6
Three pounds	7
Four pounds	8
Five pounds	10
Six pounds	12
Seven pounds	14
Eight pounds	16
Nine pounds	18
Ten pounds	20
Eleven pounds	22

There will be seven major provincial zones, the Maritime provinces comprising one. In sending a parcel across the continent there will be an additional charge for each additional zone or province through which it passes.

Eleven Pounds Weight Limit.

Eleven pounds is the weight limit under the new system. It will be noted that after four pounds the rate increases by 2 cents per pound. For the first three months of the parcels post the Department will accept parcels up to a six-pound weight only. This is to provide against a rush of business at the outset before the facilities for handling the parcels post have been fairly tested.

In connection with the regulations regarding the system there will be full instructions for farmers and others regarding the methods of sending farm produce, such as butter, eggs, vegetables, and fruit.

The parcels post rates will be, of course, very materially lower than the prevailing express rates on parcels of corresponding size.

Is U. S. System Top Heavy?

Canadian Post Office officials who are pushing forward our new parcel post system had better beware lest it become a millstone about their necks.

Nothing could have been more or better advertised than the system which our friends in the United States adopted a little over a year ago. It came in with a flourish of trumpets, so to speak, and during 1913 a C.O.D. system was added and advances in weight limits were made with the recklessness of a woodsman when he reaches the city in the spring. Now the Post Office Department at Washington is faced with a likely deficit.

Without Thought of Expense.

A writer on the subject in a United States trade newspaper states that "evidence continues to accumulate that the parcel post system was installed without thought as to its expense to the people at large or its injury to private enterprise, and that a deficit of unknown proportions may yet be faced by the Post Office Department to keep the system going, and that this deficit will be an annual and growing one." In his report just made public, the Postmaster-General of the United States claimed that there was a surplus of $4,510,650 in the running of the Post Office Department. Notwithstanding this, on December 19 last he asked Congress for an emergency appropriation of $1,000,000 to keep the system running until June 30, 1914, the end of the fiscal year. Congress has already granted an emergency appropriation of $600,000 to support the system, and it is a matter of conjecture how many emergency appropriations will be necessary before Congress has information as to just what the system is costing, and paying.

Railroads to Be Paid Yet.

"While the department," adds the writer, "isn't accused of a deliberate desire to mislead the public in regard to the exact status of the matter, nevertheless all of its reports and comments give that impression. Postmaster-General Burleson's report is based on the fiscal year which ended June 30, last, and yet it is admitted that from January 1st, the

Hardwaremen Can Increase Sales of Glass

Farmers Should Buy More Glass—Many Farm Buildings Are Not Sufficiently Lighted—Advantage of Light in Barns—More Sales, More Profits.

GLASS is a commodity you will find for sale in almost every hardware store.

There is always a regular and steady demand for glass. Sometimes, when a town or city experiences a building boom the demand for glass is stimulated; storms often cause considerable damage, which results in the demand for glass being more pronounced.

Taken on the whole, however, there is no very great apparent effort on the part of hardware merchants to educate the public, especially farmers to the advantages of using more glass.

Along this line there is great room for missionary work (especially in country districts), which will be mutually beneficial to merchants and glass-purchasers alike.

In this article we will deal with farmers particularly, and show why the farmer should purchase more glass than he generally does.

It is true that we often see a convenient, well-built barn, with the most up-to-date fixtures, shut almost in darkness. Three times the number of windows that have been installed could quite easily have been put in, giving the barn a better appearance, improving the health of the live stock, and increasing the pleasure of those working inside.

A well-built, convenient barn, almost shut in darkness.

The value of light is inestimable, and plenty of light is one of the first essentials in satisfactory stabling.

Light is essential to cleanliness and good health on the part of attendants and live stock.

Dirt and disease lurk in the dark corners of buildings or stables, and a generous supply of sunlight entering a building is of inestimable value to the stock stabled therein.

Proper sanitation is absolutely necessary in any building used for stabling live stock. An authority on matters of this kind recently stated:—

"To let in the sunlight generously is a long step towards proper sanitary conditions. Without touching the question of germ-destroying, the dirt of litter, manure, fodder, and floating dust accumulating in cobwebs, will certainly escape notice in the corners and crannies of a dark stable. A periodical housecleaning in the cattle or horse stable is no substitute for a daily cleaning, which is most likely to be done when the light is turned on. The second point in favor of good lighting is that it saves labor, a great deal of vexation and, of course, time. With one man trying vainly to do two men's work, as is the case on thousands of Canadian farms, all needless and wasteful steps and efforts must be eliminated. Efficient work cannot be accomplished in dark stables which tend to waste feed and lessen gains in meat as well as in milk production. Therefore, we say, in planning to remodel the old stabling during the coming season, provide something entirely new—make sure that there are plenty of convenient windows. The light will flow in if given a chance. Do not keep it out. It is one of the stockman's best friends."

Government publications, farm journals, etc., are going thoroughly into this matter at the present time, advising farmers, when building new barns, or when re-modeling old ones, to make ample provision for an abundant supply of sunlight for the interior of their buildings.

The advantage of using plenty of glass are being pointed out to a more marked extent than ever before.

The subject is a live one at the present time, and it appears as though the present would be a good time for hardware merchants to take a hand in the matter.

If a general movement can be started among the farmers, whereby they will re-model their insufficiently lighted barns, in order to admit more light, there will be a decided increase in the sales of glass, made by retail hardware merchants.

Hardware merchants should advocate the use of large quantities of glass in all kinds of buildings. That large firms recognize the value of the sunlight is evidenced by the many large new buildings which we see on every hand, into the construction of which glass has largely entered.

If you inspect the premises of any successful breeder of live stock, who goes into the business on a large scale, you will find that in the construction of the buildings, an abundance of glass has been used.

There is a splendid opportunity presenting itself at the present time, which if taken advantage of, will reap a harvest of glass sales for hardware merchants, especially those located in farming districts.

The season of the year is rapidly approaching when many new barns and stables will be erected, or old ones remodeled. Why not get after the prospective builders and endeavor to get them to use sufficient glass to ensure an abundance of light for the interior of their buildings.

Supposing through a little effort on your part, you could double your sales of glass to farmers this year, would it not be worth while?

MANUFACTURING METAL COILS.

The Canada Metal Co., Ltd., have recently installed 5 new additional rollers to be operated in the manufacture of several kinds of foils, viz., tinfoil, leadfoil, tea lead and electrotypers' solder, this will mean they have also to increase their motive power to the extent of 200 horse power.

It is claimed the new addition to their plant will enable them to execute all demands made upon them for this material.

HARDWARE AND METAL

VOL. XXVI. No. 5 Toronto, Canada, January 31, 1914 Two Dollars per Year

Take Advantage of New Rates

MENTION was made in the last issue of important reductions in express rates which had been announced through an order of the Railway Commission. It is highly important that merchants should familiarize themselves with the new rates, which become operative on February 1. For the benefit of readers, the new rates will be recapitulated:

In cases where the rates per 100 pounds are 90 cents, the reductions in the present minimum charges are: 2 pound parcels, 5 cents; 3 pounds, 15 cents; 4 pounds, 20 cents; 5 pounds, 15 cents; 6 and 7 pounds, 25 cents.

Where the rate per 100 is a dollar, the reductions in the minimum are: 2 pounds, 5 cents; 4 pounds, 15 cents; 5 pounds, 10 cents; 6 and 7 pounds, 20 cents.

Where the rate is $1.25 per 100 the reductions in the minimum are: 2 pounds, 5 cents; 3 pounds, 10 cents; 4 pounds, 15 cents; 5 pounds, 10 cents; 6 and 7 pounds, 15 cents.

In cases where the rates are $1.50 per 100 the reductions are: 2 pounds, 5 cents; 3 and 4 pounds, 10 cents; 5 pounds, 5 cents; 6 and 7 pounds, 10 cents.

Where the through rate is $1.75 per 100 there is in the case of 2, 3, 4, 6, and 7 pound shipments a reduction of 5 cents in the minimum charge.

The Business Outlook

IT will perhaps be in order to briefly review some figures relating to the year 1913—figures which go far to prove that conditions were not so bad for all and, what is more to the point, which point with unmistakable directness to the bright prospects ahead.

"The financial stringency," says a writer in a current periodical, "appears to be preparing for departure." He is not over-stating the facts. The stringency has gone. Money has "eased up" very considerably. The prices of securities are going up. There is a more generally active tone on the money market and even the stock exchanges are beginning to show signs of activity, a sure sign of a more free circulation of the medium of barter. And business is showing the same hopeful signs. An improvement, slow but sure, has set in. By the middle of the summer, business will be headed toward a new plane of activity.

A few figures will demonstrate how fundamentally sound conditions were under 1913. Dairy products of the prairie provinces brought in about $5,000,000, or nearly $2,000,000 more than in 1912. Live stock in the same section approximated $23,000,000, or an increase of nearly $8,000,000 over the preceding year.

The output of the iron and steel trades showed an increase of 10%. The earnings of the railways showed advances ranging from 4½% to 12½%—a significant indication of national growth. Canada's cereal milling capacity increased to 121,000 barrels per day, which is about 10,000 barrels more than the 1912 capacity.

Approximately speaking, Canada's external trade was $200,000,000 greater during 1913 than for the preceding year and this, so the statisticians tell us, is the greatest increase in any one year in the history of the Dominion.

A few other facts will serve to prove the fact that 1913, though a year of uncertainty and of hampering financial tightness, was nevertheless a year of industrial activity. Some 4,000 miles of new track was laid. The population increased by nearly half a million, the immigration figures showing a total influx of 48,812 during the year. The crop figures showed very large increases. Building permits were large in most centres. Bank clearings were large. In Winnipeg alone they reached a total of $1,634,977,237.

The present year is opening with splendid promise. The gradual improvement in conditions, which was predicted, is being felt. Each week sees a brightening of the business horizon and a larger volume of trade. That this gradual process of development will continue for several months is the general belief; and after that, there will be no limit to the measure of the prosperity that will be felt.

From the standpoint of the grocery and allied trades, business prospects continue bright. Wholesalers in provisions, fruits and fish and millers are invariably inclined to take a more hopeful view and there appears to be every reason for an average winter and a good spring trade. The majority of the large food-stuff manufacturers certainly had a good year in 1913, despite the fact that many retailers adopted a policy of retrenchment from a buying standpoint, preferring to get rid of the stocks on hand rather than add greatly to them. Now, however, these dealers are in the market again, and it is probably this that accounts mostly for the extent of the passing trade.

Parcel Post At Last

THE official announcement was made in Ottawa on Wednesday of the present week that arrangements for the Parcels Post system had been completed, and that it was hoped to have the system inaugurated by the tenth of February. Complete details of the rates were given out.

The most satisfactory feature is the fact that the promise of a local zone has been fulfilled. A low rate will apply on all goods shipped from any postoffice to a point within a radius of twenty miles. The rate within this local zone is on practically the same basis as that adopted for the first zone in the United States. The next step in the system is the establishment of provincial zones. In other words, one rate will apply on all goods shipped to any point in each province beyond the 20-mile radius of the local zone. Thus it will be possible to ship goods from Toronto to Sault Ste. Marie for the same rate that would apply if the shipment were made to Hamilton. Charges will be made in proportion to the zones traversed. The local zone will be maintained irrespective of the bounds of the provincial zones, however. Thus it will be possible to send from Ottawa over the provincial lines into Quebec at the local rate for all territory within the twenty-mile radius.

The rates are explained elsewhere in this issue. Whether the advantage of the local zone will prove sufficint protection to the local merchant against the mail order houses is a matter which time alone will tell. That the local zone will enable the merchant to give his customers a better service is obvious, however. If this advantage is energetically followed up, it would seem possible for the retailers to hold their own. That the new system will serve as a stimulus to mail order buying is certain, however, and the retail body will have to be thoroughly wide-awake if the balance is to be maintained.

The interest of the retail merchant would suggest, therefore, that immediate steps be taken, to find the means of utilizing the lower rate on the local zone. To get in touch with outside customers is now the most pressing duty of the merchant.

Get them interested in the service YOU can give them via Parcels Post.

Everything Ready For Hardware Week

WHEN it became known last week that Howick Hall in Ottawa, where the hardware convention and exhibition were to be held, has been badly damaged, some uneasiness was felt as to the possibility of suitable arrangements being made at so late a date for a new hall. This fear was allayed by the information given in last week's issue of Hardware and Metal. With commendable despatch the officers visited Ottawa at once and completed arrangements for new quarters. Secretary Tobin has sent out notices of the complete rearrangement of the plans, and is able to promise that everything will proceed as smoothly as if nothing had occurred to make the change of location necessary. Machinery Hall has been secured and provision made for the satisfactory heating of same. A new plan of the booths has been drawn up, which give the exhibiting manufacturers practically the same locations as previously allotted to them. Satisfactory arrangements have been made for the holding of the convention. Altogether the utmost credit is due for the rapid manner in which the plans for "Hardware Week" have been reconstructed to allow for the change of hall.

The programme for the convention and exhibition as announced in Hardware and Metal, will be adhered to in its entirety, and the visiting hardwaremen will have the most instructive and entertaining week yet provided. The officers report that they are receiving evidences on every hand of the interest that is being shown in the trade and they are anticipating a large attendance. Word comes from Quebec and the East that a large representation will be on hand. The proceedings will thus have a double interest through the meeting of hardwaremen from Ontario and the East.

Members of the Ontario association who have not yet decided to take in the trip should make up their minds at once. Every hardwareman should be on hand, as the trip will prove a profitable one from every standpoint. The invitation to attend is extended just as cordially to merchants who do not yet belong to the Ontario Retail Hardware and Stove Dealers' Association.

Editorial Briefs

NO TIME was lost in making new arrangements for Hardware Week at Ottawa.

* * *

GOOD SALESMEN should remember that there are comparative and superlative forms——better salesmen, best salesmen.

* * *

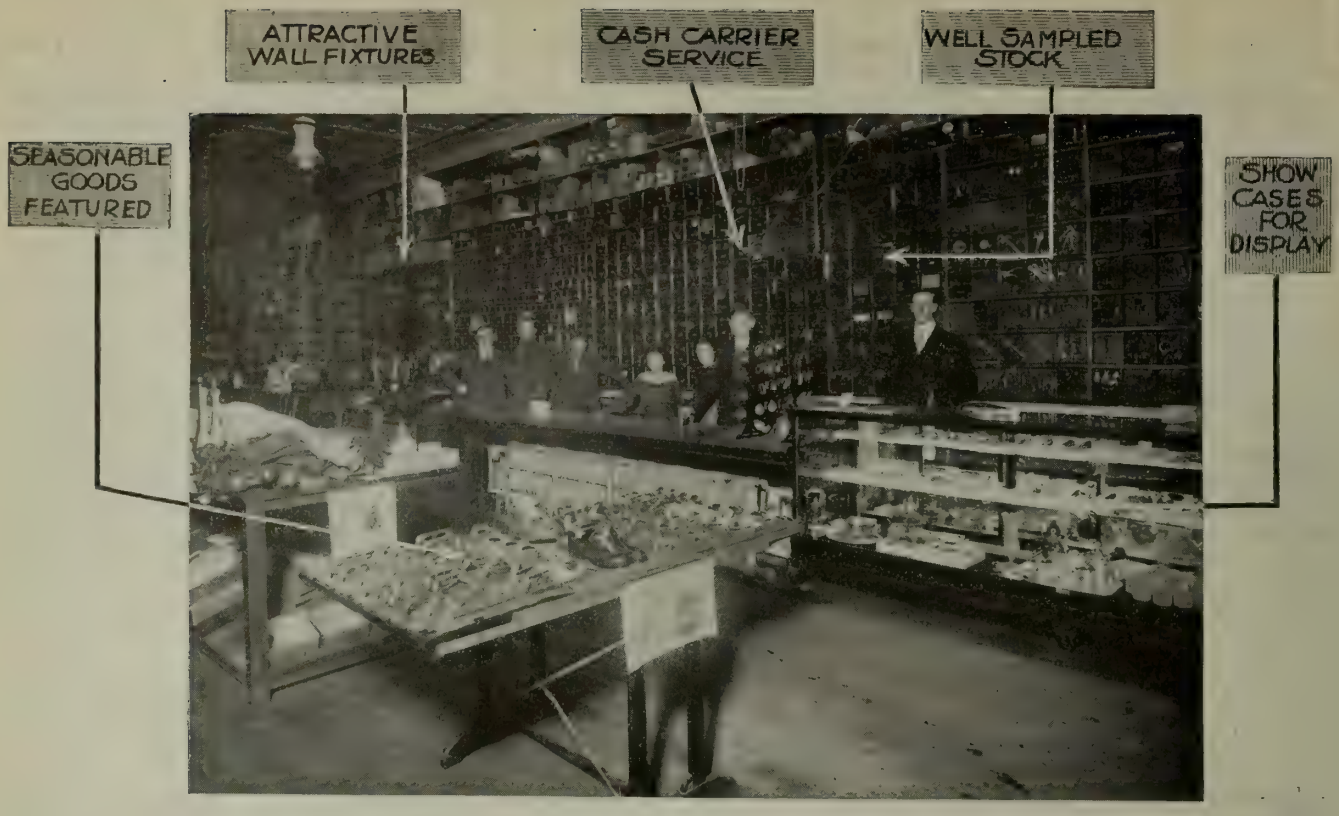
WHAT WE need is not more things, but more thoughts, says Mike Kinney, the sage philosopher of the hardware trade. Guess Mike is right at that.

* * *

THE CHANCE to visit the capital city with its countless points of interest and its historic associations, at the low rate obtainable during hardware week, is too good an opportunity to miss.

THE FIGURES quoted in the business outlook lead one to think that 1913 couldn't have been such a bad sort of a year after all.

* * *



IT IS now time to advertise the new facilities for shipment by mail within the local zone. Take advantage of Parcels Post.

* * *

PARCELS POST at last! Let us trust that like many other dreaded things it proves less dangerous in reality than in anticipation.

* * *

IN THE meantime those city and country town dealers who have been preparing for the coming of the new system, should go ahead with their plans.

Interior view of Christie Bros.' store.

Progressive Principles of Northern Store

A Brief Summary of the Merchandising Methods of Christie Bros., Owen Sound—Quality is the Main Plank of Their Policy in Selling Tools—Complete Shaving Supplies Carried—Outside Salesmanship Found a Profitable Venture.

WHY is it that the store with the best location and the best facilities for trade does not always command the biggest share of the trade? It is because there is something needed besides a good location and the best facilities—something that is found in the proprietor himself and in the personnel of his staff.

A hardwareman doing business in a city of about 25,000 population worked up a magnificent business in a stand on a side street; and a rather dingy old place it was. It is not intended to imply that strategic location and attractiveness of store are not necessary to building up a good business. They are of the utmost importance. The hardwareman in question would have doubled his turnover undoubtedly if he had moved out of his dingy premises to a store better suited to his requirements and more likely to attract trade. The fact that he was able to do a large business under the hampering conditions of a poor stand was proof that he possessed certain other assets. He was, as a matter of fact, a particularly keen buyer and he insisted on his clerks being thoroughly informed with reference to the goods handled. He advertised well. In every respect he was a live and aggressive merchandising man with the one exception—his failure to perceive the necessity for an attractive, spacious and central stand. This failing, it may be explained was due to a disinclination to leave a stand where he had "made good." He was a little sentimental about it, perhaps a little superstitious. He was afraid his "luck would change."

However, the fact desired to be pointed out is the very important one that success in business depends primarily on the adoption and maintenance of proper principles and the thorough understanding of the merchandising possibilities of the stock.

All this by way of introduction of something about a store where good ideas have been worked out and maintained—merchandising ideas of the most practical order. Two views of the store are presented herewith and it may be explained by way of further introduction that it is an attractive-looking establishment; occupying a good location on the main street.

Christie Bros., of Owen Sound, are live hardwaremen and occasion has been taken in the past to refer in Hardware and Metal to some of the aggressive methods they have adopted. A strong plank in their merchandising policy is their energetic exploitation of the principle of outside salesmanship. They have for some years past followed the idea of having members of their staff call on customers in the country sections, keeping in touch with them in regard to their needs in hardware lines. The farmer is a busy man, and does not always find it possible to get into town when he discovers that he needs a new axe or some repair for his instruments. The salesman who cultivates the habit of dropping around to see a number of agricultural customers at intervals is certain not only to book a good share of immediate business but to get into line for future orders as well.

However, it is not necessary to enter into a defence of outside salesmanship. Suffice it to say that Christie Bros. have found the plan an eminently successful one; a fact which was developed at greater length some time ago in the columns of Hardware and Metal.

The first illustration of the store shows the shelf hardware and tool department, with a partial view of the central portion. D. A. Christie, W. L. Brown and part of the staff are shown in this view.

Particular attention is paid to the tool department which is not only a profit-

able line for every hardwareman, but is, or should be, one of the bright spots in every hardware store. Christie Bros. believe that it is one of the lines where quality should be used as a selling point, first, last and always. They carry quality lines and in every case endeavor to convince customers that a quality tool is the cheapest purchase that could be made. Another feature of their policy in this regard is that they have been ready to cheerfully make good any tool which proves defective. The word "cheerfully" used in this connection is of sufficient importance to merit a little study on its own account. It is all very well for a merchant to advertise "money back," but if he accepts returned goods with a bad grace and hands over the money with the cheerful courtesy of a miser paying his income tax, he is certain to antagonize the customer almost as much as if he had refused to refund the purchase price. Nothing is more liable to turn a customer into a regular friend and visitor than the acceptance of a returned article with complete cordiality. The customer feels a strong inclination to return. He realizes that he can always count upon the fairest of treatment in that store.

It is interesting to note that some of the drawers in this section which are of galvanized iron with wooden ends were made by the boys in the shop during a quiet season, the wooden ends being purchased from a fixture factory. There is a tool case in the store which was built by one of the clerks.

Before passing to the second view of the store, attention should be called to the good use made of the central portion. Tables and racks are placed across the entrance for the display of seasonable goods. Prices are quoted and the goods are changed often so that the lines displayed in this way attract much attention. Sales are made in this way in very satisfactory bulk.

The second view of the store shows the cutlery, sporting goods and paint departments. The "quality" idea is also firmly imbedded into the merchandising policy of these departments. The motto "Everything for the man who shaves himself," has been adopted and a pretty complete assortment of razors, safety razors and strops is carried. In addition shaving soaps, powders and sticks are carried in stock. The motto is always given a prominent place in store advertisements and in window trims where razors and shaving accessories are shown. The result has been felt in a very large trade in these lines.

The sporting goods department is conducted on a basis of close co-operation with the athletic interests of the town. J. B. Morrison, who is shown in this picture and who has been with the firm for the past seven years, has charge of the department. He keeps closely in touch with the athletic and sporting organizations and is persona grata with the buyers of supplies. The store has made a specialty of supplying sporting organizations with outfits complete, including uniforms. The stock carried is very complete and includes a bicycle agency.

Christie Bros. do a large business in mixed paints. They have found it pays to push paints, and are installing a paint counter which will be entirely separate from the other counters and will be equipped with racks for holding paint brushes, color-cards, etc.

Finally, they are firm believers in advertising. They use large space and brighten up their copy by the use of plenty of illustrations.

RETAIL MERCHANTS ORGANIZE.

A branch of the Dominion Retail Merchants' Association was recently organized in Cornwall, Ont., with the following officers:—President, Thomas J. Donihee; First Vice-President, R. G. Relyea; Second Vice-President, S. W. Jacobs; Secretary, W. Hawthorne, Treasurer, Chas. W. Kyte.

R. C. Doyle of Ottawa and T. J. Maher of Toronto were present and explained the advantages to be derived from organization.

The association proposes to ask for legislation allowing municipalities to pass by-laws imposing a business tax on mail order houses in the larger cities which do business in places other than their headquarters.

Sporting goods and cutlery department in Christie Bros.' store.

Retail Hardware Advertising Methods

There is a Marked Tendency Toward the Use of Illustrations—Retail Hardware Ads. Are Improving — Methods Adopted by Various Hardware Firms.

HARDWARE and Metal has for a long time been advocating the use of illustrations, by hardwaremen, in preparing their newspaper advertisements.

Many special articles have appeared in Hardware and Metal, pointing out the advantages of using illustrations, and giving the experiences of merchants who have made a success of their advertising in newspapers.

Advertising suggestions have also appeared in Hardware and Metal. These suggestions have been gotten up in such a manner that the hardware merchant, simply had to clip the suggestions, and after making a few minor changes in the price quotations, turn the copy over to his printer to run in the local newspaper.

Canadian hardware merchants have not been slow in taking advantage of this service, and advertisements suggested by Hardware and Metal have been run in daily newspapers in all parts of the country.

It is indeed very interesting and pleasing to see the way in which hardware merchants have taken up the advertising methods suggested by Hardware and Metal.

Reproductions and criticisms of advertisements, many of which have appeared in this paper, have also been a great help to merchants in solving their advertising problems.

One of our most successful hardware merchants who advertises extensively stated as follows:—

"The illustrations are the life of the advertisement. Have good illustrations and the people will not overlook the reading matter."

In this article we give the names of some hardware firms, using illustrations extensively in their newspaper advertising. There is at present a strong tendency in this direction.

On the opposite page is shown three recent advertisements of Canadian hardware firms. Two of these advertisements occupied a large space in the newspaper, although the firms are located in small towns.

Glover's Hardware is located in the town of Aylmer, which has a population of approximately 2,500 people. In this advertisement several illustrations are used. The heading "Saturday Savings at Glover's Hardware," is similar to headings used by several other Canadian hardware firms. The main idea is to secure a large share of business on Saturday, which is the chief market day in many of our towns and cities.

A better balance could have been obtained by placing the larger cuts near the bottom of the ad, and having the lighter reading matter at the top.

A better description of some of the articles listed, would also have made the ad more interesting. Too many styles of type have been used, it would have been much better to use a uniform style of type throughout.

The advertisement has many good points, ad is a very creditable ad for a hardware firm in a town the size of Aylmer. The quoting of prices is also a good feature in Glover's ad.

Brace, McKay & Co., are located in Summerside, P.E.I., a town with a population of approximately 3,000. This ad occupied a space 7 x 15 inches, and stood out prominently among the other ads in the newspaper.

DEFINITION OF ADVERTISING.

"Advertising is intentional publicity. Good advertising is intentional publicity that is striking, attractive and convincing; for if not striking, it will not be noticed; if not attractive it will not interest; if not convincing it will not sell the goods—and if it does not sell the goods it is not good advertising."—W. H. Hate.

In this ad, tools are chiefly featured, prices are quoted and illustrations are used.

A rearrangement of the cuts and reading matter would give the ad a more even balance. In this ad, there is a big difference in the styles of type used. A more uniform style throughout would have been better.

The ad would no doubt bring results for the firm. It was the most noticeable ad. in the paper in which it appeared, and any person interested in any of the lines illustrated would study the reading matter.

This advertisement also goes to show the tendency which exists to use illustrations in advertising in the newspaper.

McGee & Lagrow are located in Sterling, Ont., a town of about 900 population. This advertisement is featuring one line, horse blankets. The illustration used here adds greatly to the value of the advertisement. The quoting of prices is also to be commended.

The first paragraph of reading matter could have been made more attractive and effective, by placing it at the top of the ad, and having the word "hardware" below the firm name. Although horse blankets are being specially featured, the word "hardware" is the most prominent in the ad.

There are many other hardware firms using illustrations in their newspaper advertisements, such as:—

Bridge Bros., of Thessalon, Ont., a town with 1,500 population, are running weekly ads under the heading of "Hardware News." These ads always show illustrations, with descriptions and prices of goods.

Purdom Hardware Co., London, Ont., run a weekly ad under the heading "Saturday Savings at Purdom's Hardware." This ad usually appears in Friday's paper and features goods for Saturday selling. Large numbers of illustrations are used, description of the goods are given and prices are always quoted.

Russill Hardware Co., Toronto, is one of the pioneer firms, in extensive retail hardware advertising. All Russill ads are noticeable by the large number of illustrations used.

Many other retail hardware firms are using illustrations extensively and there is a decided tendency in this direction.

TO CONSIDER BULK SALES ACT.

There will be an important meeting held on Monday evening next in Toronto, between representatives of the Canadian Credit Men's Association and of the retail trade, to discuss the merits of the proposed Bulk Sales Act, which will likely be introduced again into the Ontario Legislature this coming session. It will be remembered this bill was introduced last session by Mr. McMaster, M.P., but did not go through on account of objections from the R.M.A. The meeting is being held on Monday night with a view to coming, if possible, to a common understanding regarding the terms. Many retailers favor the principle of the bill, but want to be carefully protected from the standpoint of the terms.

Instructions For Hardwaremen Attending Exhibition and Convention

Exhibition and Convention to be Held in Machinery Hall — Special Rates on Railways and at Hotels—Plan of Exhibition and Convention Headquarters.

THE officers of the Canadian Hardware Manufacturers' Exhibitors' Association and the Ontario Retail Hardware and Stove Dealers' Association have completed arrangements for the Exhibition and Convention to be held at Ottawa, February 16 to 21.

The Exhibition Building has been secured instead of Howick Hall, the latter building having been badly damaged by the recent explosion.

Machinery Hall, a floor plan of which is here shown, measures 400 ft. x 140 ft. A section has been separated in the north end of the hall for the use of Convention meetings.

A lunch counter will be provided near the entrance, where a good service will be provided. Shipments of exhibits will be received one week before the Exhibition opens.

Instructions for Visitors.

The Canadian Hardware Manufacturers' Exhibitors have issued the following instructions for hardwaremen attending the Exhibition and Convention:

Purchase single fare ticket on the certificate plan from your station to Ottawa, and if you wish to travel on the Hardware Special, see that it reads via G. T. R. from Toronto or Montreal if coming from points beyond either of these cities.

A railroad representative will be on hand at Ottawa, by whom your certificate will be vised, entitling you to a first-class return ticket.

For hardware men, exhibitors, guests and ladies who attend the Convention and Exhibition, a special rate has been secured at the two leading hotels at Ottawa—The Chateau Laurier and The New Russell. The rate is $1 without bath, and $1.50 per day with bath for five days.

The rooms are expected to accommodate from two to five persons, according to size. If you reserve a room that is expected to accommodate three persons, the charge will be for the whole room—$3 without bath, or $4.50 with bath.

A deposit of $5 must be sent with your application. Send money orders, checks without exchange added will not be accepted. For the $5 deposited reservation will be made for you, from February 16th to 21st, at either of the hotels mentioned. The committee reserves the right to assign to either hotel mentioned.

These rates can only be secured by obtaining coupon from either F. M. Tobin, secretary Exhibitors' Association, Woodstock, Ont.; J. A. Beaudry, secretary, Quebec Retail Merchants' Association, Montreal; Weston Wrigley, secretary, Ontario Retail Hardware Association, Toronto.

After committee assign you to hotel, deliver the hotel accommodation coupon or receipt for the $5 to the hotel when you register; this will be credited to your account, either in full or on account, according to accommodations you select, and this assures you the special rate engaged for you.

Special hardware trains will leave Toronto and Montreal on the 16th, and return from Ottawa on 21st. Hardware men and hardware representatives and their ladies only will ride on these trains.

Special one way fare for the round

ARRANGEMENTS COMPLETED.

Hardware and Metal, just before going to press, received a letter from F. M. Tobin, Secy.-Treas. of the Canadian Hardware Manufacturers Exhibitors' Association, stating that Machinery Hall, the new building secured for the Hardware Convention and Exhibition, will permit more space for exhibits than would have been available in Howick Hall.

All exhibit spaces have been taken up, and a record attendance is expected at the Exhibition and Convention. The building will be heated by twenty furnaces, ensuring comfort for those in attendance. A Ladies' Committee of entertainment has been formed among the manufacturers' wives at Ottawa, and the lady guests will be well taken care of.

The special train from Toronto will leave at 1.30 P.M., Monday, Feb. 16.

Floor plan of machinery Hall, Ottawa, showing loc ation of booths and Convention Hall.

trip to Ottawa, from all points in Canada, can be purchased on the certificate plan.

Features at Convention.

During the Convention a number of short talks will be given by members of the Canadian Hardware Manufacturers' Exhibitors' Association, the Ontario Retail Hardware and Stove Dealers' Association and the Quebec Retail Merchants' Association pertaining to matters of importance to the trade.

The speakers will be selected from the best authorities on the subjects chosen for discussion. These talks will no doubt be very interesting and educative, and will concern matters in which the whole trade is interested.

During the retailers' meetings a number of short talks will be given by officers of the Ontario Retail Hardware and Stove Dealers' Association.

Following are the names of the officers and the subjects on which they will speak:—

W. J. Carter, Picton, Ont., "Special Sales Plans."

C. C. Lee, Goderich, "Uniform Half Holidays."

W. F. Macpherson, Prescott, "Trade Agreements."

E. J. Creeper, Owen Sound, "Retail Advertising."

C. W. Conn, Tillsonburg, "Tinshop Costs."

Jas. McGregor, Oakville, "Cost of Delivering Goods."

Question Box Sessions.

The Question Box Sessions will be open to all attending the Exhibition and Convention. A number of questions for discussion have already been sent in.

Meeting in Ottawa.

An enthusiastic meeting of the local committee was held in Ottawa recently, and sub-committees were formed to look after the various forms of entertainment.

The committee is composed of T. D. MacFarlane (chairman), MacFarlane-Douglas Co., Ltd.; W. M. Connor, J. H. Connor & Son, Ltd.; Chas. Connor, Butterworth Foundry, Ltd.; Geo. W. Green, Dustbane Mfg. Co., Ltd.; W. J. Wellwood, Dustbane Mfg. Co., Ltd.; S. S. Holden, Grant, Holden & Graham; D. P. Cruikshanks, Steel Equipment Company; John F. Taylor, E. B. Eddy Co., Ltd.; Chas. Hickman, Ottawa Paint Works; Ernest G. Browne, Smart-Woods Mfg. Co.

IMPROVING BUSINESS IN THE METAL TRADE.

After the recent large purchases by consumers for future deliveries in nearly all metals, especially tin and spelter, the market is inclined to be quiet, but there is a very good tone. Some disappointment is expressed that spot demand and the small jobbing trade does not improve more rapidly, but considering the late acute pessimism and stagnation in business the metal trade is doing well. In fact we think when the past three weeks are examined, it will be acknowledged that this trade has been a leader in pointing the way to the revival in business that is now generally recognized as having begun, being a week or more ahead of the iron and steel trade in this particular. Even in copper an excellent showing has been made. If there had not been confidence in the future, and an improving situation, the copper statistics of two weeks ago would have been followed by a very different story in copper than has since been the case.

If recovery to normal business conditions is to proceed slowly it will be all the more sure. This is not the day of miracles in business. It is quite likely a reaction may come in Wall Street, in fact it is overdue after the remarkable continuous advances. But we are in an expanding business situation, and the future is all right. There may be some setbacks and dull days, but the movement to better things has begun, and each week will find us further along the road to complete recovery. —American Metal Market Report.

PROGRAMME FOR OTTAWA CONVENTION.

Monday, February 16.

1.30 P.M.—Special train leaves Toronto.
5.30 P.M.—Special train leaves Montreal.
9.00 P.M.—Informal reception at Chateau Laurier.

Tuesday, February 17.

9.00 A.M.—Official opening. Exhibition open to hardwaremen only.
10.00 A.M.—Committee meeting.
12.00 A.M.—Luncheon and address.
2.00 P.M.—Joint meeting of Ontario, Quebec and Exhibitors' Associations.
4.00 P.M.—Adjourn to Exhibition Hall.
5.00 P.M.—Moving pictures and lecture.
7.30 P.M.—Exhibition open to public.
8.30 P.M.—Visit to House of Commons—all galleries reserved.
10.30 P.M.—Collation at Chateau Laurier.

Wednesday, February 18.

9.00 A.M.—Hardware Exhibition open to hardwaremen only.
12.00 P.M.—Luncheon and address.
2.00 P.M.—Retail Convention.
3.30 P.M.—Adjourn to Hardware Exhibition.
5.00 P.M.—Moving pictures and lecture.
7.30 P.M.—Exhibition open to public.
8.00 P.M.—Theatre party for ladies.
8.00 P.M.—Retailers meet in banquet hall, Chateau Laurier.
8.00 P.M.—Exhibitors meet in room, Chateau Laurier.
10.30 P.M.—Moving picture show, Chateau Laurier.

Thursday, February 19.

9.00 to 10.00 A.M.—Retail Convention.
10.00 A.M.—Hardware Exhibition open to Hardwaremen only.
12.00 P.M.—Luncheon and address.
5.00 P.M.—Moving pictures and lecture.
7.30 P.M.—Exhibition open to public.
8.00 P.M.—Theatre party as guests of Exhibitors.

Friday, February 20.

9.00 to 10.00 A.M.—Retail Convention.
10.00 A.M.—Hardware Exhibition open to Hardwaremen.
12.00 P.M.—Luncheon and address.
2.00 P.M.—Joint meeting of Ontario, Quebec and Exhibitors' Associations.
8.00 P.M.—To be announced later.

Saturday, February 21.

8.00 A.M.—Special trains to Toronto and Montreal.

The Retail Merchant and the Figure "Bogie"

Figures Frighten Some Dealers—They Cannot Take in the Many Things That Totals Tell—A Few Simple Rules for the Financing of a Retail Store.

Second of Series Written for Hardware and Metal by Wm. Cambel

A MERCHANT who had called me in to "doctor up" his business—it was in a decidedly sickly condition—confessed to me: "I can't master figures. They make me feel——addle-headed. I can tell when I am making money or when I am losing it, but how, why or to what degree, I simply can't figure out."

His knowledge of accounting was very meagre. His books indeed were a joke. At least I thought them a joke when I started the work of untangling them. Before I got through I decided they were a tragedy. He had not taken stock properly in five years and I found stock listed at the price he had paid for it when it was new, but which through long acquaintance with the store shelves had deteriorated in value. He had reckoned that he was carrying a stock valued at a certain figure. I discovered that the actual value was nearly two thousand dollars less. The book accounts were in very bad shape.

Underestimated the Stock Carried.

I really do not think that this merchant was very much more lax in his methods than a great many others in the retail trade. It is surprising how many merchants, reckoned prosperous and progressive, conduct the business end of their stores with a carelessness and lack of knowledge that reeks of the amateur. I remember a case not so long ago where I was called in by a dealer, who was negotiating the sale of his business, to give a full statement of the standing and stock. This store was a big one, doing a splendid trade. The owner was mayor of the town, a fairly wealthy man as wealth goes nowadays. He was accounted an eminently successful business man and I looked to find things in the store in a number one shape. The store was being operated under a system—a system with several bad faults. I went into the books and thoroughly appraised the stock, making the discovery that this merchant was carrying $4,000 more goods than he had himself reckoned. Accustomed to finding the shoe on the other foot, I could hardly believe it, but at the same time I knew I was right. Will you believe it, that man was hopping mad when I told him of his mistake? He refused to credit it at first and said that his system was too thorough to make such a mistake possible. He gave in finally.

"The man was hopping mad on discovering his mistake."

It just goes to show that you can never be sure. In some of the largest stores in the country, the system employed is inefficient and literally full of leaks.

Questions to Ask Oneself.

Here are a few questions that should be placed before every merchant:

What is your net profit? Are you absolutely sure on that all-important point? Do your half-yearly or yearly stock-taking and your balance sheet show it? Is your surplus item growing as fast as you expected? If not, perhaps this article will throw some light on the subject and be the means of that surplus growing beyond the infant stage.

Calculate All Expenses.

In the first place, it is absolutely necessary that you put down and calculate for all expenses. They will be there all the same whether you calculate for them or not, so be sure you get them or they will surely get you.

Put down a salary for yourself. Also put down wages for members of your family who help in the business just as if they were hired at a certain wage. This should be fixed on the one feasible basis: the value of the help to you, reckoning on what you would have to pay an outsider to do the same work.

If you own the store yourself, the business must pay a rent; the same rent you would get if you let the premises to someone else.

"Figures made him addleheaded."

Proving Your Figures.

Now let's get down to cases. Supposing your total expenses equal 20% of your turnover, which is, say, $2,000 per month. What percentage of profit will you require to mark on cost to leave you 10% net profit? The answer in round figures is 43%. For example:—An article costing $10 would require to be priced at $14.30. Prove it by taking off 20%, which is $2.86. This leaves $11.44. Then take off 10%, your net profit, which is $1.43, and you are down to $10, your cost, proving that it requires 43% on cost to allow 20% expenses and leave 10% net profit.

Or again, on $2,000, your turnover for the month, your expenses at 20% are $400, and your net profit of 10%, $200. This leaves $1,400 as your cost. Take 43% of this and you get $602, which equals, as nearly as possible, your expenses and profit combined, or added to your cost of $1,400, gives you $2,002, your turnover.

The Danger of Discounts.

Then there is another danger to guard against, viz:—Taking discounts off for sale purposes or otherwise. Here is an example:—A man wishing to make a large purchase of goods for a charitable institution got the head of a general store to give him a special discount of 15% off marked prices. When the head was spoken to on the subject by the accountant, he replied: "Why those goods were marked at 40% on and I guess we will come out all right." Now the expenses of the store worked out at 18% and this is how it worked out on goods costing $100, and selling at $140. Less the 15%, ($21.00) equals sale of $119. Expenses on this at 18% equal $21.42, so the sale resulted in a loss of

(Continued on page 49.)

Increased Business $1,000.00 a Month

Merchant in a Small Town Achieved This Result by Starting to Advertise in the Local Papers—Grave Difficulties Were Overcome by the Adoption of a Policy of Aggressive Publicity.

THE problem that confronts the average merchant doing business in a small town within easy distance of a large city is how to create and maintain an interest in his store against the persistent efforts of the larger people to draw business from the territory that is legitimately his.

This problem is made the more serious when the territory is traversed by a trolley line giving an hourly service with the city, when the roads leading thereto are among the best in the country and when the local merchant's customers are well-to-do fruit growers, many of whom have their own motors, and can whisk into the city and back again at little or no inconvenience.

Merchants in distant towns where there are only two or three trains daily with the larger cities and their departmental stores, will admit that the man who has to contend with the conditions described, is at a much greater disadvantage than they are, and that he must avoid the rut if he would continue in business.

The following is the story of a retail merchant in an Ontario town, doing business under the conditions outlined above, who managed to increase his turnover by $1,000 a month.

How did he manage to do this?

Apart from the advantages of a simple but thorough system, which takes care of important details and the appreciation of conditions peculiar to the district, the bulk of the explanation is found in the two words "aggressive advertising."

Merchants of that locality draw business from a very rich territory within a radius of five miles south, east and west. Bad accounts are scarce. Notes are taken on large purchases, and this dealer states that his loss on these has been negligible. Besides it is a method which has a tendency to direct business to the local merchant, whereas if a hard and fast cash rule were enforced, the result would undoubtedly be a larger patronage for the city stores at those times when ready money is more plentiful than others. On such accounts the merchants may be confident of a settlement once a year.

This five-mile radius, so easily travelled, is a rich prospecting field for the city stores.

"The country was being flooded with the advertising of the Hamilton and Toronto stores,' said this aggressive merchant, "and about nine months ago, I realized that I would have to do something more than use a small regular space in the local paper. I accordingly got in touch with a concern supplying a good advt. service—layouts, seasonable paragraphs, cuts, and all necessary material for an interesting campaign. Then I arranged my advertising contract with the weekly newspaper so that I would have a monthly service of one page and eleven halves to be used as desired. Frequently, I would have the printer strike off 5,000 copies of this full page advt. Then, with my runabout and two boys we would go over our five-mile radius thoroughly, distributing those circulars where we thought they would do the most good. For special occasions, our advts. would be exceptionally appropriate and never failed to bring results. Our Christmas advertising is an example. We secured through the syndicate, a four-page sheet bordered in color with holly and mistletoe with a head of Santa set in the border on the front page. I immediately made an arrangement with the newspaper to use this two-sheet supplement as the front and back of the regular issue. In a panel on the front page the editor ran a seasonable message to his subscribers, used the inside for reading matter, while I had the front and back for advertising. I was able to do this at a fair price by co-operating with the publisher, and the result was an exceptionally fine Christmas display and one that was very effective. By watching opportunities such as these, we have kept our customers interested and have developed the business from sections which were formerly more or less prospective. Then, too, the loyalty of the staff both in and out of office hours has assisted materially."

This increase in turnover is a most remarkable demonstration of the value of advertising. With the merchant in the small town the question of advertising frequently does not come in for much attention. He feels that he has not the same facilities as the merchant located in the city where the daily paper serves as the medium.

The experience in question shows, however, that the advertiser in the weekly paper can secure results just as surely as the advertiser in the daily.

RETAIL MERCHANTS OF NAPANEE UNITE.

At a well attended meeting of the retail merchants of Napanee, Ont., held in the council chambers on Wednesday night, of last week, it was unanimously decided to form a branch of the Retail Merchants' Association of Canada, and the following officers were elected:—

President, Reeve S. C. Denison, grocer; first vice-president, A. E. Paul, stationer; second vice-president, A Chinneck, jeweler; treasurer, W. H. Boyle, hardware; secretary, Councillor Mark Graham, men's wear. Among the different subjects discussed were:—The proposed Fire Marshall Bill; the proposed Workmens' Compensation Bill; the inspections of weights and measures; the making of false advertising a criminal offence; the Business Assessment Act; freight cartage charges and also the credit reporting department of the association. The meetings lasted till 11 p.m. The merchants think that with a live man like S. C. Denison as president, the success of the association is already assured.

THE RETAIL MERCHANT AND THE FIGURE "BOGIE."

(Continued from page 48.)

over 2%. When the head got these facts into his system he was more than surprised and you may be sure that he will not do it again.

It will be noted that in the foregoing, all reckoning has been done on the selling price. There are merchants who object to reckoning overhead expense and profits on the selling price, but there are no valid reasons for this stand. It is customary, in fact it is obligatory to reckon on the selling price in other matters. The percentage for overhead expense is reckoned on the selling price; it could not be reckoned in any other way. When a salesman is paid on the percentage basis, the reckoning is done on the selling price, not the cost price, of the goods he has sold. He reverses the process in reckoning profits?

Finally, I would propound this advice: Get to be sure of the percentage of gain gross profits; secondly, of your expenses, and then prove them by taking stock at regular intervals, when your trading account will show you whether your net profit works out right or not. Do this and you are on the right way to make your business a success.

Scientific Analysis of the Retail Buying Public

An Investigation Carried on by One Store Into Reasons People Had for Shopping at Other Stores in District — Tactful Adjuster Followed Up Each Complaint — Points of Weakness.

DEPARTMENT stores of the older type used to feel that they were so distinctly in a class by themselves that it would be impossible for anyone outside their own domain to give any information that would help solve their individual problems, writes M. L. Anthony in The Efficiency Magazine. What does a woman want to buy? Where does she prefer to shop? What advertising argument appeals most to her?

It, therefore, revolutionized things when an advertising man who had been successful in the manufacturing field, asked his new employer, a retail merchant, for more concrete data.

He had before him all the usual "shoppers' comparative reports." He knew from these what each store in the city was carrying, and how prices compared with those of the same line of goods in his own store. He had criticisms on window decorations and displays. He had time-sheets showing the drawing power of every big "Special Sale" his competitors had, even down to just how many customers "looked" and how many purchased, between ten and eleven, eleven and twelve o'clock and so on.

"Yes," he said, "this is fine. It is invaluable. But what I want as well is concrete information direct from the people who don't come to the store. Why does Mrs. Jones go to Brown Bros. for shoes when we carry the same line? Why does she go there for china and come here for linen and furniture? Our comparative reports show that our line is as good as any in the city."

The merchant demurred for a time, but finally the advertising man won his point and a campaign was started to get the unusual data. This demanded that investigation be made not only in the city proper, but also in a group of towns within a radius of thirty miles of the store.

Each investigator was required to give detailed information on a list of questions.

(1) Consumer's name?

(2) Address?

(3) Number in family: Men, Women, Children (sex)?

(4) Which store do you prefer for general shopping? Why?

(5) Which store do you patronize for special articles?

(6) Which days of the week are most convenient for you to shop?

(7) Which store has the best delivery service in this town?

DISCOVERIES.

Adjuster followed up each complaint at once.

One lady had to tell condescending clerk she was buying cheap furs for her cook.

Parcels delivered at different times.

Exaggeration in reducing prices.

(8) About what is the average amount you spend on your shopping trips?

In addition, the investigators were required to make notes on surroundings, character of household equipment, furnishings, etc.

There were many and varied reasons. "Because I have always bought there," was a familiar reply to the second part of question number four. When asked why they had always bought there they would admit that they had no particular reason.

It was found that one store had built an exceptionally great amount of goodwill through its superior adjustment methods. Instead of permitting the customer to follow up her complaint by repeated letters and telephone calls until she had the annonyance deeply impressed on her mind, the store took a different course. As soon as a complaint was made, a tactful adjuster took the matter in hand, and by personal call and follow-up not only straightened out all tangles and adjusted the matter satisfactorily, but saw to it that the customer was impressed with the store service and left in a wholly favorable attitude of mind. This sort of personal effort left its impression and resulted in a general feeling among a large group of women that that one particular store was strong on "personal service."

Another important item in the investigation was the delivery system. One store would deliver within twenty-four hours; another store only two or three times a week. In one case the men on the wagons were always courteous, while the other men seemed indifferent and often impertinent. One firm delivered everything at one time; another came straggling along with the little bundles in spasms from six to twenty-four hours late.

Another item of interest which the investigation disclosed was the attitude of the club women and the women of the better class toward comparative values in advertising. There was a great deal of criticism of one house in particular, a house that had always had good standing in the community, but which clung to the comparative values in its advertising. The women seemed to feel that they were not getting a square deal. They read the advertisements and went to the store on account of the old-established reputation. They found that $75 suits at $39 were misquoted values. The suits were probably good value and had orig-

(Continued on page 51.)

The semaphore is a new line in store display, but "it is a winner," according to a proprietor of a Los Angeles store where it was installed. In regard to this device, "Popular Electricity" quotes him as saying:—"Many a customer has stopped at the unfamiliar sight of a semaphore on a store front, and entered to ask questions, usually making a purchase before leaving. Others watch the flashing light, the rising and falling arm, and then drop in with such a remark as 'Well, I saw your stop signal, and followed it.' It is inexpensive to install. One of my clerks originated the idea and constructed the upright and arm from pine boards, and a sign painter did the lettering at small cost. The operation of a small motor keeps the arm in motion and the cost of power behind the colored panes is very slight, compared to the results."

Problems For Sheet Metal Workers

IN this issue we intend showing in a simple way, how the pattern of a funnel should be developed.

In the first place the size should be determined; suppose the body needs to be 6 inches wide at the top, see A in Fig. 1, and at B it is required to be 1 in.

Then at C it needs to be, say ½ an inch, the best course to follow is to draw a sketch those sizes first by drawing a vertical line as shown at A, E in Fig. 2.

We will now develop the actual working pattern, erect vertical line A, E, then intersect it at D, C, and B. Mark off with compass the actual size required. Then draw lines D, C down on each side until vertical line A, E, is intersected at F. Then place compasses at F, open up to D, and develop arc. DD. Next place compass at centre line G, and make semi-circle, being half the actual diameter of funnel. Divide off in equal parts, viz.: 1, 2, 3, 4, 5, 6, 7, which is the stretchout for pattern at top. Then transfer twice that number as shown at DD on arc.

Next make the semi-circle H, by placing the compass at centre formed by line C intersecting A, E, and divide again same as was required for top of funnel, again placing compass at F, so as to make stretchout arc.

To develope spout, follow out the same rule exactly as was required when developing body, except that the compasses need to be placed at A, to form the necessary arc, the same stretchout of course will do for the big end of spout that was used for lower part of funnel body, and once this has been made again mark off twice the number, then draw lines CB, CB.

The dotted lines are necessary to allow for seams and wire edge at top.

A very simple yet effective way to prevent a funnel from spluttering when in use, is to solder a small piece of brass pipe inside the funnel from a point down to the bottom of spout at C, Fig. 1 to A. This allows the air to escape from the vessel being filled. Some such means are necessary when filling an automobile tank, because the spilling of gasoline is not only a waste but is also dangerous. There are of course, funnels with a fluted spout, but not on large sizes, such as is used for the purpose named.

It may be a disgrace to die rich, but it is a form of disgrace towards which a great many men appear to be contentedly moving.

ANALYSIS OF RETAIL BUYING PUBLIC.

(Continued from page 50.)

inally sold at $45 or $50, but they were not worth $75 and never had been sold at that figure.

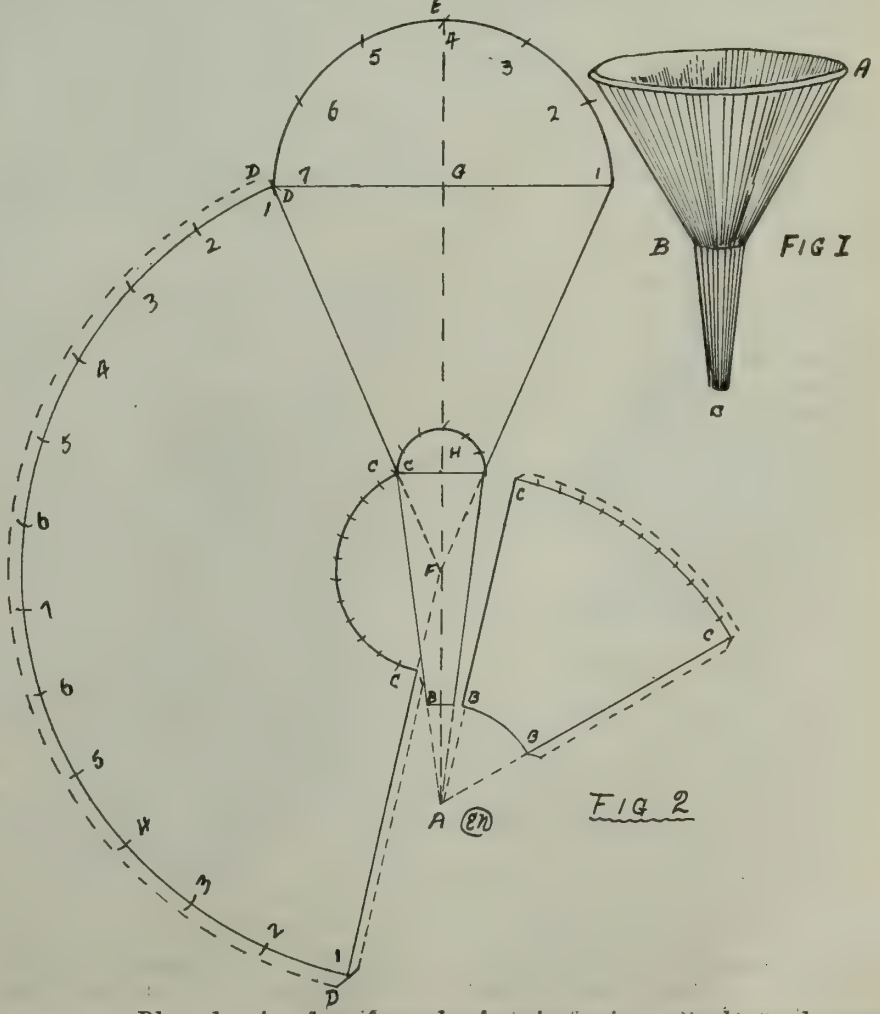
Another store, in many departments, had lofty clerks, who became quite condescending if a customer wanted to make a modest purchase. One well-to-do woman said she had closed her account with this store because of an exaggerated case of hauteur of one of the clerks. She asked to see furs such as she supposed would be satisfactory to the woman for whom she was purchasing them. When asked if they hadn't something at a lower price than those which she showed, the clerk became unsufferably rude, until the customer said: "I want a set of warm furs for my cook." Presto! The clerk was as subservient as possible. But an unpleasant impression was made and fatigue had caused the woman to make her purchase in that store, and she never went there again. This same sort of complaint came up in a number of cases and it was evident that that particular store was losing trade daily.

The data obtained by personal investigation of this sort supplied the advertising man with an excellent basis for determining:

(1) The kind of arguments that appealed to department store patrons.

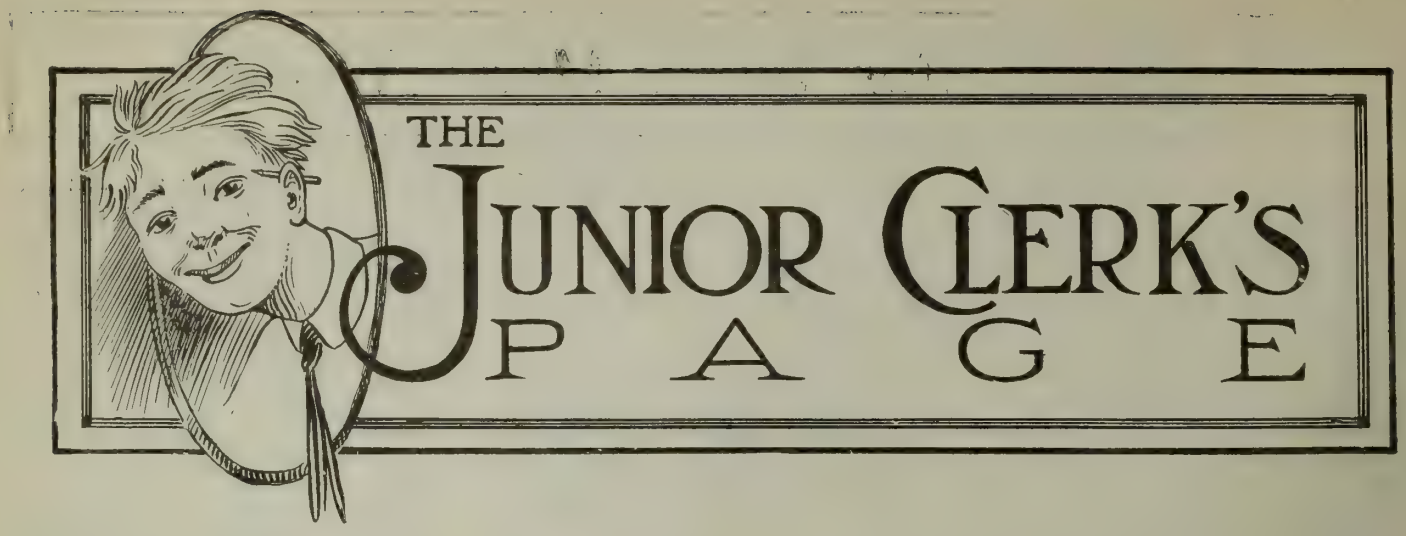
(2) Days when it was most convenient to shop for most women.

(3) Average buying power of patrons.



In addition, it gave the most concrete material for meeting points of competition hitherto unfelt and improving store service at the weakest spots. When the reports were tabulated it was possible to graphically show:

(1) Proportion of population served by the store and each competitor.



(2) Proportion of surban population served.

(3) Comparative strength of various departments of all stores from the consiumers' viewpoint.

(4) Total possible sales to be made in any department.

Plan showing how funnels of various sizes may be made.

Service the Keynote of Salesmanship

Written For Hardware and Metal By William Edward Park

THE successful salesman invariably gives the customer the impression of eagerness to be of service. This, indeed, is the keynote of successful salesmanship. The prompt showing of articles asked for or even hinted at, the proferred demonstration wherever the goods are demonstrable, the suggestion of other lines of timely interest, the offer to order goods not in stock—these and a host of similar items enter into the make-up of the young fellow who sets out to sell things instead of merely serving as an order-taker.

Good salesmanship is often revealed by contrast. The other day a lady entered a hardware store.

"I would like to see your food-choppers," she remarked.

"We don't carry any food-chopper except the Blank," returned the clerk.

The chopper he named was equal to most of those on the market and a trifle superior to one or two makes—but the clerk's tone implied nothing so optimistic. In fact, it seemed a hint that the Blank chopper was something he preferred not to talk about.

"Then you don't carry any other makes?" returned the young lady, disappointedly.

"No—nothing else, miss."

"Is it—is it all right? Does it work as well as the other makes?"

"I guess so."

"Would it be too much trouble to show me how it works? It might suit, you know," commented the lady dubiously.

The clerk reluctantly, as if doubting whether the trouble were worth while, produced a food chopper, which he laid upon the counter. Then, as if the thought had for the first time occurred to him, he explained in a grudging sort of way how the contrivance worked. By dint of persistent questioning the lady in time elicited a pretty fair description of the article.

"Would you mind sending this up on trial for a couple of days? It looks all right to me, but——"

Eventually, after consulting the proprietor, the clerk agreed to send the article on trial. Eventually the lady purchased and paid for it.

But who made the sale? Was it the clerk? Or was it the customer?

The live, aggressive salesman never gives the impression that this particular clerk—perhaps unconsciously and unintentionally—gave. The live, aggressive salesman more or less consciously studies human nature, and takes some account of the effect upon the customer of his own words and manner. Here, the clerk created in the customer's mind two distinct impressions, both unfavorable to the making of a sale—the impression that the article in stock was possibly inferior, and the impression that the selling staff of that particular store wasn't in the least degree anxious to be of service.

An aggressive clerk would have handled the same sale in a very different manner. The customer's first mention of a food chopper would have been the signal for producing one of the three different sizes which practically every hardware store carries in stock. Coupled with this would be the assurance, in words and manner, that the article was up to standard in every way.

"I'll be very pleased to show you, madam. We have an article here that has given exceptional satisfaction to our customers — the best and most convenient thing of its kind that's manufactured."

And then, to clinch the argument, a rapid-fire demonstration of the article by fastening it to the ledge of the counter, turning the handle, changing the grinders or at least showing and explaining the uses of the different grinders, and pointing out how easily, after it has been in use, the chopper can be washed clean by "slushing" with boiling water. Demonstrate one of the three sizes; then point out that you have two alternative sizes in stock.

"But," you say, "what's the use of all that trouble, when the salesman who didn't handle the customer the right way sold the chopper just the same?"

But did he actually sell the chopper? Or, as I asked before, was it the customer who pushed the sale up to the point of taking the contraption on trial—after which stage the chopper sold itself? And how many customers would, in the face of so chilly and indifferent a reception, have lingered long enough in that particular store when there were perhaps a half dozen other stores in town with clerks eager and anxious to show the goods, and to explain how to handle them?

The good salesman invariably gives that pleasant impression of being eager to serve, which instantly makes the customer feel perfectly at home and induces that friendly frame of mind so congenial to buying.

REMARKS OF THE JUNIOR CLERK.

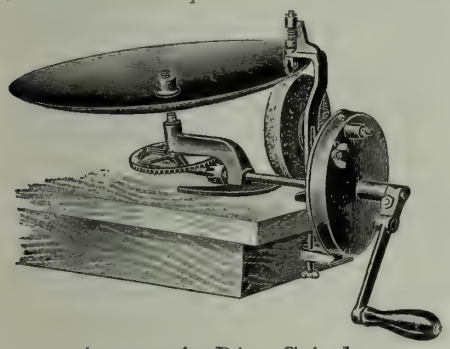
Most people have good judgement but they often fail to consult it until after the mischief is done.

• • •

Every man is the architect of his own fortune; but some of us get no higher than planning castles in the air.

New Goods Offered Canadian Hardwaremen

AUTOMATIC DISC GRINDER.



The Western Hardware Manufacturing Co., Milwaukee, are offering the trade a new automatic disc grinder.

The grinder is a combination of a tool grinder and disc grinder. The tool grinder represents a standard machine of the cut gear design. It can be easily converted into a disc grinder or tool grinder, by merely removing the disc grinder mechanism.

The parts are all interchangeable so that the operator can grind either a 12-inch disc or a 24-inch disc or coulter blade. The discs can be either concave or flat, adjustments for which are also taken care of on the vertical spindle.

The grinding wheel is beveled affording the grinding of a very clean edge on the discs.

The cone carrying the disc is made so it will accept and hold any disc no matter what size the mandril hole is. It can be either a square hole or round hole

Automatic Disc Grinder.

and of any diameter. This again is adjustable on the vertical disc as mentioned before to take care of a flat coulter blade or a concave disc.

The disc is held to the grinding wheel by means of an adjustable screw roller. The pressure of the grinding wheel is controlled by a spring and sliding spindle as shown on the cut.

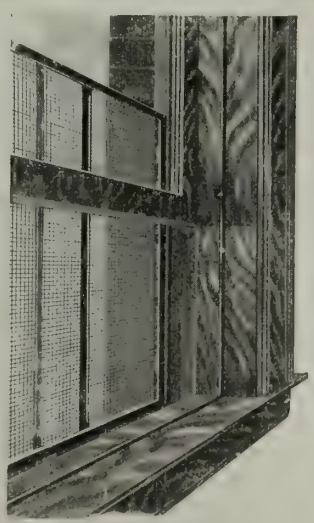
The disc revolves automatically and it revolves in the opposite direction of the grinding wheel. All the operator has to do is turn the crank and it is claimed the machine will take care of the rest.

AMCO LANTERN.

The Alexander Millburn Co., Baltimore, Md., and Montreal, Que., are offering the trade the Amco lantern here illustrated.

The makers claim that it is a high power dependable lantern, giving a bright, steady light, which is not affected by wind or weather. It is also claimed that it cannot be extinguished by a sudden movement, and does not smoke the globe.

The generation of gas is controlled by



Amco Lantern.

the thumb screw, and the flame is then automatically regulated. The construction of the light prevents overgeneration or leakage of gas. The lantern is made of heavy spun brass, highly finished, and has a strong wire globe guard. The lantern is easily converted into a table lamp by removing the top and replacing it with a 10-inch opalescent shade and bracket. In this form it makes an excellent reading light and is ideal for all indoor purposes.

The dimensions are:—Height, 14½ inches; diameter of base, 6⅛ inches; weight empty, 4½ lbs.; weight charged, 6½ lbs.; carbide charge, 8 oz.; burns 6 hours.

SHERWOOD METAL SCREENS.

The Sherwood Metal Screen here illustrated is being offered to the Canadian hardware trade by the Continental Co., Detroit, Mich. The Sherwood screen has an all-metal frame made of pressed steel. The wire cloth is drawn tightly and locked securely in the frame. This metal frame screen operates easily in all kinds of weather. It is claimed that it will not stick, warp nor bind; moves freely, and is easy to handle. The best black japan is used, which renders the screen impervious to moisture.

Sherwood Metal Screens

The screen can be used as a permanent outside screen.

The screen can also be used under the sash in the usual way.

The screens are made in several adjustable sizes.

The firm also manufactures window screen frames, which enable a customer to fit odd-sized windows.

ATLAS FLY SWATTERS.

The Atlas Mfg. Co., New Haven, Conn., are offering the trade a new No.

Atlas Fly Swatter.

A1. fly swatter, which they are just placing on the market.

The swatter has a 10-inch handle. It is neatly and securely bound with soft green felt and it is claimed that it can be used for parlor or drawing room without marring the finest furniture.

They are also making size A, which has a coppered wire handle 8 inches long, high grade wire cloth and is said to be flexible and strong.

Current News of the Hardware Trade

Business Changes.

Candahar, Sask.—Einarson & Goodman, hardware merchants, are reported having sold out.

Hamilton, Ont.—W. Chappel, tinsmith, etc., has been succeeded by W. H. Ruberry & Son.

Toronto, Ont.—W. H. C. Moore has disposed of his hardware business at 862 Kingston Road, to J. W. Merrill.

Keddleston, Sask.—W. & V. Thompson, dealers in hardware, have been succeeded by George Thompson.

Creelman, Sask.—Wright & Laberge, hardware dealers, have dissolved partnership. J. E. Wright is continuing the business.

Elbow, Sask.—J. J. Fallis, of the J. J. Fallis Hardware Co., is arranging to buy the interests of other members of the firm.

Owen Sound, Ont.—R. McKeen has taken Cecil Johns into partnership, and the firm is now known as McKeen & Johns.

Montreal, Que.—Alfred Field & Co., of Sheffield, have formed a limited company dating from January 1. To the new company they have added the business of Stacey Brothers, Sheffield, manufacturers of cutlery. The title of the new firm will be Alfred Field & Co. (Sheffield), Ltd. Frank Dawes, who has been visiting Canada in the interests of this firm for some years, is now on his way to Montreal, and will call on the trade with a representative of the J. H. Roper Company, who have been appointed resident agents.

New Firms.

Blaine Lake, Sask.—The Blaine Lake Hardware Co. has started business.

Manor, Sask.—M. F. Thornton is starting a hardware business.

Portage La Prairie, Man.—The Farmers' Harness and Hardware Co. is starting business.

Winnipeg, Man. — The Winnipeg Metal and Heating Co. has started business.

Vonda, Eask.—Panar & Co., general storekeepers are adding a line of hardware.

Weyburn, Sask.—W. R. Mitchell who has been with the Weyburn Hardware & Furniture Co. for the past six years has purchased a hardware business in Conquest, Sask. His brother, T. H. Mitchell has taken an interest in the business, and the firm will be known as Mitchell Bros.

Proposed Addition.

Hamilton, Ont.—The Tallman Brass Co. propose to make additions to their factory at a cost of about $15,000.

Changing Location.

Saskatoon, Sask. — The Saskatoon Hardware Co. have secured a five-year lease of a building on 2nd avenue, and will move about Feb. 1.

Weyburn, Sask.—The Hoshal, Carmichael Co., Ltd., will move their stock to the McKinnon Block across the road from their present place of business.

Hardware Team Wins.

Melfort, Sask.—In a hard fought game of hockey the Hardware hockey team defeated the All Stars by a score of 5—3.

British Columbia Items.

W. C. Smith & Son, who handle hardware at Notch Hill, have been appointed postmasters for that town. To accommodate the new department, an addition was built to the store.

McLennan, McFeely & Company gave each married man on their staff the present of a turkey at Christmas, and those not married received a cheque for $5. This firm has a large number of employees, which makes this generosity more marked.

T. J. Trapp, the veteran hardware man of New Westminster, was elected school trustee for 1914 at the head of the poll. He was 207 votes ahead of the next successful candidate, indicating the esteem in which he is held in the Royal City.

The Kelowna Implement Company, successors to Coats, Edwards & Gowan, of Kelowna, have moved into their new two-storey brick building, and now have one of the most complete and up-to-date stores in the Okanagan district. A. Edwards has been retained as manager of the new concern.

Indications are that things are looking good in the Okanagan, for the Morrison-Thompson Hardware Company, of Kelowna, have added twenty feet to their salesroom and also built a two-storey brick warehouse in the rear of their present premises. The cost of the improvements amounted to $25,000. At Penticton, W. R. King & Company propose making a considerable addition to their store to take care of the rapidly growing trade. This town is benefiting from the construction of the Kettle Valley Railway.

To Erect New Factory.

Victoria, B.C.—It is reported that the Canadian Steel Studding and Mfg. Co. will erect a new factory estimated to cost $25,000.

Personals.

O. F. R. Taylor, of Taylor Brothers, Limited, hardware merchants, Carleton Place, and Almonte, was in Montreal during the week.

L. Y. Birnie and E. Birnie, of Birnie Bros., Medicine Hat, have been in Winnipeg for several days on business. They are hopeful of a good season at the Hat.

The friends of Mr. Linton, formerly of the old firm of Linton & Hall, Calgary, Alta., are congratulating him on the arrival of twins, a son and daughter. Mr. Linton comes from Campbellford, Ont., and was buyer for R. R. Casement, Madoc, afterwards buyer for Marks, Clavet, Dobie & Co., Port Arthur, Ont., before starting business in Calgary, Alta.

John Persse, of Tees & Persse, Ltd., Winnipeg, was in Montreal last week, and has left for the West via Toronto.

D. G. Smith, of Smith & Hemenway Co., New York, spent a day in Montreal, last week on his way to Toronto and the West. Mr. Smith will spend three months on his trip which will extend to the Pacific coast.

James A. Coulter, president and general manager of the John Morrow Screw and Nut Co., Ingersoll, Ont., was a candidate for municipal honors at the recent election in Ingersoll. He received the largest vote of any councillor. In 1907-8 he was Mayor of the town.

The following representatives were calling on the Montreal Hardware trade during the week:—

J. Hossick, Lufkin Rule Company, Windsor, Ont.; H. A. Allan, Stevens-Hepner Limited, Port Elgin, Ont.; L. N. Vanstone, Canada Steel Goods, Hamilton, Ont.; Mr. Fay, Stevens Arms Co., Chicopee Falls, Mass.; H. E. James, Shurley — Deitrich, Galt, Ont.; R. H. Hancock, Cleveland Osborne Mfg. Co., New York.; Mr. Marsten, Springer Lock Company, Belleville, Ont.; J. O. Notman, McKinnon Dash Company, St. Catharines, Ont.; J. B. Morse, H. B. Ives Company, New Haven, Conn.; Charles K. Eichler, S. P. Slaymaker & Company, Lancaster, Pa.; Oliver B. North, O. B. North & Company, New Haven, Conn.; F. S. Laythe, Butterfield & Company, Rock Island.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

There is a much brighter outlook in the metal markets. Quotations are firm and advances have taken place on the Toronto market on brass, tin, copper and solder. Merchants are very optimistic regarding the future.

Hardware jobbers report a fair amount of business passing. In the paint line, a good number of orders are coming in, mostly for spring delivery.

The stove trade is rather slack at present as far as orders are concerned, but the outlook for spring is very good. Present indications point to a large demand for gas ranges in the spring.

Conditions appear to be improving in all lines.

MONTREAL.

MONTREAL, January 28.—There has been a decided improvement in the way of orders during the last week and local wholesalers are busy making these up at the present time. The fact that travelers have once more taken to the road is mainly responsible for this fact as their orders are coming in with the usual regularity now. Judging from the size of these orders and also the class of goods being bought there is certainly a much better feeling existing throughout the country than that which was felt before Christmas. Reports from all centres are very encouraging and point to a much better feeling all round. The centres which are still a little tame are in the large cities but even there nothing very unusual is felt. At one time it looked as if it would take quite a time for this country to get back to its former standing but if the present feeling continues for a few months there will certainly be no reason for complaint in any section, as merchants, particularly those in the country, have taken on a very confident air and this is sure to result in "good times."

One of the local firms has changed their price on Canada plates but as they are alone in the move it cannot be taken as a general advance. They are quoting $2.70 for 52 sheets, $2.80 for 60 sheets and $2.90 for 75 sheets. All other firms are up five cents from this list.

Orders have already started to come in for spring lines such as poultry netting, green wire cloth, lawn mowers, screen door hinges and freezers. This only goes to show that many merchants are preparing for a busy summer. At the present time, for immediate shipment, orders are nearly all of a sorting nature although there has been quite a demand from the lumber camps for boot calks, cant hooks, coil chain and a number of repeats for axes and axe handles. Sap spouts, bits and pails are also in good demand at present as dealers are getting in line for the maple business which is quite heavy in this province.

Collections are rounding into very good shape and are much better than they were a few months ago. The West is improving daily while the East is about normal.

The conditions of the metal market are much the same as in previous weeks although there is always more or less movement in practically all lines.

Tin.

The price quoted by London to-day for immediate shipment is £179 5s. or an advance of £6 10s. over the quotation of one week ago while futures are up £5 15s or the present quotation is £180 10s. This is accounted for by the heavy American buying which has taken place during the past week. Tin is pretty high at the present time but at that it would be hard to predict its future course. The New York price has steadily increased during the week until it has reached $39.40 for wholesale lots while $39.50 is quoted for small lots. The local market has not been subject to change during the week.

Spelter.

The spelter market was subject to an increase during the week but dropped back again yesterday to £21 10s., the price which we have quoted for a couple of weeks back. The demand in New York has dropped off during the last couple of days but as it was exceedingly good during the week it is not thought that prices will be affected in any way as the producers can now wait for the demand to start in again after the amount of business they handled during the past few days. The price quoted there to-day is 5.22½ and the market is said to be strong at that figure. Locally conditions are much the same as last week.

Lead.

The lead market is very steady although the price quoted by London this week shows a decrease of 7s. 6d. and is given as £20. The New York quotation is 4.05 and reports from there are to the effect that enquiries being received at present are mostly for future shipments. Locally prices remain unchanged from last week.

Copper.

There has been an increase in the London quotation this week of 17s. 6d. the price being £65 12s. 6d. while futures are quoted at £65 17s. 6d. The New York price is $14.40 and the report from that centre is to the effect that there is a good normal business from both domestic and foreign consumers. Locally the price is unchanged as is also the demand.

QUOTATIONS ON MILK CANS, TRIMMINGS, ETC.

Railroad or Delivery Cans	40%
Milk Cans	35%
Cream Cans	35%
Individual Cream Cans	40%
Hand Delivery Cans	35%
Creamery Cans	35%
Strainer Pails	35%
Milk Pails, Tin	35%
Canada	50%—10%
Imperial	60%—10%
Cream Pails, Dairy Pails	35%
Milk Can Trimmings, Railroad Can Trimmings, Hand Delivery Can Trimmings	20%
Creamery Can Trimmings, Creamery Gauges	72½—15%
Pail Bottoms	72½— 5%

Antimony.

There is no change in the local market while the demand is quite seasonable with the same prices in effect.

Iron.

The London quotation to-day is two-pence over that of last week and is given as £2 10s 9d. The general situation is improving. There is considerable quiet inquiry for foundry iron in the States in fact the demand from all centres is considered very good with a firm and steady market. Locally there has been no change to report in conditions.

The stove and heating business has not been very active for some time and dealers do not look for this change until the demand for gas ranges starts in again.

TORONTO.

TORONTO, Jan. 29. — During the past week trade with the hardware jobbers has been fairly good although orders are not heavy at present.

The unseasonable weather has been responsible for a demand for lines not usually sold at this season of the year.

The metal markets contribute to show improvement and quotations on some lines have been advanced. The stove trade is rather quiet at present although the outlook for future is bright.

Metals.

There have been several advances in price, particularly in alloys which contain pure tin. Tin has advanced 1½ cents per lb., consequently solder is higher. Ingot brass, both yellow and red has also advanced since our last report.

Demand for these lines are if anything a little stronger in spite of the advance in price, which goes to show that industries using this class of raw material must be fairly busy. Several foundries which were closed down or in some cases running short time, are now working full time.

Nails, Screws, Rivets, Etc.

No change is reported in the price of wire nails, which are still being quoted at 2.15 base. Black iron rivets remain unchanged at 75 per cent. off, and the following quotations for screws still hold good:—

Flat head bright.....85-10-7½-10%
Round head bright 80-10-7½-10%
Flat head brass 75-10-7½-10%
Round head brass 70-10-7½-10%

BETTER FEELING IN METAL MARKETS.

There has been a very noticeable improvement in the Toronto metal markets during the past two weeks. More buyers are coming into the market and there is an all-round general improvement. Quite a number of good orders have been placed during the past week. As reported last week, there has been an upward trend in metal prices. During the past few days tin has shown great firmness, and the price has been advanced 1½ cents per lb. The manipulations of the stock markets are again beginning to be felt. Copper has advanced ¼ cent per lb. Lead remains firm. Solder has taken a decided upward movement and quotations on all lines of solder have been advanced. It is very encouraging to metal merchants to see the brighter outlook in the metal trades. The optimism shown is not confined to local dealers, but appears to be general throughout Canada. The American markets also present a much brighter outlook, and considerable optimism is exhibited.

Rope and Twine, Etc.

There is a fair demand for this line. Quotations are as follows:—

Pure Manila rope .....15c base
British Manila rope .....11c base
African hemp .....11c base
Sisal .....10½c base
Lath yarn, single ..... 9¾c lb.
Lath yarn, double .....10¼c lb.

The Stove Business.

On account of the mild spell this line has if anything eased off, although demands are almost normal. It will be remembered with the cold spell some time ago this line boomed for a time. Several changes are to be made by some of the manufacturers in their designs, and some firms are now compiling new catalogues which will show the changes.

Gas Stoves and Ranges.

This has been a very busy season for gas stoves. The smaller towns seem to order farther ahead than dealers in the larger cities.

One manufacturer stated their factory was working overtime to fill their orders. Another stated they were exceptionally busy. Several important changes in design have taken place. The hardwaremen handling this line should look over some of the new features which are being embodied in gas ranges. These changes are not only good selling points, but are actual improvements, which will appeal very strongly to the buyers.

Garbage Burners.

This is a line which hardwaremen would do well to take up. They are about as sanitary a convenience as could be desired, are well built and will last for years. It is a well-known fact that the householder is looking for some sanitary means of finally disposing of garbage, particularly in small towns and villages where there is no regular garbage collection system. This is the season of the year when hardwaremen could do quite a little missionary work in selling this line.

Paris Green.

There is a fair demand at present for Paris green, orders are being placed ahead for later shipments and quotations remain unaltered since our last report which was as follows:—

	Paris Green.	
	C.P.C. Green.	Berger's
600 lb. casks	16¼c lb.	17¾c lb.
250 lb. casks	16½c "	18c "
100 lb. drums	17½c "	19c "
50 lb. drums	17½c "	19c "
25 lb. drums	17¾c "	19¼c "
1 lb. packages	19¾c "	21¼c "
½ lb. packages	21¾c "	23¼c "
1 lb. tins	20¾c "	22¼c "
½ lb. tins		24¼c "

TORONTO QUOTATIONS ON METALS.

Prices are gauged according to quantity purchased.

Electrotypers' Solder	30c	lb.
Brazing Metal	26c	lb.
Ingot Brass, red	14 to 16c	lb.
Ingot Brass, yellow	13 to 15c	lb.
Wire Solder	27 to 29c	lb.
Wiping Solder	24 to 26c	lb.
½ and ½ Solder	25 to 27c	lb.
Pattern Aluminum	23 to 24c	lb.
Ingot Aluminum 99% pure	19½ to 20½c	lb.
Spelter	$5.35 to $5.65	per 100 lbs.
Copper	15¾ to 17c	lb.
Tin	40½ to 44c	lb.
Lead	$5.65 to $5.85	
Tinkers' Bar Solder	28 to 29c	lb.

Tinners' Trimmings.

Demands are not to be complained of at present, though some time ago the demand was exceptionally heavy.

WINNIPEG.

WINNIPEG, Man., Jan. 21.—The only news in the way of price changes is in Canada plates, full polish, which have advanced, and are now quoted—6 to 7-inch, $4.50; 8-inch, $4.75. For the rest business is very quiet, and it is too early in the season to make predictions.

The building permits are, however, starting off well. All indications point to a banner year. Already building permits have those of last year doubled for the same length of time, and if this is the case under the present financial conditions, it is expected that the spring will see activity unsurpassed in the history of Winnipeg. Already the permits issued up to the present are $299,350 in advance of what they were at this time last year. The total permits issued number 62 for buildings valued at $546,400. This is undoubtedly a good start.

Turning to the business outlook in general, there are many encouraging signs. From the best sources of information I have been able to consult there should be some twelve millions of bushels yet to market of wheat, about one million of flax, and from fifteen to twenty million bushels of oats. The oats are, however, a very uncertain quantity, as with cold weather, as seems probable for the balance of the winter, the consumptive demand may greatly reduce the surplus. In the meantime wheat and flax prices are rising steadily, and what grain is coming to market is giving the farmer a good profit, but for the most part it is firmly held for higher prices, and it looks as though those who have this expectation will see it fulfilled.

It will be easily seen that an increase of 5 cents per bushel on all grain to market aggregates a vast sum, greatly adding to farmers' profits and supplying a very large amount of ready money for circulation.

The Manitoba Provincial Government will expend large sums during the current year in road construction, a line of activity very helpful to the hardware trade. The City of Winnipeg will have to expend some $5,000,000 in improvements outside of its new waterworks plant. It would seem from the above that contractors' tools and builders' supplies will move freely in the spring.

In stoves, the cold snap has brought out a few customers. Paints and oils are quiet. In metals, an advance in full polish Canada plates has been already noted.

ANNOUNCEMENT OF RATES FOR PARCELS POST.

(Continued from page 38.)

date of installation of the system, until June 30, the ending of the fiscal year the railroads of the country did not get one additional cent for the carriage of the 300,000,000 packages carried, and that since July 1, the beginning of the present fiscal year, some of them have received from but 1 to 5 per cent. additional compensation. In addition to this, the Postmaster-General has been compelled to announce that he will make an emergency recommendation to Congress for further compensation to carriers to save them from actual loss in the handling of mail, the recommendation being based on the volume of mail due to parcel post."

The C.O.D. Addition.

In this report of the U.S. Postmaster-General, he makes it clear that the C.O.D. system benefited the mail-order houses. This is self-evident, and it would be to the lasting shame of the merchants of Canada if they ever permitted our postal officials to go so far. Quoting from this section of the report the following is found:

"Collect-on-delivery service was made available to patrons of the parcel post on July 1 last. This facility enables the senders of a mailable parcel on which the postage is fully prepaid to have the price of the article and the charges thereon collected from the addressee on payment of a fee of 10 cents, provided, etc., etc. This feature of the service is believed to have had the effect of stimulating mail order business by making unnecessary in many transactions the payment of money in advance by purchasers or the extension of credit on the part of sellers, and it has become very popular owing to the promptness with which collections are returned to the senders. It is also believed that this service will prove a great convenience to our farming population when they accustom themselves to a larger use of the parcel post."

The Interstate Commerce Commission of the United States in its report just made public, declines to be made responsible for the situation created by the parcel post system, and asks to be relieved from its enforcement. The commission broadly intimates that it will lead to confiscation of express property and business.

This, then, is the actual state of things in the United States. Parcel Post has apparently overspent its allowance nd the question arises as to whether it is going to be a benefit or a detriment. The railways might naturally ask whether the system will show any profit at all when the post office begins to pay for parcel post mail that is still being hauled at the old contract rates.

What Is In Store for Us?

Will the Canadian officials run into the same noose? Are we going to have a white elephant on our hands a year hence in the shape of Parcel Post? Are we to have a system that requires jacking up at frequent intervals with fresh funds from the country's treasury?

The delay that has already occurred shows pretty well which way the wind is blowing at Ottawa. It looks as if our own officials see breakers ahead. Time will tell just how well they have been avoided.

Industrial.

Watsons, Limited, makers of wire screens, expect to open their plant at Bradford, Ont., in February.

Hamilton, Ont.—F. W. Bird & Son, makers of roofing paper and branch of an American firm, are making extensions.

The public is discarding the gloom bogie of the stock speculators.

Methods of Retailing Paints and Varnishes

Paint an All-Year Round Seller

Toronto Dealer Displays Paint in Zero Weather and Makes Many Sales — Making Preparation for Spring Business.

PAINT is no longer a one-season seller. Some years ago it may have been considered as such, but the tendency to-day is to sell paint the whole year round.

It is true that sales are curtailed to some extent during the winter months, but that does not prevent a live dealer from making his paint department a profit-maker during all seasons of the year.

There is a hardware dealer located in the western section of the city of Toronto, who arranged a window display of paints two weeks ago, about the time when the thermometer was hovering around the zero mark.

Did he make a mistake in doing so? I do not think he did. He has made a good many sales of floor paint, floor wax, enamel, varnish stain, wall paint, and brushes as a result of the display.

He says that the paint department must hold up its end during the winter months, the same as all other departments in his store.

He does not believe in relaxing his efforts in the paint department during the winter. Several people remarked that he was trying to start the paint season a little bit too early, but the remarks did not affect him, he simply kept the goods well to the front, and by an attractive display he was securing a nice little share of business on the side.

Do not think that his sales run around the 25 and 50-cent limit. He has made a number of good sales during the past two weeks.

One customer made an enquiry regarding a finish featured as being especially attractive and durable for walls. The customer left the store with a quart of flat wall finish, and a three-inch paint brush. Two days later the customer returned for another quart of the same material. Before he was finished painting, the customer used two gallons of paint, and some thinning material.

This is only one of the many customers who purchased paint as a result of a winter window display.

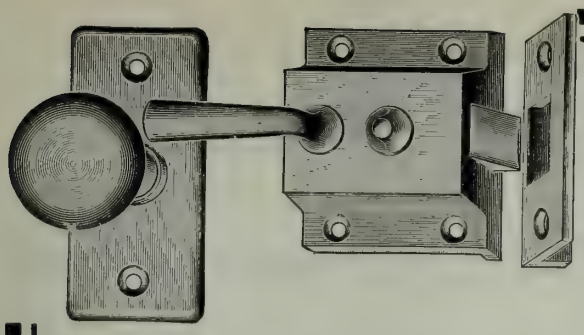
You cannot expect a big rush for paint during a slack season, but if you sell paint to one or two dozen customers, as a result of a winter window display you are doing good work.

In arranging a winter window make good use of show cards pointing out the fact that certain kinds of work can be done successfully during the winter months.

There are many householders who have plenty of spare time on their hands during the long winter evenings. This time can be devoted to painting and decorating in the home. A large amount of interior painting would doubtless be done by householders during the winter months, providing they knew that work of this nature could be undertaken and carried out successfully.

The example of the Toronto merchant could easily be followed by other hardware merchants. Why not try it out as an experiment?

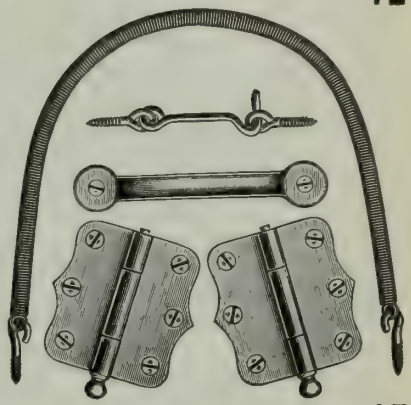
In addition to making sales during the slack winter season the merchant can also do a great deal of preparation work.



Work such as getting up complete mailing lists, looking up prospects, etc., can easily be done during the slack season.

If this work is left until the busy season sets in, the chances are it will receive scant attention.

In slack seasons prepare for busy seasons. With all preparations made early in the year, the dealer can launch his campaign early, and reap in a large share of profits.



Window display of paints by J. D. Anderson, 753 Broadview Ave., Toronto.

SCREEN DOOR FITTINGS

Are Good Profit-Makers

BUT you must have your stock in good shape to meet the demand when it arrives. It has surely been proven this winter that nothing is so uncertain as the opening up of the different seasons. Screen door weather will come suddenly and unannounced. With it will come the demand for screen door hardware. If you have your stock in shape you will get this business—if not you will lose it. Cinch this business by taking Time by the forelock and getting ready to-day. Our selection of these fittings is large, and we are ready to satisfy your requirements. Lost time means lost money—Don't be a Loser.

Other Berry Brothers' finishes that have wide popularity among builders and home-owners are:

Luxeberry White Enamel—For white interior finishing. A white enamel that stays white.
Luxeberry Wood Finish—For the finest rubbed or polished finish on interior woodwork.
Luxeberry Spar Varnish—For marine uses and all kinds of exposed outdoor finishing. Never turns white, checks nor cracks.

Use and recommend "Berry Brothers'" varnishes —the kind that make satisfied customers.

Write for interesting literature on the varnish question.

You Can't Hurt Floors

Finished With Liquid Granite

You need never worry about your hardwood floors or linoleums if they are finished with Berry Brothers' Liquid Granite. Hard usage and frequent scrubbings won't injure this superior floor varnish, and its hard, tough surface will keep your floors looking bright and smooth and glossy for a long time.

It's easy to clean such floors, for dirt and grease don't penetrate Liquid Granite, and are quickly washed off with soap and water.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, January 28.—During the past week orders have been coming in to the local manufacturers in bunches owing to the fact, that their travelers are once more on the road and doing good business. As stated last week, the quantity of paint ordered by retailers throughout the country goes to show that the feeling which existed during the last half of last year is gradually fading away and conditions to-day are in much better shape than most people expected. The only sign of any depression at all is in the larger centres such as Toronto, Montreal, Winnipeg and Vancouver where retailers are not inclined to follow the steps of practically all country dealers who seem to have rid themselves of the pessimistic attitude. There is practically no immediate business being carried on but this is not noticed when the future business is taken into consideration. Collections are very good and the West is showing vast improvement over the conditions of three or four months ago while the eastern conditions are about normal.

White Lead.

The conditions in this market have improved somewhat over last week and the chance for an advance in lead is not quite so strong. Pig lead has declined on the London market five shillings and is now quoted at £20 2s. 6d. As stated last week, the market for pig has been very strong for some time and the price has gradually increased until it had practically jumped three pounds without affecting the local quotations. Had this condition kept up there could have been nothing to prevent an advance in local quotations but as this price has now receded the possibilities are not so great. However the market is very firm at the following figures:—

Dry White ..... 6¾ cents.

Lead in Oil—

5 ton lots $7.75
1 ton lots 8.05
Less than 1 ton 8.25

Linseed Oil.

Local dealers report a very strong market this week. The demand is very good for this season of the year and the prices quoted are unchanged from last week although there are rumors going around at the present time that higher prices would not be out of order. The majority of firms are quoting 60 and 63 but one house gave a price of one cent cheaper. More than a seasonable demand is passing with the following quotations in effect.

Raw Oil—

1 to 4 barrels ..... 60 per gal.
5 to 9 barrels ..... 59c per gal.
10 to 25 barrels.....58c per gal.

Boiled Oil—

1 to 4 barrels ..... 63 per gal.
5 to 9 barrels ..... 62c per gal
10 to 25 barrels ..... 61c per gal.

With open prices for carload lots.

Prepared Paints.

As far as immediate business is concerned, the market is a dead one but this cannot be said when referring to futures. Spring delivery orders are plentiful. Country dealers are ordering in good healthy quantities and their confidence in the future can easily be judged by these.

Glass.

The market is rather a quiet one at present as this is the "off" season for glass. The demand is very light with the same prices ruling.

Putty.

The demand for putty is much the same as that for glass, rather quiet with the same prices in effect.

Putty quotations as follows:

Bulk, in casks ....$2.30 per 100 pounds.
Bulk, in drums.... 2.50 per 100 pounds.
Bladders, in barrels 2.80 per 100 pounds.

With the usual advance of 70 cents per 100 pounds for pure putty.

Turpentine.

Last week we stated that the conditions existing would warrant an increase in the price of turpentine and this has happened during the week. Local dealers are still split as to quotations the lowest being 64 cents for single barrel lots while the highest was 67 cents per gallon with lots of 5 barrels and over five cents cheaper. The situation is still one which might lead to higher prices as the conditions in the south are not too good. The market is very firm at the above quotations.

Gasoline.

The demand is still very good considering the weather conditions with the same prices ruling, namely, 25½ cents per gallon in wood, 22½ cents per gallon in steel or drums while local tank wagon prices is 21 cents per gallon for 100 gallons and over.

Benzine.

The demand is much the same as last week. Barrel lots in wood 23 cents per gallon with 20 cents per gallon in steel or drums while the local tank wagon price is 19 cents for 100 gallons and over.

TORONTO.

TORONTO, Jan. 29.—During the past week, business for immediate delivery was rather quiet, although the outlook for the future is bright.

Towards the end of February there should be a decided improvement in business.

Advance in Turpentine.

Turpentine has advanced 2 cents per gallon and the market is still firm. Sales at Savannah last week were 701 barrels against receipts of 1,000 barrels.

Toronto quotations are now as follows:—

Pure turpentine, 1 bbl. lots per Imp. gal., 70c.; 2 to 4 bbl. lots, 69c.; 5 gal. lots, 77c.

Linseed Oil.

Linseed oil quotations have been revised. Formerly, a difference of one cent per gallon, existed between single barrel quotations and 3 to 5 barrel quotations. There was also a difference of one cent per gallon between the latter quantities, and the prices of 6 to 9 barrels. A difference of two cents per gallon now exists and quotations are as follows:—

Raw linseed oil, 1 to 2 bbls. per 9 lbs., 65c.; 3 to 5 bbls per 9 lbs., 63c.; 6 to 9 bbls. per 9 lbs., 61c; 10 barrels, open. Boiled linseed oil, 1 to 2 bbls per 9 lbs., 68c.; 3 to 5 bbls per 9 lbs., 66c.; 6 to 9 bbls., 64c.; 10 barrels, open.

Oil for less than 1 bbl., 7 cents per gallon additional. 5 gallon cans, 50c.; 10 gallon cans, 75c. each.

White Lead.

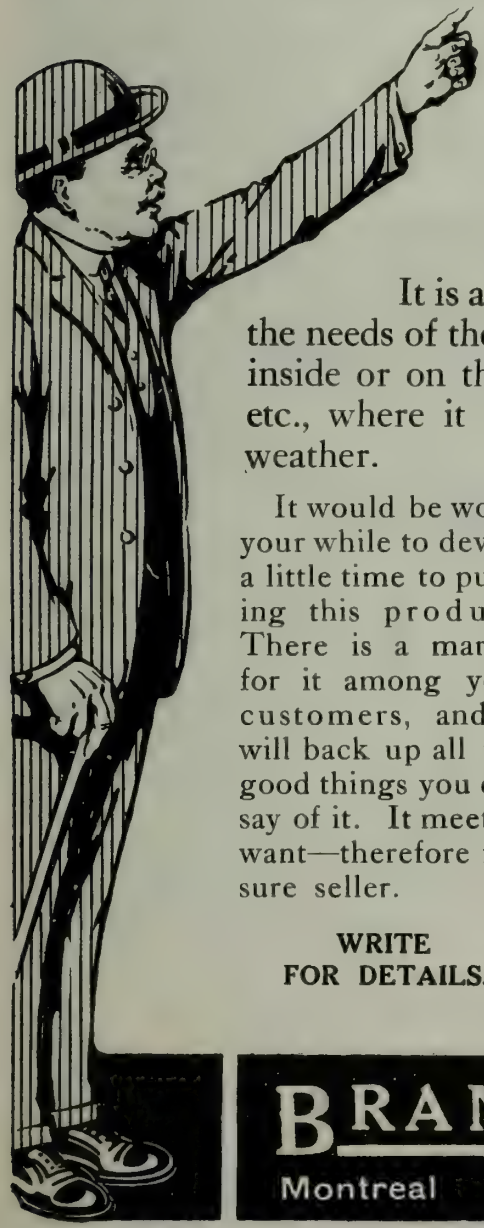
The following prices are still being quoted for delivery up to May 15:

5 ton lots, $7.90 per 100 lbs.
1 ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.

Glass and Putty.

There is no change in glass or puty quotations. The following prices are quoted on standard putty.

Bulk in casks, $2.40 per 100 lbs.
100-lb. drums, $2.60 per 100 lbs.
Bladders in barrels, $2.90 per 100 lbs.
Pure putty, 70c hd. advance.



Glass is quoted at 15 per cent. discount from the list prices shown in current market quotations.

Prepared Paints.

Spring booking continues, and so far compares favorably with the corresponding period of last year. There is at the present time a fair demand for inside finishes and the outlook for a good volume of spring business is exceedingly bright.

Owners specify Floorlustre

The fact that Floorlustre is a known and reliable floor finish, of recognized merit, is your guarantee that it is not only a sure seller, but is equally certain to please your customers, hence is a profitable and satisfactory product for you to handle.

It is made in ten attractive colors, dries with a rich lustrous finish, will not crack or peel, and will stand hard usage.

It is a floor enamel, precisely suited to the needs of the householder, and equally good inside or on the floors of porches, verandas, etc., where it is more or less exposed to the weather.

It would be worth your while to devote a little time to pushing this product. There is a market for it among your customers, and it will back up all the good things you can say of it. It meets a want—therefore is a sure seller.

CURRENT MARKET QUOTATIONS

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for large quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

MARTIN-SENOUR PAINTS & VARNISHES

A Real Step Forward

When a Hardware Dealer takes the time and trouble to thoroughly investigate the paint question;

when he compares the values of the various brands of Paint, on a basis of their service value to his customers;

when, after thorough investigation, he decides to handle not the cheapest —but the best—then, he is taking a real step forward.

Have us show you how Martin-Senour 100% Pure Paint will cost your customers less and make you more money than any other paint on the market.

Take a real step forward—investigate.

ROBERTSON SOCKET HEAD WOOD SCREWS

Will Give the Wood Worker the Best Satisfaction

They Save Time, Labor and Material

This is a real wood screw. A specially designed screw driver fits snugly into the square hole, and there it stays until the work is done.

This is the only wood screw of this type on the market and it is invaluable to carpenters, cabinet-makers, carriage-makers and for electric wiring.

Be sure to stock a few.

We manufacture high quality Hand Drivers, Yankee Bits, Brace Bits, Rivets, Bars, Washers, Nails, Wire, etc.

Drop us a card for catalogue.

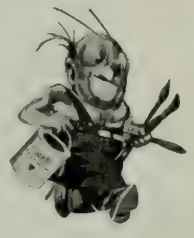
The MOORE way of selling paints adds no cost to the selling price

Mr. Dealer,—

Your customer demands the best paint you can give him at a reasonable price. The money you pay for your paint, is it going in the can, or elsewhere? Every can of Moore's House Colors contains value for money received.

If it is expensive to sell the paint you handle, and you have to pay more for it on that account, then you are not giving your customer value for money received. Why? Because your cost is increased, but your value has not.



Write for particulars of the MOORE way of selling paints. It will pay you.

BENJAMIN MOORE & CO., LIMITED
2, 4, 6 Lloyd St., West Toronto

NEW YORK CHICAGO CLEVELAND CARTERET

"SILKSTONE" Flat Wall Colours

(COPYRIGHT)

good in your store for the customers they bring—good for your customers for the service they give.

Silkstone—smooth as silk, hard as stone—is sanitary, washable and better than wall paper. Your customers will be satisfied with it—they'll come again, and the nice profit will make you glad to see them.

We want agents in some places yet. Write.

POULTRY NETTING.

52½ per cent.

Do You Know—We Told You

I.C. RED LEAD IN LINSEED OIL

IS BETTER

Than other Red Leads or Red Lead substitutes.

BECAUSE

It is always ready for use—Remains suspended in oil indefinitely—Dries quickly without the use of driers—Is more economical.

IT DOES NOT

Contain any adulterants—Disintegrate or chalk off—Harden or Solidify—Turn white after applying—Cost proportionately as much

AND WE PROVED IT

By having Canada's Most Noted Chemists, Milton Hersey, Limited, Montreal, make not only a chemical but a PRACTICAL WORKING TEST of it.

That report has been published several times recently in HARDWARE and METAL. We shall be glad to send you a copy of it.

NOW WE ARE GOING TO PROVE

I.C. Everlasting Paint

Is BETTER than other paints you are now buying or are able to secure

BECAUSE

It has greater covering power—It will not blister—It will not disintegrate or chalk off—It will hold its color—It works more smoothly under the brush—It contains pure linseed oil only—It sheds water like a duck's back.

YOU CAN TRY IT OUT YOURSELF—MAKE YOUR OWN TESTS—AND PROVE IT.

Write us for samples and particulars.

Watch this space for report of tests which are now being made.

International Color & Chemical Co. of Ontario Limited

BRIDGEBURG -:- -:- -:- -:- ONTARIO

PAINT AND VARNISH REMOVERS OF QUALITY

When you buy remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance.

Our Licensees are the only authorized manufacturers of the SLOW-DRYING, QUICK-ACTING, NEUTRAL REMOVERS.

	Name of Brand:
SHERWIN-WILLIAMS CO. OF CANADA, LTD., Montreal.	"Taxite"
INTERNATIONAL VARNISH CO., LTD., Toronto.	"Klensa"
PRATT & LAMBERT, INC., Bridgeburg, Ontario.	"Expedite"
BRITISH AMERICAN PAINT CO., Victoria, B.C.	"Bapco"
MOUNT ROYAL COLOR AND VARNISH CO., LTD., Montreal.	"Scrape-off"
ROBERTSON CO., LTD., JAMES, Toronto.	"Robertson's"
PEARCY & CO., LTD., SANDERSON, Toronto.	"Devolite"
STEWART & WOOD, Toronto.	"Solvo"
MARTIN-SENOUR COMPANY, LTD., Montreal.	"Martin-Senour"
ADAMS & ELTING CO., Toronto.	"Adelite."

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT NO. 78,586."

Chadeloid Chemical Company

100 William Street, New York, N.Y.

STABLE BROOMS

are in constant demand at this season of the year. We offer you genuine steel fastened Stable Brooms of which we are the originators. They cost less than pitch fastened Brooms and are guaranteed to stand the hardest usage.

Supplied in Bass, Cane, or Split Bamboo in sizes from 12 to 16 inches. Special sizes made to order.

Stevens-Hepner Company LIMITED

PORT ELGIN ONTARIO

THERE'S MONEY IN THE RIGHT PAINT

If you stock a complete line of **Ramsay's Paints and Varnishes** there's no danger of a customer going to "the other store" because you couldn't fill the bill.

Furthermore, that customer will be **satisfied.** Time and climate won't alter his first good impression of the paint you sold him because Ramsay's Paints have stood the test since 1842, and have built up a reputation for right down durability and unfading qualities in spite of our strenuous weather conditions.

Ramsay's paints sell themselves—stock them, there's money in it for you.

A. Ramsay & Son Co.

MONTREAL

Paint Makers Since '42

Humpty Dumpty Folding Egg Crates

for the farmers, for the poultry dealers, for a dozen and one people who enter your store every day.

Have some "Humpty-Dumpty" crates handy, where they can be seen and make a bid for all the large custom that will go elsewhere, if it doesn't come to you.

The "Humpty-Dumpty" gives splendid service, it protects eggs, preventing their getting broken—saving its users the cost many times over.

And it pays you who handle it a very nice profit, besides the good-will we've already told you about. Write for prices.

Do You Sell Paint Insurance?

That is what property-owners want when they buy paint from you.

Canada Paint products give this protection, and in selling them to your customers you can depend on it, you are giving them reliable paint insurance. Unless you are familiar with the Canada Paint Co.'s 1914 Agency Proposition you do not know what it would mean to have the Canada Paint Agency in your town. The C. P. Agency goes further than reliability and honest value in a full line of Paints and Varnishes, etc. Realizing that increased paint sales for you is a mutual benefit—a complete and practical plan has been perfected, and is now at your command, to bring more buyers into your store.

We will appreciate your courtesy in allowing our representative to show you the C. P. proposition. A post card will arrange a call whenever convenient for you.

Some Advertising Advice.

¶ To make your advertising help your business, you must make it your business to help your advertising.

¶ Fancy a salesman calling on a very busy man once a week for a year, and saying exactly the same thing, wearing the same clothes and the same expression. Wouldn't he stand a fat chance of doing business? And yet there are men who will condemn advertising because it can't produce results under conditions which would be absolutely intolerable in the human salesman.

¶ You may not have the artistic ability to plan attractive layouts for your advertisements—few business men have — but you can say something about your line that no other man can say. Something that rings true, something convincing—something that will sell.

¶ Leave the planning of your ad. to our service department. Tell us what you want to say and put it up to our ad-writing department to dress it up for the occasion—effectively.

¶ Our ad-planning-writing service is second to none in Canada, and many of our most successful advertisers are taking advantage of it. Its services are free, and every advertiser or prospective advertiser in this publication is invited to employ its help.

¶ Remember this—cold type and illustration are representing your product — your house—your service. If the illustrations are poor, if your message is weak, the type arrangement unattractive, a poor impression is received by the readers of your advertisement. On the other hand, good illustrations, good copy and a good layout give a good impression.

¶ You can't afford to allow a poor advertisement to represent you, when our Service Department stands ready to help you.

¶ **If you want your advertising to make good, you've got to make it good.**

¶ And it **will** make good in Hardware and Metal if **you'll** do **your** share. **We're** prepared to do **ours.**

Books for the Metal Workers

Any of the following books sent prepaid on receipt of price

WRITE FOR CATALOGUE

THE NEW METAL WORKER PATTERN BOOK.

A treatise on pattern cutting as applied to all branches of sheet metal work. By George W. Kittredge. 430 pages; 774 illustrations; size 10 x 13 inches. Cloth bound. Price $5.00.

ART OF COPPERSMITHING.

A practical treatise on working sheet copper into all forms. By John Fuller, Sr. 327 pages; 474 engravings; size 10 x 6½ in. Cloth bound. Price $3.00.

SHEET METAL WORK.

A manual of practical self-instruction in the art of pattern drafting and construction work in light and heavy-gauge metal, including sky-lights and roofing, cornice work, etc. By Wm. Neubecker. 267 pages; 358 illustrations; 6½ x 9¾ inches. Half-Morocco binding. Price $3.00.

A PRACTICAL WORKSHOP COMPANION.

For tin, sheet iron and copper plate workers. By LeRoy J. Blinn. 296 pages; 170 figures. Size 5 x 7½ inches. Price $2.50.

SHEET METAL WORKERS' INSTRUCTION.

By Joseph H. Rose. 300 pages. Profusely illustrated. Price $2.00.

THE ROOFING, CORNICE & SKYLIGHT MANUAL.

175 pages; 170 illustrations and 13 plates; size, 6 x 9½ inches. Cloth bound. Price $1.50.

BAUGHMAN'S BUYER & SELLER COST TABLES.

A cost book for everybody having cost to figure by the piece, pound, foot or ton, from 2½c per hundred to $10 a hundred. Leather bound. Price $1.50.

TINSMITHS' HELPER & PATTERN BOOK.

With useful rules, diagrams and tables. By H. K. Vosburgh. A new revised edition; 120 pages; 53 figures; size 4½ x 6¾ inches. Cloth bound. Price $1.00.

TWENTIETH CENTURY SHEET METAL WORKER.

By H. E. Osborne. Gives short, concise explanations which should be easily understood by the young apprentice, and are sufficiently scientific for the practical use of the journeyman. 86 pages; size 5½ x 7¾; illustrated. Cloth bound; Price $1.00. Paper Cover; Price 60c.

PRACTICAL METAL PLATE WORK.

By Paul N. Hasluck. 247 illustrations; 160 pages. Price 75c.

TREATISE ON THE GEOMETRICAL DEVELOPMENT OF ROUND AND OVAL CONES.

With easy examples of their application. For the use of beginners and practical sheet-iron and tinplate workers. By John Fuller, Sr. 52 pages; 37 figures; size 4½ x 6¾ inches. Cloth bound. Price 75c.

MENSURATION FOR SHEET METAL WORKERS.

As applied in working ordinary problems in shop practice. By W. Neubecker. 51 pages; 70 figures; 5½ x 7¾ inches. Cloth bound. Price 50c.

TABLES GIVING THE LENGTH OF BARS FOR SKY-LIGHTS, AND RAFTERS FOR ROOFS.

84 pages; bond paper; handy pocket-size. Cloth bound. Price 50c.

METAL WORKER SHOP CARDS.

Made of Manilla Board, 11 x 14 inches; eyeletted for hanging up in the shop. Each, 25 cents; Per set, 60 cents. This set of useful cards now consists of three numbers, as follows: No. 1—Table of the quantity of tin required for roofs. No. 3—Table of the Diameters, Areas and Circumferences of Circles. No. 5—Table of the Capacity of Cylinders in United States Gallons.

EASY LESSONS IN ROOF MEASUREMENTS.

By W. Neubecker. Twelve lessons on figuring the amount of material required to cover a given surface in flat, hipped or irregular shaped roofs. 31 pages, 5½ x 8 inches; 12 illustrations. Paper cover. Price 25c.

HOUSE CHIMNEYS.

A series of articles on chimney troubles and their remedies. 62 pages; 5½ x 8 inches; 40 illustrations. Paper cover. Price 25c.

MACLEAN PUBLISHING COMPANY

TECHNICAL BOOK DEPARTMENT

143-149 University Avenue - - - TORONTO, ONT.

An old Windmill often marks the Beginning of Things

The old windmill that stood on the mouth of the River Don (since beautified and straightened), marked the beginning of a Queen City and the

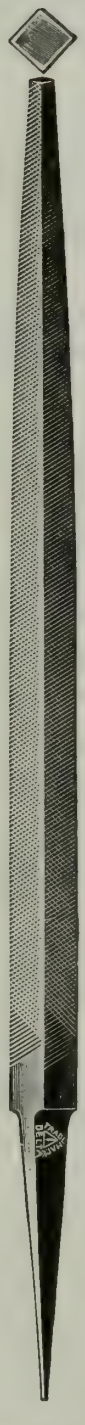
Fortunes of the Gooderham Family

There may be such a thing as luck, but most of the modern successes in Business can be traced to quality of mind and muscle. Thrift always follows certain characteristic qualities. The business instinct of the man is often noted in the youth. The way the Gooderham business grew from a small beginning to its large proportions makes an interesting study to the business man.

This family sketch appears in the February issue of MacLean's, and the reading of these successes in business life carries real information. This series are well illustrated, and can be kept on the book shelves of every business man for future reference.

In this number you will learn of the reason of Wm. McMaster's rise to the directorate of the Bank of Montreal. Also your query as to the reason why the Mexican people are constantly in political ferment will be answered in an article entitled, "Why Mexico Boils Over." Other features, including Review of Reviews, combine to make this magazine an intellectual feast for the busy business man.

Every Canadian should be a subscriber to this national magazine. Send a postcard to Dept. "M" and have your name added to our subscription list.



Write to-day and commence with this number.

Subscription price $2.00 a year. **Single copies 20 cents.**

The MacLean Publishing Co., Limited

143-149 University Avenue, Toronto

Taking Chances

On the quality of the goods with which you supply your customers, means taking chances as to whether you are going to build up a bigger, better business through the reputation you get for giving value, or remain as you are, or perhaps, degenerate into a little two-by-four kind of store—the sort that is only patronized when people are in a hurry.

And as regards files—you can't do better than handle clean-cutting, long-lasting, crucible steel.

Delta Files

the sort that will help build your business by the service they give your customers, the sort that bring repeat orders all the time, the sort that you take no chances with in staking your reputation on.

Stock up a few Delta lines, now, and give them a try-out. You'll be surprised at the way your customers come back for more, at the way they get confidence in the things you sell.

Order from your jobber or from us direct, but be sure you get genuine "Delta's" by looking for this mark on the Tang:

TRADE MARK

Blue Steel!

You know how good it looks—that blue-purple temper on the best tools, deep blue, changing through all shades of purple, to palest straw?

You know how that coloring somehow connects up in your mind with the idea of quality—with the idea that the tool bearing it is worthily made — will stand up under the service for which it was designed.

Your customer feels the same way about it. He, too, is prejudiced by blue steel; he, too, feels the pressure of the tool's greatest sales-argument.

Insist on **British-American Wax Paper** wrappings on your stock and make sure that your manufacturers and jobber ship you only tools whose greatest sales-asset has not been marred by unsightly rust.

You can't clean rusty blue tools either, because the blue is only skin deep and it will come off with the rust.

So, write them to-day and make your request. When they know how you feel about it, they'll be glad to comply,—for you satisfied, means your orders.

The

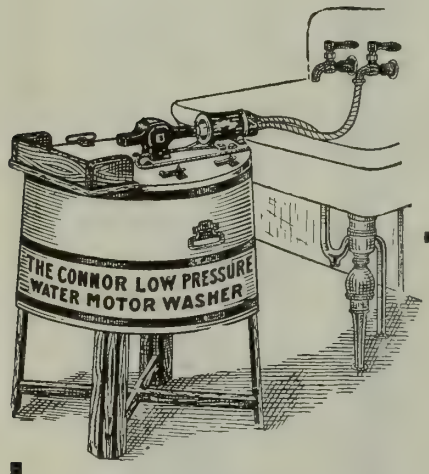
British-American Wax Paper Company, Limited

Darling Building, Toronto

BUR-NOR

You Never Can Tell

Just how stronga wooden handle is going to be, but you are sure of uniformity of strength in a Bur-Nor.



The construction and material of the Handle (Reinforced Steel) precludes any chance of weakness.

Under actual test 50% stronger than wooden-handled hatchets.

Write for descriptive circulars and list of Canadian jobbers handling this line.

Avoid Accidents by Using

Star Hack Saw Blades

known for over a quarter of a century as the standard of excellence in hack saws.

The sales of Star Blades have grown steadily, because the longer they are used the more conclusively is their sterling merit demonstrated.

They're convenient, too. A Star 14-teeth Blade can be used for all classes of work except very light work. For tubing 1-16 in. thick or less, use Star Blades 21 teeth to the inch.

If you don't know Star Blades, give them a fair trial. It would pay you to do so.

Catalog free on request.

BUCK BROTHERS

Millbury, Mass., U.S.A.

MAKE MONEY FROM GOOD PUMPS—PROFIT

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift—every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

The

R. McDougall Co., Limited

GALT, CANADA

Housewives Want An Easy-Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.

The **Thermo Washer** is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.

Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.50 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business, Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

Make a Better Living From Your Business

Every man who makes his living in the Hardware Business should read and re-read every page in Hardware and Metal's Annual Spring Number, to be issued March 21.

But especially should he study the advertising pages, which will be more interesting and more instructive than in any previous issue.

It is an old adage that "Goods Well Bought, Are Half Sold," and the only way to buy well is to thoroughly know what every manufacturer and jobber has to offer the Canadian Hardware Trade.

Hardware and Metal's Annual Spring Number will contain the announcements of practically every live firm who wants the orders of Canadian Hardware Merchants.

Many of them will show how to get better prices on hardware staples and thus save money. Many others will show how to add profitable quick-turning specialties and thus make more money.

You owe it to your business to read this big number with unusual care.

LONDON BOLT & HINGE WORKS

LONDON, CANADA

Every Horse Owner Buys at Sight

The Kling Hame Fastener holds the hames tight and uniform at all times. A child or woman can hitch up as easily as a strong man. Only takes a second to put on or take off, yet the horse can never open it or break it. Lasts longer than the harness. Costs the dealer $2.25 per doz. Any jobber. Write for circular. Look for "Kling" on the lever.

The National Safety Snap Co., Inc., Dept. 33, Wilmington, O., U.S.A.

Why The Advertiser Succeeds.

¶ Why is it that during the last few months, when money was admittedly tight, the manufacturers who advertised the most felt the pinch the least?

¶ And how is it that now, when the circulation of money is less restricted, the manufacturers who felt the pinch the most will be the last to experience relaxation and relief?

¶ The same wisdom and foresight which prompts a manufacturer to advertise will naturally guide him in forming his whole selling and general business policy, and, like a good general, he is prepared for every contingency and emergency.

¶ The fact that the successful business men is an advertiser is usually incidental. He is an advertiser because he is wise and possessed of good sound business sense and an analytical mind. At some time or other he came to the conclusion that advertising could be made one of the mightiest factors of his business organization, and having arrived at this conclusion, he just naturally went to it and advertised.

¶ He had faith in his product, and his own faith manifested in a public way, inspired confidence in the minds of his prospective customers. His name and his manufactured product became synonymous with good service and satisfying quality. The public became acquainted with the merits of his line and familiar with its outstanding features.

¶ Consequently, when conditions were normal, he secured a liberal share of business and received first consideration when purchases were made.

¶ When money tightened and business was curtailed, he continued to get the lion's share of what was going. When purchases were carefully considered the advertised line received first attention and usually secured the order.

¶ And now that the financial tide is coming back, the advertiser is getting the biggest slice of the business melon, simply because during those cloudy days of curtailment, his advertising message had been studied and absorbed at a time when the public mind was most receptive.

¶ It pays to advertise if your line is good, and it pays to buy advertised lines, because they are invariably satisfactory. The general public have long been educated to believe that advertised goods are best. Can't you see that you are laboring, not only under a handicap, but under a cloud, if your product is not advertised? Publicity dispels the cloud of suspicion and removes the handicap.

¶ You'd better hop on to the band wagon right away. Hopping on now, when the prospects for big business are so bright, will be not only timely, but extremely profitable.

You can talk across the continent for two cents per word with a WANT AD. in this paper.

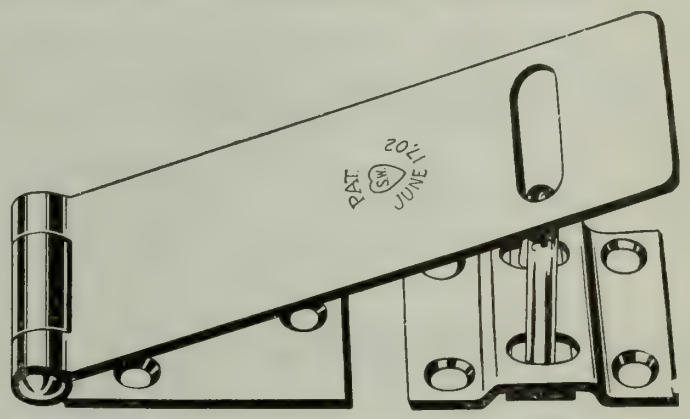
THE PROGRESSIVE MANUFACTURING CO.

Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.

Made for Brace—made for Machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.



Hated by Sneak Thieves

This Stanley No. 915 is a bona-fide Safety Hasp

It keeps sneak thieves on the right side of the door. It baffles the skill of intending intruders, who find no means for getting at the screws and balk at its great strength and resistance to a prying leverage

TRADE S.W. MARK

This Trade-Mark guarantees its genuineness and protects our patent on this 915 Hasp. You can supply yourself with four sizes: 3½, 4, 6 and 7 inch—The 7 inch being extra heavy, and strong. Plain Steel, Japan, Brass, Bronze or Antique Copper Plate, Galvanized or "Stanley" Sherardized. Stock them generously.

All Stanley Goods are ready for immediate Shipment.

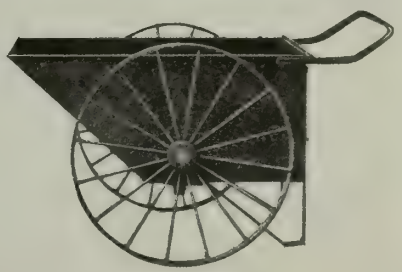
The Stanley Works, New Britain, Conn.

A. McFarlane & Co., Montreal, Canadian Rep.

John Wanamaker says that advertising doesn't jerk—it PULLS. He ought to know, and yet some men think that advertising should go against all rules and precedents and jerk them to success with one tremendous yank.

Warehouse and Store Trucks

Many different styles and sizes. We make barrows for every requirement.



Our Implements

Give a service that draws the dealer and his customers closer together

It will be to the interest of every hardwareman to get our catalogue No. 10. It fully describes our lines. Handle only Meaford Implements and you will be safeguarded against lost trade that comes from dissatisfaction.

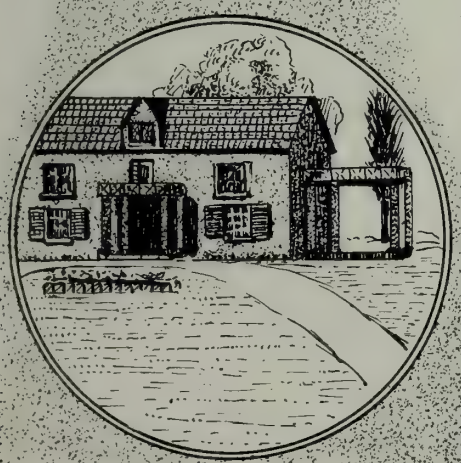
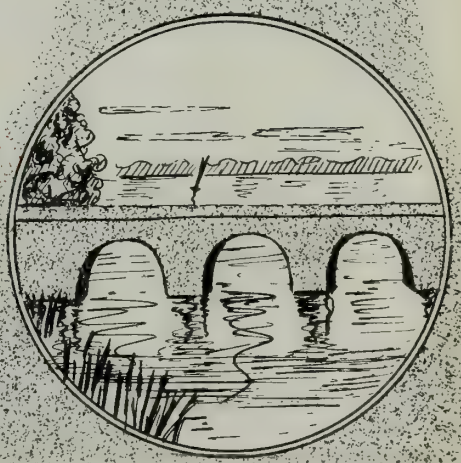
ROGERS'



Portland Cement



Will increase the activity and profit of your business

We have a great many hardwaremen on our list of representatives, and the many re-orders we receive are proof positive of their entire satisfaction. They find — and you will find Rogers' Portland Cement easy to sell because most builders know that it has exceptional strength and durability, and uniformity of set.

Our representatives need not carry a large stock. If they have not enough to meet demands we will ship immediately.

Write for full particulars to-day.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

In case lots of 24, $1.95 each. In broken lots, $2.05 each. Less 2%.

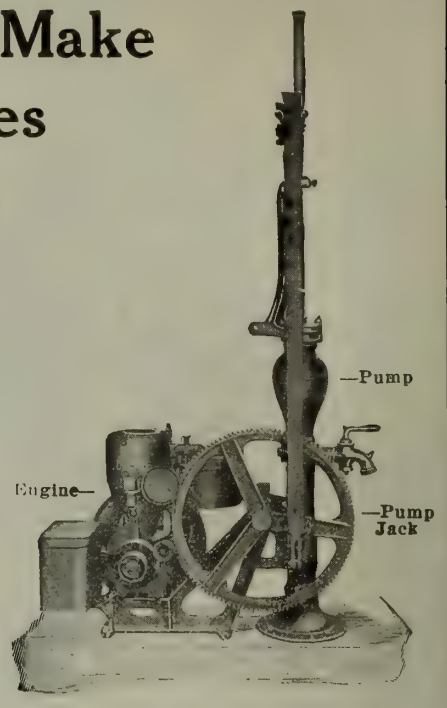
How the Hardware Man Can Make Money Selling Farm Engines



Every farmer is a prospect for a farm engine. Thousands of engines are being sold annually throughout Canada. The agricultural papers are full of farm engine advertising and long articles on the many uses and economy of the farm engine. Farmers read these papers very closely and are buying engines as rapidly as they can afford to. Farmers must come to the hardware dealer for supplies, and while there will look at a farm engine if you have one in stock.

You can add to your profits by securing the agency for a reliable farm engine.

FAIRBANKS-MORSE FARM ENGINES

Have an international reputation for reliability and long service. Farmers like them and speak well of them. Fairbanks-Morse engines are made in Canada, and are backed by a strong organization. We relieve you of all responsibility. Our engines are made in all the common sizes for farm use. By representing us you can supply any size or type of engine the farmer may need. The Eclipse engine shown here is in universal use and would be a safe engine to carry in stock, as there would never be a chance of your having it left on your hands. It is easy to sell. We are selling them all the time direct to farmers.

Write us in regard to handling our farm engines.

"Heralds of Expansion"

This week C. W. Jefferys, one of Canada's foremost artists, delivered to us the oil painting which will be reproduced in natural colors on the front cover of Hardware and Metal's Annual Spring Number.

He calls it "Heralds of Expansion," and it will be a peculiarly fitting cover for a number of which the keynote is to be "Expansion."

This cover will be easily the best of a long series of excellent covers used on the Spring and Fall Numbers of Hardware and Metal, all of which have typified the development of Canada.

We are determined that this year's Spring Number will, even more than in the past, reflect the importance of the Canadian Hardware Trade. There is not a Hardware Merchant in Canada who will not feel genuine pride in this supreme effort of the paper which has faithfully served their interests for more than twenty-five years.

While we are still considering Editorial plans, can YOU suggest any subject you would like to see discussed in this fine number?

From the Rough Stock To the Finished Drill In One Chucking

Rough Stock

Wilt Twist Drills are made by a process that accomplishes at a single chucking the work that under ordinary conditions requires five or six separate operations.

It is a revolutionary process and marks a noteworthy advance in twist drill manufacture.

It is a process by which accuracy to a remarkable degree is assured.

A process by which a clean-cut, well-defined clearance is obtained.

A process which, coupled with hardening of scientific accuracy, makes Wilt Twist Drills the most efficient drills manufactured to-day.

Be sure and visit our exhibit at the Convention of Hardware Dealers and Manufacturers, Ottawa, week of Feb. 16-21.

Do you want this business?

Nearly every building has cement used in its construction—nearly every builder has an almost constant demand for cement.

And—with the wider adaptation of concrete construction, to all classes of building, from the little three-roomed bungalow to the mighty many-floored office—that demand has become unprecedented.

One of the problems, the smaller builders have to face is the obtaining of fresh, dry supplies of cement—where they want them, and when they want them.

And it is fellows like this, that are building all around—down your street—within a stone's throw of your store.

Be an authorized

Rogers Portland Cement

dealer, and be in a position to supply these builders, with the finest quality cement—just as fast or as slow as they can use it!

They'll gladly buy from you because: 1—they don't want enough at a time to economically haul it from a builder's supply house—five miles or more maybe; 2—they know that in buying Rogers' Cement they'll be following to the letter their engineers' and architects' specifications,—they know that **Rogers' Cement is standard.**

Just two reasons—but good ones. Enough to get you the business.

Moreover you don't have to carry a great big stock of cement. We'll ship as promptly as you tell us to.

Do you want this business?

Then write now, before the other fellow gets it.

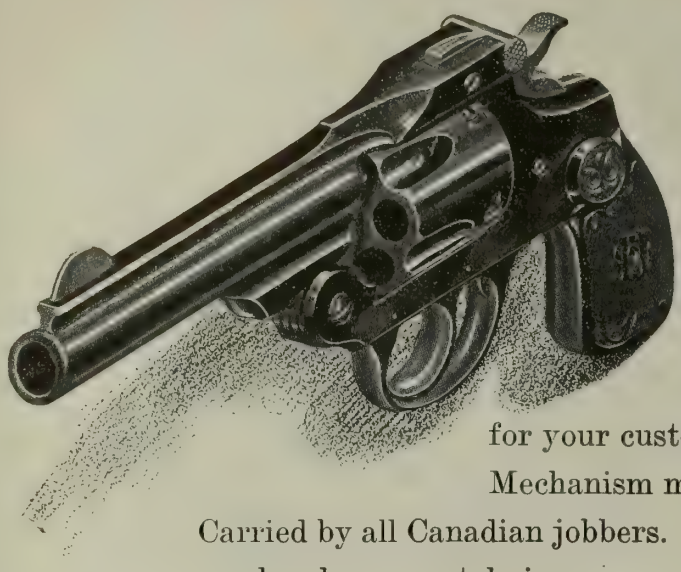
Every Man Is a Possible Starrett Customer

No matter what a man's occupation—machinist, clerk, draftsman, carpenter, or engineer, there is some one of the line of Starrett tools that will interest him. Here is a good example of a tool that interests the carpenter, pattern-maker, and amateur wood-worker. It is the

Starrett Scraper



It will put a smooth, satiny finish on work that the plane leaves rough. It is useful on furniture or any fine wood work. The ball and socket joint permits working in cramped corners. Any of the eight cutting edges may be brought instantly into use by a turn of the joint and by changing the slip-on handle.

This tool retails for $1.00. Send for our big, new free catalog No. 20MA which shows our full line of mechanics' tools and gives prices and descriptions of them all.

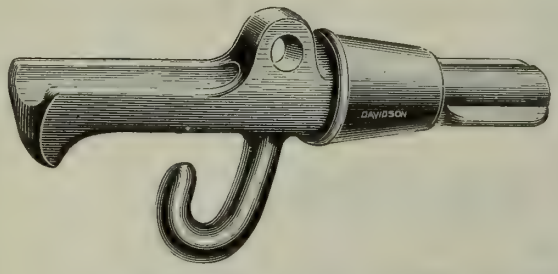
Quality Goods

which include the

"SAMSON" RAILROAD OR DELIVERY CANS

The "Samson" Bottom—the strongest, most sanitary bottom because it is stamped from one-piece, heavy sheet steel and pressed by the most powerful machine of its kind in Canada. There are no rivets to hammer in, no screws to tighten up, no hoops to adjust, everything smooth and sanitary.

The improved method of connecting the breast to the body ensures perfect rigidity and strength. The body overlap, which is curved to the shape of a half-circle, is placed **outside** the bottom of the breast. Inside the cavity thus formed, we put a half-circle piece of iron, and the whole connection is then firmly soldered together.



The extra heavy wired edge is another strong feature.

Write for a supply of our new 1914 "Samson" Booklets—

McClary's

MONTREAL HAMILTON LONDON TORONTO CALGARY WINNIPEG VANCOUVER SASKATOON EDMONTON ST. JOHN, N.B.

THE "EMPIRE" SAP SPOUT

STRONGLY MADE OF MALLEABLE IRON, TINNED AND DURABLE ENOUGH TO LAST THROUGH A GENERATION.

EVERY SPOUT GUARANTEED AGAINST BREAKAGE

THEY WILL RUN SAP EARLY AND LATE with a capacity fully one-third more than any other make.

THE TAPERED END GIVES THIS SPOUT A FIRM HOLD of the tree and the play of the wind on a full bucket of Sap cannot possibly loosen the spout after it has once been driven in.

IT DOES NOT LEAK, and is very easy to insert and just as easy to remove.

USE 7-16-INCH BIT WHEN TAPPING, and it will be found that with the **"EMPIRE" SPOUT** every severed grain of wood within the hole is left perfectly free to run Sap—and the increased amount thus obtained will pay for the Spouts in less than one Season.

NO ROSSING OF THE TREES NECESSARY and therefore no injury to the bark.

UNDERFEED
FURNACE OR BOILER
CUTS YOUR COAL BILL 1/2 to 2/3

YOU can make this year of 1914 the BIGGEST in your history, Mr. Heating Man, by securing an Underfeed Selling Agency. Write TO-DAY for our proposition to Canadian dealers. Underfeed is the greatest word in the ECONOMY of heating, because ALL-TIME comfort is assured at LEAST cost. Over 25,000 satisfied American and Canadian users KNOW that the Underfeed has actually CUT their coal bills in two, and in some cases, even in three. Clean, even, adequate heat with LEAST attention is an Underfeed certainty.

Let us send you booklets fully describing the

THE PECK Williamson Underfeed FURNACES BOILERS

We HELP you sell, and turn over to all dealers inquiries that result from our all-the-time NATIONAL advertising.

Here are exclusive points of Underfeed advantage—points that make it easy to sell Underfeeds:

The Underfeed saves $2 to $3 a ton on coal, burning CHEAPER grades of hard or soft coal—slack, pea or buckwheat sizes. All FIRE IS ON TOP—close to heating surfaces, which are thus kept free from heat-retarding soot.

Send rough sketch or blue print of your floors and basement and we will forward FREE Heating Plans and estimates of cost.

THE PECK WILLIAMSON COMPANY

GURNEY-OXFORD

A Message and an Invitation

If the net result of the forthcoming Convention at Ottawa is only one new idea for increasing or bettering your business or one new, good line to handle, its purpose will be fulfilled.

The Gurney-Oxford exhibit will be the meeting place of hundreds of live Gurney-Oxford dealers. Sales plans and ideas for making 1914 a banner stove year will be under discussion.

We are always glad to see our friends—we expect to see them, but this message is to those dealers who know us only by name. Let's get acquainted at Ottawa. You have seen the Gurney-Oxford Trade-Mark. Let us show you what it stands for in the way of service and selling help.

You have heard of the Economizer. Let us prove to you how it can be made to increase your stove sales.

You could not miss the Gurney Exhibit if you tried. Won't you please drop in and shake hands anyway?

Yours for a bigger, brighter, better 1914.

But if you can't come, let us do the next best thing—send you our $15 **Special Sample Assortment** (F.O.B., Hamilton), made up exclusively of the best selling low and medium-priced lines, every whip of which is guaranteed to give absolute satisfaction to you and your customers.

Remember, this is sent on the definite understanding if they do not open up to your satisfaction, or better still, completely to your liking, they can be returned at our expense.

To those who send us an order NOW for SAMPLE ASSORTMENT we will send, no charge as a special premium, an imported hand-carved Malacca, a whip that retails at $3.50

Where Fine Workmanship Counts

The very simplicity of this kind of tool leads many to bestow less care upon its manufacture. Not so in the Disston Works. Every detail of **every** tool receives the same care and attention in its manufacture. Whether a man here makes bevels, trowels, saws, plumb and levels or any other tool, he is equally skilled in his work. We demand the same perfection in finishing this tool as we do in any other. A line drawn by its aid will be as accurate as it is possible to make. You can always "Depend on Disston."

This DISSTON Bevel

contains a patented feature which alone makes it superior to any other. There is a ball bearing in the end of the iron stock. Turning the wing nut forces this ball against the screw that passes through the blade and holds blade firmly. A half-turn tightens it. When the blade is extended to its full length—the greatest test of all —the ball bearing holds it as solid as in any other position.

The DISSTON bevel is practically indestructible and is absolutely accurate.

NICHOLSON DEALERS ARE NICHOLSON FRIENDS

When 10,000 dealers are 10,000 loyal friends, you can readily draw your own conclusion.

Every Nicholson dealer is a loyal Nicholson friend. The profit possibilities may have attracted them first—but it's the spirit of friendly co-operation that makes them "stick."

Files couldn't be made better than Nicholsons make them—so we've devoted much time to bettering our highly satisfactory service to the trade.

Bigger factory stocks—quicker shipments—more rigid inspections — down-to-the-minute goods — and a determination to make NICHOLSON-MADE FILES a most profitable line to carry.

These are the advantages that put the Nicholson brands in Canada's progressive retail stores.

An "Eastlake" Steel Shingle

The METALLIC ROOFING CO. LIMITED

TORONTO King & Dufferin Sts. — Manufacturers Established 1884 — WINNIPEG 797 Notre Dame Ave.

"Metallic" Brick Face Siding

If you were to recommend "Metallic" Materials for every building purpose for which they are useful, you would be astounded at the possibilities of development and profitable business right in your own neighbourhood. Here a Frame Store needs an artistic "Metallic" Front—there a Moving Picture House requires "Metallic" Ceilings and Walls—in another street a friend of yours has a house that would look "miles better" were it sheathed with "Metallic" Brick, Stone or Clapboard Siding, or roofed with "Eastlake" Steel Shingles or "Eureka" Spanish Tile—Parlors, Halls, Kitchens and Bathrooms could be improved out of all belief with "Metallic" Ceilings and Walls. Farmers want Fire and Lightning-proof Barn Building Materials—recommend "Eastlake" Steel Shingles and "Metallic" Corrugated Iron. Don't you think you are entitled to this business? We think we are justified in making this suggestion and backing it up with the "Metallic" reputation for fair dealing and quality. "Delay" means "opportunity lost." Don't lose this opportunity—full information free and samples provided. We want to figure for you.

What "Plymouth Cordage" Means

The three noteworthy things about the products covered by the phrase "Plymouth Cordage" are their number, diversity, and well-known high quality.

This high quality is maintained in all "Plymouth Cordage" at all times. It is the result of superior manufacturing resources and methods, and rests on a policy which has stood the sales test for eighty-nine years.

These facts are of vital account to every dealer seeking connections that shall be of permanent value to himself and his customers.

Our Ottawa Exhibit

at booth 124, New Machinery Hall, during the Canadian Hardware Manufacturers' convention, February 16-21, will show a large number of the products of the Plymouth Cordage Company.

Come and see this exhibit. Let us tell you what "Plymouth Cordage" is doing for others. Then judge what it will do for you.

Vol. XXVI. FEBRUARY 7, 1914 No. 6

Making Efficient Salesmen

Written for Hardware and Metal
by H. W. Byers

IN large American and Canadian departmental stores where over a thousand clerks are sometimes required, it is not always possible to secure those who are experienced in the art of serving behind the counter. Resort is often made to the material coming to this continent and who are constantly applying for work of this kind. Such material is not always polished sufficiently to be trusted with the transaction of business, even with the sale of the simplest article.

To turn these men and women into salesmen, some of the largest stores have introduced business colleges where their new clerks are taught the elements of salesmanship for two or three hours each day during the first week of their employment. From the points of view of economy and safety, this has been found necessary and profitable, and as some of the lessons imparted in these schools are those that should be learned by every salesman, a brief description is given of the system used by the T. Eaton Company, Toronto, for the benefit of dealers who consider their own clerks lacking in one or two points.

When the store is busy, and clerks are leaving and being taken on every day, these classes are held continuously. It can be imagined what a busy section of the work this is prior to the Christmas rush, when so many new and temporary hands are engaged. As each new clerk usually takes four or five afternoons or mornings to complete the course, and as the company is paying them all the while, it is easily seen that the T. Eaton Co. spends hundreds of dollars every year on the preparation of its clerks. And as this is one of the most skilfully operated stores in the world, it is obvious that smaller storekeepers might benefit by emulating some of their methods. If Eaton's find that it pays to spend a few dollars on each clerk in teaching him how to make out a complicated check the smaller tradesman might at least spend a few minutes for this purpose.

There is nothing very scientific or technical about the lessons. One could venture to say that if the training were carried a little further, along psychological lines, it would result in more efficient clerks. How many of them, when they have supplied the demands of a customer, attempt to create further demands by asking a negative question? A customer will invariably reply "no" to the query, "You'll not be wanting any eggs, will you?" whereas she will think and act if informed that a consignment of fresh eggs arrived that morning. She is so often "sold" with fresh eggs, that she will grasp at the chance to take some.

The Psychology of Delivery Service.

The only suggestion of psychology in this class is in the instructions given regarding the delivery of parcels. While the T. Eaton Co. have one of the most efficient and rapid delivery systems of any store in the world, they take care not to deliver a parcel if the customer will take it with her. For that reason, new clerks are taught after taking an order to suggest that the customer carry it herself by putting the simple question, "Will you take it with you?" In a large percentage of cases, if the parcel is not a large one, the customer will say "yes," whereas if the question, "Shall we send it?" had been put, she certainly would have relieved herself of the burden. How necessary this tuition is can be judged from the number of clerks, even in Eaton's, who ask the second question, and not the first.

The Class-room Used.

The class-room is arranged like any other class-room in a school, except that the blackboards, of which there are several, are ruled permanently in a manner that will allow lessons on the making of sales checks, invoices, etc., to be made easily. In fact, facsimiles of checks are printed on the board, allowing the teacher to fill in typical examples of sales, which can quickly be erased.

The clerks-to-be are seated at ordinary school desks and tables, and at the front stands the teacher. She or he is a person who has spent many years with the firm, and is familiar with the work in every detail. During the greater part of the day, she is pursuing her duties as head of some department, but usually finds time for two hours, either in the morning or the afternoon, to give this lesson.

The T. Eaton Company run their business on a strictly cash basis, so that it is unnecessary to train clerks how to deal

(Continued on next page.)

A Review of the Stove Situation

Representative of Hardware and Metal Interviews W. S. Fisher, President Enterprise Foundry Company.

It is only necessary to mention stoves nowadays to get a crowd around, that is, a crowd of hardwaremen. Stoves seem to be a sort of thermometer of the trade just now, and when the proprietor of a large stove concern like W. S. Fisher, president of the Enterprise Foundry Co., Sackville, N.B., starts talking about why the stove trade is quiet, when it will revive, and so forth, the whole hardware trade is there with its ears open, ready to catch every word and to profit thereby.

Mr. Fisher spent a few days at the Westminster Hotel, Toronto, on Wednesday this week, and granted an interview to a reprentative of Hardware and Metal for a little hardware gosip. One or two of the observations he made will interest our readers, coming from a man who has his finger on the pulse of a business in which almost every hardwareman is interested.

Mention was made of the approaching convention of the Ontario Retail Hardware & Stove Dealers' Association, and Mr. Fisher expressed sorrow that his plans would not allow him to be present at Ottawa. He became reminiscent, recalling the first convention of the Association about ten years ago, held in the Queen's Hotel, Toronto, to which he went with Col. J. B. MacLean, publisher of Hardware and Metal. There were hardwaremen present from all parts of Ontario, and the enthusiasm shown augured well for succeeding conventions.

Coming down to solid business, Mr. Fisher admitted that the stove trade had suffered along with others, partly through the depression, and partly owing to the mildness of the weather. He was sure, however, that the fundamental basis of the business was sound, and that it simply required this rest to recuperate. Resorting to an apt simile, he said:—"Like a sick man, it will benefit from the rest, and come again with even greater vigor."

"Do you feel the depression much in New Brunswick?" asked Hardware and Metal's representative.

Mr. Fisher replied: "The whole country is suffering from this depression, but the most serious falling off is west of the lakes. The general disposition now is to go carefully, and everything this year will depend on the crop. We needed this depression as a lesson of caution. The banks did a good thing when they compelled everybody, and especially real estate men, to go slow. They deserve all credit. If the banks had not acted this way, the depression would have been more distressing, and longer lived."

Having disposed of the depression, Mr. Fisher turned the subject, and discussed the remarkable strides being made by Canadian stove manufacturers, and how effectually they were combating the American trade in the West. Canadian manufacturers, he said, are making a higher grade of goods, and are now better able to keep out imported goods. During the past few years, the

W. S. FISHER.

volume of imported stoves and furnaces into the West had been considerably reduced by Canadians securing better facilities, and putting a better stove on the market.

Mr. Fisher, as readers of Hardware and Metal know, is a member of the commission which governs St. John's municipal affairs. As such, he is naturally very much interested in the development of St. John as a winter port. He stated that he felt sure the Canadian ports were gradually coming into their own, and that Canadians generally were recognizing the desirability of cultivating trade through their national ports.

Asked about the success of the Commission form of government in St. John, Mr. Fisher said that it was working out quite satisfactorily, and he thought that the people were well pleased with the innovation. St. John was the first Canadian city to adopt the commission form of government, and it has ben in force there for two years.

EFFICENT SALESMEN.

(Continued from page 40.)

with credit customers, but there is an enormous amount to be taught in dealing with cash slips, returned goods, and deposit slips. When a person applies for a position, and is accepted, he is given a card, and told to be in a certain class-room at a certain hour. Before the lesson begins, the teacher delivers a little speech explaining how long he or she has been with the firm, how necessary it is to be accurate to succeed, and so on. Then check-books similar to those used in the store are handed around.

First lessons are given on how to address customers. Instead of leaving to the new clerk to say, "And what do you want?" he or she is instructed to say, "Is anyone waiting on you, madam?" The term "lady" is strictly forbidden by this company when clerks are addressing customers. Care is taken to instruct the pupil not to worry people who are standing near their counter, and yet by using tact, to catch people who would otherwise pass away without purchasing. In large departmental stores one often notices clerks who stand behind the counter mute, while others are too aggressive, and by their zeal drive customers away; the T. Eaton Company teach their clerks to adopt tactics between these two.

A Rigid Examination.

In order that each pupil will know how to handle cash and the check-book, the teacher describes typical sales on the blackboard, each pupil being required to copy them into his or her book of slips. Following that, the teacher goes around to each desk pretending to be a customer, the clerks selling her imaginary goods, and making out the necessary checks. At one desk she will order something C. O. D.; at the next she will be returning goods, and making a further purchase, and at another desk a pupil will be required to supply her with goods on which she intends to make a deposit.

When this has all been gone through, three other afternoons are usually required, at which the pupils are given papers containing about twenty-five questions, covering every conceivable kind of complicated sale. Each paper is more difficult than the preceding one, and the pupils are kept at these until they have supplied satisfactory answers, and are considered sufficiently proficient to act as clerks in the T. Eaton Company's store.

It should be pointed out that while these lessons are being given, a portion of the day is spent by the novice in the store, where he or she has an opportunity of putting what has ben learned into practice, and is able to obtain advice in the class-room on any difficulties met with behind the counter.

The Ottawa Exhibition and Convention

Those Not Having Made Reservations Should do so at Once—A Large Attendance Expected From Quebec Province—Visitors Will Be Well Taken Care of.

EXHIBITION and convention week is close at hand. Retailers have only one more week in which to decide whether or not they will go to Ottawa. Decisions should be made quickly and reservations made at once, in order to be sure of ample accommodation.

For the benefit of those who have not yet made arrangements for exhibition and convention week, we will publish the instructions issued by the C. H. M. E. A.

Purchase single fare ticket on the certificate plan from your station to Ottawa, and if you wish to travel on the Hardware Special, see that it reads via G. T. R. from Toronto or Montreal if coming from points beyond either of these cities.

A railroad representative will be on hand at Ottawa, by whom your certificate will be vised, entitling you to a first-class return ticket.

For hardware men, exhibitors, guests and ladies who attend the Convention and Exhibition, a special rate has been secured at the two leading hotels at Ottawa—The Chateau Laurier and The New Russell. The rate is $1 without bath, and $1.50 per day with bath for five days.

The rooms are expected to accommodate from two to five persons, according to size. If you reserve a room that is expected to accommodate three persons, the charge will be for the whole room—$3 without bath, or $4.50 with bath.

A deposit of $5 must be sent with your application. Send money orders, checks without exchange added will not be accepted. For the $5 deposited reservation will be made for you, from February 16th to 21st, at either of the hotels mentioned. The committee reserves the right to assign to either hotel mentioned.

These rates can only be secured by obtaining coupon from either F. M. Tobin, secretary Exhibitors' Association, Woodstock, Ont.; J. A. Beaudry, secretary, Quebec Retail Merchants' Association, Montreal; Weston Wrigley, secretary, Ontario Retail Hardware Association, Toronto.

After committee assign you to hotel, deliver the hotel accommodation coupon or receipt for the $5 to the hotel when you register; this will be credited to your account, either in full or on account, according to accommodations you select, and this assures you the special rate engaged for you.

Special hardware trains will leave Toronto and Montreal on the 16th, and return from Ottawa on 21st. Hardware men and hardware representatives and their ladies only will ride on these trains.

The next issue of Hardware and Metal will contain much valuable information regarding the Capital City and the many points of interest, which hardwaremen will have an opportunity of visiting.

LETTER FROM F. M. TOBIN SEC'Y.-TREAS. C.H.M.E.A.

Hardware and Metal,
Toronto, Ont.

Gentlemen:—

It is interesting to note that the retail hardwaremen who have attended the hardware exhibition in Hamilton are realizing the importance of these exhibitions from an educational point of view for the dealer and his employees. In connection with this it is noticeable that many of the dealers are not only taking advantage of the exhibition this year, but they are sending their employees. This interest is appreciated, and is very satisfactory to the promoters of the exhibition.

Among the attendance at Ottawa will be noticed a large number from the Maritime Provinces. A number of reservations have been received from there.

Nova Scotia, New Brunswick and Prince Edward Island have been heard from.

Yours truly,
F. M. TOBIN.

Ottawa, Canada, North Central View from Victoria Museum.

HARDWARE AND METAL

VOL. XXVI. No. 6 Toronto, Canada, February 7, 1914 Two Dollars per Year

The Business Situation

THE Business procession is moving forward and making steady progress each day. It is not going ahead by leaps and bounds; it is slow, but sure. Depression and pessimism are falling behind, and there is a general movement toward normal conditions.

Canadian business men have great faith in the future of Canada, and believe that the recent stringency will not pass without leaving a beneficial effect. There is no doubt but that we will have a general improvement in business from now on, in all hardware and kindred lines. Since the first of the year, and especially during the past few weeks there has been a steady improvement in the metal markets. For a considerable length of time, caution and conservatism reigned supreme, and very little buying took place. There has been a general buying movement during the past two or three weeks, and a general all-round better feeling is exhibited. Quotations are in nearly all cases, very firm, and several recent advances have taken place.

In general hardware, business is quiet, a condition which generally exists at this period of the year. Booking for spring is very heavy, especially in Eastern Canada. Booking in some lines is in excess of last year, showing that the retail trade are looking forward to a good business year in 1914. It is felt that stocks of retailers are in the majority of cases very light at the present time. Retailers have been cautious and have not allowed heavy stocks to accumulate. Manufacturers' stocks in some lines are undoubtedly heavy, but there should be a big movement during the next few months.

That American business men are cheerful is evidenced by a letter issued by the National Association of Credit Men. It says: "The first month of the new year has clearly given a new note to business. Uncertainty as to what was going to happen next has been giving way during the month to definiteness. Instead of pursuing a policy of self-protection, as business men have thought necessary for several years, they may look forward, in lines where stocks have not been carried over on account of unseasonable weather, with genuine confidence, working aggressively and expansively for business.

"There is a world-wide ease in the money market, a condition almost novel, so long is it since we have been free from financial stress and strain in one or more of the world's centres.

"This note of cheer does not mean that we need be less vigilant in keeping receivables well under control, for no matter how favorable business prospects may be, anything but a close collection policy is bad business.

"It is obvious from reports reaching the National office that during the last two months of 1913 slowness in the settlement of merchandise accounts was general. There are two distinctive reasons for this condition: First, unseasonable weather operating against sales of winter stocks, and, second, timidity on the part of interior banks pending banking and currency legislation."

Regulations Affecting Scales

IN the Jan. 3 issue of Hardware and Metal a notice appeared, giving information regarding the amendments to the weights and measures regulations of the Inland Revenue Department. As a result of the notice, a large number of retail hardware merchants sent in letters asking for further information, resulting in our publishing the amendments in full in the Jan. 10 issue. The amended regulations, which go into effect sixty days from Jan 1, prohibit entirely the manufacture or sale of spring scales except in the cases of the kinds now used for weighing ice, sportsmen's spring balances and farmers' milk scales. Retail hardware merchants are concerned principally in the regulations which will prohibit the importation or sale of family scales. During the past two years many thousands of these family or household scales have been imported into Canada. There are at the present time many hardware merchants who have stocks of these scales on hand. The purpose of this editorial is to urge retailers to make an effort to dispose of all scales which will be banned under the new regulations. Only three weeks remain in which to accomplish the disposing of a line of goods which after that time will practically be dead stock. Unless an extension of time is granted, and there is no reason to expect such an extension, the new regulations will go into effect about March 1.

The writer called at a large department store in Toronto a few days ago, and going to the scale department he found a large array of household scales on display. One of the salesladies in charge was very anxious to make sales of household weighing machines. When questioned regarding the effort that was being made to dispose of this class of scale, she admitted that orders had been given to clear them out in view of the new regulations which would shortly be enforced. Hardware and Metal advises retailers to lose no time in disposing of all scales of the type which will be banned under the new regulations. Only three weeks remain to dispose of these lines.

Business Built on Fighting Spirit

A TORONTO newspaper presented to its readers recently an interesting article under the above caption, in which was told the story of a prominent merchant's success. The head of a large Queen City store had been asked to tell why one man can build up a large store and accumulate a fortune, while the merchant next door struggles along all his life without increasing the scope of his operations or the extent of his profits one iota. His reply was to the effect that the ability to fight, to keep eternally working to advance one's interests, was the real secret of success.

It will be interesting to quote from the article: "The men who have developed Canadian business have had to fight from the beginning," he said. "Coming here, they faced the wilderness, the handicap of great distances, and finally, because of unprecedented, natural development, competition of the fiercest kind. All this gives young men, native or foreign born, who are beginning business life in Canada, much to think about. They must fight to win. But they have precedents which must be inspiring. The necessity to fight is not a handicap; it is a stimulant. A man's career in Canada, in most cases, must be his own, for here changes in methods are constantly taking place. Every generation of Canadians has its own way of tying up a bundle, and the new ways are always better than the old ways. Of course there are certain general business principles, such as honesty, industry, and enterprise, which are transmitted from one generation to another. The beaten track is never to be scorned, but no explorer ever followed it, and it has been explorers who have made discoveries in business, as well as geographically. No big business was ever founded upon pessimism. A merchant cannot grow if he thinks the worst is yet to come."

There is a large measure of truth in this. The secret of the success of a retail business lies in the personality of the head of that business—his ability to grapple with conditions, to surmount obstacles, to instil his own enthusiasm into every member of his staff.

The following axioms propounded by the merchant in question are well worth keeping:

"The beaten track is not to be scorned, but no explorer ever followed it."

"A big business, and a small one, for all that, must roll up hill."

"Team work is more necessary in business than in football."

"The chief fault of sales-people is ignorance of the goods they are expected to sell."

"Drink and over-much tobacco are great foes to salesmanship and good salaries, as are too much tango and excessively tight clothing."

Current Market Quotations

COMMENCING with this issue a change is being made in the arrangement of our Current Market Quotations. The principal changes will be the use of larger type, and the addition of two extra pages of quotations. During the past few weeks we have been in correspondence with a large number of our subscribrs asking for suggestions as to how we could improve the service which Hardware and Metal is giving. We have now in our possession several hundred letters, and every mail is bringing in large numbers. The requests have been principally for extensions to our Current Market Quotations.

This is a service which has been appreciated in th past, and will be to a greater extent in the future. It is our intention to have this list absolutely correct, and to embrace many more lines than it has in the past. There may be typographical errors in the list this week, owing to the work of re-setting and the short length of time allowed to check quotations. Commencing with the Feb. 14 issue of Hardware and Metal, all corrections will have been made, and new lines added, and readers of Hardware and Metal will have an opportunity of making use of the most complete and efficient list of Current Market Quotations, on lines pertaining to the hardware business, that has ever been published for the Canadian trade.

PERHAPS THE solution of the Parcels Post question from the standpoint of the retail merchant is the establishment of radials. Good radial connections throughout the local zone will enable the merchant to hold his own.

Main exhibit room of the Yale & Towne Mfg. Co., 9 E. 40th St.

New Building and Show Rooms of the Yale & Towne Mfg. Co.

The New Building Recently Opened is Luxuriously Equipped With Most Modern Innovations of the Builders' Hardware Line —Descriptions of Exhibit Rooms.

THE new office building of the Yale & Towne Mfg. Co., occupying a plot 50x100 feet on the north side of 40th street, about 100 feet east of Fifth ave., New York, is twelve storeys high, and, including two sub-basements and a roof loft for elevator and ventilating machinery, has in all fifteen floors or levels, containing an aggregate of 60,000 sq. ft. of floor space. It was designed throughout to meet the special requirements of the company's business.

Canadian hardware firms, particularly those in the large cities, who are contemplating installing sample or display rooms (on a smaller scale, of course, than the ones here illustrated) will be particularly interested in the section of the Yale & Towne Building devoted to the display of the company's products.

The first, or ground floor, is devoted to a series of elaborate exhibit rooms, for the display of the company's products, and for the use and convenience of its customers, including architects and their clients. The main exhibit room is approximately 50 by 20 feet in area, and 21 feet in height, paneled throughout in French walnut, elaborately carved, the walls consisting of glass cases, electrically lighted and containing a most extensive and beautiful display of art hardware, the examples covering practically every important school of ornament and every variety of metal and finish.

Behind this is the "Alcove Room" containing, in a series of alcoves, extensive exhibits of the company's commercial products, including night latches, padlocks, cabinets and trunk locks, bank locks, prison locks, door checks, and builders' hardware and locks. Opening from the alcove room are four smaller consultation rooms, for the use of architects and their clients in the selection of hardware, finished in four different schools as follows, Georgian, Louis XVI., Colonial and Tudor Gothic. On this floor is located the office of the manager of the city sales department, with a separate entrance.

In one of the accompanying illustrations is shown the interior of one of the small exhibit rooms, showing construction of the display cabinets, open, partly closed, and fully closed. Illustrations are also shown of the main exhibit room, and the Colonial room, in the latter, showing panels of exhibits closed.

Surrounding the main exhibit room is a mezzanine floor, the rear portion of which is occupied by the manager and salesmen of the contract sales department, through which pass the drawings and specifications of architects from which are compiled the schedules of

locks and hardware for individual buildings which they call for, and on which are based the estimates, quotations and sales of this part of the company's product.

In the basement is located the city sales room, for the convenience of local trade customers, excellently lighted, with marble trim and terrazzo floor; and adjacent to it is the repair shop, for the making of duplicate keys and repairs for local customers. In the rear is a large stock room with metal shelving, containing stock of the company's products for the accommodation of local trade customers.

A fire escape, enclosed in a separate well or tower and connected with the rear of each floor by an open balcony, extends from the roof to the street level, while an internal service staircase, also completely and separately enclosed, furnishes convenient facility for communication from floor to floor. A special feature in the building is a receding construction of the rear wall whereby effective skylights are provided on the first, third, fifth, seventh and ninth floors. The building is designed throughout, and in every detail, to facilitate the conduct of the company's business, and to promote the health, comfort and efficiency of its employees, the number of whom now employed in the building is about 350.

The company's main works are located at Stamford, Conn., covering an area of over twenty acres, and employing upwards of four thousand people. Its subsidiary, Canadian Yale & Towne, Limited, operates a plant at St. Catharines, Ont., employing three hundred people, to meet the requirements of the Canadian market.

AMENDMENTS TO JOINT STOCK COMPANY'S ACT.

Proposed legislation and the draft of the amendment of the new Joint Stock Companies Act, for the Province of Manitoba, formed part of an address delivered at the Winnipeg Canadian Credit Men's Association dinner by A. E. Hoskin, K.C.

Mr. Hoskin stated that he had received a copy of the proposed Act, which tained in any prospectus, if adopted in Manitoba, are of the utmost importance as it has happened, more frequently in the east than in the west, that untrue statements have been made in prospectuses.

Important Changes.

Another, and the last important change in the present law, which had, he said, special reference to the interest of credit men in the Act, was the English practice of making retiring members liable for the debts and liabilities of a corporation for one year after they had parted with their stock. This is designed to prevent persons having confidential information in regard to the affairs of a company passing on their shares.

Mr. Hoskins also made a number of interesting observations to the members on the subject of commercial guarantees, and the proper requirements of a guarantee by a debtor were explained with is intended to bring the company procedure of the province more into line with the law in England and in Ontario, drawn up by Mr. Justice Robson.

The first requirement under the bill will be that companies must have a

Interior of one of the small exhibit rooms, showing construction of the display cabinets, open, partly closed and fully closed.

Methods of Doctoring a Sick Business

How One Merchant Made Large Profits on a Small Investment —Sending Out Price Lists Found Profitable—Price Tickets in the Show Window.

Written for Hardware and Metal by C. J. Morris

THERE is always a purpose in business. That purpose is the desire to make money. The conditions of that desire are various, each one depending on the ambition of the individual. How much the business man wants to make therefore depends upon himself and his own resources.

It is said that comparisons are odious, but comparisons in business matters are necessary, even though they be odious. A business is very much like a human being, for, like a man or a woman, it is subject to a good many ills. Some businesses are very weak on account of a poor constitution; others are healthy and robust. There are doctors and remedies for the sick man, and practically the same remedies are in existence for a sick business. There can be nothing odious in such a comparison.

The Price List Cure.

When a business is found to be ailing one of the first things to be done is to find a remedy. A good remedy is to clap a plaster on its chest. A good plaster is a price list. It is surprising what relief it will give. A few days ago I came across a small retail merchant who seven or eight years ago, started business with a capital of $400. He was one of the big crowd of retailers now rapidly disappearing, who looked upon bookkeeping as a pure waste of time; that, or his knowing nothing of accounts caused him to forget entirely the necessity for a balance sheet. Anyway, despite this omission, and through infinite exertion, he has made a snug little pile of $5,000 for himself, and now wants to sell out and go into something where the field will be larger. Some people would think this a foolish step to take, but this merchant is ambitious and lives only for work. A man of his calibre cannot fail. The word "fail" is not in any dictionary of his. Nor is it to be found according to Richelieu "in the lexicon of youth" at all. One of the principal things that brought him business was a price list he sent out every month all over the neighborhood. He also published this same price list at first once a month in the weekly paper, and afterwards regularly every week as he found results justified the outlay.

Now, people read price lists—women do particularly; and if you are selling anything one cent or two cents cheaper than anyone else the women-folk who, after all, are really the mainstay of the retail merchant will go some distance out

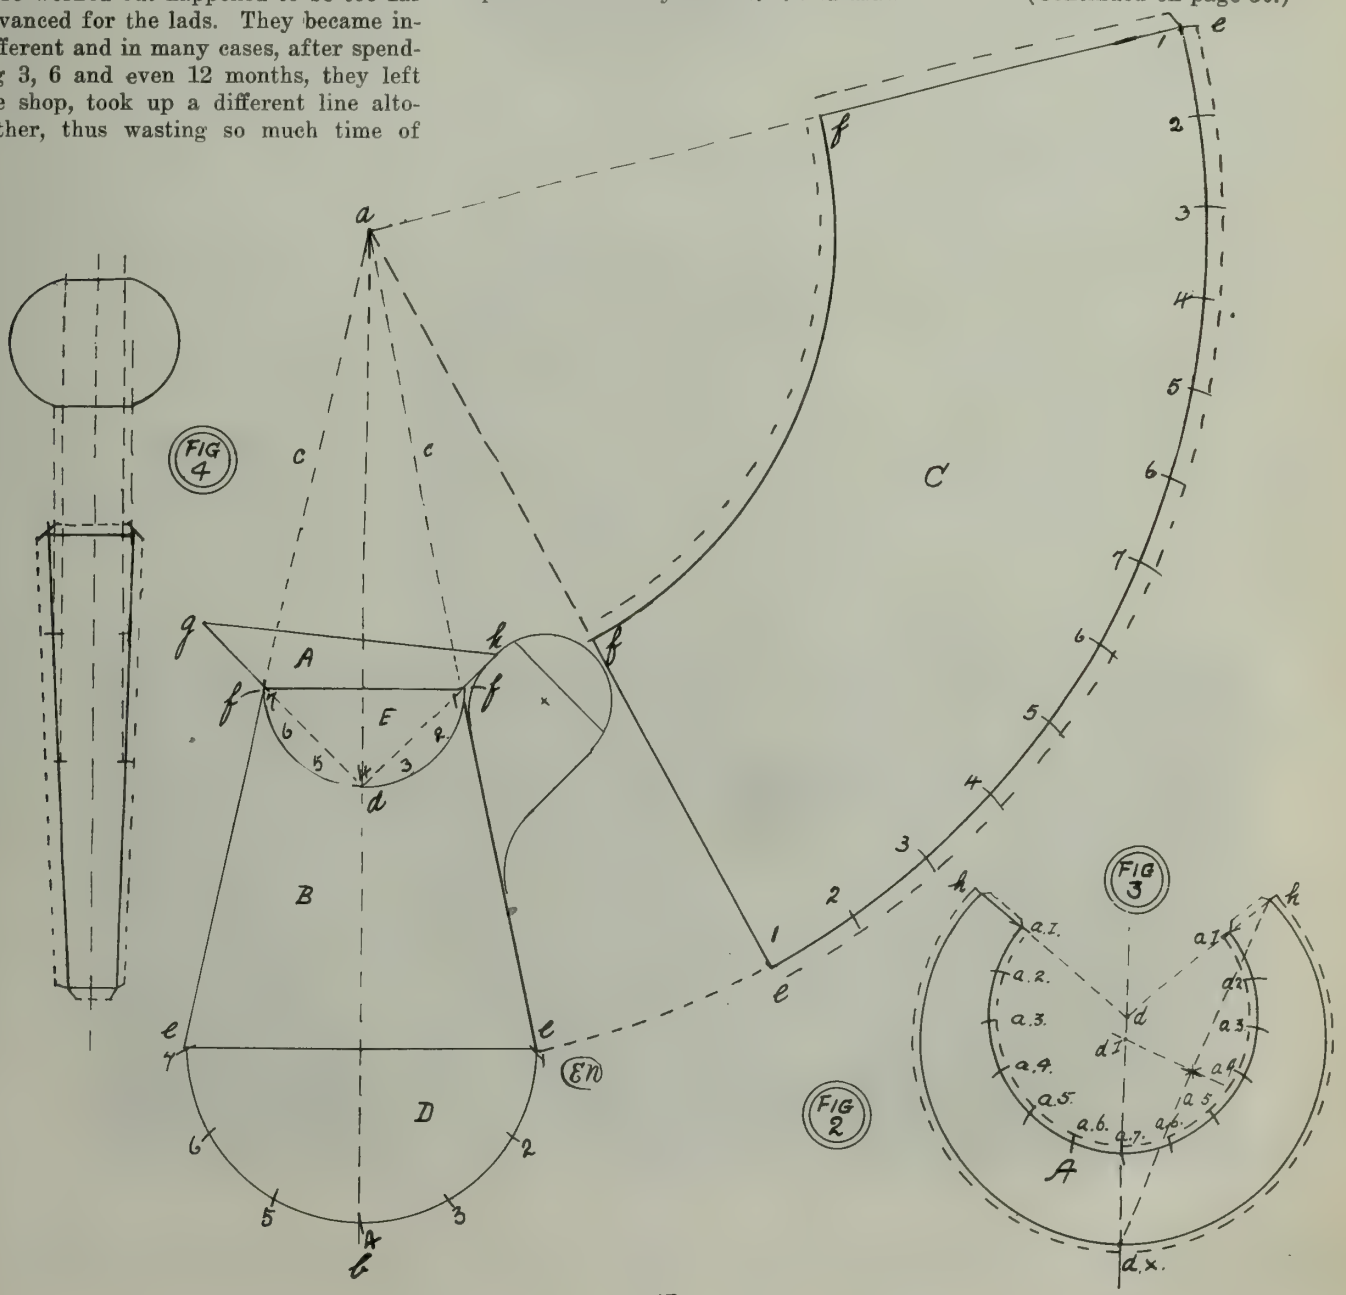
Problems For Sheet Metal Workers



IN this issue we propose taking up a simple, yet practical, problem for the tinshop, viz:—that of developing the necessary patterns required for an ordinary measure. These problems are taken up chiefly with a view to keep our craftsmen in touch with the actual development of such articles from day to day, and also to assist those who, some day will be our future men, viz: the apprentices.

Not many years ago the writer was employed in a shop where quite a number of apprentices were employed. They were termed helpers, and oftener than not these lads were simply wasting their time, because most of the problems which were worked out happened to be too far advanced for the lads. They became indifferent and in many cases, after spending 3, 6 and even 12 months, they left the shop, took up a different line altogether, thus wasting so much time of their lives. Those who stuck to their jobs often began doing work from mere habit as it were, just picking up a pattern, marking it off, then cutting and assembling. But if they had been asked to develop the pattern they were using, they could not have done so. These patterns we produce are simple, yet embody several of the principles which are required in most tinsmith work.

We will now take up the development of this measure. First turn to Fig. 2, and having decided the size, erect line *a b*; then draw the outline of measure in actual size, viz: flared lip A, body B and handle X. Then make arcs D and E. Next place the straight-edge in line with sloped sides of body from e. f. and draw lines until they intersect perpendicular line a. b. making a centre; then place compass at a and open up to C., developing arc C. Then measure off into 7 equal parts the arc D and stretch out these divisions on e. e., starting at e with 1, 2, 3, 4, 5, 6, 7 and 6, 5, 4, 3, 2, 1. The dotted lines on the edge are simple to allow for seaming and must be determined or allowed for by those developing the pattern.

When f. f. has been drawn and lines drawn on this arc from f. e. f. e. the pattern of the body is completed. For the bottom a circular piece is necessary twice the size of arc D with the necessary allowance for seaming.

(Continued on page 50.)

Staff Conventions and Reunions

Annual Dinner of the Trefoil Club

Club Composed of Members of the Yale and Towne Mfg. Co. Organization.

The annual dinner of the Trefoil Club of the Yale & Towne Manufacturing Co., held at the Hofbrau Haus, 1214 Broadway, New York, on Saturday evening, January 17, was one of the most successful ever held by the organization.

The dinner was of the beefsteak variety, and the "doin's and carryin's on" by professional entertainers added greatly to the jollity of the occasion.

A special feature was the unlooked-for issue of the "Yaletowne Trefoil," a little souvenir paper printed especially for this event in up-to-the-minute style, and chock full of jest and good humor peculiar to the occasion.

The whole affair was surcharged with the fine "esprit de corps" which stands out as such a prominent factor with the employees of the company, and is accentuated in the personnel of the Trefoil Club.

The picture shown herewith is a reproduction of a flashlight taken the evening of the dinner.

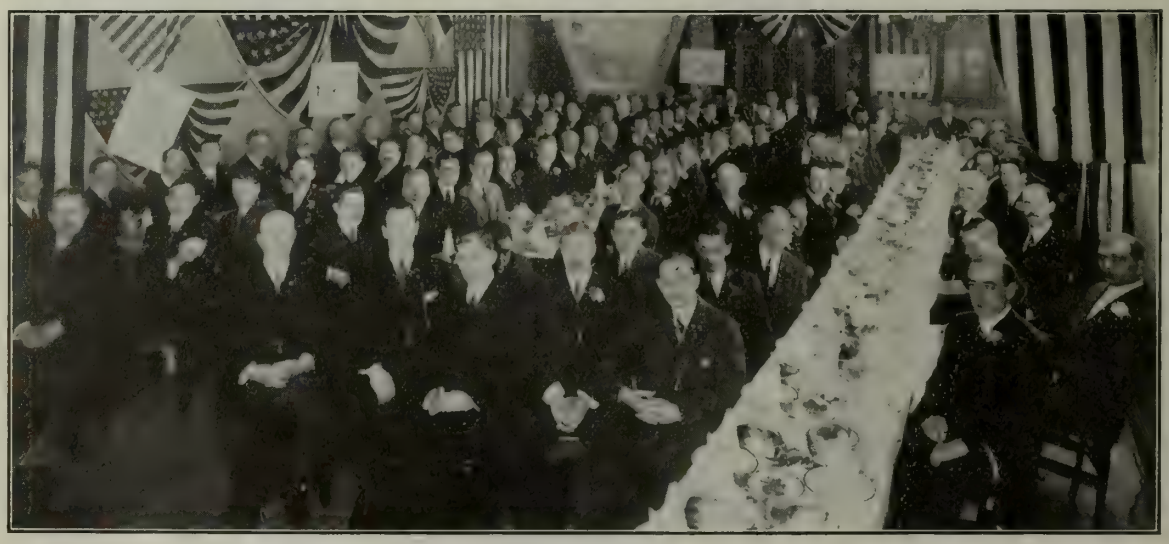
Our illustration in part represents the dynamic force of one of America's great industrial institutions—the directing departmental heads of the Yale & Towne Manufacturing Company—the captains in the great industry which Henry R. Towne has succeeded in building up, and of which he is still the guiding spirit.

The Trefoil Club was founded more than twenty years ago, membership being confined entirely to the officers of the company, departmental heads, salesmen, and members of the staff. Some general idea of the executive force of the establishment may be gathered from the fact that the membership of the club has grown to more than two hundred; some of them located in Canada (the home of Canadian Yale & Towne), others in London, Hamburg, Paris, Cuba, Mexico and the Far East.

J. C. Ziegler is chairman of the entertainment committee.

PENNSLYVANIA RETAILERS' CONVENTION.

The sixth annual Convention of the Pennsylvania Retail Hardware Association will be held in Philadelphia, Feb. 10-13, 1914. The headquarters of the Convention will be at the Bellevue-Stratford Hotel, where the general business will be transacted. An exhibition of hardware will be held in the Third Regiment Armory, Broad and Federal Streets, in conjunction with the Convention.



President John Wardrop has appointed various committees to handle general arrangements and details of the Convention. Chairmen of committees who have authority to appoint their associates on the committees are as follows:—C. W. Summerfield, chairman publicity committee; A. J. Egolf, chairman reception committee; C. E. Tobias, chairman committee on music; Albert Kaiser, chairman committee on ball; F. A. Mitchell, chairman committee on entertainment of ladies.

Charles W. Summerfield, chairman of the publicity committee, has completed his committee by appointment as follows:—James E. Baum, Supplee-Biddle Hardware Co.; Wm. B. Charlton, Supplee-Biddle Hardware Co.; F. C. Goodwin, 5801 Germantown Avenue; H. O. Stansbury, president, Philadelphia Hardware Association; T. James Fernley, secretary, Hardware Merchants' and Manufacturers' Association; J. G. Esmond, 60th and Market Streets.

It is the purpose of this committee to meet under the train shed at Broad Street Station, Monday, February 9th, at 5.45 p.m., and escort the delegates who will come in on the hardware special train to the Bellevue-Stratford Hotel, the Convention headquarters. All Philadelphia hardware merchants and those affiliated in any way with the trade are invited to be present and escort the delegates to the hotel.

W. J. Carter, of Carter Bros., hardware merchants, Picton, Ont., was recently elected vice-president of the Picton Bowling and Curling Club and president of the Prince Edward County Agricultural Society.

Annual Dinner of Trefoil Club of the Yale & Towne Mfg. Co.

New Stove and Furnace Firm in Canada

New Firm is Located at Almonte, Ont.—Members of Firm Are Prominent Stove Men—Stoves and Furnaces to be Manufactured.

ANOTHER FIRM has been added to the list of stove and furnace manufacturers in Canada.

T. W. Kirby and J. E. Bennett, late of Gurney-Tilden factories at Hamilton have announced the incorporation of Kir-Ben, Ltd., with a capital of $200,000, and head office at Almonte, Ont., to manufacture Kir-Ben furnaces, stoves and ranges.

Both members of the new firm are well known among the Canadian trade.

T. W. Kirby, of Kir-Ben, Ltd., has been associated with the hardware and stove trade for many years. Mr. Kirby was at one time sales manager of the Metal Shingle and Siding Co., Preston, Ont. He later became secretary of the Stove Manufacturers' Association and in that capacity was in close touch with manufacturers of stoves in all parts of the country, and received a very complete insight into the stove situation.

Mr. Kirby later became assistant manager of the Gurney-Tilden Co., of Hamilton, Ont. After the re-organization of the firm, which became known as the Hamilton Stove and Heater Co. Mr. Kirby retained his former position as assistant manager until a short time ago, when he resigned to take a partnership in Kir-Ben, Limited.

In addition to having had extensive executive experience, Mr. Kirby has had a great deal of practical experience in connection with the manufacture of stoves and furnaces, and is considered an expert authority on matters pertaining to the stove and furnace trade.

Mr. Kirby is third vice-president of Canadian Hardware Manufacturers Exhibitors' Association. He is also a prominent Mason.

J. E. Bennett started in the hardware business in August, 1897, as junior clerk with McBride Bros., Toronto Junction. In May, 1898, the business was purchased by E. R. Rogers and Mr. Bennett was given the position of head clerk. Two years later he was placed in charge of the hardware and tinshop departments, and was also appointed buyer for the firm.

During these years Mr. Bennett gained valuable experience, especially in the selling end of the business, and in 1903 he joined the selling staff of the Gurney-Tilden Co., and had charge of Eastern territory, until the company sold out to the Hamilton Stove and Heater Co. in 1908. Mr. Bennett remained with the latter firm for three years, resigning to take a partnership in Kir-Ben, Ltd.

The experience gained by Mr. Bennett during his many years' service in the various phases of the hardware and stove

J. E. BENNETT.

business, will prove a valuable asset in conducting affairs of the new firm.

The products of the new firm will be

T. W. KIRBY.

exhibited for the first time at the coming Hardware Exhibition at Ottawa.

DOCTORING A SICK BUSINESS.

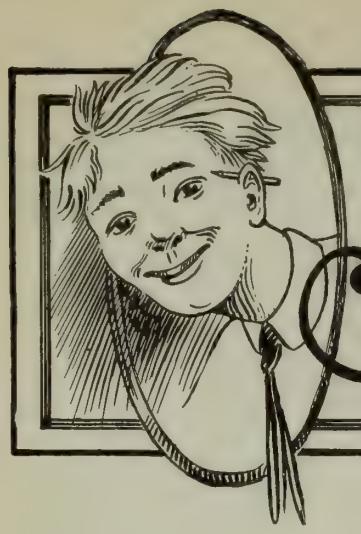
(Continued from page 46.

of their ordinary course to save that reduction.

Where is the housewife who will not go out of her way for the three articles at 25 cents, instead of paying 10 cents each? It is a question of domestic economy for the woman and one of business economy for the business man.

A Smart Example.

It is impossible to make a law to suit every business and one set of rules cannot be made applicable to every merchant. But there are universal principles which can be set up for the betterment of business in a general way. Now, a most effective general rule that can be adopted by nearly all retail merchants is to reserve one day in every month, at least, for a special advertising scheme. The plan is simple. Say that the appointed day is the first Monday in each month. On or about the 25th of the previous month send out a circular distributing it far and wide about your district, and insert a telling advertisement in your local weekly paper, calling attention to the fact that on this special day any article can be obtained at a discount of 10 or 15 per cent. (Please yourself how far you can go). You may take it as a certainty that your turnover for that day will be considerably increased. And good business man, as you are, you will not let the grass grow under your feet.



You will see to it that the loss of income you are enduring for advertising purposes will only be apparent. It should not be a real loss, and it need not be. You will of course, among other things, get in a good job line of something, some good stuff you can buy cheap, and there are many good job lines to be had at the present time.

Marking Goods.

Talking of price lists brings to mind a conversation I had last week with a hardwareman who asked for an opinion as to the advisability of marking goods. This merchant was inclined to disagree with some of his friends who argued that it is better not to price window goods. Many large merchants consider it a mistake not to price window goods.

True, it is the practice of some merchants not to do so, and if you are in a district where it does not matter, all well and good; but few small traders are in this happy position.

In a busy street of a busy town you must catch the eye of the passer-by. The mere sight of the articles in the window will not always do it. But a prominent card with the price of the article on it will. There are two ways of pricing goods. There is the aggressive style, and the reminding one. The former is done by big brazen figures, with an alluring inscription; the latter by just intimating the price in small figures in a neat way. The difference in the two is the difference between a coarse, loud shout and the gentle aristocratic whisper. Both are effective in their different spheres. But mark your goods, and in unmistakable plain figures. Try it and see the effect.

THE JUNIOR CLERK'S PAGE

Clerk Now Keeps His Mouth Shut

"LOUIS," said the general manager to the young man who stood before him, "I raised your wages last week."

"Yes, sir," the young man answered, "and I was very grateful for it, too. I——"

The general manager raised his hand.

"You're not going to be grateful very long," he said, "because I am going to take that raise away from you."

"Take it away?" Louis paled.

"Exactly—that is, I am going to postpone it two months. Two months from next pay day you will receive your raise again, but not until then. I think by that time you will have learned your lesson. I know it is drastic, but I cannot help it. I've tried to drive it into other heads by talking, but that seems to do no good. And so I must adopt a method of punishment. You will remember, Louis, when I gave you that raise I cautioned you not to tell any one about it? And now, honestly and truly, what was the first thing you did when you left this office?"

The young man hung his head and grinned sheepishly.

"I told a fellow," he answered. "I was so glad I had got that raise that—well, I guess I couldn't hold it in."

"And that is why I am taking the raise away from you. When I told you that, you believed I did so because this firm is stingy and doesn't want any one to know what any one else is getting. That is an impression I am sorry to see you have.

"There are in every office and every factory, Louis, men who are not worth a cent more than they are getting and never will be. They know how to do a certain amount of work in a certain way. They are nothing but human machines, and they would be dead wood on our hands at any higher wages. But we are forced to keep them because we can't get any one to take their places. But do you believe these men can see this in themselves? Certainly not. They have the same exalted opinions of themselves that every one else has. We all think that we're a little better than we really are, you know.

"Therefore, when these men hear that some one else is getting a little more money than they are they immediately think they are being discriminated against. They begin to grumble. They talk to other employees. Every little thing that a workman has against this firm is brought into the argument and piled up until the offence seems formidable. The result is general dissatisfaction—lack of good work, lack of discipline and the lack of everything that should be present in a good working crew. And the reason has been, all in the beginning, that a man who really deserved a raise got it—then told about it. Do you see what I mean? We're not stingy. We're just got good sound business sense, that's all. Understand?"

"Yes, sir," said Louis meekly, "I'll—I'll keep my mouth closed in the future."

The manager smiled.

"You bet it is," said Louis. Ten minutes later he had taken his position in the office again.

"What'd the boss want to see you about?" a fellow-worker inquired. Louis looked far away.

"Nothing," he answered.

—Chicago Tribune.

SHEET METAL WORKERS.

(Continued from page 47.

We will now turn to Fig. 3, which is pattern of flared lip of measure A.

Place compass point at d in Fig. 2 and open up to f. Then transfer this to form arc which will be the inner shape of flare, having as centre d. From d drop a vertical line through centre of Fig. 2. Then beginning at a7, transfer spaces in Fig. 2 at arc f. d. f. to inner arc Fig. 3, as shown up to a1. From centre d draw lines through the intersections a 1 a 1, extending them as shown. The next step to take will be to develop the outer arc. First place compass at f in Fig. 2 and stretch open to g., being front of lip and place point at a. 7. d. in Fig. 3, repeating the same on back of lip, f. h., transferring this measurement to a1. on line intersecting. Then draw a line across from intersection h. to vertical line at d. Then divide this line equally and form right angle to intersect vertical line, thus making centre dI. From this centre open up compass to d.x., being form of lip and form arc on each side to h. h.

It is now only necessary to draw arc as seen by dotted lines to allow for laps and wire edge.

The handle pattern, Fig. 4, is so simple that it really needs no describing. It speaks for itself.

REMARKS OF THE JUNIOR CLERK.

Are you going to Ottawa?

* * *

Sometimes one of his own bricks hits the man in a glass house.

* * *

It's money makes the wheels go around—especially those in an egg-beater.

* * *

If this weather continues, the fur-bearing animal may get a chance to come back.

* * *

"Don't knock." If the boss don't treat you right, get another job.

* * *

The wheel of fortune has turned many a man's head.

* * *

An oak is not felled by one chop. Neither does a clerk become a hardware man all in a day.

The Basis for Judging a Display

Written for Hardware and Metal by Byron H. Morrow

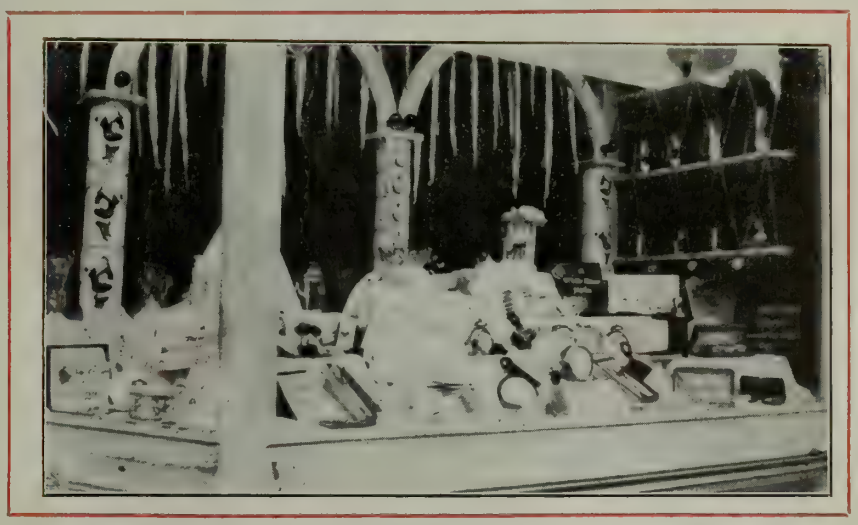
IT has often been said that the window trimmer who possesses the gift of turning out work distinctly different, who is original in the fullest sense of the word, is most certain to attract the attention of that all-important person, the passer-by. He does it by making his work so new, so striking, so attractive that people stop to look at it. He gets them "coming to him" as it were.

There is another sure way of attracting attention—quite as sure and much less difficult. Instead of preparing a display from your own standpoint which may be an original one, prepare it from the standpoint of the spectator. Plan to make it along the lines that the spectator will be thinking. Interest him by showing something that will appeal to him directly.

This is done by keeping the windows thoroughly seasonable, thoroughly in tune with popular demand and by taking advantage of all special occasions. If it is a cold day out, a man's mind runs on skates, snowshoes, carriage heaters, mitts, blankets. A window display of any of these articles will interest him; certainly will be more likely to attract his attention than a showing of knives or razors. A store's windows should always be in concert with the elements. Work in team play with the weather man and results will follow.

During the winter season the store windows should be suggestive in every way of winter needs. It is not difficult to secure the necessary effects. As an evidence of what can be done in this way, the accompanying illustration is shown of a display which appeared in the window of Van Tuyl and Fairbank, Petrolia, Ont., just previous to Christmas. This display was one of unusual merit, but unfortunately the photograph was too small to show the detail to advantage.

The window is 7 feet across the front and 9 feet across the back, with a depth of 3½ feet and a height of 10 feet. At the height of 7 feet a false top, composed of cheese cloth trimmed with red bells, was placed. The background was of solid red, with 12 in. white border, trimmed with silver tinsel, blocking it off in squares, with paper Santa Claus' in between.



The original feature of the window was the introduction of imitation icicles, suspended from the back of the window and along the arches. They were made by dipping cotton batting in gelatine, and a very weak solution of egg dye. They were then sprinkled with snow sparkle, the result being a very good imitation of an icicle.

This feature gave to the display exactly what was necessary—a realistically wintery background. A great deal of attention was won in this way.

James A. Craig, the display man, deserves credit for the skill he exhibited in this piece of work.

The idea is one which could be followed with good results at any time while the wintry season lasts.

To get the best results, a window trimmer must understand the mental attitude of the public he is appealing to. If he is planning a display of paint, he must understand what there is about the paint question which interests the average person before coming in contact with the display, and in this way arrange that display so that it will have an appeal when the person does come in contact with it. A certain window trimmer, who appreciated this phase of his work to the utmost, decided once to test the matter in the most practical way he knew how. He started out one day on a tour of inspection of the display windows of the town. One of the first he encountered was a display of a new cereal in a grocery store. Standing in front of that trim, he figured out just what his interest in cereals was.

at once that the only way that new assortment could be made attractive to him was by showing that the new food was worth trying. He had fallen into the habit of taking a plateful of a certain cereal each morning. Would this new variety be more palatable? Would it be more nutritious? Would it be cheaper? The display gave him no inkling on any of these points. It consisted of a clever arrangement of the boxes, one which quite apparently had taken considerable time in working out. But it made no appeal to him, and he decided that as a sales-making force it was absolutely nil. "Ordinarily I would never have stopped to look at that trim," he declared.

His tour was continued on the same basis, and as he progressed, he began to realize that he had found the one real basis on which a display can be judged—its measure of appeal to the particular class of person interested in the article shown, the extent to which it fulfilled the interest aroused in the mind by that article.

Hydro-Radials Are Now Needed

With the Unlimited Possibilities of Niagara Falls, the Province of Ontario Should Soon be Honeycombed With Radial Lines—Parcels Post Brings the Need for Radials Very Prominently Forward.

THE regulations of the new Parcels Post system provide the merchant with a means of holding his own against the aggressions of the mail-order houses. The local zone is the means provided of fighting the common enemy. It is not a high bulwark behind which the merchant can ensconce himself, safe from the competition of the catalogue corporations. On the contrary, it is a means of protection which protects only through active efforts. The merchant must be "up and doing," using the advantages of the local zone to the last cent of protection that it affords him.

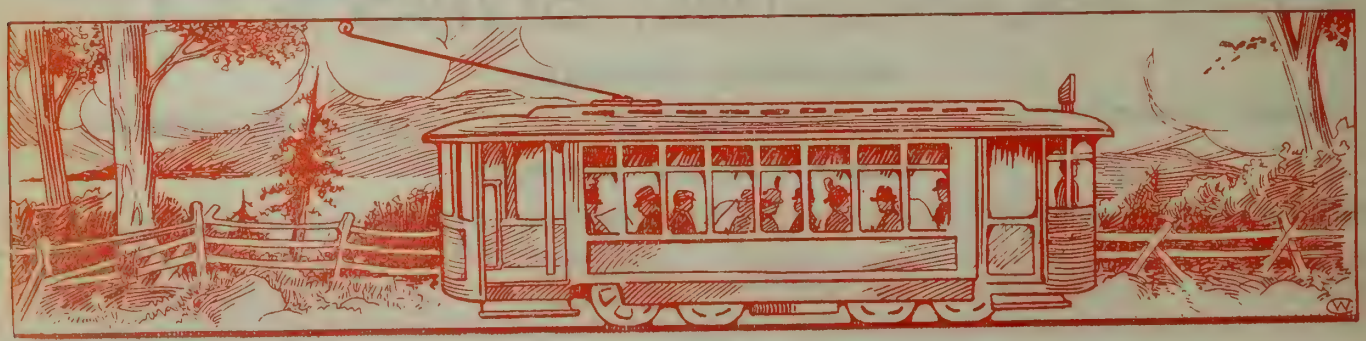
And so the big problem facing the retail body in Canada to-day is to use the local zone, to reach by means of it the customers in isolated townships and back concessions who otherwise would be sending their money to the mail-order houses. Many merchandising problems are involved in this question of covering the territory in the local zone.

A suggestion growing out of the need of better facilities for reaching the surrounding districts is now engaging the attention of certain sections of the retail body and certain publishers. What is needed is more radial roads. Electric lines connecting nearby points do more than any other single factor to bring districts together, to establish freer communication and to build up local trade. To make Parcels Post an aid to the local merchant, more radial roads are needed.

Four years ago a radial was built through a section of country of great agricultural possibilities. This country was not as thickly populated, nor as prosperous as surrounding counties; and the reason was probably found in the fact that the transportation facilities were strangely poor. One railway connected most of the principal points in a round-about way. A second railway cut through one corner of the county. It took a whole day's journey to get from the county seat to the town next in importance and size.

Enterprising promoters launched the radial scheme, and finally put it through. The road was built from the county seat following a circuitous route which took in all the main towns and bisected the best part of the country district. It was completed something over three years ago.

Figures will tell in the most direct way the results which have been obtained. The population of the county seat has increased more during the three years than it had during the previous ten. A more active tone is felt in all the towns. The farmers state that they are doing better as the road gives them a chance to market their own goods and thus make a larger profit. Life in the farming sections has been rendered more enjoyable by the readier means of communication with the larger centres.



What is more important still, the business done by the merchants in all parts of the county has increased. The added prosperity has been felt by the general merchant at Smiths' Corners as well as by the big stores in the county seat. This is due to a great extent to the fact that the people from the country districts get into town more and, therefore, buy more. But it is reasonable to assume that it is due also to a shrinkage in mail-order buying in that county.

The problem of radial connection with radial sections becomes of double importance with the advent of Parcels Post. The merchant located in a town where radial connections are good, will be in a good position to send out goods to customers in a few hours' time. Farmers who hitherto have been compelled to do all their shopping on their occasional visits to town or by mail, entailing long delays, will be able to enjoy the privilege of sending in orders to town at any time and getting delivery in a few hours. Are they likely to purchase their supplies thereafter in any other way?

The merchant who has the advantage of radial connections and **who advertises**, should find the Parcels Post measure with its local zone, a lever for the increasing of his business.

As the need for radial roads is so directly bound up with commercial expansion, retail merchants should take an active part in their encouragement. A feature also which must not be lost sight of is the fact that, so far as Ontario is concerned, the development of the Hydro-Electric supply is solving the power problem. With the unlimited possibilities of Niagara power, the province should soon be honey-combed with electric lines, bringing increased comfort to the farmers and increased business to the merchant.

With Parcels Post here, no time should be lost in taking up the question of Hydro-Radials.

New Goods Offered Canadian Hardwaremen

KING NO-DRIP LAMP.

King Light Co., Peoria, Ill., are offering the Canadian trade their new lamp, here illustrated.

The lamp will be known as the no-drip No. 157. The burner and mantle are the special features, and patents covering both burner and mantle are pending, as

No Drip Condensation Lamp.

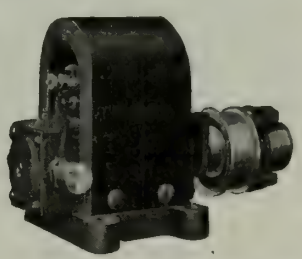
well as the design patent on the burner.

The manufacturers claim for this burner that it takes care of all condensation resulting from the use of poor grades of gasoline or the accumulation of heavy gas that is manufactured by the machine and with the long run of piping cools before reaching the lamp and be-

No. 157 Burner.

comes a liquid, accumulating little by little at the low point in the piping until sufficient liquid has accumulated, where it runs to the lamp and comes streaming down the lamp and should the lights be on will sometimes blaze at the mantle.

With the no-drip condensation burner the makers claim they avoid, and take care of all condensation that reaches the lamp.



It is claimed that, as it is impossible for any dripping on account of the peculiar shape of the burner, the mantle hangs from the gas tips, which are horizontally opposite each other.

The makers state that this lamp may be used on any make of tube lighting systems.

MOTOR BOAT LIGHTING OUTFITS.

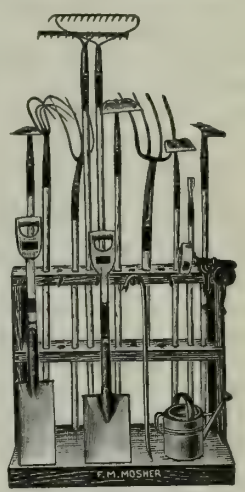
The Henricks Novelty Co., 1539 St. Paul St., Indianapolis, Ind., are offering the Canadian hardware trade the Henricks improved lighting and ignition outfits, with or without storage battery in connection, for motor boat or automobile.

The Henricks Eureka lighting outfit consists of the Eureka generator with automatic cut-out, a governor control and storage battery. The generator, it is claimed, keeps the battery fully

Hendricks' Generators.

charged at all times and the current supply for ignition and lights is taken from the battery.

The generator is of the permanent magnet type which means that for a given output electrically the power consumed at the shaft is only about two-thirds of a wound field type machine.



A simple constructed automatic cut-out is placed between the magnets, this being operated by the governor. This cut-out is in the form of a switch which connects the circuit between the generator and the battery when the speed of the magneto is sufficient to generate over 6 volts.

A centrifugal governor of simple construction is provided which actuates the electric switch of the cut-out at the proper speed of the armature.

The firm manufactures several types of magnetos and lighting outfits.

THE MOSHER SELL-MORE RACK.

F. M. Mosher, Canton, Ill., is offering the trade a new display rack for outside store front display. It can be used for displaying forks, rakes, hoes, shovels, spades, mop sticks, brooms, etc. The platform of the rack can be used for displaying general merchandise.

Mosher "Sell More" Rack.

The rack is 30 inches high, 35 inches long and 17 inches wide; built of 2 x 4 uprights and 2 x 4's under platform; matched flooring on top, with galvanized iron (punched) between the 2 x 4 uprights to receive the handles. Floor space 17 x 35 inches. Set on castors. Built strong and durable, of hard pine, bolted together. Painted a carmine red.

The rack can be used for inside display purposes as well as for outside.

New Goods ..

FOLDING BOXWOOD RULES.

The Lufkin Rule Co. of Canada, Ltd., Windsor, Ont., announce that they are now making boxwood folding rules, which will be on display for the first time at the Ottawa Exhibition. The company claim that the new line of rules, will be fully up to the standard of the other products made by them.

New Firm.

Melfort, Sask.—Jos. Shriar will open a store at Pathlow about Feb. 15, to carry a line of general merchandise.

Reopen Plant.

New Toronto, Ont.—The Brown Brass and Bronze Rolling Mills have started operations after being closed down for 1½ years.

Current News of the Hardware Trade

New Firms.

Montreal, Que.—Canadian Bronze, Ltd., have registered.

Quebec, Que.—Duval & Ereer, hardware, have registered.

Montreal, Que.—Geo. G. Miller Oil Co. have registered.

Montreal, Que.—Viger-Foster Valve Co. have incorporated.

Montreal, Que.—Radio Electric Co., of Canada, have registered.

Montreal, Que.—Automobile Tire and Supply Co. have registered.

Minitonas, Man.—H. R. Taviner has started a hardware business.

Montreal, Que.—The Herbert Morris Crane and Hoist Co. has registered.

Lethbridge, Alta.—Geo. R. Dixon & Co. have started a sheet metal business.

Hamilton, Ont.—The Canadian Sewer Pipe and Clay Products Co. have obtained charter.

Montreal, Que.—The Empire Broom and Woodenware Co., Chas. W. Meakins, has registered.

St. Johns, Que.—The St. Johns Machinery & Tools Co., Ltd., have obtained charter.

Lethbridge, Alta.—The Automatic Hose Coupler Co. have decided to have plans drawn up for a factory to manufacture for the Canadian trade.

Business Changes.

Windsor, Ont.—H. Martin, hardware, is reported discontinuing here.

Lang, Alta.—S. C. Wright & Co. have been succeeded by Alder Bros.

Sidney, Sask.—Thos. Tyson has discontinued his tinsmithing business.

St. James, Man.—W. D. Cambell is reported discontinuing business here.

Lang, Sask.—S. C. Wright & Co., hardware, have sold out to Alder Bros.

Teeswater, Ont.—It is reported that John Dick & Son, hardware, have sold out.

Rosthern, Sask.—Ewing & Braden have bought the Weibe hardware business.

Montreal, Que.—Poirer & Dion, sheet metal workers, are reported having dissolved.

Montreal, Que.—The Automobile Tire and Supply Co. are reported having dissolved.

Montreal, Que.—The Smith Hardware Co. have been succeeded by P. L. Schmidt Hardware Co.

Alliston, Ont.—W. B. Clifton & Son, plumbers and tinsmiths, have dissolved, W. D. Clifton continuing.

Toronto, Ont.—N. T. Fell, hardware merchant, 1067 Bathurst St., Toronto, has been succeeded by J. P. Parker.

London, Ont.—Love Brothers have taken possession of the J. E. Young Hardware Co. business, Dundas Street. An announcement of the proposed change was made in Hardware and Metal in a previous issue. The new firm will be called the Love Hardware Co.

Fire Losses.

Lewiston, N.S.—J. Lewis & Sons, manufacturers lasts, etc., have suffered a fire loss.

Sarnia, Ont.—Fire recently did damage to the japanning room of the Doherty Stove Co.

Ottawa, Ont.—Pritchard & Andrews Co., scale manufacturers, 264 Sparks St., have suffered a slight fire loss.

Dominion Incorporations.

H. C. Red Label Chemical Co., of Canada, Ltd., capitalized at $250,000, head office, Monteral, to manufacture and deal in all kinds of chemicals.

Viger Foster Valve Co., Ltd., capitalized at $250,000, head office, Montreal, Que., to carry on business as tool makers, brass founders, metal workers, mechanical engineers, etc.

Ontario Incorporations.

Beaver-Acetylene Co., Ltd., head office Toronto, Ont., capitalized at $40,000, to manufacture and deal in gas appliances.

Walter Bentley Co., Ltd., Niagara Falls, Ont., capitalized at $20,000, to manufacture and deal in sporting and athletic goods.

Fox Chain Co., Hamilton, Ont., capital $200,000, to manufacture and deal in tire chains and to acquire Canadian patent 146,533.

Chatham Items.

Chatham, Ont.—Geo. Stephens has disposed of his entire interest in the hardware business of which he hed been head for nearly 42 years to his former partner, D. H. Douglas, and the latter is now in possession. Mr. Stephens intends to re-engage in business after renovating his present premises, and in the meantime is handling fencing, galvanized roofing and similar goods.

B. F. Brown, for the past five years on E. C. Birsco's staff, has entered into partnership with F. Hathaway, 45 Fifth St., and the business is being enlarged to cater to automobile as well as bicycle trade.

P. Cunningham & Co., hardware merchants, have made considerable improvements to their place of business, installing a new and modern front.

Underwent Operation.

Picton, Ont.—Milton Adams, of Adams & Vandusen, underwent an operation for appendicitis this week.

Death of A. M. Campbell.

The death took place recently of A. M. Campbell, hardware and lumber merchant, Margaret, Man.

Changed Location.

Sault Ste. Marie.—The Plummer, Ferguson Hardware Co., Ltd., have moved to their new store at the corner of Queen and Spring Sts.

Open Foreign Office.

The Ontario Lantern and Lamp Co., Hamilton, Ont., announce that they have made arrangements with C. K. Turner & Son, 116 Broad St., New York, to act as their export representatives.

To Extend Plant.

If a satisfactory agreement can be reached with the civic officials the Imperial Steel & Wire Co. will erect a large addition to their present plant. They propose erecting a screw, bolt and nut department.

Death of H. F. Young.

Simcoe, Ont., Feb. 1.—H. F. Young, aged 65, of Toronto, traveling for the Clements Manufacturing Company, 78 Duchess street, died to-day at the Melborne Hotel here. On Wednesday he arrived feeling well, but before evening was taken ill and gradually sank. Heart disease was the cause of death.

Plans Erection of Large Plant.

St. John.—Plans for a manufacturing plant on the Marsh Road involving eventually an outlay of $2,000,000, were laid before the city commissioners by George McAvity and A. P. Barnhill. When the plans of the McAvity interests are worked out, the plant on the Marsh Road will be the home of an industry of great importance, giving employment to probably 1,500 men.

The initial unit of the plant, to be erected on the property acquired on the Marsh Road would cost $300,000, and give employment at the outset to 250 men. Extensions to the plant which the company planned on making, would require a further capital expenditure running up the total to about $2,000,000.

Business Changes.

Gladstone, Man.—A. G. Williams, of Winnipeg, Man., has re-purchased the hardware department of the business at Gladstone, Man., that he formerly owned and sold to Alex. Morrison.

Hardwareman Elected Mayor.

L. P. Beauline, hardware merchant, Hawkesbury, Ont., was recently elected Mayor of the town by a large majority. Mr. Beauline has also occupied the office of reeve and served four years as a school trustee.

Will Add Hardware Department.

Fort William, Ont.—Hollenberg Bros., housefurnishers, are constructing an addition to their store, 50x70 ft., to carry a full line of hardware and kitchen goods. The firm would like to receive catalogues from hardware jobbers and manufacturers.

Convention at Belleville.

The executive of the Eastern Canada Association of Master Painters and Decorators met in the Labor Temple, Toronto. Plans were made for the coming convention which will be held some time during the month of July. It was decided that the convention will be held in Belleville, Ont.

Plants Re-open.

Islington, Jan. 27.—The Glass Rolling Mill at New Toronto, which was burned down two years ago, has been rebuilt at a cost of $200,000 and is expected to commence operations in a few weeks. The plant will employ about 200 men. The Ontario Leather Company, who closed their doors and laid off their staff a few months ago, will shortly open with employment for about 100 men.

Hold Annual Meeting.

The annual meeting of the Brantford Cordage Company was held recently at the new office of the company in West Brantford. A large addition has been erected this year and a new warehouse in three sections replaces the old warehouse destroyed by fire last year.

The old board of directors were re-elected, viz: C. Cook, S. G. Kitchen, C. L. Messecar, J. R. Smith, S. G. Simpson and A. Balantyne.

Re-organize Sales Force.

The Canadian Wolverine Co., Chatham, Ont., recently held a convention at the head office of the firm. The sales force has been re-organized and the firm will be represented from coast to coast. The salesmen are: C. H. Bahemeyer, Manitoba and Saskatchewan; E. T. Needham, British Columbia and Alberta; W. H. Darling, Toronto and Eastern Ontario; J. J. Cornelius, Northern and Western Ontario; H. M. Dunn, Montreal and Eastern Province.

JOINS THE WINNIPEG HOUSE.

Western trade circles will be interested in the recent announcement of Miller-Morse Hardware Company, Limited, Winnipeg, advising that Stanley C. Morse, eldest son of the president, F. Morton Morse, has entered the executive of the company, in the capacity of secretary.

Stanley C. Morse brings to his position a comprehensive knowledge of business affairs, resulting from many years'

STANLEY C. MORSE.

careful training at the University, where he specialized in Commerce, and more latterly four years' practical experience in the various departments of the business.

He is a native born Westerner, in the full sense of the term, and his career will be a matter of kindly interest to the many friends and customers of the old established jobbing house.

Death of Ezra McDougall.

The James Stewart Manufacturing Co., Woodstock, Ont., have sent out the following obituary notice:—

"It is with profound regret that we have to announce the death of Ezra McDougall, which occurred at his late residence in this city on Saturday, 31st ult., after an illness of but a few days.

"Mr. McDougall represented our company faithfully and well, both in Ontario and the North-West for over eight years, and the many friends in the trade whom he made will, we are sure, learn with sorrow of his sudden demise."

Picton Items.

Mayor Adams, of Adams & Vandusen, underwent an operation for appendicitis at his home in Picton last Tuesday, and is progressing favorably according to latest reports.

J. H. McComb, of J. H. McComb Limited, Montreal, paid a business trip to Picton last Friday. While there he was a guest of the Camp Louise Recreation Club at their annual banquet which took place on the same night. The genial John enjoyed himself to the full, and says he never struck a more jolly, fun-loving crowd of professional and business men in his life. And was more than glad that his old friend, W. J. Carter prevailed on him to stay over for the event.

Personal.

J. G. Lewis, vice-president Lewis Bros., Ltd., Montreal, has left on a three months' trip to the Mediterranean.

Chas. E. Screaton, sales manager, H. S. Howland, Sons & Co., Toronto, was a visitor in Toledo, Ohio, last week.

A. H. Richardson, formerly of the Cochrane Hardware staff, of the Sault, is now on the road for the Welland Vale Axe & Tool Co., St. Catharines.

John Harold, general manager of the Sanderson, Harold Co., Paris, has decided not to run as a candidate for the House of Commons in South Brant.

E. E. Turner, of the safe department, Canadian Fairbanks-Morse Co., Toronto, has been transferred to Montreal, to manage the same department there.

Fred. Kemp, who has been associated with the Farmers' Hardware Co., Castor, Alta., for some years, has left to join the staff of the Skimmer Hardware Co., Stettler.

F. R. Humpage, formerly general manager the Thomas Motor Car Co., Buffalo, has been elected treasurer of the International Chemical Co., of Canada, Bridgeburg, Ont.

Mr. and Mrs. C. J. Walker, 41 Bruce Ave., Westmount, P.Q., are being congratulated on the arrival of a son on January 26. Mr. Walker was formerly in the purchasing department of Lewis Bros., Ltd., and is now Eastern representative of the Ontario Lantern & Lamp Co., and the Canadian Tungsten Lamp Co.

Among the representatives who called on the Montreal hardware trade during the past week were the following:—Thos. Mortimer, representing Rabone & Sons, Toronto; F. B. Park, C. J. Hamilton & Sons, Plymouth, Mich.; B. Dahlheim, W. & G. Vogel, Germany; E. A. Cabana, vice-president, Buffalo Specialty Co., Buffalo, N.Y.; Rogers M. Cox, Bromwell Brush and Wire Goods, Cincinnati; Frank Dawes, Alfred Field & Co. (Sheffield), Ltd., England.

PRIZE WINNERS IN CHRISTMAS WINDOW CONTEST.

The judges have just announced the prize winners in the Annual Christmas Window Contest of Hardware and Metal. Reproductions of the prize-winning displays, and full information will appear in the Feb. 14 issue of Hardware and Metal. Following are the prize winners:—

Places of 5000 and over—Black

First Prize.—Fred J. Mills with Mills Hardware Co., Hamilton, Ont.

Second Prize.—Chas. Byford, with Bond Hardware Co., Guelph, Ont.

Third Prize.—C. H. Smith, with J. H. Ashdown Co., Calgary, Alta.

Places under 5000—Black

First Prize.—W. S. Petrie, with D. Leckie, hardware, Kelowna, B.C.

Second Prize.—D. E. Tait, with T. S. Tait & Sons, Campbellford, Ont.

Third Prize.—John F. Bingham, with G. A. Binn's hardware, Newmarket, Ont.

Clean your stock, and then keep it clean. Look it over carefully day by day. Keep yourself posted on what is moving and what is not moving. When some particular line is dragging centre your energies on it and see that it moves, and at the beginning of 1915 you will find a clean stock.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal of February 10, 1894:—

"O. B. Henry, formerly of Henry & Hambly, is starting business in that place under the style of O. B. Henry & Co."

Editor's Note.—O. B. Henry & Co. are still in business at Drayton, Ont. J. R. Hambly is in the hardware business at Barrie, Ont.

"A successful hockey match was played at the Beaver Rink, Montreal, between the team of Caverhill, Learmont & Co. (champions) and Frothingham & Workman. The staffs of both firms turned out in full force. The score was 2-0 in favor of Caverhill, Learmont & Co. The following were the respective teams:—Caverhill, Learmont & Co.—Labelle, Davidson, McGowan, Jordan, Newman, Douglass, Bain. Frothingham & Workman—Morris, Dunn, Eadie, Davis, Warren, Monk, Eaton. Allan Campbell refereed the game, and Messrs. Chipchase and Nicholl were umpires."

Editor's Note.—Caverhill, Learmont & Co. and Frothingham & Workman are still located in Montreal, the latter firm having recently been visited by a disastrous fire. Several of the names mentioned in the hockey teams are quite familiar to hardwaremen.

LETTERS TO THE EDITOR.

Jan. 23, 1914.
Editor, Hardware & Metal,
Toronto, Can.
Dear Sir:—

I read with interest your article "Fighting Mail Order Competition," but there was one very vital point you omitted, which handicaps the Western hardware man in the fight, viz:

"In too many instances he has to pay the wholesaler, and also the manufacturer in Winnipeg, exactly the same price for his goods as the Mail Order House charges its retail customers."

Here are two of the too many:

Starretts' Speed Indicator; wholesale price $1.00*; Mail Order,* $1.00*; No.* 9 *Galvanized Boilers, wholesale price,* $1.00*, Mail Order* $1.00.

How can a man fight with his hands tied behind his back?

What have other retailers got to say on this matter?

I would like to see a good discussion in your columns re this matter.

Yours truly,
Western Hardwareman.

We don't all get business from our friends, but we can make friends of those from whom we get business.—Institute Wire of the Alexander Hamilton Institute.

Scenes at Frothingham & Workman's recent fire in Montreal, showing building during early stage of fire, and ice-coated buildings after fire had been extinguished.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

The chief feature this week, is the continued good feeling in the metal markets. Toronto dealers in metals report that orders are coming in freely and many buyers are entering the market. Quotations are firm.

Hardware jobbers report trade fair for this season of the year; orders are not heavy for immediate delivery, but booking for future is good. Western jobbers are not pushing sales very hard at present, but are hopeful that a decided improvement in business conditions will take place in the spring.

Business in paints is seasonably quiet, although the outlook for spring business is very bright. Merchants are booking freely. The demand for stoves is light on account of the unseasonable weather. A large number of orders are being booked for future deliveries of gas ranges, plates, ovens, etc.

There appears to be a better feeling in all lines, and the concensus of opinion appears to be that with the advent of spring there will be, as far as the hardware trade is concerned, a decided improvement in business.

MONTREAL.

MONTREAL, Feb. 4.—The local market this week is devoid of features, although the business passing is very much better than that of January. Orders are coming in quite plentifully and every line is receiving more or less attention. Retailers throughout the country seem to have completed their stock-taking and are aware of their requirements as the orders being received from travelers are all of a sorting-up nature. It must be said though, that most of the business coming into jobbers' hands at present is from country merchants, the city men seem to be holding off for some reason or other. The usual lines are in demand which generally come into prominence at this season of the year. There has been great demands for wire cloth, poultry netting, etc., as well as all other lines which figure in the spring buying.

Perhaps the most important demand is in the different articles used by the maple producers. Sap spouts, bits and pails are moving out freely. The Province of Quebec is noted for its maple sugar and syrup and there is always quite a trade each year in these particular articles.

The lumber camps are also sending in their orders regularly and the tools used in that work are also moving out in large numbers. Boot calks, cant hooks and quite a quantity of coil chain are being shipped.

The retailers throughout the country are certainly looking forward to a big year as their orders do not seem to be cut down at all. We have listened to different prophets throughout the country as to when conditions would once more be normal and almost without exception they looked for an improvement about mid-summer, not before. At the present time, conditions are in much better shape than expected and if the retailers throughout the country keep on the path which they seem to be following at present there is no reason why conditions should not be normal before very long. Collections, are improving, and practically all local manufacturers are feeling in good spirits at the improvement shown since the first of the year. One of the leading firms of this city stated to-day that they are making their collections without the least trouble and their books show that where a merchant is unable to meet his paper at the first of the month there is always a payment made on account. The large centres are showing a little slower progress than the country merchants, the latter seem to be going right ahead with their plans.

In the metal market this week we might report a general firmness all round as conditions seem to be improving here as well as in the other lines.

Tin.

The London quotation this week shows a decided advance over that quoted one week ago. Spot shipments are bringing £187 10s. while futures are given out at an advance of one pound. The quotation last week for spots was £8 5s. under this figure while futures were £8 cheaper. The local market has firmed up considerably lately and although the demand has been very fair there has been no advance in the quotations. The New York prices have also jumped up from one week ago. Wholesale lots are selling at $41.00 or an advance of 60 cents while small lots are advanced 75 cents or $41.25. There seem to be quite a number of reasons for these advances being given but just which one is authoritative is the question. On the latter market consumers are reported to be showing very little interest at the advance.

Spelter.

The London quotation to-day is £21 7s. 6d. or 2s. 6d. under last week, while the New York price is up 10 cents and is given as 5.32½. The local market is very firm at present although there has not been any change in the quotations. Reports from London are to the effect that a fair inquiry is being met but that the market is featureless. The New York reports are to the effect that sellers will not make any sales further

NEW QUOTATIONS ON WASTE.

White Waste XXX Extra	11c	lb.
White Waste X Grand	10½c	"
White Waste XLCR	9¾c	"
X Empire	8¾c	"
X Press	7¾c	"
Colored Waste Fancy	7¾c	"
Colored Waste Lion	7c	"
Colored Waste Standard	6¼c	"
Colored Waste Popular	5½c	"
Colored Waste Keen	5c	"
Washer Wipers Mixed White	8½c	"
Washer Wipers Light Colored	7c	"
Dark Colored	5½c	"

ahead than February. That market is said to have an advancing tendency.

Lead.

This is the only market that could be called weak and at that there are some who claim that the conditions existing are in pretty fair shape. The London quotation for this week is £20 or the same as quoted one week ago, while New York has advanced their price 2½ cents and the quotation is now 4.07½. In the local market there has been a decrease of 25 cents, the quotation now being $5.50. It might be said that the local market is dull and unsettled.

Copper.

The London quotations are still advancing and those given out this week show an advance of £1 1s. 3d. for spots while futures are showing an advance of £1 2s. 6d. The quotations are £66 13s. 9d. and £67 respectively. The New York price has also advanced 20 cents and is given out to-day as $14.60. Locally the market is very firm although the same prices rule. It is claimed that the consumption of copper at this time is 25 to 30 per cent. lower than it was one year ago. Consumers do not seem to be buying on the New York market, but the firmness has been maintained owing the remarkable export business that is going on at present. For the month of January there was an increase of 10,000 over the same period of 1913.

Antimony.

There has been no change in price on this market although it must be said that the market is firming up a little.

Iron

The London quotation this week is up 1s. 1d. over the quotation of one week ago and is given as £2 11s. 10d. The New York market is a very active one at present and is termed "excited." Although there does not seem to be an over-abundance of buyers the price at present is thought to be advanced before long, in fact, one of the local jobbers said to-day that it looked as if there would be a jump in the iron and steel market in the very near future. Reports from New York are to the effect that although there does not seem to be any very active demand from consumers the prices are kept up and it is thought that sellers are assuming a stronger position than they can maintain. This, however, remains to be seen.

In the stove and heating business there is not much to report although there is a very good demand from all sections for repair parts. The bulk of the business, however, is over for a few weeks until the spring buying starts in again.

TORONTO.

TORONTO, Feb. 5.—The better feeling reported existing in the metal market last week, still continues, and the volume of business is growing. Metal merchants are very optimistic. The American markets are also much brighter and the trade in general are looking forward to a steady increase in business.

Price Changes in Metals.

Tin has taken another advance in price, and quotations are two cents per pound higher than last week. Copper has advanced ¼ cent per pound. Lead and spelter remain unchanged but firm. Middleboro pig iron has advanced 1s. Wire solder and wiping solder have advanced ½ cent per pound.

Traps and Bends.

Lead traps and bends have advanced in price and the discount is now 40 per cent. instead of 40 and 5 per cent. as formerly.

Scales.

The following prices are now being quoted by Toronto jobbers in Champion scales: 4-lb. list 5.00, stamping 30 cents net extra; 10-lb. list 7.50, stamping 50 cents net extra; 240-lb. 11.00 list, stamping 50 cents net extra; 600-lb. platform scales 28.00 list, stamping 1.00 net extra; 1,200-lb. scales 33.00 list, stamping 1.00 net extra; 2,000-lb. 44.00 list, stamping 1.00 net extra; 200-lb. drop lever 52.00 list, stamping $1.00 net extra. Discount off lest price is 50 per cent., but all stamping charges are net extra.

Rope and Twine.

Business at present is naturally a little quiet, although dealers are optimistic. Just preceding the opening of navigation there will be a heavy demand for rope.

Quotations are as follows:—

Pure Manila rope	15c	base
British Manila rope	11c	base
African hemp	11c	base
Sisal	10½c	base
Lath yarn, single	9¾c	lb.
Lath yarn, double	10¼c	lb.

General Hardware.

Business is rather slack at present, although this condition usually exists at this season of the year. Jobbers are hopeful of a good spring trade and booking for spring is heavy.

Stoves.

Orders for immediate shipment are not heavy, although heavy booking especially in gas ranges and plates is taking place. The outlook is very bright and spring trade should be brisk.

Wire Netting.

No change is reported in the prices of poultry netting; 2-in. mesh is quoted at 60 per cent. off. Smaller sizes are being quoted at net prices which are as follows:—

½	inch	x 22	guage	x 12	inch	roll	$3.00
½	"	22	"	18	"	..	4.30
½	"	22	"	24	"	..	5.65
½	"	22	"	30	"	..	6.90
½	"	22	"	36	"	..	8.20
1	"	20	"	12	"	..	1.50
1	"	20	"	18	"	..	2.10
1	"	20	"	24	"	..	2.70
1	"	20	"	30	"	..	3.25
1	"	20	"	36	"	..	3.80
1	"	20	"	48	"	..	5.10

Poultry netting staples remain the same as last quoted at 55 per cent. off.

Boilers and Radiators.

For this time of the year the demand is fairly good. The open winter is responsible to a great extent, as builders and contractors have been able to bring their work up to such a stage as would better enable such goods to be installed. The outlook for the coming year is very favorable and manufacturers are keeping up their stocks in view of the expected rush for this line. No change in prices is reported.

TORONTO QUOTATIONS ON METALS.

Prices are gauged according to quantity purchased.

Electrotypers' Solder		30c	lb.
Brazing Metal		26c	lb.
Ingot Brass, red	14 to	16c	lb.
Ingot Brass, yellow	13 to	15c	lb.
Wire Solder	27½ to	29½c	lb.
Wiping Solder	24 to	27c	lb.
½ and ½ Solder	25 to	27c	lb.
Pattern Aluminum	23 to	24c	lb.
Ingot Aluminum 99% pure	19½ to	20½c	lb.
Spelter	$5.35 to	$5.65	per 100 lbs.
Copper	15¾ to	17¼c	lb.
Tin	41½ to	45c	lb.
Lead	$5.65 to	$5.85	
Tinkers' Bar Solder	28 to	29c	lb.

Soil Pipe and Fittings.

The demand for soil pipe and fittings has been rather dull, but is now taking a brighter turn. For some time several foundries were closed down or working short time, at present all are working on schedule with a view of increasing stocks ready for the spring orders. Two years ago it will be remembered a very great shortage was experienced which did not occurr during 1913 for two reasons. One, because of the tightness of money which resulted in building being somewhat curtailed and the other, because the manufacturers were forewarned by their experience of the previous year.

Last year a large amount of foreign pipe was imported but was not disposed of. Hence it will be seen, with foundries stocking up in readiness, no shortage is anticipated.

Prices quoted are as follows:—

Medium and extra heavy up to 6-inch, 60 and 5 per cent. off; 7 and 8-inch, 45 per cent. off.

Medium and extra heavy fittings, 70 per cent. off.

WINNIPEG.

Winnipeg, Feb. 4.—"The season of 1914 is opening up well, but wholesalers are not pressing sales, and for the present trade is quiet," said the sales manager of one of the big wholesale and jobbing houses, when talking over the business outlook with a representative of Hardware and Metal.

"I might add," he continued, "that the men on the road are very hopeful as regards the western business outlook, and from what I can gather, if our crop prospects in July are up to average, that we shall have a good year.

Real winter has prevailed in the West for the past two weeks, and it has helped retailers to unload some special winter goods, but is too late to have much effect on the stove trade, which is seasonably quiet.

Collections are fair, and there is a decided improvement in financial conditions generally. Cheaper and more plentiful money will very soon have its effect here, and the march of progress will go on as briskly as ever.

Architects report prospects for much building next year, but nothing of importance has as yet been announced. The building permits for January were, however, most satisfactory and totalled more than double those of last year. This is a very satisfactory start.

Prices on all leading lines are steady, and no changes of importance are anticipated in the immediate future.

A very large number of country merchants are expected in town next week for the big annual Bonspiel, and, though on pleasure bent, this annual excursion is generally utilized by the country retailers to look up their business connections in the city.

JOINT STOCK COMPANY'S ACT.

(Continued from page 45.)

memorandum of association which, however, the speaker explained, was not very important in view of the present practice. The safeguards in the English Act in regard to the truth of statements con- ample illustrations as to what constitutes a binding guarantee.

Amend Chattel Mortgage Act.

A petition was circulated praying the Government to amend the Chattel Mortgage Act, making it necessary to register assignments of book accounts, as at the present time these assignments are of a secret character, and it is sought to give publicity to all such assignments.

A committee was appointed, consisting of E. D. Martin, A. K. Godfrey and M. H. Belcher to interview the Government on behalf of the board of trade. The banquet was held in the Royal Alexandra Hotel, and a large turnout of the members were present.

CHEMICAL DETERIORATION IN ROPE.

Well made rope is extremely durable under most conditions, so durable that its strength would remain unimpaired almost indefinitely were it not for outside influences. Exposure to weather is the chief cause of deterioration, a fact that has led to the use of various dressings, such as tar, to prevent rotting caused by moisture. But tar is not advisable if pliability is wanted. No treatment for repelling moisture is altogether satisfactory if the rope is to be handled. In discussing this matter Plymouth Products states that, "The material used by any manufacturer, except in a tarred rope, must be in the nature of a compromise. Even in this compromise class of lubricants, however, there are various grades and the kind and amount used have an important bearing on the life of the rope.

Large ropes lose strength through rotting much more slowly than small ones, the percentage of inner fibers increasing proportionally to the square of the diameter. In common-laid ropes up to about ¾ inch diameter all the yarns appear on the outside of the rope. It should also be noted that alternate wet-

(Continued on page 62.)

DO YOU RECEIVE PROMPT DELIVERY?

Subscribers to Hardware and Metal who do not receive prompt and regular delivery, each week, will confer a favor by reporting the matter to us. Hardware and Metal is mailed regularly in Toronto Friday afternoon, and should reach every town within 12 hour's run of Toronto, on Saturday morning.

The turn of the tide.

Methods of Retailing Paints and Varnishes

Dealer Quit Advertising Too Soon

Experience of a Windsor Hardware Merchant—Worked up Business for Another Dealer—A Good Lesson.

"I had a rather disappointing experience last year," remarked a Windsor, Ont., hardwareman. "Of course, I'm used to business disappointments, and don't mind a chap buying elsewhere; but just the same this one rather disgusted me with myself.

"The year before last I put up a good, strong paint-selling campaign. In conjunction with the manufacturers of one of the very best brands that's going, I arranged to put out a lot of literature to a carefully selected mailing list. In the lot was a man I knew well—a chap who owned a house that was worth about $1,500, and would have been worth $1,800 if he could only be induced to put about $25 worth of paint on it.

"Well, between us we bombarded the list, this man included, with paint literature. There was something going out every few weeks right through from early spring till late in the fall, the year before last. We pulled in a lot of business, which shows that it pays to go after the people systematically.

"But this man never gave a sign—never said a word. So at last I dropped him from my list. I knew he was a hard nut, when it came to selling paint, and thought I'd better try some other prospect easier to influence.

"Last spring he startled the whole neighborhood by painting his house. He put the stuff on thick—used lots of it, for the house was just parched for paint. It was a beautiful job, too—only, he didn't buy the paint from me. After I'd spent a year's time and several pounds of literature and a bale of postage stamps educating the fellow pretty nearly to the stage where he was ready to paint up another fellow who knew him personally and called him "Ike," buttonholed him one day and landed his order.

"If I'd only kept at him, I'd have got that order; and I suppose if I'd mentioned the subject to him personally I'd have landed him sure. I asked him about it afterward, and he said as much himself. As it was, another fellow who butted in at the opportune moment got the benefit of all my work.

"However, I've got the man listed for another campaign a year or so from now, and I'm not going to let up on him next time. And, anyway, I landed a lot of business as it was, which shows that it pays to go after the paint trade systematically. Next time, however, I mean to do as much personal work as I can. A fellow throws away a lot of good chances if he puts out a regular line of paint literature to a lot of prospects and then neglects to talk paint to them personally when they happen to be in his store."

MATERIALS FOR MODERN COLORS.

Judging from the queer sources of modern colors the discoverers must have tried everything else on earth and had only those sources of supply remaining, as surely no one would have quietly sat down and decided that the camel would be an appropriate depository of Indian yellow? Or that the exquisite Prussian blue could be obtained by using horse hoofs and other refuse animal matter with impure potassium carbonate?

The cochineal insect furnished the gorgeous carmine, crimson, scarlet-carmine, and purple lakes, while the cuttlefish gives sepia. Ivory chips produce ivory black and bone black, while blue-black comes from charcoal made from the vine stock.

Turkey red has nothing to do with Turkey, but is made from the madder plant, which grows in Hindoostan, and all the way from Siam comes gamboge, obtained from the yellow sap of a tree.

Raw sienna is simply natural earth from Sienna, Italy, and umber is an earth found near Umbria. India ink is made from burned camphor, and mastic is from the gum of the mastic tree, which grows in Greece. Bistre is the soot of wood ashes. Chinese white is zinc, scarlet is iodide of mercury, and vermilion is from the ore, cinnabar.

In a small collection of modern colors, therefore, are found materials from the animal, vegetable and mineral kingdoms.

Taylor Forbes Calendar.

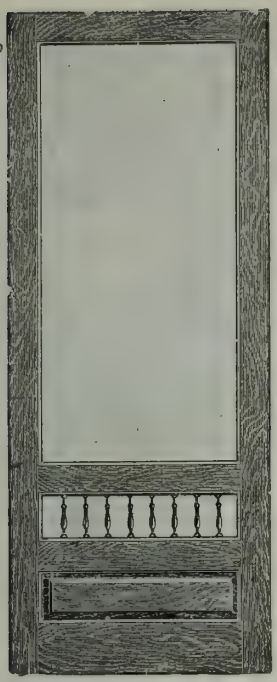
Taylor Forbes Co., Guelph, Ont., have issued an attractive 1914 calendar featuring their line of Sovereign Brand heating equipment.

R. M. A. ANNUAL MEETING.

The annual convention of the Retail Merchants' Association, Ontario branch, will be held in the Temple Building, Toronto, on Wednesday and Thursday. February 25 and 26. On Tuesday night of this week the election of officers of Toronto branch was held, resulting as follows:—President, J. C. Van Camp; First Vice-President, W. J. Sheppard; Second Vice-President, T. R. Bigwood; Treasurer, F. C. Higgins (grocer); Secretary, E. M. Trowern.

The Toronto body came out flatly against any proposal on the part of the Toronto City Council to place a high license upon retailers as well as to tax them on a business assessment. A special committee was appointed by the delegates to place the views of the association on public markets before public bodies seeking information in this regard.

CHEMICAL DETERIORATION IN ROPE.



(Continued from page 61.)

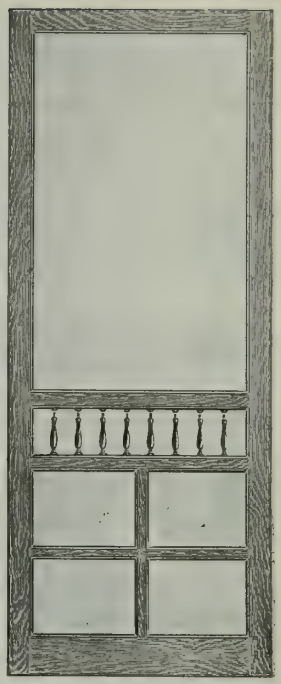
ing and drying causes more rapid deterioration than does a constantly wet condition.

The presence of dry rot in a rope is difficult to note except through an actual test of the fibre. To inspect a used rope for strength, both the individual fibers and the yarns should be broken. Unused single fibers sustain from two to four pounds each and the yarns from 150 to 300 pounds each, according to their size and quality. It should also be borne in mind that the breaking strength of a rope is approximately only one-half of the aggregate strength of its yarns.

Another not uncommon cause of rotting, and one seldom recognized, is the presence of acid. The common commercial acids and uric acid exert a very injurious effect on all rope-making fibers and are the cause of many apparently mysterious rope troubles. Through ignorance, indifference or carelessness, the common acids are frequently transported, used or stored in close proximity to rope.

To lessen the opportunity for chemical deterioration, rope should be kept away from acids and kept as dry as possible. If left out at night, it should be covered sufficiently to protect it from the weather. Rope should always be stored in a dry place and when wet, should be thoroughly dried out before storing."

SCREEN DOORS



That are Ready-Sellers

Doors that you will be proud of—that will be appreciated both for their stability and appearance. Our doors are all mortised and of tenoned construction—conceded to be the strongest and only correct construction for screen doors—not simply "fastened" like ordinary doors.

MADE FROM THE BEST FOR THE WEST

Each door is made of clear pine and finished with high-grade spar varnish with stiles and rails 1⅛ inches thick. They are doors that give satisfaction and make satisfied customers. They are doors that you will be glad to recommend.

Write for our illustrated screen door pamphlet and Price List.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, Feb. 4.—Conditions on the local market are practically unchanged from one week ago. Orders are still coming in in good healthy quantities for future business—that is to say, spring deliveries, while there is also a little business in futures being carried on. Orders continue to show just what confidence the country merchants have in the future, as do also collections, which are exceedingly good. In the West the conditions are very much better than they were two months ago, and each day seems to bring forth further improvement.

White Lead.

This market continues very firm, although the London quotation for pig lead is down 2s. 6d. from last week, the present quotation being £20. However, as the local quotations did not advance with the London pig market during December and January, it is not likely that there will be cheaper prices; in fact, they are not thought of. The market is considered very firm at these figures.

Dry White ..... 7 cents.
Lead in Oil—
5-ton lots $7.75
1-ton lots 8.05
Less than 1 ton..... 8.25

Linseed Oil.

The same strong feeling which has characterized the local market for the past few weeks is still in effect, and prices remain unchanged, with the same seasonable demand in evidence. Cheaper oil is not looked for by local jobbers; in fact, there is a sort of an impression that dearer oil would not be out of order.

Raw Oil—
1 to 4 barrels ..... 60c per gal.
5 to 9 barrels ..... 59c per gal.
10 to 25 barrels ..... 58c per gal.
Boiled Oil—
1 to 4 barrels ..... 63c per gal.
5 to 9 barrels ..... 62c per gal.
10 to 25 barrels ..... 61c per gal.
With open prices for carload lots.

Prepared Paints.

The demand is much the same as in previous weeks; the greater portion, in fact, for spring delivery, as the immediate shipments are rather scarce, few and far between. The orders coming from country merchants are still keeping up, and the quantity does not seem to be decreasing in any part of the country. Judging from these, a good year is anticipated by all the country dealers.

Glass.

The demand has not changed since one week ago. There is never much business passing in this line at this season of the year; therefore, the demand may be termed seasonable.

Putty.

There is only a seasonable demand in evidence at present, with the same prices ruling:

Bulk, in casks ....$2.30 per 100 pounds.
Bulk, in drums.... 2.50 per 100 pounds.
Bladders, in barrels 2.80 per 100 pounds.
With the usual advance of 70 cents per 100 pounds for pure putty.

Turpentine.

This market is exceedingly firm at the present time, and another advance has taken place since last week. It is costing much more to bring turpentine from the South, and conditions there do not help matters. The local dealers are split in their prices, the lowest quotation received being 66 cents, while the highest was 68 cents, with lots of five barrels and over one cent cheaper. It would not be surprising if the price next week would show a further advance.

Gasoline.

The demand has not changed since one week ago, and the same prices are ruling; namely, 25½c per gallon in wood, 22½c per gallon in steel and drums, while local tank wagon price is 21c for 100 gallons and over.

Benzine.

There is no change in either the demand or price. Barrel lots in wood are quoted at 23 cents per gallon, in steel and drums 20 cents, while local tank wagon price is 19 cents per gallon for 100-gallon lots and over.

Coal Oil.

American oil—best, 21 cents per gallon; tank wagon, 17½ cents for 100 gallons and over. The demand is very good. There is also another grade of oil which is quoted at 17½ cents, with the tank wagon price 14 cents for 100 gallons and over.

TORONTO.

TORONTO, Feb. 5.—Business continues fair in the paint line, with booking for future delivery, very good. A large number of booked orders are now coming in and retailers are buying more freely.

Orders for immediate shipment are very fair for this season of the year. Toronto paint manufacturers and jobbers appear to very optimistic regarding future business, and are of the opinion that 1914 will be a good year.

Very few price changes have taken place during the week.

Linseed Oil.

The demand for oil this week is slightly better than last week. It is claimed that stocks at present are light. Quotations are as follows:—

Raw linseed oil, 1 to 2 bbls. per 9 lbs., 65c.; 3 to 5 bbls. per 9 lbs., 63c.; 6 to 9 bbls, per 9 lbs., 61c; 10 bbls. open. Boiled linseed oil, 1 to 2 bbls. per 9 lbs., 68c.; 3 to 5 bbls. per 9 lbs., 66c.; 6 to 9 bbls., 64c.; 10 bbls., open.

Oil for less than 1 bbl., 7 cents per gallon additional, 5 gallon cans, 50c.; 10-gallon cans, 75c. each.

White Lead.

The following prices are still being quoted for delivery up to May 15:

5 ton lots, $7.90 per 100 lbs.
1 ton lots, $8.20 per 100 lbs.
Less than ton lots, $8.40 per 100 lbs.
The lead market is still very firm.

Red lead is now being quoted at the following prices:—

	Per Hd.
Genuine ,500-lb. cask .....$	6.12½
Genuine, 100-lb. cask	6.38
No. 1, 500-lb. cask	5.87
No. 1, 100-lb. cask	6.12½

Naval Stores.

The situation in naval stores is unchanged and no change has taken place in turpentine quotations since the advance reported in last issue.

Toronto quotations now as follows:—

Pure turpentine, 1 bbl. lots per Imp. gal., 70c.; 2 to 4-bbl. lots, 69c.; 5 gal. lots, 77c.

Resin is quoted in 280-lb. lots at $6.00, and in smaller lots 3½c per pound.

Glass and Putty.

There is a fair demand for glass at prices shown in current market quotations. Standard putty in 100-lb. drums is now quoted at $2.65, an advance of 5 cents per 100 lbs.

Prepared Paints.

Booking for spring continues, and orders for future delivery are numerous and in many cases as large or larger than last year. The outlook is bright and the trade in general expects a very satisfactory year.

It is always better, if space will permit, to have all your paint stock centred in one department rather than to have it scattered in various parts of the store.

Paint that pleases your trade

THE paint that pleases your trade and brings in "repeat" orders, is the paint that gives the most enduring service, for the paint that wears is the only paint it pays to use.

In doing a job of painting, every stroke of the brush costs money, from which it follows naturally that the cheapest way to keep a building properly protected is to use the paint that lasts longest, regardless of first cost of the paint.

B-H "ENGLISH" PAINT

although sold at a reasonable price, has the quality of endurance to a superlative degree—it is made to last and it does last. There's no secret about it. We make it strictly in accordance with our guaranteed formula—70% Brandram's B.B. White Lead and 30% Pure White Zinc as the base of White and tints; and every painter knows that a paint so made will last longer and give more satisfaction than any other.

This fact makes the path of the dealer who handles "English" Paint a smooth one. Send for our Dealer's Proposition and Booklet giving details.

MARTIN-SENOUR PAINTS & VARNISHES

Easier and Quicker Sales

Everything in Nature follows the line of least resistance. The brook, with its many curves and turns, winds its way according to this law of Nature.

Martin-Senour 100% Pure Paint is the line of least resistance in paint selling—and after the first sale, the satisfaction received makes future sales a matter of order-taking.

Investigate

—a repeat order in every can.

Purity is the standard when buying White Lead, Zinc Oxide, Linseed Oil, or Turpentine, and purity is the standard of the great majority of people when buying paint.

It is easier—quicker—more profitable to sell 100% Pure Paint to pre-convinced buyers than to argue half an hour about the efficiency of a paint that is not 100% Pure.

"Muresco helps to sell other lines in your store"

Mr. Dealer:

What about MURESCO this season? You have no line that is easier sold or more profitable on your shelves, and you have no line which will give better satisfaction to your customers than the well-known MURESCO wall finish.

MURESCO is the best wall finish known, and it is made in Canada.

Write at once for agency proposition and prices.

John Wanamaker says that advertising doesn't jerk — it PULLS. He ought to know, and yet some men think that advertising should go against all rules and precedents and jerk them to success with one tremendous yank.

Do You Know—We Told You

I.C. RED LEAD IN LINSEED OIL

IS BETTER

Than other Red Leads or Red Lead substitutes.

BECAUSE

It is always ready for use—Remains suspended in oil indefinitely—Dries quickly without the use of driers—Is more economical.

IT DOES NOT

Contain any adulterants—Disintegrate or chalk off—Harden or Solidify—Turn white after applying—Cost proportionately as much

AND WE PROVED IT

By having Canada's Most Noted Chemists, Milton Hersey, Limited, Montreal, make not only a chemical but a PRACTICAL WORKING TEST of it.

That report has been published several times recently in HARDWARE and METAL. We shall be glad to send you a copy of it.

NOW WE ARE GOING TO PROVE

I.C. Everlasting Paint

Is BETTER than other paints you are now buying or are able to secure

BECAUSE

It has greater covering power—It will not blister—It will not disintegrate or chalk off—It will hold its color—It works more smoothly under the brush—It contains pure linseed oil only—It sheds water like a duck's back.

YOU CAN TRY IT OUT YOURSELF—MAKE YOUR OWN TESTS—AND PROVE IT.

Write us for samples and particulars.

Watch this space for report of tests which are now being made.

BRIDGEBURG -:- -:- -:- -:- ONTARIO

PAINT AND VARNISH REMOVERS OF QUALITY

When you buy remember that QUALITY is more important than Price. A good Paint Remover is a help to the painter; a poor Paint Remover is a nuisance.

Our Licensees are the only authorized manufacturers of the SLOW-DRYING, QUICK-ACTING, NEUTRAL REMOVERS.

	Name of Brand:
SHERWIN-WILLIAMS CO. OF CANADA, LTD., Montreal.	"Taxite"
INTERNATIONAL VARNISH CO., LTD., Toronto.	"Klensa"
PRATT & LAMBERT, INC., Bridgeburg, Ontario.	"Expedite"
BRITISH AMERICAN PAINT CO., Victoria, B.C.	"Bapco"
MOUNT ROYAL COLOR AND VARNISH CO., LTD., Montreal.	"Scrape-off"
ROBERTSON CO., LTD., JAMES, Toronto.	"Robertson's"
PEARCY & CO., LTD., SANDERSON, Toronto.	"Devolite"
STEWART & WOOD, Toronto.	"Solvo"
MARTIN-SENOUR COMPANY, LTD., Montreal.	"Martin-Senour"
ADAMS & ELTING CO., Toronto.	"Adelite."

You take no risk when you buy one of the licensed brands of Removers. They are harmless and efficient.

SEE THAT EVERY CAN IS MARKED "LICENSED UNDER CANADIAN PATENT NO. 78,586."

Chadeloid Chemical Company

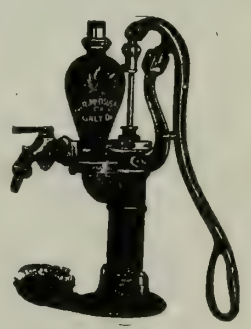
Pumps that Carry Good Will



Dealers that sell McDougall's "Aremacdee" Hand or Motor Metal Force or Lift Pumps give their customers lasting satisfaction.

Every pump sold stays sold—gives the dealer no trouble.

They are metal — hand fitted valves — air-tight — strong — lasting.

The big catalogue tells you exactly what the line is—get it for the asking.

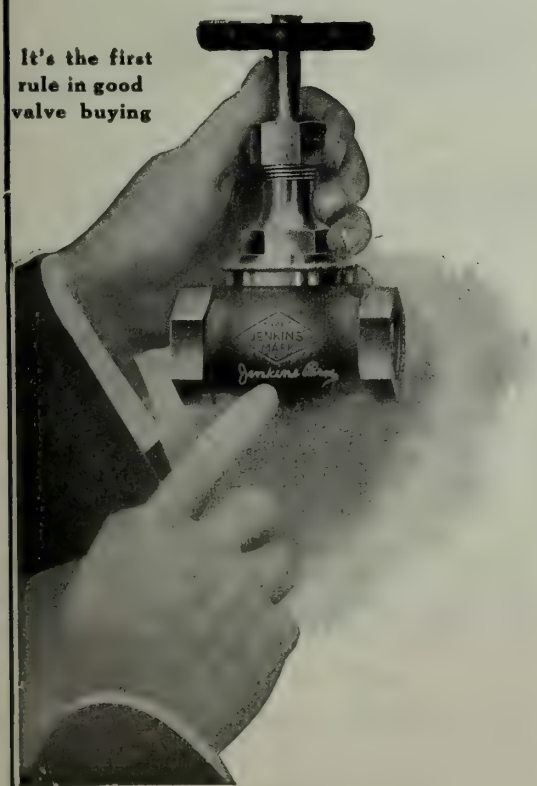
Now for Satisfaction!

The sale has been made. The customer has his Lowe Bros.' High Standard Paint—the dealer has his money. What happens? Just satisfaction, good old **S.A.T.I.S.F.A.C.T.I.O.N.** and plenty of it.

You know, thousands of dollars are sometimes spent on advertising, on clever sales plans, on preliminary work of all kinds, and the whole thing comes to naught just because someone hasn't been quite honest about the **quality** of the article itself. That's where "High Standard" shines.

Our advertising is good—yes. Our selling plan is splendid—certainly. But the quality of the goods themselves just soars away higher than either.



To-day is a good day to write us—for satisfaction.

LOOK FOR THE DIAMOND TRADE-MARK

When ordering valves, specify and insist on securing Genuine Diamond Brand.

JENKINS BROS.' VALVES

They are the "ORIGINAL" and it's only with the original that satisfactory service goes.

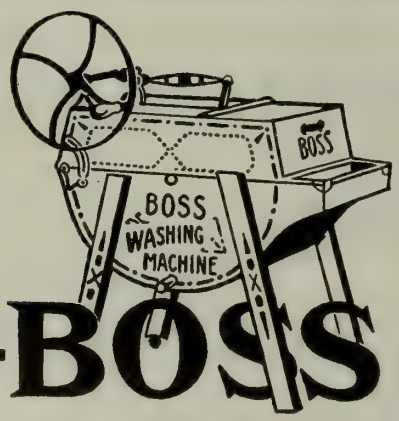
Our Diamond Trade-Mark is cast on the body of all genuine valves for your protection.

See that the valves you buy bear it. This will save you all the trouble and inconvenience which would result from the use of an inferior valve.

Catalogue mailed free upon request.

JENKINS BROS., LIMITED

103 St. Remi St. **Montreal**



The dealer who wants to make a big **paint** profit should stock a **complete** line of paints, varnishes and supplies.

He must handle a product of **known** worth, that will give satisfaction to householder, contractor and painter—a product that will bring his customer back for more and add to the good reputation of his store.

Since 1842 dealers have found that it is an easy matter to hold the whip hand in the paint trade of their district if they handle

RAMSAY'S PAINT

ST. THOMAS, ONTARIO

Seventeen years selling SWP

MR. JAMES PURVIS

IT must now be sixteen or seventeen years since we commenced selling SWP. It was just after Walter Cottingham transferred his paint business and himself to The Sherwin-Williams Co. Even in those primitive days there were enthusiasts and hustlers.

I wonder how many who may read this will remember the late Benny Ross? Benny even in these days of advanced salesmanship would take rank as a hustler. He talked SWP all day and we believed must have dreamed about SWP every night. We never remember seeing his enthusiasm for his goods equalled, except in the case of one man some years later for the Loose Leaf book-keeping system. Benny found us contented and happy with a line of really good mixed paint, and started in to make us believe that he had the best paint in the world, and he succeeded. For a year or so we handled both makes, then we gradually got rid of all but SWP, and since have handled this line alone, having the exclusive contract of them in our town and district. We have had fair success and would have had greater but for the continued hostility of the painters. Our painters have always opposed the use of SWP and all mixed paints. Evidently they can make more profit out of their own mixtures.

We have done a fair amount of advertising in our local paper, have handed out hundreds of cards, etc., and have sent out many hundreds of inserts with our invoices and monthly statements, and all, we think, have borne fruit. The letters sent out by the Advertising Department from Montreal have no doubt been aids, but the real force is the Clerk with his knowledge of, and faith in the goods. Only a limited number of hardware clerks make good paint men. The majority of them change their employers too often, and when they do, change their line of paints and end by treating all mixed paints alike and having no particular faith or enthusiasm for any. The successful SWP salesman is the one who gets posted and stays with his line. Frequent changes in our clerical staff have had a bad effect on our sales. If we could persuade customers to follow directions in using Primer, and apply a proper number of coats, the durability and popularity of mixed paints would be greatly increased. In no case that we can recall have we ever had a dissatisfied customer who followed directions in applying his paint. We also find that we are doing an increasing business in varnishes and other lines that are being added from time to time. We believe that were it not for the opposition of the painters, the sale of mixed paints would double within two years. No painter can grind or blend his colors equal to a well-equipped modern paint factory.

We are,

Yours truly

HAMILTON

Family Size $1.75
Large Size 2.50

For 1914!

We're through with 1913, hard times, money-stringency, hoodoo—and all that; we've said good-bye to the old year—most of us without regret. 1914 is upon us and we all look forward to making it one of the best years we've had.

We expect that money will loosen up, that there'll be a return to the vigorous trading of a year or two ago. And we're not going to be disappointed.

But it depends largely on you, on the skill and judgment that you use in selecting your new stock, whether you get your fair share of the returning good times, or not.

And that's why you cannot afford to overlook the profits and good-will producing qualities of the

ENTERPRISE

line of patented Hardware specialties. That's why Enterprise food choppers, sausage stuffers, coffee grinders, etc., should not only find a place in your store, but should have your best sales effort behind them.

Coffee Grinder

We illustrate here, just three out of our many products, because there is a big demand for them at this time.

Enterprise Tinned Food Choppers in two sizes—family and large—for all household food chopping purposes, appeal to your housewife patrons because they open up the way to many delightful dishes—to many domestic economies.

The Enterprise Sausage Stuffer and Lard or Fruit Press, is a thoroughly efficient machine, at a moderate price. Its many special features, such as the Patented Corrugated Spout which keeps all air out of the sausage and the latch which prevents breakage of plates, make it distinctive.

And Enterprise Coffee Grinders are for all who appreciate a good cup of coffee, and know that to get it, the coffee must be ground fresh each time.

Sausage Stuffer and Lard Press

Get in line for those 1914 profits by sending for our price list now.

Yours just for the asking.

An Ermined Judge

The Supreme Court of Canada is becoming overloaded with business. The big increase in cases during 1913 has meant that the six judges who sit daily in the dingy old building at Ottawa have been hard-worked men. The procedure is simple, dignified, and conducted with almost an Arctic silence.

Yet there is a human side to the situation, for the trappings of flesh cannot be wholly discarded in this, the Clearing House of legal wrangles.

A special writer, at the suggestion of "MacLean's Magazine," visited the Court, and in other divers places dug up much useful information concerning which the average Canadian knows little.

The March "MacLean's" will appear with the first of the celebrated Coburn covers, and the illustrations have been attempted on a strikingly broader scale. Besides this leading article there is the pronouncing of a leading Toronto doctor on "The Truth About Radium."

Several short stories, well illustrated, will appear in this issue.

Do not miss this copy. The cover alone, being something new in Canadian journalism, will be more than worth the price.

Send your name and address on a postcard to Dept. "M" and commence your subscription with this striking number—Mail it to-day.

Subscription $2 a year. *Twenty cents a copy.*

Amatite ROOFING

How To Sell Amatite

Here is the argument that sells Amatite to the consumer. Imagine yourself using it and see how effective it is—

"Yes, I can sell you the ordinary 'rubber' roofings, but of course you will have to paint them every two years to keep them in good order. Amatite has a mineral surface and **needs no painting.** You just lay Amatite on your roof and leave it alone. It takes care of itself.

"Amatite weighs twice as much as the other roofings and that means you get twice as much density per foot, and that means durability. Amatite is easy to lay. The nails and cement are supplied free. The price is no higher than a first-class painted roofing and you save all the cost of paint in the future.

"Amatite is made by the biggest company in the roofing business. They couldn't afford to make anything but the best."

This is the kind of argument that sells goods. Any sensible customer will see the points as soon as the facts are presented. Sample and booklet on request to nearest office.

New York

"Finish" counts

Take the expensive automobile. It may have the best engine built, the finest transmission, the most comfortable coach-work, and the starting-lighting system may be perfect, yet the manufacturer does not rely on these alone—he makes the finish as good as he knows how—he makes it express **quality.**

Likewise do the makers of good tools give their products an appearance that vouches for the service they will render.

Guard their most valuable sales-asset, by specifying that all bright goods be wrapped in **British-American Wax Paper,** before shipment to you. Make sure that your stock will arrive and remain with all its selling force, ready, at your command.

When you've explained it to your jobbers fairly, they'll catch on, and be glad to comply. For they'll understand that by so doing they can keep you satisfied and make sure of your orders.

So send them a postal to-day.
